### ACCT 1215 Accounting Principles I

This course is an introduction to the fundamental accounting concepts and principles used to analyze and record business transactions. Both the preparer and user perspective are emphasized. Students will explore accounting as an information system completing and analyzing various accounting projects and applying business

- 5.) The PDF version can be saved and sent on to whomever is interested in that information. The outline can be a very useful tool for transfer of credit, review for pre-reqs and other needs for course content information.

### FAQs:

What is a course outline? A course outline includes all of the essential information about a course including title, credit breakdown, pre-reqs, description, student learning outcomes, and content areas.

Is an outline the same as a syllabus? No, a course syllabus is property of the faculty for the course and will include more customized information about the course such as classroom policies, schedule, grading breakdowns, etc.
