Every effort has been made to ensure the accuracy of the material contained within this catalog as of the date of publication. However, all policies, procedures, academic schedules, program information, and fees are subject to change at any time by appropriate action of the faculty, the College administration, the Minnesota State Colleges and Universities Board of Trustees or the Minnesota Legislature without prior notification. The provisions of this catalog do not constitute a contract between the student and the College. The information in this catalog is for use as an academic planning tool and is subject to change at any time.

Upon printing of this catalog, all previous issues are revoked.
College Overview
As a highly recognized institution of technology and applied science, St. Cloud Technical College (SCTC) is one of the fastest growing two-year colleges within the Minnesota State Colleges and Universities system. Located in an urban area with a population of approximately 68,000, just one hour north of the Minneapolis/St. Paul metro area, SCTC is the second largest higher education institution in the St. Cloud area.

St. Cloud Technical College was founded in 1948 as a vocational-technical institute and was part of the local school district. In 1966, the College moved from the high school to its present location on Northway Drive. The North Central Association of Colleges and Schools accredited the college in 1985. In 1995, the college became a member of the newly-formed Minnesota State Colleges and Universities system.

SCTC offers certificate, diplomas and degrees that can be completed in two years or less in more than 90 career majors. The College serves over 12,000 students per year with 80% of the student population drawn from the five-county central MN area. Committed to placing you first, the college’s primary goal is to prepare students for a rewarding career. Over the last decade 97% of SCTC graduates have found employment in their area of study.

Mission
St. Cloud Technical College prepares students for life-long learning by providing relevant technical education and training for developing necessary knowledge, skills, and attitudes to obtain, maintain or advance in a career.

Vision
St. Cloud Technical College is the college of choice for quality education focused on high-skilled employment and life-long learning.

Core Values
- Student success through collaboration and cooperation
- A friendly, respectful, enthusiastic, safe, and diverse atmosphere
- Student-centered from prospect through alumni
- Staff development and success
- A team oriented environment
- Relationships with industry and the community
- Quality and continuous improvement
- Innovation, creativity, and flexibility
- Contextual and technologically driven learning

St. Cloud Technical College is committed to providing equal education and employment opportunities to all persons regardless of race, color, creed, sex, age, religion, marital status, sexual orientation/affectional preference, national origin, mental or physical disability, status with regard to public assistance or any other group or class against which discrimination is prohibited by State or Federal law. Further, the college will not tolerate acts of sexual harassment/assault within its area of jurisdiction.

St. Cloud Technical College will continue to remain in full compliance with: Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 and the 1992 Crime Bill. Inquiries, complaints or grievances concerning the application of affirmative action, equal opportunity or Title IX at SCTC should be referred to the affirmative action officer, Deb Holstad, located in office 1-402, or by telephone at 320-308-3227. Inquiries about services offered under Section 504 of the Rehabilitation Act of 1973 or the Americans with Disabilities Act of 1990 should be referred to the counselor for students with disabilities, Judy Jacobson-Berg, who is located in office 1-410V, or by telephone at 320-308-5096, or 320-308-5988 (ITY).

This publication is available in accessible formats upon request by calling Judy Jacobson-Berg at 320-308-5096. TTY users please call MN Relay Service at 711 to contact the college.
Location of St. Cloud Technical College: 1540 Northway Drive, St. Cloud, MN  56303  
(320) 308-5000, 1-800-222-1009 or www.sctc.edu.

The Admissions and Counseling Office is located in the north west section of the building. Parking is available in Lot C adjacent to Northway Drive.

Driving Directions:

- From the southeast on I-94, take the St. Augusta exit #171, travel County Road 75 north approximately 1 mile to Clearwater Road. Turn right and follow Clearwater Road until it becomes Ninth Avenue, which will take you through the city to our campus.

- From the west on I-94, take the Highway 15 exit, then follow Highway 15 north to 12th Street. Turn right and follow 12th Street east until you reach Northway Drive. Follow Northway Drive to our campus.

- From the north on Highway 10, take the Highway 15 exit. Take the Benton Drive exit, turn left on Benton Drive through Sauk Rapids. Turn right at Second Street North, go across the Mississippi River bridge, continue straight ahead on Ninth Avenue to our campus.

- From the south on Highway 10 or the east on Highway 23, at the cloverleaf follow Highway 23 West/Division Street to the Ninth Avenue North exit. Turn right and follow Ninth Avenue north to our campus.

- From the south on Highway 15 or southwest on Highway 23, follow Highway 15 north to 12th Street. Turn right and follow 12th Street east until you reach Northway Drive. Follow Northway Drive to our campus.

ACCREDITATIONS

St. Cloud Technical College is accredited by
The Higher Learning Commission of the North Central Association of College and Schools
30 North LaSalle Street, Suite 2400
Chicago, IL 60602
www.ncahigherlearningcommission.org

In addition to institutional accreditation, all programs offered at St. Cloud Technical College are approved by the Minnesota State Colleges and Universities System. The following programs are accredited, licensed or approved by national, state or program specific agencies.

- **Automotives, Auto Body Repair and Medium/Heavy Truck** by the National Automotive Technician Education Foundation (NATEF), 101 Blue Seal Drive, Suite 101, Leesburg, VA 20175. Telephone: (703) 669-6650.

- **Cardiovascular Technology** by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 East Wacker Drive, Suite 1970, Chicago, Illinois 60601-2208. Telephone: (312) 553-9355; Email: megivegivern@caahep.org, http://www.caahep.org.

- **Dental Assisting** by the Minnesota Board of Dentistry and is accredited by the Commission on Dental Accreditation of the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611, a specialized accrediting body recognized by the Council on Post Secondary Accreditation and by the United States Department of Education. Telephone: (312) 440-4653, (800) 621-8099. www.ada.org.

- **Dental Hygiene** is accredited by the Commission on Dental Accreditation of the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611, allowing students to sit for national board examinations. Telephone: (800) 621-8099.

- **Echocardiography** by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 East Wacker Drive, Suite 1970, Chicago, Illinois 60601-2208. Telephone: (312) 553-9355; Email: megivegivern@caahep.org, http://www.caahep.org.

- **Electrical Construction Technology** by the Minnesota Board of Electricity, 1821 University Avenue, Suite S-128, St. Paul, MN 55101, Telephone: (651) 642-0800.

- **Emergency and Safety Education** by the Minnesota Emergency Medical Services Regulatory Board (EMSRB) to teach First Responder and Emergency Medical Technician-Basic and an approved program for the American Heart Association and National Safety Council courses.

- **Nursing Assistant** by the Minnesota Department of Health, 85 East Seventh Place, Suite 300, P.O. Box 64501, St. Paul, MN 55164-0501, Telephone: (651) 215-8705.

- **Paramedicine** by the Minnesota Emergency Medical Services Regulatory Board (EMSRB) and nationally accredited by the “Committee on Accreditation of Educational Programs for the EMS Professions” (CoAEMSP), 1248 Hardwood Road, Bedford, TX 76021-4244, Telephone: (817) 283-9403.

- **Practical Nursing** by the Minnesota State Board of Nursing. State of Minnesota Board of Nursing, 2829 University Avenue SE, 2nd floor, Minneapolis, MN 55414-3253. Telephone: (612) 617-2270, (888) 234-2690.

- **Sonography** by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 35 East Wacker Drive, Suite 1970, Chicago, Illinois 60601-2208. Telephone: (312) 553-9355; Email: megivegivern@caahep.org, http://www.caahep.org.

- **Surgical Technology** is accredited by Commission on Accreditation of Allied Health Education Programs (CAAHEP), 36 E. Wacker Drive, Suite 1970, Chicago, IL 60601. Telephone: (3120) 553-9355.

- **Water Environmental Technology** by the Minnesota Department of Health and the Minnesota Pollution Control Agency, 520 Lafayette Road, St. Paul, MN 55155-4194. Telephone: (651) 296-6300.
**Admissions Policy**

St. Cloud Technical College grants admission to all persons 16 years of age or older regardless of race, creed, color, veterans status, religion, gender, physical ability, age, national origin, marital status, sexual orientation, public assistance status or membership or activity in a local commission. The lack of English skills is not a barrier to admission or participation.

The College has a rolling admissions policy, meaning that applications are acted upon and students are notified of admission typically within 30 days of receipt of the following application materials:

1. Diploma or the Test of General Education Development (GED) certificate, or
2. A person who has neither a high school diploma nor a GED certificate may be admitted if that person demonstrates potential for being a successful college student. These students must meet with a counselor, and additional testing will be required.

Admission to the College does not guarantee admission to college-level courses, or a desired major. Consult program descriptions for pre-requisites and additional admissions requirements.

Lack of English skills will not be a barrier to admission or participation. In order to eliminate barriers we take appropriate measures to assess each student’s ability to participate and benefit through assessment testing and counseling. Based on the assessment and counseling, students are then provided with campus services or a referral to community services to be prepared for successful participation.

**Admissions Procedures**

Priority will be given to completed applications received at least four weeks before the first day of classes. A complete application contains:

1. A completed college application form available from our Admissions Office, all Minnesota colleges, and high school guidance offices.
2. An official high school transcript and/or GED scores.
3. A $20 non-refundable application fee (check or money order) attached to the completed application. Students who have previously been admitted to the College are exempt from the $20 application fee.

Interviews, aptitude tests, and interest inventories may be scheduled if additional information is needed.

Applications are taken beginning on the third Tuesday in September, one year prior to the start of the program. Class sizes are limited in many areas and waiting lists occur frequently in high demand programs. Individuals applying for high demand programs will need to contact the Admissions Office at 320-308-5089 or log on to the Web site at [www.sctc.edu](http://www.sctc.edu) to view specific directions for applying to these programs. Applicants denied acceptance have the right to appeal the decision to the Vice President of Student Services.

**Background Check for Health Programs**

State law requires that any person who intends to provide services that involve direct contact with patients and residents at a health care facility have a background check provided by the state. A student who is disqualified as a result of a background check will not be allowed to enter the program major.

An individual who is disqualified has the right to request reconsideration of the disqualification. It is the responsibility of the student to request reconsideration by the Commissioner of Health. An applicant is considered to be disqualified during the reconsideration process. A student who has any restriction will not be sent to a clinical site.

All health majors require that students earn a “C” or better in all required courses. Students earning any grade less than “C” will be required to repeat the course. Please see individual program handbooks for special procedures.

**International Student Admission Procedures**

International student applicants must submit the following materials and information:

1. A completed international student application form available from the Admissions Office or on-line at [www.sctc.edu](http://www.sctc.edu).
2. A $20 non-refundable application fee.
3. An English translation of all official transcripts indicating the completion of high school.
4. A completed Confidential Financial Information Form and Affidavit of Financial Support including bank statements.
5. Proof of English Proficiency, if English is a second language (TOEFL, Michigan or transcripts demonstrating a satisfactory level of English proficiency).
6. Health insurance must be purchased through the College upon enrollment.

**Non-Degree Seeking Student Admission**

Persons who are interested in registering for selected courses, but are not interested in pursuing a diploma or degree, are
designated by the College as Non-Degree Seeking Students. These students are not required to complete the usual application or to submit high school transcripts. Students must declare a major once they have completed 16 credits. Contact Records and Registration for additional information at 320-308-5075.

TRANSFER STUDENT ADMISSIONS
To apply as a transfer student, 12 quarter or semester credits must have been completed with a “C” average or better at a regionally accredited college-level institution. Students who have earned less than 12 quarter or semester credits should apply as a first year student.

Students who have earned college credits only through post secondary enrollment option (PSEO) should apply using a first year student application. Applicants must submit:
1. A completed college application form. Questions concerning availability of program openings should be directed to the Admissions Office.
2. A $20 non-refundable application fee attached to the application form.
3. An official academic transcript from each previously attended college or university must be sent directly to Records and Registration.

Transcripts are official only when recorded on the transcript form and sent directly from the sending institution to Records and Registration. Transcripts mailed or brought by the student cannot be used for transfer.

HIGH SCHOOL OPTIONS

TECH PREP STUDENT ADMISSION PROCEDURES
St. Cloud Technical College is working with area high schools to provide educational pathways in technical programs for students. Students participate in college-level course work to earn a certificate that transfers to the College.

Acceptance of Tech Prep Certificates
Tech Prep certificates will be accepted according to the terms of the agreement between the high school and SCTC. An incoming student should present the earned certificate to the College during registration. Tech Prep courses will be noted in summary in the transfer section of the students’ transcript.

Acceptance of Articulation Agreements
Non-Member Districts
St. Cloud Technical College will consider accepting Tech Prep college credits from other Minnesota Tech Prep consortia. The high school or student must submit a copy of the articulation agreement. The Registrar will review the agreement to determine if the content is applicable to an SCTC course and will then forward to the appropriate faculty member for approval. Records and Registration will contact the student in writing with the results of the review.

DISCOVERY ACADEMY
Discovery Academy is an opportunity for high school students to take advanced technical college courses. The courses are taught in various cooperating high schools around the area and interested students may be required to travel to another high school for a particular course. Courses are taught by technical college instructors or specially trained and mentored high school teachers. Students earn college credit and the course is recorded on a college transcript.

NOTE to counselors, students, and parents: each of the academic programs aligned with these course credits has a university pathway. Ask for the SCTC/University alignment table if interested. Courses available in 2008-09 include:

Health:
Emergency Medical Services I and II

Automotive:
Engine Performance
Steering and Suspension
Brakes
Electrical/Electronic Systems

Information Technology:
Cisco Routing I
Cisco Routing II
IT Essentials
Intro to HTML

Pre-engineering:
Principles of Engineering
Digital Electronics
Introduction to Engineering Design

Welding:
Oxy Fuel Welding and Brazing
Math for Professional Welders
Blue Print Reading
Arc Welding

Construction:
Construction Tools, Equipment & Machines
Blueprint Reading & Estimating
Construction Principles
Exterior/Interior Finishing
Cabinet Building and Estimating

If you would like more information about these courses, where they are offered, and how to apply, please contact: Sandy Fabian, Director of the Office of Educational Partnerships at St. Cloud Technical College (320)308-5908 or sfabian@sctc.edu.

POST SECONDARY ENROLLMENT OPTION (PSEO) POLICY
Students wishing to attend SCTC utilizing the PSEO program must submit a completed technical college application form and a school transcript by the application deadline for Fall
Semester, June 1, 2008, and for Spring Semester, November 30, 2008. Students must also schedule an appointment for ACCUPLACER testing and a meeting with the PSEO counselor at SCTC to discuss procedures and social aspects of using the program.

PSEO applicants must achieve the following minimum scores on the ACCUPLACER test to be considered for acceptance to St. Cloud Technical College.

<table>
<thead>
<tr>
<th>CPT Test</th>
<th>Score</th>
<th>Percentile</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading Comprehension</td>
<td>55</td>
<td>18</td>
</tr>
<tr>
<td>Arithmetic</td>
<td>34</td>
<td>25</td>
</tr>
</tbody>
</table>

Students must pass the two areas and may retest only once. There is a $5 charge to retest. If testing accommodations are needed, documentation of disability is required in advance. Testing with accommodations is often scheduled individually. Following retesting, a student who does not meet the entrance requirements may file an appeal for review by the PSEO counselor. The appeal must consist of a written statement by the student indicating college readiness and at least two letters of recommendation from professionals in the education field stating college readiness in the identified areas.

In addition to acceptance to the College, some college courses may have specific placement score requirements or other prerequisites that students must meet. If the prerequisite scores are not achieved, college readiness courses may be required to prepare for the identified classes. The Post Secondary Enrollment Options program does not cover tuition or book costs for college readiness courses. Students are required to pay tuition and book costs of college readiness courses.

To complete an application to the College, PSEO students must submit a completed SCTC Graduation Plan and PSEO Notice of Student Registration form (these forms are obtained at the meeting with the PSEO counselor). PSEO students are accepted to courses and majors on a space available basis. Students enrolling in high school and the College are limited to a maximum of 11 credits per semester. Some courses may be blocked from PSEO student enrollment.

Students will need to meet each semester with their college advisor to select courses and with the PSEO counselor to provide a PSEO notice of student registration. The College will set course registration deadlines each semester.

Books
The costs of books and tuition will be covered by the PSEO program. PSEO students are not charged fees for the use of books. However, the books are the property of the college and must be returned to the college book store by the last day of final week each semester or the student will be required to make payment for the books. PSEO students withdrawing from the college should return their books immediately. Books will be available to PSEO students three business days prior to the start of the semester. PSEO students will need their class schedule to obtain their books in the college book store.

Parking
PSEO students are personally responsible to pay a $3 per credit fee to park on campus. The parking fee is due by the beginning of each semester; paid at the Business Office. A parking permit will then be issued at the time of payment. PSEO students electing not to park on campus may have the parking fee waived by stopping by the Business Office. Failure to pay the parking fee by the beginning of the semester will result in the assessment of a late fee.

Academics
PSEO students must maintain a cumulative GPA of 2.0 or better (C average). If a PSEO student’s GPA falls below 2.0 the student will be suspended from the College for one semester immediately following the occurrence. In addition, the student will be placed on Academic Probation with the College and will be required to meet with a counselor to form an Academic Probation Plan prior to registration for another semester. A copy of PSEO students’ class schedules and grades for those classes are sent to the students’ high school each semester.

Students requesting supplemental support services may access 2.5 hours a week of supportive instruction. If additional accommodations are required the school district and the College will negotiate for the provision of services. Contact the PSEO counselor for specific information.

PSEO students wishing to enroll in only one of the following credit based courses at St. Cloud Technical College; i.e. ASL, CPR, EMT, CNA; may be exempt from application and testing policies. Contact the PSEO counselor for more information.

For PSEO state statute, refer to MN Statute 124D.09.

Immunization Policy
Minnesota Law (MS 135A.14) requires that all students born after 1956 and enrolled in a public or private postsecondary school in Minnesota must provide evidence of immunization for measles, rubella, mumps, diphtheria, and tetanus. Students graduating from a Minnesota high school after 1997 are not required to provide documentation.

Forms for this purpose and additional information are available from the Admissions Office. Students may also submit immunization records maintained by their high school or health care provider. Proof of immunization must be received no later than the 45th day of the term, or the student will not be allowed to register for subsequent terms.

Minnesota State Residency
(MnSCU Policy 2.2 and M.S. 135A.031, sbd2.) Students may establish eligibility for in-state tuition by demonstrating domicile in Minnesota before the beginning of any term. Students must have resided in Minnesota for at least one calendar year immediately prior to applying for in-state tuition. Residence in Minnesota must not be for educational purposes. Students must provide sufficient evidence of domicile. Resident Tuition Classification Request forms are
available in the Admissions Office. Requests submitted without documentation will be returned to the student unprocessed. Students will receive a written response by mail within 30 days of their request.

**DATA PRACTICES POLICY**

Minnesota State Colleges and Universities comply with the Family Education Rights and Privacy Act (FERPA), 20 U.S.C. §1232g, 34 CFR 99; the Minnesota Government Data Practices Act, (MGDPA) Minn. Stat. Ch 13, Minn. Rules CH 1205; and other applicable laws and regulations concerning the handling of education records. Accordingly, the college adopts the following policy:

**Student** means an individual currently or formerly enrolled or registered, applicants for enrollment registration at a public education agency or institution or individuals who receive shared time education services from a public agency or institution. All students at a post-secondary school have the same rights regarding their educational data regardless of age.

**Educational data or education records** means data in any form directly relating to an individual student maintained by a public education agency or institution or by a person acting for the agency or institution. Educational records **do not** include:

1. Financial records of the student’s parents or guardian;
2. Confidential letters or statements of recommendation placed in education records before January 1, 1975, or after January 1, 1975, if the student waived right of access;
3. Records of instructional personnel that are kept in the sole possession of the maker and are not accessible or revealed to any other individual except a temporary substitute for the maker and are destroyed at the end of the school year;
4. Records of law enforcement units (if law enforcement unit is a separate entity and the records are maintained exclusively by and for law enforcement purposes);
5. Employment records related exclusively to a student’s employment capacity (not employment related to status as a student, such as work study) and not available for use for any other purpose;
6. Medical and psychological treatment records that are maintained solely by the treating professional for treatment purposes;
7. Records that only contain information about a student after that individual is no longer a student at the institution (alumni data).

**Consent for Release Generally Required**

The college will not permit access to or the release of personally identifiable information contained in student education records without the written consent of the student to any third party, except as authorized by the MGDPA and FERPA or other applicable law.

**Release without Consent**

As allowed by the MGDPA and FERPA, the college will release student records **without consent** as follows:

1. To appropriate school officials who require access to educational records in order to perform their legitimate educational duties (see explanation below);
2. To federal, state, or local officials or agencies authorized by law;
3. In connection with a student’s application for, or receipt of, financial aid;
4. To accrediting organizations or organizations conducting educational studies, provided that these organizations do not release personally identifiable data and destroy such data when it is no longer needed for the purpose it was obtained;
5. In compliance with a judicial order or subpoena, provided a reasonable effort is made to notify the student in advance unless such subpoena specifically directs the institution not to disclose the existence of a subpoena;
6. To appropriate persons in an emergency situation if the information is necessary to protect the health or safety of the students or other persons; or
7. To an alleged victim of a crime of violence (as defined in 18 U.S.C. Sect 16) or non-forcible sex offense, the final results of the alleged student perpetrator’s disciplinary proceeding may be released;
8. To another educational agency or institution, if requested by the agency or institution, where a student is enrolled or receives services while the student is also in attendance at the college or university, provided that the student is notified where applicable; receives a copy of the record, if requested; and has an opportunity for a hearing to amend the record, as required by law.

**“School Officials” with a “legitimate educational interest”**

The college will release information in student education records to appropriate school officials as indicated in (1) above when there is a legitimate educational interest. A school official is a person employed by the college in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, or assisting another school official in performing his or her tasks. A school official has a legitimate education interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

**Directory Information**

The following information on students at college is designated as public Directory Information:

1. Student’s name, hometown
2. Participation in officially recognized activities and sports
3. Dates of attendance (beginning and end dates of the semester)
4. Classification
5. Degrees, honors and awards received
6. Date of graduation
7. Physical factors (height and weight) of athletes
8. Photographs
9. Enrollment status (e.g., undergraduate, graduate, full-time, or part-time)

**Notice to students about Directory Information:**

Students may direct that any or all of the above-listed Directory Information be withheld from public disclosure by notifying the Records and Registration Office in writing.

**Access to Educational Records by Student**

Upon (written) request, the College shall provide a student
with access to his or her educational records. There is no charge for viewing the records even if the college is required to make a copy of the data in order to provide access. Responses to requests by students to review their educational records shall be within ten business days.

Upon request, the meaning of education data shall be explained to the student by college personnel assigned to, and designated by, the appropriate office.

Students have the right to review only their own records. When a record contains private information about other student(s), disclosure cannot include information regarding the other student(s).

**Challenge to Record**

Students may challenge the accuracy or completeness of their educational records. *Note:* the right to challenge a grade does not apply under this policy unless the grade assigned was allegedly inaccurately recorded.

**Copies**

Students may have copies of their educational records and this policy. The copies of records will be made at the student’s expense at rates stated in the college copy charge policy. Official transcripts will be $7.00.

Official copies of academic records or transcripts will not be released for students who have a delinquent financial obligation or financial “hold” at the College, unless otherwise required by law.

**Security and Crime Reporting**

Campus security and safety is a high priority at SCTC. Providing students with a safe environment in which to learn and keeping students, parents and employees well informed about campus security is important to the College. SCTC complies with the collection and reporting of all campus crime as per the requirements of the *Crime Awareness and Campus Security Act of 1990 (Clery Act).* Copies of this report are available through the Admissions Office or via the college’s Web site at [http://www.sctc.edu/security/](http://www.sctc.edu/security/).

### Ability to Benefit Policy

Students who do not possess a high school diploma or GED certificate will not be eligible to receive financial aid unless they receive a passing score on a test which measures their ability to benefit from the instruction. The test is a standardized, federally approved test. Persons who do not have a high school diploma or GED may take the Accuplacer test at St. Cloud Technical College to determine their ability to benefit. This policy does not restrict a student from enrolling in programs at St. Cloud Technical College, but does apply to receiving financial aid. For more information, please contact the Admissions Office at 320-308-5089.

### College Readiness Assessment

See MnSCU Policy 3.3

St. Cloud Technical College requires all applicants, unless exempted, to complete a MnSCU approved academic assessment test before registering for classes. This assessment must be completed within 45 days of acceptance. Failure to take the assessment within this time frame may result in cancellation from the program. A letter and brochure about the test will be mailed at the time the student is accepted into a program. College readiness courses will be required of students earning scores below the minimum standards in Reading Comprehension and Math. Students may retest one or all parts of the test. A fee will be assessed for each retest.

### Accuplacer

Generally, students must achieve the following minimum scores on the Accuplacer test sections to take general education or general studies classes.

<table>
<thead>
<tr>
<th>Test</th>
<th>Score Criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reading Comprehension</td>
<td>78</td>
</tr>
<tr>
<td>Arithmetic</td>
<td>62</td>
</tr>
<tr>
<td>Elementary Algebra</td>
<td>Varies by major</td>
</tr>
<tr>
<td>College Level Math</td>
<td></td>
</tr>
</tbody>
</table>

Students applying for programs with selective admissions criteria may be required to take additional tests. College readiness courses and program prerequisites must be completed before acceptance into programs with selective criteria.

### Test Exemptions

Students wishing to be exempted from testing must meet the following conditions:

- Completed 12 or more college level quarter credits, or eight or more semester credits, with grades of “C” or above from an accredited college or university. Courses completed with grades of “C” or above must include English composition and mathematics. An official college or university transcript is required. If a student earned these credits more than five years ago they are encouraged to take the placement test.
- ACT scores of 24 or above in English, reading, or math will exempt students from one or all of the tests. An official ACT Assessment College Report is required.

Students meeting the conditions above should send a letter requesting to be exempted and include a copy of the student’s college transcript(s), full name, social security number, current mailing address, phone number, and signature to:

St. Cloud Technical College
Assessment Center
1540 Northway Drive
St. Cloud, MN 56303-1240

Students will be notified in writing only if they are exempted. The College and programs may require tests in addition to basic academic skills testing. A $5 fee will be assessed for each retest.

### Assessment Tests from other Colleges

Send an official copy of the test results to the Assessment Center at the address listed above at least five weeks prior to registration.

### English as a Second Language

Applicants not using English as the first or native language should call (320) 308-5089 or 1-800-222-1009, option 3 to schedule a test designed for non-native English speakers.

### Testing Accommodations

Students who need accommodations (i.e. reader, interpreter, IEP) because of a disability or temporary disabling condition should call the above number to schedule testing. Documentation from a licensed medical practitioner will be required before accommodations can be arranged.

The College and programs may require tests in addition to basic academic skills testing. A $5 fee will be charged for retesting.

### Appeal Procedure

Students who feel their test scores do not accurately represent their readiness for college may appeal the requirement of a college readiness course. To appeal a college readiness course requirement, a student must fill out the appeal form, available in the Admissions Office, and provide any supporting documentation (i.e., transcripts, letters, test scores, etc.)

The form and the documentation must be returned to the Admissions Office. The college readiness appeals will be reviewed regularly by a committee made up of a counselor, a member of the college readiness assessment committee, and the appropriate faculty or academic dean. The student will be notified in writing of the committee’s decision.

### Academic Integrity

Academic dishonesty is considered a disciplinary offense under St. Cloud Technical College’s Student Code of Conduct. Academic dishonesty is defined as the submission of false academic records, cheating, plagiarism, alterring, forging, or misusing a college academic record, acquiring or using test materials without faculty permission, acting alone or in cooperation with another to falsify records or to obtain dishonest...
grades, honors, or awards. Any acts of academic dishonesty will be subject to disciplinary action and could result in sanctions as described in the College’s Student Code of Conduct. Students are ensured due process in academic misconduct situations.

**Program Completion Options**

It is the student’s choice to earn a Certificate, Diploma, Associate in Applied Science (AAS) degree, Associate in Arts (AA) or Associate in Science (AS) degree. Selecting the right option before registering will save time and money. The following options apply:

**Certificate**

Student may choose to complete a Certificate. This is the most basic program option and requires successful completion of the fewest number of credits. It will allow students to gain a skill that may lead to employment.

**Diploma**

A Diploma is a comprehensive program with extensive technical coursework to help develop job skills that will lead directly to employment. Students will choose a specific area of study and will complete their education in one or two years. The curriculum also includes general studies and general education courses. Before making a choice, students should be aware that general studies do not meet the Minnesota Transfer requirements. At the discretion of the receiving institution, these courses may be accepted as electives. Applicants are encouraged to check in advance if they intend to transfer to a four-year college or university.

**Associate in Applied Science Degree (A.A.S.)**

An Associate in Applied Science degree allows students to take not only program specific courses, but their degree will also include at least 15 credits of transferable general education courses. The general education credits may transfer to a four-year college or university. St. Cloud Technical College has articulation agreements with a variety of colleges and universities that will improve transferability upon completion of the degree. All AAS degrees will take at least two years to complete.

**Associate in Science (A.S.)**

An Associate in Science degree may be awarded after the successfully completing the Business Management program with an emphasis in either Accounting, Sales and Management, or Finance and Credit. The Child and Adult Care and Education program also offers the option of earning an Associate in Science Degree in Early Childhood Education. This degree option combines technical education with at least 30 general education credits. Students may also have the option to continue their education by transferring into Southwest State University and earn their Bachelor of Applied Science Degree.

**Associate in Arts (A.A.)**

Collaboration between the St. Cloud Technical College and Anoka-Ramsey Community College allows students to complete an Associate in Arts degree on the SCTC campus. While enrolled in this program, students will complete the Minnesota Transfer Curriculum which consists of their lower division general education coursework. After completion of the 2-year general education program students have the option of continuing their education at a MnSCU University and earn their baccalaureate degree. For a complete list of transfer universities visit: [www.mnscu.edu](http://www.mnscu.edu) or [www.sctc.edu/transfer](http://www.sctc.edu/transfer).

**Bachelor of Applied Science Management (B.A.S.)**

A special arrangement with Southwest Minnesota State University Marshall makes it possible for students to complete a Bachelor of Applied Science Degree in Management on the SCTC campus. The program is available to students who have successfully earned an A.A.S. degree from SCTC in Accounting, Finance and Credit, Sales and Management or Supervisory Management or an A.S. degree in Business Management. All classes are held two evenings per week and one weekend (Friday and Saturday) per month. Contact St. Cloud Technical College for more information.

**Bachelor of Science Degree (B.S.) in Early Childhood Education**

A special arrangement with Southwest Minnesota State University (SMSU) makes it possible for students to complete a BS Degree in Early Childhood Education on the SCTC campus. This degree allows the student to obtain a teacher license for the ages of Birth to Grade 3. This program is available to students who have successfully completed the AS Degree or AAS Degree in the Child and Adult Care and Education (CACE) Program. All classes are currently held one night per week. Contact St. Cloud Technical College for more information.

**General Education Course Transfer**

The Minnesota Transfer Curriculum is the means by which students transfer their completed lower division general education work at one public college or university to meet lower division general/liberal education requirements at any public college or university in Minnesota. For more information about the Minnesota Transfer Curriculum, goal areas, and content, visit their website at [www.mntransfer.org/](http://www.mntransfer.org/).

**Mn Transfer Curriculum (MNTC) requirements:**

(1) complete the requirements in each of the ten goal areas,
(2) complete a total of 40 credits in MnTC courses listed in the ten goal areas below. A minimum of 20 credits applied towards completion of the MnTC must be taken at SCTC. This may be reduced to 12 credits for students transferring in at least 8 semester credits from another MnSCU college or university or from the U of M. A minimum 2.0 GPA must be earned for the 40 credits of MnTC.

The courses listed here may change. The list will be updated periodically as new courses are added.
Requirements:

**GOAL 1: Communications**
Two courses required - ENGL 1302 and CMST 1320
Elective courses: CMST 2300, 2301, 2310 ENGL 1301, 2302, 2310

**GOAL 2: Critical Thinking**
One course required - CRTK 1300
Elective Courses: CMST 2301, COMM 1330, PHIL 1340, WMST 1300

**GOAL 3: Natural Sciences:**
Two courses required from two different disciplines; one must include a laboratory experience (identified with*)
Choose from: ASTR 1300, BLGY 1305*, BLGY 1351*, 2310*, 2320*, 2330*, CHEM 1340*, CHEM 1341*, EASC 1310, PHYS 1300*

**GOAL 4: Mathematical/Logical Reasoning**
One course required, choose from: MATH 1300, 1320, 1330, 1350, PHIL 1340

**GOAL 5: History and Social/Behavioral Sciences**
Three courses required from three different disciplines, must include DVRS 1304
Choose two additional courses from: ANTH 1300, 2300, ECON 1320, 1330, GEOG 1300, POLS 1304, PSYC 1300, 1304, 1310, 2310, SOCI 1310, 1320, 1350, 2305, SSCI 1300

**GOAL 6: Humanities/Fine Arts**
Three courses required from three different disciplines, must include CRTK 1300
Choose two additional courses from: ART 1320, ENGL 1321, 1322, 1330, 1340, 1341, HUMN 1300, 1320, 1340, 2350, 2352, PHIL 1320, 1360, THTR 1310, 1360

**GOAL 7: Human Diversity**
Two courses required, must include DVRS 1304
Choose additional course from: DVRS 2301, ENGL 1340, GERO 1300, PSYC 1310, WMST 1300

**GOAL 8: Global Perspective**
One course required, choose from: ANTH 1300, 2300, GEOG 1300, HASL 1408, 1412, HUMN 1340, PHIL 1360

**GOAL 9: Ethical and Civic Responsibility**
One course required, choose from: COMM 1330, ECON 1310, HUMN 1320, PHIL 1320, POLS 1304

**GOAL 10: People and the Environment**
One course required BLGY 1305, SOCI 2305

MNTC Electives: (If needed to reach 40 credits) - Select from any of the above

**ACADEMIC ADVISING**
All students admitted to the College are assigned a program academic advisor. They must meet with their advisor prior to registration. College counselors can also answer questions and are available by appointment for consultation. Call 320-308-5089 or 1-800-222-1009 to schedule a meeting with a program advisor or college counselor.

**PROGRAM OPEN ENROLLMENT**
Programs and courses that have seats available are open for enrollment before the start of each semester. Check programs that may require courses to be taken in sequence as they may not be offered every semester.

**COURSE BY ARRANGEMENT**
In extreme cases of schedule conflicts or unusual course demands, students with the approval of the academic deans, may take courses by arrangement. Students may not take previously failed courses by arrangement.

**CREDIT BY EXAM (TEST OUT)**
Test-outs may be written, oral, performance based, an interview or any combination of these. Academic advisors can supply additional information about course requirements and specific tests. The cost for test-out is determined annually and is published on the test-out form. The fees must be paid in the Business Office prior to the exam. The exam fees will not be refunded for students failing to demonstrate the necessary competency. Credit awarded shall be noted on the official student transcript. Test-outs are not allowed if the course has previously been taken for credit or if the student is currently enrolled in the course. Students must be enrolled at St. Cloud Technical College.

**CREDIT FOR PRIOR EXPERIENTIAL LEARNING BASED ON LIFE/WORK EXPERIENCE**
St. Cloud Technical College students may apply to obtain course credit based on previous relevant life/work experience. The experience must be documented through a portfolio process, usually won’t exceed one third of the credits needed to complete a major, and will be noted as CR (credit by examination) on the college transcript. A non-refundable fee is charged for each course for which credit is being requested.

**GRADUATION REQUIREMENTS**
The college Graduation Requirements Policy governs the awarding of certificates, diplomas and degrees and is based in part on MnSCU policy 3.17 Degrees, Diplomas and Certificates. Students seeking to graduate from St. Cloud Technical College must:

- Satisfactorily complete the required curriculum.
- Earn at least 15 or 1/3 of the technical credits (whichever is less) at St. Cloud Technical College if they are diploma or certificate students. Students must earn 20 or more technical credits at St. Cloud Technical College for AAS or AS degrees.
- Maintain a minimum cumulative grade point average of 2.0.
- Satisfy all general and specific requirements of the college including fulfillment of all financial obligations.
- Complete an Application for Graduation Form at least one (1) term prior to the anticipated date of graduation. Forms are available in the Office of Records and Registration.
• Satisfy all requirements per institutional agreement with SCSU where applicable.
• Petition exceptions to technical program graduation requirements by officially requesting course substitution using an Academic Policy Appeal form. Forms are available in the Office of Records and Registration. The Academic Policy Review Committee meets monthly to review appeals.
• Participate in exit counseling if a student loan recipient.

**Credit Load**

Students registered for at least 12 credits are considered full-time students. Students registered for 9-11 credits are considered three-quarter time students. Students registered for 6-8 credits are considered half-time students.

The recommended normal load is 16 credits per semester. The maximum allowable load without special permission is 20 credits. Students who wish to enroll for more than the established maximum must secure permission from their academic advisors. Students wishing to enroll for more than 25 credits must secure permission from a counselor and their academic advisor.

Students are classified according to course credits earned: freshmen = 0 to 30, sophomore = 31 and more credits.

**Auditing Classes**

Students who wish to attend the class sessions of a course, but do not wish to receive credit, must register for audit. Like credit courses, the same registration procedure is followed and the same fees are charged. Students are expected to attend classes, but the taking of tests is optional. Audited courses do not affect the grade point average. Financial aid and veterans’ benefits will not pay for audited courses.

“Course Audit Application Forms” must be obtained from Records and Registration and returned during the free enrollment period. Students are responsible for obtaining the required signatures. Students will not receive credit for a course which was audited unless the course is retaken for credit.

**Declaration of A Major**

To assist with educational planning, all students must declare a major upon completion of 16 semester credits of coursework as a resident student. Forms to declare a major may be obtained from the Admissions Office. Upon declaring a major, students will be assigned an academic advisor from their program.

**Internships, Practicums and Clinicals**

Many majors include the opportunity for students to participate in off-campus practical work experiences. In many cases these work experiences are required. The College may assist the student in finding an initial placement site. The College is not responsible for finding alternative off-campus work experience placement following a student’s termination from the initial placement site.

Work experience includes the following:
• Internships
• Practicums
• Supervised occupational experience, clinical, training associations, and other off-site work experiences.

**Service Learning**

Service learning is a type of experiential learning that engages students in service within the community as an integrated part of a course. Effective service learning courses involve students in course-relevant activities in partnership with a community organization.

Information on service learning is available from the Office of Educational Partnerships: 320-308-5908.

**Grading System**

The achievement of students is recorded using the following system:

- “A” = Superior
- “B” = Very good
- “C” = Average
- “D” = Passing (except specified majors)
- “F” = Failing
- “I” = Incomplete
- “IP” = In progress
- “NC” = No Credit
- “P” = Passing
- “W” = Withdraw
- “CR” = Credit by examination. The “CR” is granted to students with advanced standing, test-out or credit by examination.

**Grade Changes**

Grade changes on all courses must be completed by the end of the following term and approved by the academic dean.

**Repetition of Courses**

A student who receives a grade of D, F or W in courses may repeat these courses in an effort to improve their grades. The highest grade earned will be used in calculating the student’s grade point average (GPA). Repeating a course more than once will result in the removal of only one previous grade from the GPA calculation. If a student repeats a course in which a grade of C or better was originally earned, the last grade earned will be calculated in the grade point average. Regardless of the grade earned, students may only repeat a course two times. All course attempts will remain on the student’s permanent academic record.

**Incomplete**

Students who are doing satisfactory work in a course, but cannot complete all requirements, may receive an incomplete “I”. An incomplete is given for reasons such as serious illness or family illness. Documentation may be required. Incomplete grades are
assigned at the discretion of the course instructor only after the midpoint of the course. The course instructor and the student will develop a contract outlining the remaining work to be done. A signed copy of this contract will be kept on file in the academic division. Students must complete the course requirements within one semester. Incomplete spring semester coursework must be completed by the end of the following fall semester. Incomplete grades that are not changed by the end of the following semester will be changed to “F” for failure.

Grade changes on all courses must be approved by the appropriate academic dean.

**Grade Point Average (GPA)**

GPA is determined by adding all grade points earned and dividing by the sum of all credits attempted in courses where letter grades of A, B, C, D, or F were received. GPA is computed on a semester and cumulative basis. A semester example is shown below.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
<th>Credits</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.00 x</td>
<td>3</td>
<td>12.00</td>
</tr>
<tr>
<td>B</td>
<td>3.00 x</td>
<td>4</td>
<td>12.00</td>
</tr>
<tr>
<td>C</td>
<td>2.00 x</td>
<td>4</td>
<td>8.00</td>
</tr>
<tr>
<td>D</td>
<td>1.00 x</td>
<td>3</td>
<td>3.00</td>
</tr>
<tr>
<td>F</td>
<td>0.00 x</td>
<td>1</td>
<td>0.00</td>
</tr>
<tr>
<td>Total</td>
<td>15</td>
<td></td>
<td>35.00</td>
</tr>
</tbody>
</table>

GPA equals 35/15 = 2.33

**Satisfactory Academic Progress**

Students will be expected to maintain a cumulative grade point average (GPA) of 2.0 and complete a minimum of 67% of all attempted credits. Any student who does not maintain the cumulative 2.0 GPA academic requirement, or who does not meet the 67% completion requirement will, at the end of the term, be placed on academic probation (Students remain on probation until these standards are met, or until they meet the criteria for academic suspension listed below). The student must meet with a counselor and their program academic advisor to set up a plan which emphasizes the assistance available through the college to help the student.

1. A student who has been placed on probation and fails to maintain a 2.0 GPA the following term or does not meet the 67% completion rate of all attempted credits, will be suspended from the college for a period of one regular semester (excluding summer).
2. A student who has been suspended must remain out of the college for a period of one semester before being readmitted on probation.
3. A student readmitted after suspension must maintain a term GPA of at least 2.0 and a term completion rate of at least 67%. The student will remain on probation until his or her cumulative GPA is 2.0 or above and cumulative completion rate is 67% or above.
4. A student suspended for the second time must remain out of the college for a period of one full academic year.

**Note:** It is possible to be in good academic standing at the college, and yet not be in good academic standing in certain programs which require a GPA higher than 2.0. Some programs of study have program handbooks (e.g. Practical Nursing) that outline additional or more rigorous academic program requirements.
**STUDENT SERVICES**

**CHILD CARE**
On-campus child care is available for students. Parents must enroll their children before they are allowed to attend. Enrollment and fee structure information may be obtained by calling the Campus Playhouse at (320) 534-0174. The Campus Childcare Center operates from 6:00 am to 6:00 pm. The Center is accredited by the National Association for the Education of Young Children. Child care grants may be available through the Financial Aid Office.

**COUNSELING: PERSONAL, ACADEMIC, CAREER**
The mission of the Counseling Office is to facilitate students’ academic, career, and personal success. It provides a variety of services, including personal assessment to aid students or prospective students in choosing an appropriate program of study and counseling to assist in the completion of their programs.

Licensed counselors adhere to the “Ethical Standards for School Counselors” established by the American School Counselor Association. Students are encouraged to use the counseling service for any type of academic or personal concerns. When appropriate, referrals are made to outside agencies.

Appointments are preferred. The Counseling Office may be reached through the Admissions Office at (320) 308-5089.

**ACADEMIC ACHIEVEMENT CENTER (AACE)**
The College’s Academic Achievement Center is a centrally-located, multi-purpose academic area comprised of the Math Center, Study/Tutor Center and Writing Center. The Academic Achievement Center’s goal is to help students succeed in college by providing academic assistance in a supportive setting. Professional staff and peer tutors help students with both technical and general courses based on their needs. Services are available on an individual or small group setting. Students may be referred to the AACE by faculty, counselors, student services staff or by drop in. AACE services are free to all students enrolled at St. Cloud Technical College.

**CAREER SERVICES**
St. Cloud Technical College provides free job placement assistance to all students and graduates. While the primary responsibility of employment rests with the individual, the Career Center provides active support in helping both students and graduates initiate their careers. The Career Center, located in room 1-433, provides a variety of reference materials, job and employer information, PCs with internet access, a fax and telephone for job seekers’ use.

The professionally staffed office provides student support by:

1. Assisting students with part-time, full-time and internship employment opportunities.

2. Assisting with personal, career-related needs including job seeking skills, mock interviews, labor market information, relocation assistance, job development, and cover letter/resume development.

3. Employer development to maximize employment opportunities for students.

4. Planning and facilitating events that enhance career opportunities for students, such as on-campus interviews, employer visits, and hosting an annual job fair for SCTC student and graduates.

5. Following up on graduates to obtain placement data to meet state reporting requirements and provide consumer information to prospective students, legislators, high school counselors, and other interested people.

For additional information and/or to review placement data summaries by major and listings of SCTC graduates’ past employers call 320-308-5926 or go to www.sctc.edu/placement.

**ELL SERVICES**
SCTC employs an ELL coach/coordinator to work with students whose native language is not English. The staff assists students in the admissions and registration process, provides tutoring assistance in the Academic Achievement Center and Writing Center, teaches college-readiness courses for non-native speakers, and is a general resource to any student new to American higher education. Information on ELL services is available through the Admissions Office at 320-308-5980.

**VETERANS RESOURCE CENTER**
The Veterans Resource Center is a place where students can come with questions about a variety of subjects pertaining to his/her benefits as a veteran or dependent of a veteran. The Resource Center staff will answer questions or refer you to another office which may be better prepared to give you the right answer. The staff in this office can help you understand your education benefits including:

- Montgomery GI Bill
- GI Bill Kicker
- Student Loan Repayment Program
- Available Scholarships and Grants
- VA Education Programs

Students may also receive help with other VA programs, TriCare Insurance, military and retirement pay, family assistance, personal finance and budgeting, and veteran’s employment. Many resources are available.

The Veterans Resource Center is partnered with many other agencies, including:

- The Department of Defense
- The Veterans Administration
- MN Family Programs
- The American Legion/S.A. L./Veterans of Foreign Wars, D.A.V.
**STUDENT SUPPORT SERVICES (TRIO)**

TRIO is a federally funded student support program that offers a variety of free academic services for:

- low income students,
- students with disabilities,
- first generation college students whose parents do not have a baccalaureate degree.

TRIO staff help students graduate successfully by:

- developing academic and career plans,
- providing academic advising,
- preparing new students for a successful college experience through the Summer Institute, and arranging peer and group tutoring/mentoring for students’ academic success.

See the Student Handbook for a complete listing of TRIO programs and supplemental support services for students with disabilities.

**HOUSING**

The Admissions Office provides a housing list to help students locate living quarters such as apartments, dorm rooms and single family dwellings.

**LEARNING RESOURCE CENTER**

The St. Cloud Technical College library facilities provides study tables, quiet study areas, computers, wireless internet connections, an integrated library system (using Aleph software), and electronic, paper, and audiovisual collections holdings. The library has a large collection of e-books, subscriptions to journal and periodical databases accessible to students on or off-campus and uses interlibrary loan to provide rapid access to materials not held in the library collection. The library operates a service desk for your research needs during all open hours. To access library databases and library hours go to [http://www.sctc.edu/library/](http://www.sctc.edu/library/).

**STUDENT LIFE/SPORTS/RECREATION**

The Student Senate and the Student Activities Coordinator are located in the Student Center. Information about recreational and extra-curricular activities is available in the Student Center. Sports available to students include: women’s volleyball, women’s basketball, men’s basketball, men’s baseball, and women’s softball. Students may receive a free membership to the YMCA. Additional information on student life can be found in the Student Handbook.

**STUDENT RIGHTS, RESPONSIBILITIES AND CONDUCT**

St. Cloud Technical College is committed to the creation and maintenance of an academic community which fosters the intellectual, personal, social and ethical development of its students. The College expects that each student will obey the laws enacted by federal, state and local governments. In addition, there are certain rules and regulations governing student conduct which have been established by St. Cloud Technical College and the Minnesota State Colleges and Universities Board of Trustees (MnSCU).

A number of offenses are defined by the St. Cloud Technical College Student Code of Conduct as disciplinary by the College. They include violations that range from academic violations to disruptive conduct. The College reserves the right to review student behavior that occurs off campus if the behavior violates college policy and is of principle interest regarding the College.

The College is committed to due process in investigating complaints of conduct violations. Where students are found to be responsible for code violations, a variety of sanctions may be applied by the conduct officer. They can range from a warning, to restitution, to even suspension.

The entire Student Code of Conduct is included in the Student Handbook. It is important for students to familiarize themselves with it.

**STUDENTS WITH DISABILITIES**

See MnSCU Policy 1B.4

St. Cloud Technical College complies with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act and Minnesota Human Rights Legislation, which cumulatively assure that no otherwise qualified individual with a disability shall, by reason of that disability, be excluded from participating in, or be denied the benefits of the services, programs or activities provided by the College, nor will the individual be subjected to discrimination. SCTC shall make reasonable accommodations to ensure access to programs, services and activities as required by law. Equal access to communications originated from the College is also assured.

To support these assurances, the College will provide, upon student request and appropriate documentation of disability, reasonable accommodations, academic assistance, and advocacy services. In accordance with the Americans with Disabilities Act, accommodations will not be provided 1) for personal “daily living” devices or services even though the individual may be a qualified individual with a disability, or 2) that result in a fundamental alteration in the nature of a service, program, or activity, or in undue financial or administrative burdens.

The process of requesting accommodations begins with completion of an SCTC Verification of Eligibility for Accommodations form. Forms and requests should be directed
to the Counselor for Students with Disabilities. A case-by-case determination will be made to establish eligibility for the requested accommodations. Appropriate accommodations are provided at no cost to the student.

To provide appropriate accommodations to a student with a disability, the college needs documentation of the disability. Documentation must be current, signed by an appropriate professional, and must include assessment results, a diagnosis of disability, and recommended accommodations relevant to disability needs. High School Individual Education Plans (IEP's) can be included as additional information. These documents are held in a confidential file in order to help better meet disability service needs. Submit documentation and a request for accommodations to Judy Jacobson-Berg, Counselor for Students with Disabilities. Denial of requested accommodations can be appealed by contacting the office of the Vice President of Academic Affairs. If you feel that your rights under ADA have not been met, you may file a grievance with the SCTC ADA coordinator.

Alternate formats of all college materials are available by request, to qualified individuals, by contacting the Counselor for Students with Disabilities. If you need disability related accommodations to make a college event accessible, please contact Judy Jacobson-Berg, Counselor for Students with Disabilities at 320-308-5096 or jjacobsonberg@sctc.edu. TTY users please call MN Relay Service at 711 to contact the college.
Allow plenty of time for the College to supply the necessary services two or more weeks are usually needed to provide sign language interpreters. Textbooks and materials in alternative format often require at least six weeks notice.

For Further Information Please Refer to:
- MnSCU Policy 1B.4
- St. Cloud Technical College Student Handbook
- www.sctc.edu/disabilityServices
- www.sctc.edu/disabilityServices/accommodations/
The student's family has the primary responsibility to pay for an education. Financial Aid is intended to supplement the difference between the cost of education and the expected family contributions. Several financial aid programs are available to help you meet your educational expenses. The Financial Aid Office can help you determine the financial aid programs for which you are eligible.

To be eligible for financial aid, students must meet the requirements detailed on the Free Application for Federal Student Aid (FAFSA), enroll as a student working toward a degree or certificate in an eligible program and maintain satisfactory academic progress. The Academic Progress Policy can be found at [http://www.sctc.edu/financialAid/sap/](http://www.sctc.edu/financialAid/sap/). The Financial Aid Office determines your eligibility by applying federal guidelines.

**Steps To Receive Financial Aid**

Apply for admission to an eligible program at St. Cloud Technical College. Only students accepted into an eligible program are eligible for financial aid.

- You will need a PIN number to electronically sign your federal financial aid application. To apply for a PIN, go to [www.pin.ed.gov](http://www.pin.ed.gov). Parents may also apply for a PIN.
- Complete the federal financial aid application, which is also called the Free Application for Federal Student Aid (FAFSA). You can complete the FAFSA on-line at [www.fafsa.ed.gov](http://www.fafsa.ed.gov). A paper form is also available at St. Cloud Technical College (SCTC). The college code for SCTC is 005534. It takes approximately two weeks to process the on-line application and four weeks to process the paper version.
- Complete the SCTC Financial Aid Application available at [http://www.sctc.edu/financialAid/](http://www.sctc.edu/financialAid/).
- After all documentation is received by SCTC, you will be sent an award notification. Your notification will include the grants and some of the student loan eligibility for which you qualify.
- Separate applications are required for student loans, work study, and the child care grant program. Your award notification will direct you when and where to apply for these funds.

**Disbursement**

Financial aid, including scholarships, grants, work study and loans, disburse 10 days after the start of each semester. At that point, financial aid first pays off all tuition and fees the student owes the college; then, if there are funds left over, an overage check is available for the student to pick up in the Business Office. Most financial aid awards are split evenly between fall and spring semester, except work study earnings, which are paid to the student worker every two weeks. Financial Aid will only be paid for courses actually attended. If a student registers for a course, then drops the course during the college add/drop period or before the course obligation date, financial aid must be returned for that dropped course.

Summer financial aid will be processed separately.

In order to qualify for a MN State Grant, the student’s Free Application for Federal Student Aid (FAFSA) must be received by the Federal Processor no later than 30 days after the start of the term. Students whose FAFSA’s are received by the Federal Processor after that date will be ineligible for MN State Grants.

**Types of Financial Aid**

**Grants**

Grants are a gift aid which you do not have to pay back.

- **Federal Pell Grant**
  Undergraduate students may apply for the Federal Pell grant by completing the Free Application for Federal Student Aid (FAFSA).

- **Minnesota Grant**
  This is a grant for Minnesota residents who are attending an accredited post-secondary institution.

- **Federal Supplemental Educational Opportunity Grant (FSEOG)**
  This federal program is designed for students who have exceptional financial need.

- **Post-Secondary Child Care Grant**
  This is a grant for Minnesota residents to help offset the cost of daycare to attend college.

**Scholarships**

A scholarship is money that does not need to be repaid. Scholarships are made possible through the generosity of private parties. A list of various scholarship resources can be found at [http://www.sctc.edu/financialAid/scholarships/](http://www.sctc.edu/financialAid/scholarships/).

**Work-Study**

Work-study is employment for students both on and off campus. Pay is determined in accordance with the minimum wage laws. These programs provide for up to 20 hours of employment per week. Total work-study earnings are limited and based on need as determined by the FAFSA application.

**Loans**

Loans are financial aid that must be paid back with interest.

**Veterans Assistance**

Funding received under the Montgomery GI Bill is typically considered a resource for funding your education. There are some exceptions to this. Funding may be available if you are a member of the National Guard or Reserves, if you are a veteran
of the U.S. Armed services, or a dependent or spouse of a
disabled or deceased veteran. You will need to provide a copy
of your schedule to the Financial Aid Office each semester to
receive funding. Please see the staff in the Veteran’s Resource
Center if you have questions related to your eligibility.

**ENROLLMENT STATUS**

<table>
<thead>
<tr>
<th>Enrollment Status</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full Time</td>
<td>12 or more</td>
</tr>
<tr>
<td>3/4 Time</td>
<td>9-11 credits</td>
</tr>
<tr>
<td>1/2 Time</td>
<td>6-8 credits</td>
</tr>
<tr>
<td>less than 1/2 time</td>
<td>1-5 credits</td>
</tr>
</tbody>
</table>

The Minnesota State Grant requires 15 credits to be a full time
student. Enrollment is determined at the end of the add/drop
period, 12 credits is full-time for all other types of aid.

For additional information contact the Financial
Aid Office by phone at 320-308-5961 or by e-mail at
financialaid@sctc.edu. Additional information is available at
http://www.sctc.edu/financialAid/.
Registration

Registration Sessions

All accepted students are required to attend a registration session where they will be advised on course selections before enrolling in college courses. To register for courses, students must have completed the Accuplacer test or been informed they are exempt from testing. Students are exempt if they have completed 12 or more college credits with passing grades in both math and written composition.

Prior to the registration session, students must complete an on-line orientation session. Failure to complete the on-line orientation will result in delayed registration. St. Cloud Technical College will provide directions and deadlines for completing the orientation process.

Any student who has “stopped out” (not attended classes) for one year or longer, will be required to re-activate their file and complete the on-line orientation session.

Registration & Student Records

The Office of Records and Registration is responsible for maintaining the student record system and for the publication of the course schedule. This office is additionally responsible for the release of transcripts, the awarding of degrees, diplomas, and certificates, and transfer of credit. Any questions regarding adding and dropping classes, transfer of credit and graduation, should be directed to Records and Registration. The website, and hallway TV monitors provide important registration information.

Registration Process for Continuing Students

Degree seeking students who are currently enrolled at the College will be eligible for priority registration for the following semester.

2. Meet with faculty advisor. The advisor will review the individual program plan with the student to ensure registration for appropriate courses and to be sure that prerequisites and other education requirements have been met. The student must meet with an advisor in order to obtain a registration access code. The registration access code is necessary to register.
3. Prepare a schedule worksheet to identify time conflicts.
4. Submit immunization information (if needed).
5. Fulfill financial obligations to the College, including parking tickets.
6. Return overdue materials to the Library.

Note: Students who are on academic probation must see a counselor in the Counseling Office prior to registration to complete an academic success plan.

Returning Students

Students who have “stopped out” (not attended classes) for one semester must meet with their academic advisor prior to registration.

Registering for St. Cloud State University Courses

Students pursuing an Associate of Applied Science degree may also register for St. Cloud State University (SCSU) general education courses. St. Cloud Technical College students registering during the assigned priority period may register for up to eight credits per semester. Students registering for SCSU classes will register in person in Records and Registration. Information and publications are available in Records and Registration.

Academic Forgiveness

Students who have earned a cumulative grade point average of less than 2.0 may have the grades earned during that period of attendance forgiven. Academic Forgiveness may only be granted once and is limited to St. Cloud Technical College coursework. The student:

- May not be enrolled at St. Cloud Technical College for at least three years prior to re-enrollment.
- Must complete one term of full-time enrollment or equivalent with a grade point average of 2.0.
- Must petition for academic forgiveness from the Academic Appeal Committee.

The Appeals Committee uses the Academic Policy Appeal Form which is available in Records and Registration.

The Academic Appeals Committee will review student appeals. If academic forgiveness is granted, Records and Registration will make the following changes to the student’s academic transcript: All D or F grades earned in courses taken prior to the date of forgiveness will remain on the transcript, but will no longer calculate in the GPA.

Academic Forgiveness does not extend to financial aid. All credits and all grades attempted will be included when determining satisfactory academic progress for financial aid purposes.
HEALTH SERVICE FEE
All students must pay a health service fee. The fee is determined annually and posted at www.sctc.edu/tuition. These funds purchase an accident insurance policy, $5,000 limit, no deductible, which covers students on campus and at all off campus college sponsored events including internships and supervised occupational experiences.

Since it is a secondary policy, students covered by another policy, will pay for the deductible on their primary policy. Claim forms and a reference copy of the policy are available in the Business Office.

MSCSA Fee
The Minnesota State College Student Association (MSCSA) is the recognized student association for Minnesota technical college students. A per credit fee is charged to each student and credited to the association for state-wide representation. The fee is determined annually and posted at www.sctc.edu/tuition.

ACCESS/PARKING FEE AND PARKING REGULATIONS
All students must pay a per credit access/parking fee. The fee is determined annually and posted at www.sctc.edu/tuition. Daily parking permits are $2. Permits are available in the Business Office.

Access/parking fees will be charged to all St. Cloud Technical College students. The purpose of such fees is for the development and upkeep of the College’s parking lots, access road, parking security, associated lighting and sidewalks to the campus, administrative costs associated to access/parking and is used solely for that purpose. All students, regardless of whether their education includes actually parking in the lots, benefit from the establishment and maintenance of the lots. It is an embedded service that allows service providers, students, faculty, staff and administration, security, delivery vehicles, etc., the access to our buildings necessary to complete the mission of the College.

Students enrolled in purely online delivered courses will not be charged. Students on extended internships, or in situations where the student does not park on campus, may formally request a waiver of the fee. Students should also request a waiver if they have a current handicapped sticker. Students must show proof of a valid handicapped sticker. A parking permit refund may be obtained from the Business Office on the same prorated basis used to refund tuition upon withdrawal from the College. A $10 fee will be charged for replacement of lost, stolen or damaged permits. Additional permits may be purchased for $10. Motorcycle permits will be issued at no extra charge provided a student qualifies for a regular permit.

Access/parking fees are reviewed annually and subject to change.

PSEO STUDENT PARKING
PSEO students are personally responsible to pay a $3 per credit fee to park on campus. The parking fee is due by the beginning of each semester; paid at the Business Office. A parking permit will then be issued at the time of payment. PSEO students electing not to park on campus may have the parking fee waived by stopping by the Business Office. Failure to pay the parking fee by the beginning of the semester will result in the assessment of a late fee.

PARKING VIOLATIONS
- Parking in prohibited area fine $15.
- Parking in grass area fine $15.
- Misuse of Handicapped Parking Only fine $200. (handicapped placard or handicapped license plate must be displayed to be eligible to park in the college lot).
- Blocking of Fire Lane fine $15.
- Altered/forged permit fine $60.
- Motorcycles should be parked in areas designated as “Motorcycle Parking.” (located by Door 10)
- Visitor parking is designated for guests only. Visitor permits are available at the Information Center.

Circumstances under which vehicles will be ticketed and/or towed shall include (but not limited to) the following:
1. Security and parking operations receives a complaint that a vehicle is illegally parked, obstructing traffic, impeding emergency responses and/or college operations, blocking pedestrian traffic, etc.
2. Vehicles parked in such a way to constitute a hazard, impede vehicular and pedestrian traffic, emergency responses and repair, or grounds operations.
3. Vehicles that have been autoclamped for 24 hours will be towed.

Circumstances under which vehicles will be ticketed and
autoclamped are:
1. A vehicle displays a permit that has been reported as being lost or stolen, or one which has been altered or forged.
2. A vehicle has been issued three or more unpaid parking citations in the current academic year.

Appeals Procedure for a SCTC Parking Ticket
1. Tickets must be appealed within five (5) business days from date of issuance of ticket.
2. The parking appeals committee will meet every other Tuesday from 2:00 p.m. to 3:00 p.m. during the academic year to hear appeals.
3. Individuals may present their appeals in writing with the option to be present for their appeal. Appeals will be considered by the committee on a first come, first served basis. Written appeals forms are available in the Business Office.

Senior Citizen Fee
Residents 62 years or older may register tuition-free for any hour-based courses except for courses designed and offered specifically and exclusively for senior citizens (prerequisites must be met). Senior citizens registering for credit-based courses are required to pay a $20 per credit fee. If the course is audited, tuition is free. Exceptions may apply. State law states that a senior citizen may take a course “when space is available after all tuition-paying students have been accommodated.” This means senior citizens may have to wait until the first class meeting to register. Senior citizens are responsible for all materials, personal property, or service charges for the course, including technology fee, parking fee, MSCSA fee, and health service fee.

Student Activity Fee
All students must pay a per credit student activity fee. The Student Senate uses these funds to sponsor special events for students. A complete budget may be requested from your Student Senate representative. The fee is determined annually and posted at www.sctc.edu/tuition.

Technology Fee
The purpose of the technology fee is to increase service, quality and/or access to high-end technology. The technology fee will be charged to all students. The fee is determined annually and posted at www.sctc.edu/tuition.

Transcript Fee
Students may obtain an official transcript of their grades by completing a request for transcripts and paying $7 for each transcript requested.

Tuition and Fee Policy
Tuition rates per credit and fees are subject to change according to Minnesota State College and Universities (MnSCU) and/or college policies. Current tuition and fee rates are posted at www.sctc.edu.

Tuition Deferment
SCTC offers a service for those students who must defer tuition and other college costs, and who do not qualify or are not eligible for agency funding, loans or grants. The College contracts with FACTS, a tuition management company that provides a low cost option for budgeting students’ college costs. SCTC/FACTS has established several payment schedules requiring various down payment amounts and number of payment dates. Students register on-line with FACTS via the SCTC web site, www.sctc.edu. Click on-line registration, then bills/payments to authorize automatic bank payments or apply charges to a credit card.

Students will not be allowed to register for a new term if deferred payments from a previous term are not current. Payments may be deferred for only the current semester and the entire balance must be paid in full by the end of that semester. A $30 processing fee will be charged for each deferment agreement. Deferred payment plans cannot be established or extended for past debt or for students not currently enrolled. Additional information on FACTS payment options is available from the Business Office at 320-308-5572 or 320-308-5512.

Tuition Payment
Per MnSCU Policy 5.12, payment of tuition and fees will be due 14 calendar days prior to the start of the semester. Students whose tuition is unpaid, or do not have other approved financial arrangements in place by this deadline will have their registration cancelled and be denied entrance to class. To avoid registration cancellation, one of the following approved financial arrangements must be in place:
• Tuition/fees paid in full
• Down Payment of 15% of tuition/fees or $300 through the FACTS tuition payment plan
• Financial Aid in place, meaning the FAFSA is complete and the College has an ISIR on file
• Scholarship or other agency/third party support in place of at least 15% of tuition/fees or $300 through the FACTS tuition payment plan
• A completed PSEO student enrollment agreement on file
• Active I-20 or DS2019 in place for an international student

Students are financially obligated for every class in which they are registered. Students that register for, but do not attend classes at Cloud Technical College and fail to formally withdraw, or drop classes within the free drop/add deadline, will still be responsible for the full tuition amount due. (After the free drop/add deadline, students must withdraw from ALL courses to receive a pro-rated refund based on the date of total withdrawal. It is the student’s responsibility to check their balance due on-line.)
No invoices or tuition statements are mailed. Accounts may be reviewed and payments made online at: www.sctc.edu. Log into the on-line registration module and click on “bills/payments”. Follow the directions provided to pay with Visa, e-checks, Mastercard or Discover credit cards. International students not meeting the payment criteria outlined above will have their registration cancelled after the fifth day of the term. Students are responsible to ensure that financial aid documents (ISIR with the Financial Aid Office) and agency awards (documents with the Business Office) are complete and on file prior to the deadline date. Students will be allowed to add courses to their schedules through the drop/add period only with full payment unless a FACTS account has been previously established. Changes may cause payment plan to change. If a student’s account is not paid in full, a hold will be placed on the student’s account and a $50 late fee may be applied. The student will be unable to register for future classes or receive an official transcript until full payment is made. Students taking courses from St. Cloud State University will be financially obligated to pay for all registered courses at St. Cloud State University. These courses will not be included with SCTC bills. Individuals that submit Non Sufficient Fund (NSF) checks will be subject to a $25 fine and be asked to make restitution by cash, money order or cashier’s check. A registration hold will be placed on the student’s account. The policy on NSF checks and the fine are subject to change without notice.

**Refunds, Drops, Withdrawals, and Waivers, MnSCU Policy 5.12**

Students are financially obligated for every class in which they have registered. Students that register for, but do not attend classes at St. Cloud Technical College and fail to formally withdraw, or drop classes within the free drop/add deadline, will still be responsible for the full tuition amount due. (After the free drop/add deadline, students must withdraw from ALL courses to receive a pro-rated refund based on the date of total withdrawal. It is the student’s responsibility to check their balance due on-line).

**DROP/ADD**

Students may add or drop courses by using the WEB registration system through the fifth day of the semester or the first business day after the course begins, whichever is later. If the class is full, a student may add the course(s) by using a Course Overload Form and obtaining the instructor’s signature. Return the signed form to the Office of Records and Registration prior to the end of the add/drop period. Courses withdrawn from after the add/drop period will receive a grade of “W”. No course may be withdrawn from after the twelfth week of the semester or after 75% of the class for short-term courses.

No tuition refunds will be processed by the Business Office for courses withdrawn from after the add/drop period. (Students withdrawing from the college, see below).

Students wishing to completely withdraw from the college should obtain a “Withdrawal Worksheet” from the Admissions Office. Students should complete and sign the top portion of the form and return it immediately to the Admissions Office. The date of withdrawal will be the date the completed form is received by the Admissions Office. No withdrawals are allowed after the twelfth week of the semester has been completed. The Business Office will determine if a refund is appropriate and to whom the refund should be distributed. Questions about refunds should be directed to the Business Office.

**Withdrawing from a Course**

Students withdrawing from a single course (after the add/drop period listed above) are not eligible for a refund and will receive a grade of W. Students may withdraw from full term courses through the 12th week of the semester or through 75% of the class for shorter courses. Students may withdraw online or a course withdrawal form can be completed in Records and Registration.

**Refunds for Total Withdrawal from College**

Students who officially and totally withdraw from the College may be eligible for a refund as defined below. Withdrawal forms are available in the Admissions Office. A student who withdraws simply by non-attendance will not be eligible for a refund. When students do not officially withdraw, they will receive the earned grade in each course for which they are registered and will be liable for all tuition and fees for those courses.

**Waivers**

The College President may waive amounts due to St. Cloud Technical College for the following reasons:
- Employee Benefit Provided by a Bargaining Agreement
- Death of a Student
- Medical Reasons
- College Error or Unsatisfactory Service
- Employment Related Conditions
- Significant Personal Circumstances
- Student Leader Stipends
- Course Conditions

A course condition exists when the location or timing of the course results in the student not being able to use the services intended by a fee.

Students will be required to provide documentation with their request.
Welcome to Customized Training and Education Center (CTEC) at St. Cloud Technical College where class offerings vary from continuing education, learning on-line, and customized training.

Education Center Courses are classes that are open to the general public. These courses may apply toward professional and personal development, certification, and advancement requirements of a trade or profession. Course offerings include:

- Forklift Training
- Health Care Classes
- High-Low Pressure Steam Engineering
- MnDOT Truck Re-Certification
- Truck Driver’s Training Program
- Real Estate
- Workplace Spanish

Customized Training Courses are specifically designed to meet the continuing education and training needs of our public and private sector employers. These courses are held at the business site or at the SCTC campus. Some popular course offerings include:

- Customer Service
- Leadership Training
- Manufacturing Skills
- Sales
- Organizational Development

For more information please call CTEC at 320-308-0015.

Emergency Medical, Safety Education and Fire Fighting is a division of CTEC at St. Cloud Technical College. The health and safety related programs and courses are offered as CEU, customized, or credit based and in collaboration with local hospitals, police, and ambulance personnel and fire fighters. Courses include:

- CPR
- Emergency Medical Technician
- Fire Fighting
- First Responder

Motorcycle Training is located in St. Cloud, MN

The Basic Rider Course is for the beginning rider. The curriculum and materials are supplied by the Motorcycle Safety Foundation (MSF), and our instructors are MSF-certified. The course includes both classroom and on-cycle instruction, with high-quality, personalized coaching, and several hours of practice riding. CTEC also provides the motorcycles free of charge for training purposes.

The Advanced Rider Course is designed for riders with one or many years experience. Riders practice advanced motorcycle handling skills on their own motorcycles. Certified instructors draw from student knowledge and experience to coach riders to success.

Moped Training is designed to benefit anyone who wants to ride on two wheels. The course consists of four hours of classroom training.

On-Line Courses include over 300 options through our ed2go partnership. Browse courses by department such as The Internet, Web Page Design, Computer Applications, Law & Legal Careers, Grant Writing and more by visiting our web site at www.sctc.edu/training. Try Learning-on-Line FREE! Call us at 320-308-0015 or visit our web site. You are just three clicks away from two free lessons.

1. Visit www.sctc.edu/training
2. Click on “Do you want to take a class?”
3. Click on “Learning On-Line”.

Days and Hours

CTEC at St. Cloud Technical College office hours:
Monday–Thursday  7:30 a.m. – 6:00 p.m.
Friday          7:30 a.m. – 4:00 p.m.
Summer Hours:
Monday, Wednesday, Thursday  7:30 a.m. – 5:00 p.m.
Tuesday         7:30 a.m. - 6:00 p.m.
Friday          7:30 a.m. - 4:00 p.m.

For more information, please call:
320-308-0015 or 1-800-222-1009 option 6 or visit us online at www.sctc.edu/training

Truck Driving Program is a six-week course to prepare men and women for truck driving employment. The course consists of classroom instruction, truck simulation and behind-the-wheel experience in trucks currently used in the industry. Contact Diane at 320-308-6522.
Accounting Careers
Accountant AAS Degree  (72 Credits)

Program Description
The Accounting Careers program prepares students for long-term office positions, as well as to meet the exacting requirements of bookkeeping and accounting. Certain skills are common to all accounting career occupations and are included in all accounting career programs. All accounting careers emphasize analysis, decision-making, and using computers.

Students will gain experience working with calculators, microcomputers and microcomputer software.

Prospective students should have an average or above average academic record. Personal qualities which are important are a good aptitude for working with numbers, good vocabulary, strong oral communication skills, organizational ability and attention to detail.

An accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include recording receipts, disbursements, and preparing state and federal reports. The accountant may prepare reports and statements manually or using a computer.

Students graduating with an AAS or Diploma qualify to sit for the Registered Accounting Practitioner exam in the State of Minnesota.

Students successfully completing the degree may choose to further advance their education by obtaining a Bachelor of Applied Science Degree in Management from Southwest Minnesota State University, Marshall. Students attend two evening classes per week and one weekend class per month at St. Cloud Technical College.

Career Opportunities
This program is designed to prepare students as accountants in both private and public accounting. Any business, company, or non-profit enterprise is a great job prospect for an accounting graduate.

Accounting Careers
Accountant Diploma (67 Credits)

Program Description
The Accounting Careers Program prepares students for long-term office positions, as well as to meet the exacting requirements of bookkeeping and accounting. Certain skills are common to all accounting career occupations and are included in all accounting career programs. All accounting careers emphasize analysis, decision-making, and using computers.

Students will gain experience working with calculators, microcomputers and microcomputer software.
Prospective students should have an average or above average academic record. Personal qualities which are important are a good aptitude for working with numbers, good vocabulary, strong oral communication skills, organizational ability and attention to detail.

An accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include recording receipts, disbursements, and preparing state and federal reports. The accountant may prepare reports and statements manually or using a computer.

Students graduating with an AAS or Diploma qualify to sit for the Registered Accounting Practitioner exam in the State of Minnesota.

Students successfully completing the degree may choose to further advance their education by obtaining a Bachelor of Applied Science Degree in Management from Southwest Minnesota State University, Marshall. Students attend two evening classes per week and one weekend class per month at St. Cloud Technical College.

Career Opportunities
This program is designed to prepare students as accountants in both private and public accounting. Any business, company, or non-profit enterprise is a great job prospect for an accounting graduate.

Accounting Careers

Accounting Microcomputer Specialist Diploma (48 Credits)

Program Description

The Accounting Careers Program prepares students for long-term office positions, as well as to meet the exacting requirements of bookkeeping and accounting. There is emphasis on analysis, decision-making skills, and using computers.

Students will gain experience working with calculators and computer equipment. As a result of the increasing demand for the application of accounting theory to data processing, students will receive training on microcomputers and microcomputer software.

Prospective students should have an average or above average academic record. Personal qualities which are important are a good aptitude for working with numbers, good vocabulary, strong oral communication skills, organizational ability and attention to detail.

An accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include recording receipts, disbursements, and preparing state and federal reports. The accountant may prepare reports and statements manually or using a computer.

Career Opportunities

Any business, company, or non-profit enterprise is a great job prospect for an Accounting Microcomputer Specialist.

Accounting Careers
Accounting Clerk Diploma  (34 Credits)

Program Description
The Accounting Careers Program prepares students for long-term office positions, as well as to meet the exacting requirements of bookkeeping and accounting. There is emphasis on analysis, decision-making skills, and using computers.

Students will gain experience working with calculators and computer equipment. As a result of the increasing demand for the application of accounting theory to data processing, students will receive training on microcomputers and microcomputer software.

Prospective students should have an average or above average academic record. Personal qualities which are important are a good aptitude for working with numbers, good vocabulary, strong oral communication skills, organizational ability and attention to detail.

An accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include recording receipts, disbursements, and preparing state and federal reports. The accountant may prepare reports and statements manually or using a computer.

An Accounting Clerk performs any combination of routine calculating, posting, and verifying duties to obtain primary financial data. A clerk maintains accounting records; posts details of business transactions such as receipts, disbursements, checks, and claims; reconciles bank statements; and prepares vouchers, invoices, and other records.

Career Opportunities
Any business, company or non-profit enterprise is a great job prospect for an Accounting Clerk.

Estimated cost of books, supplies and materials: $3,900

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description

The Health Information Technician Program is designed to meet the Standards and Guidelines for an Accredited Educational Program adopted by CAHIIM (Commission on Accreditation for Health Informatics and Information Management Education) in cooperation with AHIMA (Health Information Management Association). Upon completion of the HIT program, graduates should be prepared to demonstrate entry-level competencies for Registered Health Information Technicians (RHITs) as identified by the profession.

Health information management combines the disciplines of medicine, information management, and computer technology within the healthcare industry. The HIT program curriculum includes general education requirements as well as courses in computer applications, biological sciences, medicine, health information collection, processing, retrieval, evaluation, dissemination and management. The curriculum also includes an educational clinical internship. During this experience, the student reports to a healthcare facility and experiences planned activities in the environment of the actual workplace. The provision for technical and managerial experiences is an important aspect of the curriculum.

**Students who have earned a grade of “C” or better, in all program classes, as well as an overall GPA of 2.5 or better will have satisfied the program requirements for a diploma or AAS degree.**

Career Opportunities

Health Information Technology graduates successfully complete internships in clinics, hospitals, insurance offices, medical testing facilities, long-term care facilities, and industrial medical facilities. Many of these internship sites transfer into full-time jobs.

All students are required to purchase a program-specific laptop.

Administrative Support Careers

Legal Administrative Secretary AAS Degree (65 Credits)

Program Description

Administrative Support Legal Office professionals are critical to the support of attorneys and other legal staff in law firms, corporate legal departments, government agencies, and other legal service facilities. Well-trained legal office administrative support professionals assist attorneys and other legal professionals in the creation and retention of quality legal documentation and assist with other administrative duties. The AAS legal students train on the latest computer technology. They successfully complete courses and have comprehensive knowledge in litigation, family, real estate, estate planning, probate, civil, corporate, criminal, and bankruptcy law appropriate to a legal administrative assistant. Their studies also include subjects such as accounting, advanced Microsoft Office, the humanities, the social sciences, and more.

Career Opportunities

Administrative Support AAS Legal Office graduates successfully complete internships in law firms, court administrator offices, and other legal service facilities. These internship sites may lead to full-time jobs. There is a strong demand in the legal workplace for Administrative Support Legal Office graduates. All students are required to purchase a program-specific laptop.

Medical Office Technology Assistants work with physicians and other medical support staff. The Medical Office Technology students learn medical transcription, insurance coding and reimbursement, computerized medical records, and other medical office procedures.

Career Opportunities
Medical Office Technology Assistants become employed in clinics, hospitals, insurance offices, medical testing facilities, long-term care facilities, and industrial medical facilities. After a few years of employment, the assistants may decide to do remote transcription or medical coding.

All students are required to purchase a program-specific laptop.

Acceptance Requirements and Credits
* BUSM1207 Basic Keyboarding is a developmental course, required only if students are unable to key text at a speed of 35 words per minute with five or fewer errors on a 2 minute timing. Students must show proof with a high school transcript, Tech Prep certificate or other documentation showing they have completed a keyboarding course that meets these requirements. Otherwise, this course is available fall and spring semester.

Administrative Support Careers
Office Assistant Certificate (26 Credits)

Program Description
The Office Assistant program consists of a core of administrative courses designed to develop basic office skills, including keyboarding, oral and written communications, and basic computer knowledge. Office Assistants perform general office work, including keying, receptionist duties, and records management. An Office Assistant may be asked to complete a variety of office duties depending on the size of the office and number of people supported by assistants.

Career Opportunities
Graduates become employed at the entry-level position as an office assistant. The assistant works in an office support position that may utilize a wide range of systems and software applications. Graduates have an opportunity to apply the credits earned as an Office Assistant to other Administrative Support diplomas or AAS Degree.

All students are required to purchase a program-specific laptop.

Acceptance Requirements and Credits
* BUSM1207 Basic Keyboarding is a developmental course, required only if students are unable to key text at a speed of 35 words per minute with 5 or fewer errors on a 2 minute timing. Administrative Support Careers

Receptionist Certificate  (23 Credits)

Program Description
Receptionists are critical to the support of any business. Employers rely on receptionists to greet visitors and determine the visitors’ needs and refer them to the proper people. When not busy with callers and visitors, the receptionist may open and sort mail, schedule appointments, and perform general bookkeeping and office duties. This major requires strong skills in communications, telephone techniques, computer usage and human relations.

Career Opportunities
Employment opportunities will vary depending upon the individual’s achievement. Receptionists become employed in general, educational, medical, and legal businesses. After a few years of employment, the receptionist often advances within the firm. Receptionists may be asked to take on additional responsibilities which would allow them to advance more quickly. Temporary and full-time work is available.

All students are required to purchase a program-specific laptop.

Acceptance Requirements and Credits

Advertising Communication And Design

Program Description

Advertising is a communications tool. The advertising student studies all the various forms of advertising mediums such as newspaper, print, billboards, television and the Internet. Students then develop the design skills and creative talent necessary to the selling of ideas and/or products. They serve to bring the consumer and the producer of products, ideas, together creating a positive outcome for both the business and the economy. With approximately a 34% job growth rate each year, advertising is an exciting career choice with unlimited opportunity for creativity and job advancement. People in the advertising business are said to be the innovators of our times. They show us a vision of our world through print, radio, television, as well as the Internet.

Students are encouraged to participate in the student professional organizations such as DEX (Delta Epsilon Chi), AAF (American Advertising Federation) and The Northway Group (a student run in-house advertising agency). These organizations are designed to further develop and practice the advertising, sales and leadership skills taught in the formal classroom.

Career Opportunities

Employment opportunities exist with advertising agencies, newspapers, in-house advertising departments, magazine publishers, radio and television stations, media companies, direct marketing and outdoor advertising businesses.

Program Description

In this course, students will learn the basics of designing and developing a web site. The class focuses on Web page planning, writing, basic design, layout and construction, setup and maintenance of a Web site. In addition, students will look at design issues specific to web-based presentations, learn web page layout, effective navigation and delve into the design process. Students examine the how-to’s, in’s and out’s and pitfalls of using graphics, color and fonts on web pages as well as working with tables and CSS.

Students gain the ideal combination of web design skills including web basics, design theory, image creation and usage, introduction of the WYSIWYG editors, using HTML, site establishment, advanced issues, testing and evaluation. By mastering key software application and fundamental design principles, you’ll be able to design, illustrate, compile and produce visual solutions for communications, especially for the Internet.

Students are encouraged to participate in the student professional organizations such as DEX (Delta Epsilon Chi), AAF (American Advertising Federation) and The Northway Group (a student run in-house advertising agency). These organizations are designed to further develop and practice the advertising, sales and leadership skills taught in the formal classroom.

Career Opportunities

Employment areas for web design graduates include creating, updating web pages with corporations, organizations, educational institutions, government agencies, entertainment, advertising agencies, in-house advertising departments, public relations firms, promotions and marketing agencies and other emerging Internet businesses and organizations. Potential career opportunities may include digital media producer, webmaster, project coordinator and more.

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description
American Sign Language (ASL) is the primary visual/gesture language used in the United States and English-speaking parts of Canada. It is the native language of many deaf men and women as well as hearing children born into deaf families. These courses introduce the student to American Sign Language communications as the conversational level.

Career Opportunities
ASL students may find employment in the areas of residential schools for the Deaf, child care centers, real estate, teaching, and residential (group), working with the deaf who communicate sign language as their primary language.

Courses Offered
HASL1400  American Sign Language I.......................... 3
HASL1404  American Sign Language II.......................... 3
HASL1408  American Sign Language III.......................... 3
HASL1412  American Sign Language IV.......................... 3

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description

This program is designed to prepare students for employment in the construction industry. The objective of the program is to give students a well-rounded, basic light construction background, along with CAD (computer aided drafting) skills. The program includes designing and drawing 2 and 3 dimensional plans for residential and small commercial buildings, using AutoCAD-Architecture and Revit software. Construction technology, materials, design, blueprint reading and estimating are studied in addition to drafting techniques. The laptop computer format of the program allows students to work on drafting and design projects in a lab setting as well as off-site. Students may choose between a Diploma or an AAS Degree.

Career Opportunities

Employment areas for graduates include general contractors, architectural and engineering firms, building material centers, related material suppliers, and building material manufacturers. Graduates work as drafters, estimators, technical support staff, material salespeople, management trainees, and project managers. Articulation agreements with other schools also give students the opportunity to continue their education for advanced degrees in areas such as construction management.

Suggested Technical Studies Semester I
ARCH1502 Introduction to Architectural Drafting 3
ARCH1506 Intro to Architectural CAD 3
ARCH1514 Estimating and Construction Fundamentals I 3
ARCH1522 Residential Design Principles 2
ARCH1526 Residential Materials and Methods I 2

Associate in Arts Degree

ST CLOUD TECHNICAL COLLEGE
in collaboration with
ANOKA-RAMSEY COMMUNITY COLLEGE

GENERAL INFORMATION: This degree is intended to constitute the first two years of a baccalaureate degree program. Transferability of courses from St. Cloud Technical College (SCTC) to public higher education systems in Minnesota is enhanced by transfer agreements that are in place. Transfer standards and procedures adopted by all the public higher education systems in Minnesota insure students' transfer rights. For more information on SCTC, visit our websites at http://www.sctc.edu.

GENERAL REQUIREMENTS:
1. A minimum of 64 semester credits in courses numbered 1000 or above.
2. A minimum grade point average (GPA) of 2.0 at SCTC in courses numbered 1000 or above. Students who have transferred to SCTC must have a minimum GPA of 2.0 in combined SCTC/ARCC courses and accepted transfer courses.
3. A minimum of 20 semester credits applied toward the degree must be taken from SCTC/ARCC. This requirement may be reduced from 20 to 12 semester credits for students transferring in at least 8 semester credits from either another MnSCU college or the U of M.
4. Completion of specific degree requirements below.

General Education Requirements/MnTC 40 credits

Distribution requirements are satisfied through completion of the Minnesota Transfer Curriculum (MnTC) listed below. These two criteria must be met to complete the MnTC:
1) All ten emphasis areas listed below must be completed.
2) A total of at least 40 semester credits from courses listed in the MnTC must be satisfactorily completed. One course may satisfy more than one emphasis area, but the course credits may be counted only once.

1. Communications (at least two courses)
   - ENGL 1302 Analytical Writing 4 cr
   - CMST 1320 Intro to Speech Communication 3 cr
   - CMST 2300 Introduction to Public Speaking 3 cr

2. Critical Thinking (at least three courses)

3. Natural Sciences (at least one laboratory course with at least one course from each category)
   a. Physical Science
   b. Biological Science

4. Mathematical/Logical Reasoning (at least one course and demonstrated competency)
   Competency is demonstrated by completion of the SCTC math sequence and either Math 1300, Math 1320, MATH 1330, MATH 1350 with a grade of C or better.

5. History and the Social and Behavioral Sciences (at least two courses; one from each of two categories)
   a. Economics/Geography
   b. Anthropology/Psychology/Sociology
   c. History/Political Science

6. The Humanities and Fine Arts (at least two courses; one from each of two categories)
   a. Literature
   b. Humanities/Philosophy
   c. Art/Music/Theatre

7. Human Diversity (at least one course)

8. Global Perspective (at least one course)

9. Ethical and Civic Responsibility (at least one course)

10. People and the Environment (at least one course)

Wellness Requirement Minimum 3 credits

PE 107 Walking for Wellness (Southwest MN State University (SMSU)

Elective Credit Requirement 21 credits

The balance of the 64 semester credits for the degree may be met by taking college-level coursework, including up to 16 technical credits, appropriate to the student's transfer program.

NOTE: The requirements of this program are subject to change without notice. Students should refer to the current Anoka Ramsey Community College catalog to determine the limits to earn a degree.
### Associate in Arts Degree

**ST CLOUD TECHNICAL COLLEGE**

in collaboration with

**ANOKA-RAMSEY COMMUNITY COLLEGE**

To complete the Minnesota Transfer Curriculum, all ten-emphasis areas listed below must be completed. A total of at least 40 semester credits must be earned. Courses designated with a superscript (e.g., ENGL 1302) satisfy more than one emphasis area. Courses in bold = SCTC courses; Courses not in bold = ARCC courses offered at SCTC. Courses in bold & italic = Southwest Minnesota State University (SMSU) courses offered at SCTC. Note: Credits are counted only once toward the 40-credit minimum requirement.

Auto Body Collision Technician

Auto Body Collision Technician AAS Degree (72 Credits)

Program Description

The Automobile Body Collision Technology Program is designed to prepare graduates for employment as auto body technicians. Emphasis is on developing skills in straightening and restoring metal and fiberglass automobile bodies to original condition. Students will use industry-standard equipment on current model unibody vehicles. Instruction includes how to realign body-frame units and sheet metal, remove dents, replace panels and glass, diagnose collision damage and apply the latest two-stage and three-stage refinishing systems. Students learn how to repair high-tech plastics, repair and replace trim and brightwork, and restore corrosion protection.

The St. Cloud Technical College’s Auto Body Collision Technology Program is ASE Certified, and graduates are prepared for the Auto Body Repair Excellence examinations. The program is certified by the National Automotive Technicians Education Foundation, Inc. (NATEF) and our instructors are certified by the Inter-Industry Conference on Auto Collision Repair (I-CAR).

Career Opportunities

The Automobile Body Collision Technology program will give graduates sufficient skills to enter the trade as advanced apprentices. Employment opportunities exist with automotive dealers, independent body repair shops, leasing agencies, industries, airlines, truck repair shops, wholesale suppliers, and also paint salespersons. There are also opportunities for employment with an AAS Degree as insurance company and body shop estimators, shop managers, and factory dealer representatives.

Automotive Service Technician
Automotives Service Technician AAS Degree (72 Credits)

Program Description
A nation on wheels demands skilled technicians to keep the wheels turning. St. Cloud Technical College provides the education and training needed to meet this demand. Students receive instruction in the most current techniques of repair, diagnosis, maintenance, and our laboratories are equipped with the latest service and testing equipment. Graduates have the necessary educational background to obtain entry-level positions and progress to higher-level technical or management positions.

St. Cloud Technical College’s Automotive Service Technician Program is ASE Certified and graduates are prepared for the Automotive Service Excellence examinations. The program is certified by the National Automotive Technicians Education Foundation, Inc. (NATEF). Students selecting this program will find they must master a considerable amount of theory as well as manual skills. The Transportation Studies Core also meets some of the requirements for graduation in the Medium/Heavy Truck Technician Program.

Career Opportunities
Trained technicians are offered a broad range of jobs from which to select their area of specialty. Examples include line technician, driveability specialist, front-end specialist, transmission specialist and parts specialist. Students with Associate of Applied Science Degrees have job opportunities such as service technicians, service advisors and shop managers. Graduates may transfer their degree to a 4 year college in order to attain a Bachelors Degree which would qualify them to obtain positions with the automotive manufacturers or the automotive aftermarket at a corporate level.

Program Description

The business world today is facing rapid changes, creating an increased demand for well-trained professionals to fill positions in all areas of the business industry. An Associate of Science degree builds a strong foundation of leadership and managerial skills to effectively manage people, organizations, and technology in the increasingly competitive global business world.

The Business Management degree at SCTC is a flexible degree designed for students who want to continue their education and/or enter the workforce. The curriculum addresses contemporary business issues through courses in economics, communications, the legal environment, accounting, technology and management. Emphasis is placed on developing skills in management decision-making, interpersonal and communication skills, critical thinking, project management and problem solving.

Students in the Business Management degree also have the opportunity to participate in Business Professionals of America (BPA) and Delta Epsilon Chi (DEX). These student organizations further develop the project management, presentation, creativity, and leadership skills employers demand.

The Accounting emphasis focuses on students practical knowledge in specific content areas such as payroll, auditing, income tax and related computerized accounting applications. Students successfully completing the Business Management degree may choose to further advance their education by obtaining a Bachelor of Science Degree through agreements with other colleges.

Career Opportunities

The Business Management Degree is designed to allow students to continue their education through articulations with other colleges to complete a bachelor’s degree. Students entering the work environment are often employed by public and private organizations of all sizes.

Accounting Emphasis - 14 Technical credits (one class minimum from each of the three groups):

Group 1
ACCT1220  Payroll Accounting .............................................. 2
ACCT2230  Income Tax I ......................................................... 4
ACCT2231  Income Tax II ........................................................ 2

Cardiovascular Technology
Cardiovascular Technology AAS Degree  (71 Credits)

Program Description
The demands of the Cardiovascular Technologist require a working knowledge of detailed anatomy, physiology and pathology of the heart, coronary arteries, and cardiac valvular function.

The program coordinates academic study with the clinical experience. The applied clinical experience will be performed in a hospital setting and affiliate the student with one of the various cardiac catheterization laboratory facilities within the five state region.

Cardiovascular technologists assist the cardiologist in performing diagnostic, interventional, angioplasty and stent placement procedures; measure cardiovascular parameters such as cardiac output, cardiac electrophysiology parameters; intra-cardiac shunt detection, intra-cardiac pressure measurements, oximetry determination, and valve flow/valve area determination; record, analyze and process cardiovascular hemodynamic pressure measurements for presentation to the interpreting physician. Graduates demonstrate appropriate communication skills with patients and colleagues; act in a professional and ethical manner; provide patient education related to cardiovascular diagnostic and interventional techniques and promote good health.

Career Opportunities
The Cardiovascular Technology Program prepares students for employment in cardiac catheterization laboratories, open heart surgical suites and cardiac research facilities.

Carpentry

Carpentry AAS Degree  (72 Credits)

Program Description

The building construction industry is one of the largest industries in America today. With the increasing population and need for more housing, urban redevelopment, commercial and industrial buildings and facilities to improve the environment, the skills of a well-trained carpenter are in demand. Department of Labor statistics indicate that the majority of supervisory people in building construction come from the carpentry trade.

A well-equipped shop is available for the development of student carpentry skills. Advanced students construct a home on a city lot. The building trades house project is a joint effort of the building trades classes. Local contractors, realtors, public officials, and financial managers serve as members of the Advisory Committee for this project.

Career Opportunities

The Carpentry Program is designed to equip students to enter the trade as the equivalent to advanced apprentices. Graduates may find employment in the areas of residential, light and heavy commercial, highway and heavy bridgework, cabinetry and millwork. Graduates may be employed as ceiling tile installers, drywall applicators, building inspectors, customer service representatives for building and hardware supply companies and lumber yard manager trainees, along with sales/service for any building materials supply. A number of graduates start their own contracting businesses.

Carpentry
Carpentry Diploma  (64 Credits)

Program Description
The building construction industry is one of the largest industries in America today. With the increasing population and need for more housing, urban redevelopment, commercial and industrial buildings and facilities to improve the environment, the skills of a well-trained carpenter are in demand. Department of Labor statistics indicate that the majority of supervisory people in building construction come from the carpentry trade.

A well-equipped shop is available for the development of student carpentry skills. Advanced students construct a home on a city lot. The building trades house project is a joint effort of the building trades classes. Local contractors, realtors, public officials, and financial managers serve as members of the Advisory Committee for this project.

Career Opportunities
The Carpentry Program is designed to equip students to enter the trade as the equivalent to advanced apprentices. Graduates may find employment in the areas of residential, light and heavy commercial, highway and heavy bridgework, cabinetry and millwork. Graduates may be employed as ceiling tile installers, drywall applicators, building inspectors, customer service representatives for building and hardware supply companies and lumber yard manager trainees, along with sales/service for any building materials supply. A number of graduates start their own contracting businesses.

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description

The CACE Program prepares students for employment in a variety of human service positions by providing courses in human development, managing behavior, inclusive learning environments, planning curriculum, implementing strategies for learning, and practical experience. Students who successfully complete the program will have the qualifications to apply for a center-based assistant teacher position. After one year of experience, graduates qualify for a head teacher position. In addition, the completion of credit courses offers several options for fulfilling training and in-service requirements for assistant teachers, teachers, directors, paraprofessionals, family child care providers, and other interested individuals. The program courses are in agreement with the Department of Human Services (DHS) licensing guidelines for child care providers. Membership in MnAEYC, NAEYC or other professional organizations is strongly recommended.

Applicants to the CACE Program must complete any college readiness courses with a passing grade, if indicated by their Accuplacer scores prior to enrolling in the CACE Program courses.

Before being placed on an Internship, students will be required to complete EMSC 404, and submit these completed forms: Department of Human Services (DHS) Background Study Form; Pre-Entrance Medical Exam; and an Immunization Record.

Career Opportunities

Career opportunities for Child and Adult Care and Education graduates may be found in early childhood centers, school settings, long-term care facilities, licensed family child care, facilities for people with disabilities, and for students interested in starting their own business as child care providers. Graduates will be capable of planning learning activities, managing programs and daily routines, preparing materials, and managing the health and safety of children and/or vulnerable adults. Personal qualities desirable for the field include emotional maturity, physical stamina and the ability to work with people in a variety of settings, and acceptance of people with diverse backgrounds.

Child And Adult Care And Education

Child and Adult Care and Education AS Degree  (63 Credits)

Program Description

Students completing the CACE AS Degree may choose to further their education by obtaining a Bachelor of Science (BS) Degree in Early Childhood Education from Southwest Minnesota State University, Marshall. Students will be able to attend classes at the St. Cloud Technical College while completing this degree leading to teaching licensure for ages Birth to Grade 3. There is also the opportunity to transfer to other universities.

The CACE AS Degree also prepares students for employment in a variety of human service positions by providing courses in human development, managing behavior, inclusive learning environments, planning curriculum, implementing strategies for learning, and practical experience. Students who successfully complete the program will have the qualifications to apply for a center-based assistant teacher position. After one year of experience, graduates qualify for a head teacher position. In addition, the completion of credit courses offers several options for fulfilling training and in-service requirements for individuals. The program courses are in agreement with the Department of Human Services (DHS) licensing guidelines for child care providers. Membership in MnAEYC, NAEYC or other professional organizations is strongly recommended.

Applicants to the CACE Program must complete any college readiness courses with a passing grade, if indicated by their ACCUPLACER scores prior to enrolling in the CACE Program courses.

Before being placed on an Internship, students will be required to complete EMSC 1404, and submit these completed forms: Department of Human Services (DHS) Background Study Form; Pre-Entrance Medical Exam; and an Immunization Record.

Career Opportunities

Students may choose to continue their education by transferring to a teacher licensure program. Career opportunities for Child and Adult Care and Education AS Degree graduates may be found in early childhood centers, school settings, long-term care facilities, private homes, licensed family child care, facilities for people with disabilities, and for students interested in starting their own business as child care providers. Graduates will be capable of planning learning activities, managing programs and daily routines, preparing materials, and managing the health and safety of children and/or vulnerable adults. Program Description

The Computer Programmer major involves the meaningful processing of data by computers. Effective decision-making can take place only if accurate data is available when and where needed. Students will receive an AAS degree upon successful completion of the major. Skills such as attentiveness, logical reasoning and attention to detail are necessary to be a successful Computer Programmer.

E-commerce and the Internet have become an integral part of our daily lives. Students will receive extensive exposure to extremely current methodologies, languages, programming procedures, and to business data processing applications. Practical experience is provided on IBM PC-compatible computers. Computer Programmers will design and write programs for E-commerce, Internet and Business Application environments. Students will be able to follow instructions provided by systems documentation, write and test the programs, review results and make necessary corrections. These processes will apply to E-commerce, Internet and Business Application platforms.

Students in the Computer Programmer major must achieve a 2.0 GPA or better in all Computer Programmer technical courses. All students in the Computer Programmer major are required to purchase a laptop computer for their coursework.

Career Opportunities

The use of stand-alone and networked computers is rapidly increasing in all levels of government and in business such as accounting firms, software houses, manufacturing firms, computer service centers, banks and hospitals. Employment potential is outstanding for competent Computer Programmer graduates.

Culinary Arts
Culinary Arts Diploma (38 Credits)

Program Description
The Culinary Arts Program is designed to prepare students for the food service industry by exploring all facets of food preparation, planning, and service. The program provides training in nutrition, sanitation, and the operation of equipment in addition to food preparation techniques. Technical classes are supplemented with a variety of assessments, demonstrations, training, preparation and service experiences. You will have many opportunities to participate in college and community events where you can gain practical experience in the field, including membership in the local Chef’s Society. Students with a passion for food, a sense of style and creativity, and organizational skills are encouraged to apply and explore this exciting program.

Career Opportunities
As a graduate of the program you will be licensed in Serv-Safe and may enjoy a career as a chef or cook in hotels, restaurants, resorts, catering, healthcare centers, and more!

Dental Assistant
Dental Assistant AAS Degree  (68 Credits)

Program Description
The Dental Assistant Program is designed to provide an opportunity for students to acquire background knowledge and develop specialized skills for gaining employment in the dental profession. Specific training is provided in preparing the student for a variety of duties performed by the dental assistant include chairside assisting, infection control procedures, preparing instruments and materials, laboratory procedures, administrative duties and expanded functions such as mechanical polishing and application of sealants. This learning is accomplished through on-campus classroom, laboratory and clinical experience as well as an internship rotation in dental offices.

The Dental Assistant Program is accredited by the Commission on Dental Accreditation of the American Dental Association. Graduates will be eligible to write the Dental Assisting National Board Certification examination and the Minnesota Registration examination.

Career Opportunities
The need for Dental Assistants is due to the success of preventive dentistry, increased awareness of the importance of regular dental care and cosmetic dentistry. Work schedules are often flexible and include full-time and part-time opportunities in a variety of settings including general dental practices, public health clinics, insurance companies, dental education facilities and specialty practices such as orthodontics and oral surgery. The AAS degree is designed to transfer some general education credits toward earning a dental hygiene degree and/or a related baccalaureate major.

Dental Hygienist
Dental Hygiene AAS Degree  (84 Credits)

Program Description
The Dental Hygiene Program provides the students with academic and clinical opportunities to acquire the knowledge, skills and attitude necessary to become a dental hygiene professional. A dental hygienist is a member of the dental team who provides direct care to patients under the supervision of a licensed dentist. The duties of a dental hygienist include patient assessments, taking radiographs, teeth cleaning and polishing, applying preventive agents, nonsurgical periodontal therapies (scaling and root planing), administering local anesthesia and nitrous oxide, taking impressions, pouring up study models and making bleaching trays.

The education program is a combination of classroom lectures, hands-on lab and clinical activities, along with numerous service learning opportunities. The program is demanding and quite rigorous in the scope and depth of study. Individuals who are strong in the biological sciences and human anatomy, have good dexterity, attention to detail and possess critical thinking skills are excellent candidates for a career in Dental Hygiene. Upon graduation, students must successfully complete the National Dental Hygiene Board Exam, the Central Regional Board Exam and then obtain a license in the state they wish to practice. Dental Hygiene is a very competitive program. Fulfiling the prerequisites is not a guarantee to admission into the program. Students are ranked according to GPA in the prerequisite courses in consideration for admission to the program.

Career Opportunities
There is a strong demand for clinical dental hygienists throughout the USA. However, there are a limited number of full time employment opportunities in the St. Cloud area. Licensed dental hygienists can work in many different settings: clinical dental offices, nursing homes, public health agencies, dental and pharmaceutical companies, teaching in dental hygiene education programs and doing dental research.

Program Description
Echocardiography is a specialized concentration within the field of diagnostic medical ultrasound. The Echo technologist learns to become adept at obtaining and interpreting diagnostic quality images of the heart and surrounding structures, evaluating heart anatomy, chamber size, wall thickness, valve morphology and overall heart function.

The program coordinates academic study with clinical laboratory experience and a hospital or clinic based Applied Clinical Internship. Students may choose to complete some of their additional education requirements prior to programs entrance or during a summer session.

In general, the technologist’s job requires good eye/hand coordination, the ability to stand and/or sit for prolonged periods of time, lift approximately 40 pounds and if necessary, push an ultrasound machine. Good verbal and sometimes written communication skills enhance the technologist’s work experience.

Preferential entrance into the program will be given to students who have completed all acceptance requirements.

Career Opportunities
Technologists usually work in a hospital or clinic setting. This is a growing and technically demanding profession and as a result, Echo technologists enjoy excellent salaries and nation-wide job opportunities.

Estimated cost of books, supplies and materials: $2,900

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description

The Electrical Construction Technology Program begins with basic principles and progresses to more technical information. The early part of the program includes D. C. theory, related math, National Electrical Code, shop skills and safety. Related subjects are scheduled throughout the program. A good mathematics background with one year of high school algebra or trigonometry is required.

Students will learn to apply knowledge to actual projects in the shop or mock-ups. Students will wire the house project, built as a student project by our building trades classes.

Students will receive training in A. C. and D. C. motor and generator theory, transformers, lighting, three phase systems, motor control, solid state, variable frequency drives (VFD) and programmable logic controls (PLC).

The Electrical Construction Technology Program is approved by Minnesota State Board of Electricity. Credit is given toward the state electrical license upon completion of this two year course.

Students are required to have completed ACCUPLACER with a minimum math score of 44 and a minimum reading score of 78. If ACCUPLACER scores indicate pre-college course work this must be done prior to starting the program.

Career Opportunities

After completing an apprenticeship, the graduate may be eligible to take the state examination for a journeyperson’s license. A master electrician’s license can be obtained after an electrician has worked for a number of years and gained further knowledge and skills. The Minnesota State Board of Electricity recognizes this program for credit towards the license.

The electrical trade today is an ever-expanding industry that offers a wide variety of interesting work. The properly trained electrician will be called upon to wire buildings ranging from private homes to industrial plants. An electrician may perform maintenance work in industrial plants, office buildings, hospitals, or public buildings. Some electricians may specialize in particular fields such as motor rewinding, machine tool manufacture, appliance repair, or industrial controls.

Electronics

*Industrial Electronics Technician AAS Degree (66 Credits)*

**Program Description**

The Electronics Program prepares individuals to apply electronic engineering principles and technical skills in the fields of instrumentation and industrial control systems, digital and analog circuits, automated manufacturing and robotics, manufacturing and facilities maintenance, embedded microcontrollers, and telecommunications systems.

This program prepares individuals with knowledge and skills in the areas of AC/DC electronics, digital and analog circuits, use of electronic test equipment, use of computers for analysis and problem solving, reading electrical schematics and system diagrams, scientific methods, and problem solving skills.

Individuals are also able to select elective credits from a variety of other knowledge and skill areas such as programmable logic controllers (PLCs), industrial automation, process control systems, instrumentation techniques and calibration, microcomputer hardware and network support, computer programming, telecommunications systems, computer aided drafting, and statistical process control.

**Career Opportunities**

Graduates from this program find exciting opportunities as instrument and process control technicians in installing, maintaining, and repairing electronic equipment and automated systems used in a variety of industries. Examples include aerospace, paper manufacturing, food processing, petro-chemical production, power generation, mining, municipal water and waste water treatment, plant maintenance, medical device testing and calibration, and environmental monitoring and control systems.

Program Description

The Farm Business Management Program is concerned with the economic principles and agricultural practices used in making decisions about alternative ways of using land, labor, capital and management ability to make a profit in farming. Information about farm business relationships, legal aspects of estate planning, partnerships, trusts, and business transfers from older to younger farmers is available when needed.

Students are taught a system of farm business recordkeeping necessary for computerized farm business analysis. This is the core of the instructional program. Instructional activities include the annual series of class meetings and individual conferences with farmers and others concerned with a farm operated by a family unit. Instruction is based on the economic, social, and cultural goals of the family and business unit.

A three-year post-diploma program is available to those who complete the six-year Farm Business Management Program. Information may be obtained by visiting or writing to the Farm Business Management Program, St. Cloud Technical College, 1540 Northway Drive, St. Cloud, Minnesota 56303. The telephone numbers are (320) 308-5033 or 308-5925.

Estimated cost of books, supplies and materials: $25

# Finance and Credit

*Finance And Credit AAS Degree* (72 Credits)

## Program Description

The Finance and Credit Program includes course material designed to prepare students interested in pursuing career opportunities in the Finance and Credit industry. Preparing students for a diverse employment market, courses cover a variety of business related areas including accounting, banking, communications, computer applications, management, math, sales and collections.

By effectively using the material and activities offered in this program, students can develop their abilities to secure promising positions in this dynamic field.

Students may be eligible for individual scholarships in the program.

## Career Opportunities

Finance and Credit graduates have found many job opportunities in a variety of businesses such as commercial banks, credit unions, finance companies, collection agencies, medical facilities, mortgage companies, property management associations, and in the credit departments of retail, wholesale, and service organizations.

Graphic Communications
Graphic Communications Diploma (40 Credits)

Program Description
The Graphic Communications Program offers training in the areas of printing and publishing. Instruction ranges from project conception through computer image generation, principles of web site design, image assembly, presswork, and bindery. The program is equipped with modern equipment in both traditional offset lithography and state-of-the-art electronic communication.

Lab work will consist of assigned projects with each emphasizing a variety of particular skills. There will also be opportunity for creating original personal projects as well as live production work.

Available equipment includes fully supplied pre-press and pressrooms as well as training and production computer labs containing over 30 Macintosh computers, scanners, printers and imagesetters.

Career Opportunities
The field of printing and imaging technology offers many job opportunities which range from minimum-skilled occupations through top management positions. Employment areas vary from desktop publishing, computer prepress, offset press operation, and marketing the final project. Placement has been excellent and experts project a shortage of trained workers in this large and rapidly growing industry through the twenty-first century and beyond.

Program Description
Health Care is one of the fastest growing industries. An aging population and the retirement of larger numbers of health care workers present a significant need for workers in health occupations. The Health Care Technician program offers the student an opportunity to prepare for entry into one of the College’s health career programs and to gain marketable skills for gainful employment.

Career Opportunities
The Health Care Technician Certificate program prepares the student to become a Certified Nursing Assistant/Home Health Aide with a broad base of knowledge and understanding for more health career options.

Estimated cost of books, supplies and materials: $500

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description

The Heating, Air Conditioning, and Refrigeration Technology Program prepares workers to enter the heating, ventilation, air conditioning, and refrigeration field. First year emphasizes residential service, maintenance, and installation of forced air furnaces, heat pumps, and air conditioning systems. Second year emphasizes commercial service, maintenance, and installation of heating, air conditioning, and refrigeration systems. Students will gain knowledge in troubleshooting of electrical controls, motors, service and maintain refrigeration equipment, heating and air conditioning systems.

Well-trained service technicians are in great demand in this rapidly growing trade. Service, maintenance and proper installation are of great concern to the customer. Technicians trained in this field will perform preventive maintenance to keep systems operating efficiently and respond to service calls to perform repairs to systems as needed. Service technicians will work alone much of the time and use their training and knowledge to diagnose systems and perform needed repairs. The service technician must also have good customer relation skills.

Career Opportunities

Employment is available with heating, air conditioning, and refrigeration service companies; wholesale supply companies; maintenance positions at hospitals, schools, supermarkets, etc. Positions are also available in sales, installation, design and as manufacturing representatives.

Program Description

The new Network Administration major strongly reflects current industry needs and market demands with an increased focus on certifications. The new Network Administration major ties courses directly to high demand IT certification tests including: * CompTIA: A, Security, Linux * Microsoft: MCP and MCSA XP (70-270), Server 2003 (70-290, 70-291) * Panduit: Panduit Authorized Installer (PAI) for cable installation * Certified Wireless Network Professional (CWNP): Wireless# and Certified Wireless Network Administrator (CWNA) The Network Administration major continues to offer the Cisco Networking Academy curriculum, building students’ fundamental knowledge and hands-on training in this high demand industry. The program has also been expanded to include network installation training, with a focus on Panduit equipment and materials. General education courses help develop student interpersonal communications skills and other important “soft skills” needed in the IT field. The program focuses on skill sets needed by an entry level worker in the microcomputer networking career field, including: * Providing computer hardware and software support * Administering networks and servers * Computer and network analysis, design, recommendation and implementation * Training users * Cabling and connecting Local Area Networks (LANs) and Wide Area Networks (WANs) The Practicum and Internship experiences expose students to actual IT work environments, and allow them the opportunity to demonstrate their abilities in presence of prospective employers.

Network Administration students must achieve a 2.0 (‘C’) or better in each of the major’s technical courses.

Career Opportunities

Organizations continue to expand their networking infrastructure, including networked computers and peripheral equipment of increasingly complex design and configuration. This growth will ensure employment for individuals willing to achieve the knowledge and hands-on skills needed to succeed in a challenging and ever-changing technical environment. Employment includes positions in IT Helpdesk, desktop and server assembly, systems upgrade and repair, user training, and more. The curriculum includes a strong combination of skills, which combined with very attainable certifications, results in excellent job placement potential. The curriculum will continue to be updated to meet industry changes, which affords program alumni continued educational and training opportunities.

Land Surveying/Civil Engineering

**Land Surveying/Civil Engineering AAS Degree (72 Credits)**

**Program Description**

The Land Surveying/Civil Engineering Technology Program prepares individuals for entry-level employment as engineering/surveying technicians. Students will learn surveying and drafting techniques, along with design and construction practices dealing with sewer, water, streets, roads, and land surveying. Students will be introduced to modern surveying equipment, computer applications, computer aided drafting and surveying systems.

Ability to work independently with accuracy and neatness and make decisions is a very important quality for technicians. Technicians must be able to work with other professional people, as well as the general public on a day-to-day basis. Working conditions for technicians may involve a variety of indoor and/or outdoor settings.

**Students who have earned a grade of “C” or better, in all program classes, as well as an overall GPA of 2.0 or better will have satisfied the program requirements for a diploma or AAS degree.**

**Career Opportunities**

Technicians may be employed by state, county and city governmental agencies, contractors, private engineering or land surveying firms in a wide range of starting positions. Drafting, computer application, testing of materials, construction surveying and inspection, land surveying, estimating or general design work are just a few examples of career possibilities. This program is articulated with several state universities in the areas of land surveying and construction management.

Machine Tool Technology

Machine Tool Technology AAS Degree (72 Credits)

Program Description
The Machine Tool Technology Program provides training in the latest techniques of machining. The shop is equipped with a variety of machines that are representative of the industry.

Machine Tool Technology is a large and expanding occupational field that offers unlimited opportunities to the energetic and competent person who wants to meet the challenge. Employment in the machine tool field is expected to be excellent far into the future.

Career Opportunities
The program is designed to give students the necessary skills to enter the labor market as a machine operator, machinist, or a tool and die or mold-maker apprentice. Graduates can expand to areas such as tool making, precision machining, setup specialist, inspection work, machining technician, CNC machining including Swiss CNC turning technology.

Mechanical Design Technology
Mechanical Design Technology (CADD) AAS Degree  (66 Credits)

Program Description

This program prepares the student to create mechanical drawings that meet industry standards. These drawings are used to create components and products. Drawings, whether plotted on paper or in an electronic format are the universal graphic language in the manufacturing industry. Students will create designs and drawings for products and machines using state of the art computer hardware and the latest available 2d drawing/design, 3d modeling and computer aided manufacturing software. Students will create designs for simple components, complex machines and consumer products. Many things need to be considered when creating or changing existing products, such as economic, manufacturability, and aesthetics. These are a few of the challenges today's mechanical designer faces.

The Mechanical Design Program consists of a concentration of hands on technology and related math and general education courses. The Mechanical Design Technology program will also have students learning hands-on basics in related fields such as electricity, machine shop, and welding. Courses are designed to produce a well-rounded graduate with a “hands-on” perspective of the manufacturing industry.

Career Opportunities

Graduates of the Mechanical Design Technology Program can expect career opportunities in many areas of the engineering field. Graduates will often assist engineers with product design, tool design or product continuation or improvement. Graduates will utilize mathematics and problem solving skills concerning strength, quality, cost and product appearance. Entry-level positions may include; CAD Drafter/Designer, Engineering Technician, Research and Development Technician, Quality Control or Field Service Technicians and other related areas. The demand for well-rounded individuals with practical hands on education is growing. For individuals interested in changing the way America creates and produces goods, the Mechanical Design Technology program offers an excellent opportunity to do so.

Designers in industry serve society by creating new products and redesigning existing ones that need improvement.

Courses are designed to produce a well-rounded graduate with a “hands-on” perspective of the manufacturing industry.

Career Opportunities

Graduates of the Mechanical Design Technology Program can expect career opportunities in many areas of the engineering field. Graduates will often assist engineers with product design, tool design or product continuation or improvement. Graduates will utilize mathematics and problem solving skills concerning strength, quality, cost and product appearance. Entry-level positions may include; CAD Drafter/Designer, Engineering Technician, Research and Development Technician, Quality Control or Field Service Technicians and other related areas. The demand for well-rounded individuals with practical hands on education is growing. For individuals interested in changing the way America creates and produces goods, the Mechanical Design Technology Program offers an excellent opportunity to do so.

Designers in industry serve society by creating new products and redesigning existing ones that need improvement.

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
Program Description
An advanced certificate is available to graduates of the Machine Tool Technology and Mechanical Design Technology programs. This program allows students to expand the breadth of computer design and CNC (Computer Numeric Control) and related technologies. The cross-functional nature of the advanced certificate broadens their experience in machining and design applications. To enroll in this program a student must have graduated from either the Machine Tool Technology or Mechanical Design Technology AAS or Diploma program.

Career Opportunities
Engineering Technology is a large and expanding occupational field that offers unlimited opportunities to the energetic and competent persons who want to meet the challenge. Employment in the machining and design fields is expected to be excellent far into the future.

Technicians with drafting and design background will often assist engineers and designers with the design and development of new products and tools and the modernizing of present equipment.

Because of the industry’s rapid growth, the demand for qualified people in this technical field exceeds supply. For students interested in making a mark in modern day technology, Engineering Technology offers and excellent opportunity. Graduates will find placement opportunities in both large and small companies. The cross-functional nature of the Advanced Certificate gives graduates options in both machining and design technology.

### Mechanical Design Graduates:

**Suggested Technical Studies Semester V**

Program Description

The growing demand to transport products quickly by trucks has created an increasing need for skilled medium/heavy truck technicians. Students will perform maintenance, repair, and overhaul on medium/heavy duty trucks and tractor/trailer vehicles. The Medium/Heavy Truck Technician Program is designed to provide individuals with the knowledge and skills needed for an entry-level technician position in the trucking industry.

Students selecting this program will develop and practice their skills in a well-equipped shop and study challenging areas such as truck computers, diesel engines, electrical systems, suspension, air-brakes, and power-train. Instruction is also given in related truck area studies such as welding, transport refrigeration, automatic transmissions, and truck body repair.

St. Cloud Technical College’s Medium Heavy Truck Technician Program is ASE Certified and graduates are prepared for the Automotive Service Excellence examinations. The program is certified by the National Automotive Technicians Education Foundation, Inc. (NATEF). The Transportation Studies Core also meets some of the requirements for graduation in the Automotive Service Technician Program.

Career Opportunities

Major employers are independent truck repair shops, truck dealers, and firms that own large fleets of truck transports. After completion of training, medium/heavy truck technicians may wish to specialize in one phase of the field, such as component rebuilding, transport refrigeration, or preventive maintenance.

There are also opportunities for AAS Degree graduates as medium/heavy truck technicians, shop supervisors, dealer and factory representatives.

Nursing Assistant/Home Health Aide
Certificate (4 Credits)

Program Description
Today's health care industry is in need of caregivers at all levels; Nursing Assistants, Home Health Aides/Homemakers, Licensed Practical Nurses, Registered Nurses and many specialty areas. The Nursing Assistant/Home Health Aide course prepares the students to provide 60 care-giving skills in a supervised simulation laboratory and in an actual work environment.

This Minnesota Department of Health approved course prepares the student to complete a written and skills test in order to be placed on the State Registry and work as a Nursing Assistant and/or Home Health Aide. Attendance of 75 hours or more of the Nursing Assistant portion of the course is mandatory.

Before the student begins clinicals, he/she must obtain a uniform and have evidence of a negative Mantoux or chest x-ray within the past three months showing no active tuberculosis. A Minnesota background check is also required. Information about uniforms, Mantoux and background checks will be discussed the first class session.

Upon completion of all class hours, students will be eligible to take the state exam offered at St. Cloud Technical College (cost is $149) and upon passing, will be recognized by the state of Minnesota in its registry of Nursing Assistants/Home Health Aides.

The college continually accepts interested students into this course.

Career Opportunities
There is a continuous need for Nursing Assistant/Home Health Aides. A benefit to those students who become employed within 12 months of completing the program is that the state licensed nursing home, which employs the student, will reimburse the student for the course and test-out fees. To remain on the Minnesota registry, an individual must complete 12 hours of education every year and work in the field at least eight paid hours every two years. Placement on the Minnesota Registry as a Nursing Assistant/Home Health Aide is an acceptance requirement for the college Practical Nursing Program.

Program Description
Graduates of the Paramedicine A.A.S. program will be eligible to take the national level Paramedicine exam and have the knowledge and skills necessary to be a competent and successful entry-level paramedic. The Paramedic (EMT-P) works in the exciting and expanding field of Emergency Medical Services (EMS).

This degree incorporates theoretical knowledge with extensive clinical application and experience. The specialization, advanced education and training in the care and transport of the critically ill and injured can mean the difference between life and death. AAS degree graduates have greater potential for upward progression in the career of pre-hospital care.

The St. Cloud Technical College Paramedicine AAS program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

Career Opportunities
Career opportunities for paramedics include: private ambulance companies, hospitals, industry, city health agencies, fire departments and law enforcement agencies. Park services, ski patrols and other groups in many countries often educate their personnel to become Emergency Medical Technicians or Paramedics as part of their duties.

Paraprofessional Educator

Paraprofessional Educator AAS Degree  (65 Credits)

Program Description

This program meets the requirements and recent federal legislation regarding the employment of paraprofessionals. In order to satisfy the requirement, school districts are encouraged to employ paraprofessionals who have completed two years of study at an institution of higher education; or obtained an Associates (or higher) Degree, or who have met a rigorous standard of quality and can demonstrate knowledge of and the ability to assist in instructing reading, writing, and mathematics.

This curriculum follows the Minnesota Core Instructional Paraprofessional Competencies which will form the basis of a credentialing system for instructional paraprofessionals. The competencies are statements that indicate the knowledge and skills needed for the paraprofessional to work successfully in educational settings. Students are provided classroom instruction and practical experience in a variety of educational settings, including Early Childhood Family Education (ECFE), Early Childhood Special Education (ECSE), Title I, Head Start, preschools, elementary schools, secondary schools, and other special education programs. Membership in Skills USA, MnAEYC, NAEYC or other professional organizations is strongly recommended.

Applicants to the Paraprofessional Educator Program must complete any college readiness course with a passing grade, if indicated by their Accuplacer scores prior to enrolling in the Program courses.

Before being placed on an Internship, students will be required to complete EMSC404 and submit these completed forms: A Department of Human Services (DHS) Background Study Form, Pre-Entrance Medical Exam, and Immunization Record.

Career Opportunities

Job opportunities for Paraprofessional Education graduates may be found in Special Education, Title I, Bilingual Programs, and Career and Technical Education. These jobs may be found in a variety of settings including Early Childhood Family Education (ECFE), Early Childhood Special Education (ECSE), Title I, Head Start, preschools, elementary schools, secondary schools, special education programs. Personal qualities desirable for the field include emotional maturity, physical stamina, the ability to work with people in a variety of settings, and acceptance of people with diverse backgrounds.

**Program Description**

The Plumbing Program is designed to give students a series of experiences with a wide variety of tasks normally performed by a plumber. Some areas included are installation of fixtures, pipe threading, use of tools and equipment, hot and cold water supply, drainage systems, fabrication and testing, maintenance and repair of plumbing, and hydronic heating. Students may choose between a Diploma and an AAS Degree. Students choosing an AAS Degree will find added emphasis on shop management and communication skills.

Related material covered includes blueprint reading and sketching, plumbers’ mathematics, the Minnesota State Plumbing Code, and a considerable amount of trade knowledge. One of the main class projects involves installation of the plumbing and fixtures in the house project built each year by the building trades classes. The building construction industry is moving ahead rapidly and becoming more complex each year. There is a need for people with the desire and ambition to learn the basics of plumbing and enter the field as apprentices.

**Career Opportunities**

The plumbing industry presents many outstanding opportunities for advancement and success in residential, commercial, industrial and service plumbing. Skilled mechanics in this trade are among the highest paid of any craft. In this field, initiative and ability are rewarded. Plumbers must keep informed on the latest developments in sanitary science. They contribute to the public health and welfare by means of well designed and properly installed plumbing.

Plumbing

Plumbing Diploma (37 Credits)

Program Description

The Plumbing Program is designed to give students a series of experiences with a wide variety of tasks normally performed by a plumber. Some areas included are installation of fixtures, pipe threading, use of tools and equipment, hot and cold water supply, drainage systems, fabrication and testing, maintenance and repair of plumbing, and hydronic heating. Students may choose between a Diploma and an AAS Degree. Students choosing an AAS Degree will find added emphasis on shop management and communication skills.

Related material covered includes blueprint reading and sketching, plumbers’ mathematics, the Minnesota State Plumbing Code, and a considerable amount of trade knowledge. One of the main class projects involves installation of the plumbing and fixtures in the house project built each year by the building trades classes. The building construction industry is moving ahead rapidly and becoming more complex each year. There is a need for people with the desire and ambition to learn the basics of plumbing and enter the field as apprentices.

Career Opportunities

The plumbing industry presents many outstanding opportunities for advancement and success in residential, commercial, industrial and service plumbing. Skilled mechanics in this trade are among the highest paid of any craft. In this field, initiative and ability are rewarded. Plumbers must keep informed on the latest developments in sanitary science. They contribute to the public health and welfare by means of well designed and properly installed plumbing.

Practical Nursing
Practical Nursing AAS Degree  (60 Credits)

Program Description
Practical Nursing is a challenging, meaningful, and fulfilling career with the benefits of intellectual stimulation, attractive earning potential, personal rewards, and excitement! The program is designed to prepare interested men and women to provide nursing care in a variety of patient care settings. The focus of the provision of care includes promotion of health, prevention of illness, holistic and restorative interventions, and acute and long-term care practice. We are very proud of the college’s state-of-the-art nursing simulation lab that allows for the integration of instruction and clinical practice.

The program exists to educate and prepare individuals to complete the National Council Licensure Exam (NCLEX-PN), and to encourage individuals to engage in lifelong learning; continued learning is essential in a society that seeks well-trained healthcare workers for the benefit of patient health, quality of life and the well-being of the community. All program Core requirements must be completed at SCTC. Students may be admitted to the Nursing Program only two times.

Admission to the program is highly competitive and requires the student to attend the pre-program informational session offered by the SCTC Admissions Department. Admittance requirements are subject to change in the near future. For consideration into the nursing program, students must have completed all prerequisite courses with a minimum GPA of 2.8 or above for the A. A.S.

A graduate of the Practical Nursing program provides a foundation for career mobility with associate or baccalaureate RN programs.

Career Opportunities
Today we are finding businesses and occupations being laid off, however, health care continues to need highly qualified and competent workers. Projections from the U. S. Bureau of Labor Statistics indicate that one million new nurses will be needed by 2010; by 2014 employment of nurses is expected to grow 29.4%; “Job Outlook is Excellent”! The SCTC Practical Nursing Program has consistently placed its graduates throughout the St. Cloud areas and Minnesota.

Program Description

The Sales and Management field is one of the fastest growing, largest, and most diversified fields of employment. This degree program is designed for students who want to start their career in sales, management or marketing and want to enter this dynamic, rapidly growing field right away while leaving their options for continuing their education open.

The program introduces students to a broad base of business related knowledge and includes experiences and opportunities for students to network and make connections in the community while they attend classes. The AAS degree option also includes general education classes that broaden the student experience and are transferable to other colleges in the Minnesota State College and University system.

Students develop skills in business applications including communication, sales, prospecting, marketing, customer relationship management, managing a business, supervising employees, and related technology applications. Courses emphasize practical business related knowledge and hands-on learning.

During the program, students complete three semesters of supervised occupational experience that directly applies classroom learning and experiences to the workplace. This work experience broadens students knowledge and helps them successfully secure positions after graduation.

Students also have the opportunity to participate in Delta Epsilon Chi (DEX), the collegiate division of DECA. Students who participate in this organization further develop the sales, management, marketing, team-building, entrepreneurial, and presentation skills taught in the classroom through activities and competitions.

Career Opportunities

Sales and Management AAS graduates are often employed as department managers, store managers, retail sales associates, hospitality managers, customer service representatives, supervisors, business-to-business salespeople, and owners of their own businesses. Graduates work in the areas of wholesale, industrial, and commercial sales, management, or marketing.

**Program Description**

The Sales and Management Associate program is designed for students seeking an introduction to sales and management or to pair this knowledge base with a trade of their choice.

Students develop basic skills and understanding in selling, marketing, management styles and business applications including math, accounting, and communications. Courses include an emphasis in practical business related knowledge and hands-on learning. Students immediately apply course topics in a supervised occupational experience in a sales, customer service, marketing, or management related position.

Students also have the opportunity to participate in Delta Epsilon Chi (DEX), the collegiate division of DECA. Students who participate in this organization further develop and practice the sales, management, marketing, and leadership skills taught in the classroom.

**Career Opportunities**

Sales and Management Associate level (1-year diploma) graduates are often employed as customer service representatives, entry-level sales people, and entry-level retail, restaurant, and hospitality managers and supervisors. Students can also choose to continue their education by applying these courses to the Sales and Management diploma or AAS degree.

Sonography
Diagnostic Medical Sonography - Generalist
AAS Degree (71 Credits)

Program Description
The Sonography Program provides the student with academic study, laboratory and clinical experience. The clinical experience will affiliate the students with facilities located within the five state region and beyond during the clinical ultrasound internship courses. Sonography students will receive comprehensive training and experience performing scanning procedures in abdominal, superficial structures, gynecological and obstetrical ultrasound. Students will also receive training and experience in vascular ultrasound procedures. Diagnostic Medical Sonographers perform and analyze ultrasound images through the use of high frequency sound waves in a variety of medical settings.

Upon completion of the program, graduates are eligible to take the national registry exams in Ultrasound Physics, Abdominal Ultrasound, and Obstetrical and Gynecological Ultrasound following American Registry for Diagnostic Medical Sonography (ARDMS) prerequisite guidelines. This program is nationally accredited by the Commission on Accreditation of Allied Health Educational Programs (CAAHEP). Graduates of this program will be able to obtain, review and integrate pertinent and supporting clinical data to facilitate optimum diagnostic results, analyze and process anatomic, pathologic and/or physiologic data for interpretation by a physician.

Admission preference will be given to students who have completed the admission requirements with post secondary education and health care experience. Prior health experience is helpful. Applicants should be aware that this program has very rigorous technical and clinical courses where eye-hand coordination skills are required for scanning. Students must be able to communicate effectively when performing ultrasound examinations. Students must provide their own transportation to clinical facilities, as well as living arrangements.

Career Opportunities
Many students find jobs in hospitals, outpatient clinics and mobile services. Ultrasound equipment manufacturers also hire Sonographers to demonstrate and sell their products. Other job opportunities include supervising, managing, education and research.

Program Description

The Surgical Technology Program prepares students to function as part of the operating room team by handing instruments to the surgeon during various surgical procedures. The surgical technologist works under medical supervision to facilitate the safe and effective conduct of invasive surgical procedures. This individual acts in association with the registered nurse and surgeon to ensure that the operating room environment is safe, that equipment functions properly, and that the operative procedure is conducted under conditions that maximize patient safety.

The curriculum includes classroom, laboratory and clinical experiences. Clinical experience is provided at area hospitals. This clinical experience includes the following surgical areas: general surgery, orthopedics, plastics, obstetrics, genitourinary, eye, ear, nose and throat, cardiovascular and neurological. Students also spend time in the instrument room, central supply, recovery room and with unit support personnel. Students may choose between a diploma and an AAS Degree. The general education courses taken in the AAS Degree option are transferable to a 4-year university.

A surgical technologist possesses expertise in the theory and application of sterile and septic technique and combines the knowledge of human anatomy, surgical procedures and implementation tools and technologies to facilitate a physician’s performance of invasive therapeutic and diagnostic procedures. Personal qualities of patience, manual dexterity and the ability to work under stress and to stand for long periods of time are necessities in this field. This profession does require some lifting. Students must maintain a “C” average in every class to enter clinical rotations. A physical examination is required prior to clinical practice. Students must have a current CPR for Health Care Providers Certificate prior to clinical experience.

Students will join the Association of Surgical Technologists and graduates of the Surgical Technology Program will be eligible to take the National Certification Examination. This program is nationally accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

Students must provide their own transportation to clinical facilities, as well as living arrangements.

Career Opportunities

Surgical Technologists are allied health professionals who are an integral part of the team of medical practitioners providing pre-operative, intra-operative, and post-operative surgical care to patients in a variety of settings. Jobs are available in small Minnesota communities, as well as the metro area and in various cities throughout the United States.

Program Description

Water Environmental Technologies (WETT) is an environmental program geared toward protecting the world’s most precious resource; WATER. This course is designed to prepare students for a diverse employment market. Courses cover a variety of chemical, biological, physical and mechanical water and wastewater treatment processes and techniques being applied today. Instruction for this program is provided in well-equipped classrooms and laboratory facilities that are continuously upgraded. Classroom sites are located in St. Cloud at the main campus and also at a unique satellite location in Eden Prairie, Minnesota. Students have the choice of a metropolitan or out-state location for training to accommodate their lifestyles and employment needs. The Eden Prairie location utilizes both an active water and wastewater treatment plant as the classroom.

As guardians of our public water supplies, students will learn the complex processes of obtaining water from its source, to treatment through multiple purification processes, to distribution of safe water in order to maintain the facilities, identify and troubleshoot treatment problems, and devise solutions to those problems to ensure safe uncontaminated water is available to end users.

Students of this program are offered an AAS Degree or Diploma to meet their career objectives. Upon completion of either degree, successful students will be eligible to take the examinations for their State of Minnesota Water and Wastewater certifications. When students successfully pass their state exams they will receive their Class D Water and Wastewater certificates, which are required to operate water and wastewater treatment facilities for both public and private entities.

Career Opportunities

Graduates of the Water Environment Technologies Program are prepared to accept positions as entry-level water and/or wastewater operators at various water purification facilities. A career in water treatment offers dynamic, rapid growing employment opportunities with competitive salaries and benefit packages.

Water Environment Technologies graduates will have the diverse opportunity to work locally or apply their skills in a global market for either public or private employers. The demand for trained operators is consistently growing in areas of municipal and privately owned facilities. The global concerns for a safe constant supply of drinking water makes this program very attractive to students looking for a meaningful, secure career with an endless variety of opportunities today and in the future.

Upon successful completion of the Water Environment Technologies program, students may also choose to become lab technicians, facility mechanics, equipment sales persons, solids handlers, meter readers, utility service operators, or pursue other various related positions in the water treatment field.

Welding/Fabrication Diploma (37 Credits)

Program Description
The Welding Program provides both practical and theoretical knowledge for qualified welding technicians. The specific subjects include: Shielded Metal Arc Welding, Oxy-Acetylene Welding and Brazing, Gas Metal Arc Welding, Gas Tungsten Arc Welding, Cutting Processes-fuel gas and plasma, Metallurgy, Fabrication and Equipment, Automated Machining, CADD, Blueprint Reading and Math. Safety procedures are also an important part of each welding process. Good safety practices are stressed in lab situations as required in the metal working industry. Students will work with many of the tools used in industry.

Welds will be made to industry standards using the AWS D1.1 Structural Code and AWS D1.3 structural welding code-sheet steel. Welds will be done in all positions, and guided bend tests will be made to check weld quality.

Career Opportunities
Positions for graduates may be found in fabricating, plant maintenance, structural steel, pipe fitting, and in sales. Many students will find opportunities in supervisory positions after gaining some experience on the job. The opportunities are many and will vary with ability and skills that have been developed. Skilled welders have the satisfaction of knowing that their education can lead to a successful and rewarding future.

**PLEASE NOTE:** All program plans are preliminary and curriculum may change without notice.
ABCT 1502 - Collision Welding and Cutting
With the construction of today's vehicles, welding is an important part of auto body repair. This course covers basic welding, safety procedures, application for welding on steel and galvanized metals, introduction to metal arc welding, oxy-acetylene welding and cutting. Major emphasis is placed on MIG (Metal Inert Gas), and plasma cutting according to I-Car standards.
(3 C: 1 lect/pres, 2 lab, 0 other)

ABCT 1506 - Intro to Collision Repair
This course enables the student to work with power and hand tools used in the daily operation of an Autobody facility. Lab tasks will be performed on vehicles by removal of interior and exterior parts. Other tasks include reconditioning vehicles.
(4 C: 1 lect/pres, 3 lab, 0 other)

ABCT 1510 - Collision Repair Lab I
The student will apply basic procedures on production type vehicles, according to NATEF and I-CAR standards. Corequisite(s): ABCT1514, Prerequisite(s): ABCT1502, ABCT1506
(3 C: 0 lect/pres, 3 lab, 0 other)

ABCT 1512 - Refinishing
This course is a lecture/lab that will enable a student to develop the basic skills in refinishing. It will be an introduction to the application of paint products, the use of equipment, computer paint mixing, safety and environment. Corequisite(s): ABCT1518
(4 C: 2 lect/pres, 2 lab, 0 other)

ABCT 1514 - Basic Collision Repair
In order to develop the basic skills of autobody repair, students will learn the fundamentals of metal straightening, rust repair, fiberglass repair, and attachment of trim and hardware. Students will learn to repair damaged vehicles to the priming stage according to NATEF and I-CAR standards.
(4 C: 2 lect/pres, 2 lab, 0 other)

ABCT 1518 - Refinishing Lab I
This is a lab course in which students will apply procedures learned in ABCT 1522 Refinishing. Complete paint jobs will be done on project vehicles. Corequisite(s): ABCT1522
(3 C: 0 lect/pres, 3 lab, 0 other)

ABCT 1522 - Refinishing
This course is a lecture/lab that will enable a student to develop the basic skills in refinishing. It will be an introduction to the application of paint products, the use of equipment, computer paint mixing, safety and environment. Corequisite(s): ABCT1518
(4 C: 2 lect/pres, 2 lab, 0 other)

ABCT 1526 - Refinishing Lab II
The student will continue to develop skills in overall refinishing, spot repair, color match and blend, and reconditioning. Students will satisfactorily complete projects using knowledge and skills learned in previous refinishing courses, according to NATEF and I-CAR standards. Corequisite(s): ABCT1530 Prerequisite(s): ABCT1518, ABCT1522
(3 C: 0 lect/pres, 3 lab, 0 other)

ABCT 1530 - Color Match and Blend
This course is a lecture/lab enabling a student to develop professional skills in spot repair, blending, tinting and panel refinishing. Practical applications will be done on production projects. Corequisite(s): ABCT1526
(3 C: 1 lect/pres, 2 lab, 0 other)

ABCT 1538 - Auto Restoration
This course will emphasize the repair of older vehicles not normally associated with collision repair. Topics will include: panel replacement, rust repair, body filler application, corrosion protection, and primer application.
(2 C: 1 lect/pres, 1 lab, 0 other)

ABCT 1541 - Advanced and Custom Refinishing
This course will explore various techniques of advanced refinishing such as: tinting, blending, masking, and tri-stage color application. Students will use a variety of types of refinishing equipment and materials to produce let-down panels spray tri-stage paints and have the opportunity to design, mask, and spray custom designed panels of their own.
(2 C: 1 lect/pres, 1 lab, 0 other)

ABCT 2502 - Estimating
An estimate is a written guide to the repairs that will be performed on a vehicle. Instruction will include becoming familiar with the manuals, forms, and procedures used in writing estimates. Insurance procedures and customer relations will be examined.
(2 C: 1 lect/pres, 1 lab, 0 other)

ABCT 2507 - Electrical Systems
Electrical components are often damaged as a result of a collision. In most cases the collision technician is responsible for completing the required repairs. The focus of this course will be diagnosing and repairing electrical malfunctions including SRS, power accessories, and lighting systems.
(2 C: 1 lect/pres, 1 lab, 0 other)

ABCT 2510 - Damage Analysis and Measuring Systems
Vehicles are built to very close tolerances and standards during the repair process these standards must be duplicated. You will identify, examine designs, use measuring equipment, and analyze damage to create repair plans that will be used to perform repairs. Corequisite(s): ABCT2518 Prerequisite(s): ABCT1506, ABCT1514
(3 C: 1 lect/pres, 2 lab, 0 other)

ABCT 2514 - Plastic Repair
Plastics have become an integral part of automobile design and construction. Identification and the repair of these products has become a must for the collision technician. Topics include: plastic welding, SMC repair, adhesive repair, and plastic refinishing.
(2 C: 1 lect/pres, 1 lab, 0 other)

ABCT 2518 - Collision Repair Lab II
This course will run concurrent with Damage Analysis and Measuring Systems. Students will use repair plans to perform repairs on collision damaged unibody and conventional frame vehicles. This is a variable credit course, with 1-3 credits. Corequisite(s): ABCT2510
(C: 0 lect/pres, 3 lab, -3 other)
ABCT 2522 - Structural Damage Repair
With high strength steel, lighter sheet metal, and glass being used for structural support, today's technician must fully understand how the automobile functions as a complete unit. Students will identify and perform repairs on structural components in accordance with industry standards.
Corequisite(s): ABCT2526,
Prerequisite(s): ABCT1502, ABCT1506, ABCT1514
(4 C: 2 lect/pres, 2 lab, 0 other)

ABCT 2527 - Collision Repair Lab III
This lab will run concurrent with ABCT 2522 Structural Repair. It allows students the necessary time to perform structural repairs.
(4 C: 0 lect/pres, 4 lab, 0 other)

ABCT 2531 - Mechanical Systems
Suspension and other mechanical parts often become damaged as a result of an accident. Collision technicians must be able to identify and possibly repair this damage. In this course, students will perform minor repairs to these systems. Environmental concerns and other topics pertaining to mechanical repairs will be addressed.
(3 C: 1 lect/pres, 2 lab, 0 other)

ABCT 2534 - Collision Repair Lab IV
In the collision industry attention to detail, accuracy, and use of time are highly prioritized attributes. With the aid of the instructor, students will choose projects that will enable them to have these skills in preparation for entering the work force.
Prerequisite(s): ABCT1506, ABCT2518
(4 C: 0 lect/pres, 4 lab, 0 other)

ABCT 2542 - Supervised Internship
Internships can help aid the students make an easier transition from school to work. Students will be placed in collision repair facilities to work side-by-side with journeymen technicians. Specific duties to be performed on the job will be arranged by the sponsoring repair facility, instructor, and the student.
This is a variable course with credits 1-6.
( C: 0 lect/pres, 0 lab, 0 other)

ACCP 2290 - Accounting Comp. Review
Review course for Registered Accounting Professional (RAP) exam.
(3 C: 3 lect/pres, 0 lab, 0 other)

ACCT 1204 - Fundamentals of Accounting I
This course is designed to examine the parts of profit and loss statements, calculations, and formulas and how they relate to the effective operations of a business. The course includes basic accounting fundamentals, along with interpreting financial operating statements and methods to improve the profitability of the business.
(2 C: 2 lect/pres, 0 lab, 0 other)

ACCT 1214 - Principles of Accounting I - Modified Course for Tech Prep
This course is an introduction to the fundamental accounting concepts and principles used to analyze and record business transactions. Topics include accounting as an information system, measuring and recording business transactions, business income, adjusting entries, the accounting cycle, accounting for service businesses and merchandising operations, accounting systems, special purpose journals, accounting for cash, receivables, temporary investments and inventories.
This is a variable credit course, with 1-3 credits.
( C: 3 lect/pres, 1 lab, -4 other)

ACCT 1215 - Accounting Principles I
This course is an introduction to the fundamental accounting concepts and principles used to analyze and record business transactions. Topics include accounting as an information system, measuring and recording business transactions, business income, adjusting entries, the accounting cycle, accounting for service businesses and merchandising operations, accounting systems, special purpose journals, accounting for cash, receivables, temporary investments and inventories.
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 1216 - Accounting Principles II
This course covers the analysis and recording of business transactions related to partnerships and corporations. Topics include but not limited to organization, capital structure, stockholders equity, earning dividends and the Retained Earnings Statement. Also included are accounting for long-term liabilities and the statement of cash flows.
Prerequisite(s): ACCT1215
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 1217 - Cost Accounting I
This course covers cost accounting for materials, labor and factory overhead in a manufacturing entity for a job order cost system.
Prerequisite(s): ACCT1215 or concurrent registration
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 1218 - Computerized Accounting I
This course is an introduction to computerized accounting and Internet applications. Topics include computerized general ledger, payroll, accounts receivable, account payable, and business applications of the Internet.
Prerequisite(s): BUSM1200, ACCT1215 or concurrent registration
(3 C: 2 lect/pres, 1 lab, 0 other)

ACCT 1219 - Spreadsheets-Microsoft Excel
This course covers the most recent versions of spreadsheet applications. Topics include document design and creation, format modifications, and advanced formulas and functions.
Prerequisite(s): CPTR1300 or BUSM1200
(2 C: 1 lect/pres, 1 lab, 0 other)

ACCT 1220 - Payroll Accounting
This course covers the various state and federal laws pertaining to the computation and payment of salaries and wages. Topics include preparation of employment records, payroll registers, employee earnings records, time cards, and state and federal reports.
Corequisite(s): ACCT1215
(2 C: 1 lect/pres, 1 lab, 0 other)

ACCT 1280 - Accounting Internship
This will be available to students who have demonstrated readiness and willingness to work in an on-the-job situation. It usually will be a training culmination and an opportunity to apply the skills learned.
( C: 0 lect/pres, 0 lab, 0 other)

ACCT 2219 - Computerized Accounting II
This course covers additional computerized accounting applications. Topics include payroll, income tax preparation, general ledger setup and maintenance, business presentations, and financial analysis. Computerized accounting simulation is utilized.
Corequisite(s): ACCT1216, ACCT1217
Prerequisite(s): ACCT1215, ACCT1218, ACCT2230
(3 C: 2 lect/pres, 1 lab, 0 other)

Please note: All program plans are preliminary and curriculum may change without notice.
ACCT 2226 - Intermediate Accounting I
Students will explore accounting as a process of measurement and communication of economic data with an emphasis on recording, classifying, measuring and reporting. Procedures for the recognition of revenue and long-term debt are also included.
Prerequisite(s): ACCT1216
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 2227 - Intermediate Accounting II
A continuation of ACCT 2226 with an emphasis on accounting requirements and procedures that relate to equity financing, investing activities, leases, income tax, employee compensation, financial statement disclosures, earnings per share, accounting changes and error corrections, and financial statement analysis.
Prerequisite(s): ACCT2226
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 2228 - Cost Accounting II/Managerial Accounting
Managerial accounting is the process of producing financial and operating information regarding the economic condition of the organization for users internal to the organization. The process is driven by the informational needs of individuals internal to the organization with an emphasis on cost systems, pricing decision, budgeting, planning and control.
Prerequisite(s): ACCT1217
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 2230 - Income Tax I
This course focuses on federal individual income taxes. The student will learn the tax laws as they apply to individual income taxes, how to complete a variety of federal income tax forms, and how to approach the yearly filing of federal individual income taxes.
(4 C: 3 lect/pres, 1 lab, 0 other)

ACCT 2231 - Income Tax II
This course will provide the student a hands on experience working with federal individual income taxes, Minnesota state income taxes, and other federal taxes (partnership, corporate, FICA, FUTA). The student will learn to use a computerized tax preparation program, and prepare various forms and schedules. The course will also focus on tax planning issues and the income tax system.
Prerequisite(s): ACCT2230
(2 C: 2 lect/pres, 0 lab, 0 other)

ACCT 2233 - Fund/Not-for-Profit Accounting
A study and application of fund accounting principles and procedures that apply to governmental entities and not-for-profit organizations with an emphasis on the application of recording and reporting economic information for these organizations.
Prerequisite(s): ACCT1215
(3 C: 2 lect/pres, 1 lab, 0 other)

ACCT 2234 - Auditing
This course is a study of the methods and procedures used to verify the completeness and accuracy of accounting records. Topics include professional ethics, the audit process, nature of evidence, internal control, audit-sampling techniques, the audit examination, and audit reports.
Prerequisite(s): ACCT2226
(3 C: 2 lect/pres, 1 lab, 0 other)

ACCT 2235 - Accounting Comprehensive Review
The course serves as a capstone course covering financial accounting, ethics, business consulting, managerial accounting, business law and taxation. It is also designed to prepare the student for the Comprehensive Examination for Accreditation in Accountancy, as offered by the Accreditation Council for Accountancy and Taxation.
(2 C: 2 lect/pres, 0 lab, 0 other)

ADMS 1201 - Introduction to Personal Computers
This course provides a general overview of the frequently-used functions of a personal computer at SCTC or a laptop. Course will include introduction to computer hardware, operating systems, electronic mail, Internet, D2L, network drives, and Novell Client software.
(1 C: 1 lect/pres, 0 lab, 0 other)

ADMS 1202 - Keyboarding/Word Processing
Students will cover the basic formatting of business documents using word processing, spreadsheet, database, graphics, presentation, and e-mail applications. Students will design and generate letters, tables, memos, and reports using appropriate software. Students will continue the development of keyboarding speed, accuracy, and proofreading skills.
Prerequisite(s): BUSM1207
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1203 - Advanced Keyboarding/Word Processing Appl.
This course is a continuation of ADMS 1202. The student will continue the development of keyboarding skills, and emphasize the formatting of various kinds of business correspondence, reports, tables, electronic forms, and desktop publishing projects from unarranged and rough-draft sources.
Prerequisite(s): ADMS1202 C grade; 35 wpm
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1204 - Advanced Microsoft Office
Advanced Microsoft Office will introduce the intermediate and advanced features of MS Office. They will also require the advanced skills of Windows 98 and a revision of the student performance on the test of A.R.M.A. Rules. Alphabetic, numeric, and geographic systems will be studied.
Prerequisite(s): CPTR1300 or BUSM1200
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1206 - Keyboard Speedbuilding
This course is designed for the student to increase keyboarding speed and improve accuracy through personal goal setting and intensive practice work.
Prerequisite(s): ADMS1202
(1 C: 0 lect/pres, 1 lab, 0 other)

ADMS 1207 - Office Procedures I
This course will include basic filing and calculator skills. Students will be introduced to the rules and procedures involved when storing documents using the A.R.M.A. Rules. Alphabetic, numeric, and geographic systems will be studied. Students will develop speed and accuracy using the touch system for four basic arithmetic operations and solving business applications on the calculator. Students will identify skills and qualities necessary for administrative professionals.
Corequisite(s): ADMS1202
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1208 - Office Procedures II
Students will complete a simulation (hands-on and technology based) which will allow the student to perform various administrative tasks. Using today’s technology the student will research information, maintain an electronic calendar, send and receive e-mail. A variety of other office administrative tasks involving the use of advanced word processing functions and database and spreadsheets will be performed.
Prerequisite(s): ADMS1207, ADMS1202
(3 C: 2 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ADMS 1214 - Administrative Desktop Publishing
This course provides an introduction to the Microsoft Publisher 2002. Topics include creating and editing single-page and multi-page publications, using wizards, commercial printing considerations, editing text, colors, and graphic design objects, personal information sets, logos, the Pack and Go Wizard, and using Publisher to create flyers, newsletters, brochures, logos, and calendars. Also included are topics covering business forms such as letterheads, business cards, envelopes, labels with mail merge, invoices, fax covers and tables.
Prerequisite(s): ADMS1203
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1221 - Medical Machine Transcription I
Students will cover the basic formatting of business documents and healthcare documents using word processing and transcription software. Document storage, retrieval, and major editing will be used. Students will continue the development of keyboarding speed, accuracy, and proofreading skills.
Prerequisite(s): ADMS1202 or Instructor Approval, BUSM1207
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1222 - Medical Machine Transcription II
This course covers transcription of dictated medical material into a variety of usable medical documents. Emphasis will be on producing templates for medical forms; building speed and accuracy; proofreading and correcting errors.
Prerequisite(s): ADMS1202 or Instructor Approval, ADMS1221 or Instructor Approval
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1225 - Introduction to Health Information Technology
This course will introduce the student to health information technology both as work-based, task-oriented function and as part of a larger profession of health information management. The course will identify content and structure of health information; reporting of health information for reimbursement and classification, overview of legal health record and importance of professional development. The course also introduces EHR and PHR.
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 1226 - CPT Coding
This course covers basic coding rules and principles for coding diseases using CPT-4 classification systems. Accuracy and the need for following coding rules are emphasized when coding procedures.
Prerequisite(s): ADMS1223
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 1227 - ICD Coding
This course covers the basics of coding with ICD-9-CM coding system. Students learn how to classify and index diagnoses and procedures for the purposes of reimbursement, retrieval, and statistical analysis.
Prerequisite(s): ADMS1221 or Instructor’s approval, ADMS1223
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 1228 - Administrative Medical Terminology
This is a basic medical vocabulary building course with emphasis on human anatomy, including terminology analysis and structure as related to the digestive, urinary, female and male reproductive, nervous, cardiovascular, respiratory, musculoskeletal, skin, and endocrine systems as well as cancer medicine with focus on spelling and pronunciation.
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 1229 - Administrative Pharmacology
This course will introduce basic pharmacology concepts, such as drug terminology, abbreviations, drug effects, dosages and the use of drug reference books. Will discuss commonly prescribed drugs and look alike/sound alike drug names. Medications used to treat specific diseases of the body will be identified.
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 1236 - Administrative Legal Transcription
Students will use computers to digitally transcribe and prepare legal correspondence and legal documents from digitized dictation. Students will become familiar with documents and correspondence common to specific legal proceedings, and will learn specialized rules of punctuation and standards for preparing legal documents. Students will become familiar with legal citations and transcribe court documents containing extensive citations. Students will be able to correctly spell, define legal terminology, and use legal terminology in their transcriptions. Emphasis will be on formatting legal documents, correct use of citations, proofreading, correcting errors, accuracy, and speed.
Prerequisite(s): ADMS1202, ADMS1237
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 1237 - Administrative Legal Office Procedures
This course is intended to teach general legal office skills such as docket control, tickler file techniques, records management, and machine transcription. Ethical considerations in the law office and a comprehensive introduction to the preparation of legal documents are emphasized. This course is a foundation to all other Legal Administrative Classes.
(4 C: 4 lect/pres, 0 lab, 0 other)

ADMS 1240 - Computerized Health Information
Introduction to the basic concepts of an information system and development of life cycle. Systems to support decision making will be investigated. Immersion into electronic health records from the aspect of electronic document management systems to comprehensive systems which integrate clinical data from all potential source applications. Review of standardized healthcare data sets and the data needs for an electronic health record. Introduction of security measures to protect organization-wide information systems, measures to protect data integrity and validity using software or hardware technology, contingency planning, and data recovery procedures. The concepts of integration of computer systems, testing, evaluation and support for organization-wide information systems will be discussed. The course discusses patient focused communication, patient portals and personal health records (PHR). Basic workflow of coding and billing functions in an electronic health record environment.
Prerequisite(s): ADMS1226, ADMS1227, ADMS1228
Prerequisite(s): CPTR1300, ADMS1223, ADMS1221 or BUSM1200, ADMS1223, ADMS1221
(3 C: 2 lect/pres, 1 lab, 0 other)

ADMS 2204 - Administrative Pathophysiology
This course will provide students with the basic concepts related to diseases and disorders of the human body. Focus will be on the nature, causation, diagnostic procedures and treatment of common diseases relating to infection, genetics, and the following body systems: immune, endocrine, respiratory, cardiovascular, neurologic, blood, digestive, renal, and musculoskeletal systems.
Prerequisite(s): ADMS1223, HLTH1444
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2206 - HIT AAS Professional Practice Experience
This course emphasizes interaction between the student and PPE supervisor with emphasis on the supervisory role. Human relations and working within a team environment are emphasized. This is the capstone course for the program; course should be completed during the student’s final year. Student must have a cumulative GPA of 2.5 or greater.
Prerequisite(s): ADMS1223, ADMS1226, ADMS1227
(4 C: 0 lect/pres, 0 lab, 4 other)

ADMS 2210 - Administrative Support AAS Degree Internship
This is a cooperative work-study program that will be available to students who have demonstrated readiness and willingness to work in an on-the-job situation. It usually will be a training culmination and an opportunity to apply the skills learned. This is a variable credit course that may be taken for 4 to 6 credits.
( C: 0 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ADMS 2212 - Quality Improvement and Healthcare Statistics
This course covers the components of quality improvement systems using practical tools for problem-solving, decision-making, time management, and implementation of quality concepts. Activities that provide the process of reviewing and evaluating healthcare services will be examined as well as topics related to utilization review and risk management will be explored. This course is also a study of collecting, analyzing, interpreting, and presenting numerical data relating to health care services.
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2220 - Legal Aspects of Health Information
This course covers the fundamental aspect of all the essentials including the legal system, the patient/physician relationship, professional liability and medical malpractice prevention, public duties of the physician, the medical record, confidentiality, bioethical issues and HIPAA.
Prerequisite(s): ADMS1240, ADMS1225
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2224 - Advanced Medical Coding
This course will provide more complex cases to allow the student to coordinate CPT, HCPCS, and ICD-9-CM coding in outpatient settings of the clinical and outpatient departments of the hospital as well as major specialties. The course will guide the student through the certification process.
Prerequisite(s): ADMS1226, ADMS1223, HLTH1444, ADMS1227
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2231 - Paralegal Basic Law I
This course presents Ethics for Attorneys and Paralegals, Career Opportunities in the Legal Profession, Sources of American Law; the Court System, Alternative Dispute Resolution, Tort Law, Product Liability, Consumer Law, Contracts, and Intellectual Property Law, Insurance Law, Real Property, Estates and Family Law.
Corequisite(s): ADMS1237
(4 C: 4 lect/pres, 0 lab, 0 other)

ADMS 2232 - Paralegal Basic Law II
This course presents Administrative Law and Government Regulation; Civil Litigation; Conducting Interviews and Investigation; Trial Procedures; Criminal Law and Procedures; Legal Research and Analysis; Computer Assisted Legal Research; Legal Writing: Form and Substance.
(4 C: 4 lect/pres, 0 lab, 0 other)

ADMS 2234 - Family Law
The purpose of the family law course is to give legal assistants a better understanding of domestic relations law and to show students how those laws governing family situations are applied. The content of the course covers such areas as formation of the marital relationship, dissolution, child custody and support, adoption, abortion, paternity, domestic violence, child neglect, and surrogacy.
Prerequisite(s): ADMS223, ADMS2232, ENGL1302
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2235 - Legal Research and Writing
This course will provide a comprehensive working knowledge and an understanding of the research materials, research tools, research strategies and other skills necessary to write legal memoranda in order to assist attorneys to write briefs and other legal research-based documents. Students will be instructed to use a law library to locate and use both primary and secondary research data, to use Westlaw or Lexis Nexus legal research sources to solve legal problems, including federal and state cases, digests, statutes, regulations, treatises, encyclopedias, law reviews, citators and practice works.
Prerequisite(s): ENGL1302
(4 C: 3 lect/pres, 1 lab, 0 other)

ADMS 2240 - Administrative Office Management and Supervision
This course introduces current management principles, concepts, and organizational trends, in addition, also acknowledge that it’s everyone’s job to manage information systems, from the top executive to the receptionist. The course will provide a strong, management-based background using a humanistic approach for managing and supervision staff. The course will also include managing human resources, working with groups and teams, managing essential administrative services, and managing workplace systems and technology. Technological changes in the workplace demand that each employee be computer-oriented with knowledge of efficiency techniques relative to business systems.
Prerequisite(s): BUSM1200, CPTR1300, ADMS1202, ADMS1208, ADMS1240 or ADMS1208 or ADMS1237
(3 C: 3 lect/pres, 0 lab, 0 other)

ADMS 2244 - HIT Comprehensive Review
The course will provide study tips, comprehensive list of useful resources, review questions within the course content areas, and practice examination questions.
Corequisite(s): ADMS2242, ADMS2224
(1 C: 1 lect/pres, 0 lab, 0 other)

ADVR 1200 - Introduction to Advertising
Students will study the history of advertising, its social and legal impact as well as other aspects of the advertising industry. Sales Promotion will also be studied as an important part of the advertising and marketing industry.
(4 C: 4 lect/pres, 0 lab, 0 other)

ADVR 1210 - Computer Design and Layout - Modified Course for Tech Prep
Using a leading dominant page layout graphic program, students will learn to use this powerful software to create pamphlets, advertisements, booklets and just about any printed to digital document. Features include extensive text manipulation, photo and illustration control, color trapping, art and design capabilities and preparation for output. It is a highly versatile program that is valuable for beginners and professionals alike.
NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement.
This variable course is designed to allow students with Tech Prep College credit for ADVR 1210 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ADVR 1210) will be delivered concurrently with ADVR 1211.
( C: 0 lect/pres, 0 lab, 0 other)

ADVR 1211 - Computer Design and Layout
This course introduces students to the concepts and processes of graphic design. Students learn the fundamental principles of page layout and typography working on computers in bitmap, vector graphics, and page layout software. Using current industry standard software, students will learn essential design concepts and techniques used in desktop publishing. Students will be required to produce various types of design pieces using page layout software.
(3 C: 1 lect/pres, 2 lab, 0 other)

ADVR 1214 - Drawing with the Computer - Modified Course for Tech Prep
Students will learn the functions of Adobe Illustrator, a vector-based Macintosh application, to create drawings, logos and other design projects. Basic grayscale scanning will be taught as it relates to creation of drawing templates. Design, drawing and color theory are taught as integral parts of this class.
NOTES: For details of topics covered in the high school variable course please refer to the appropriate advanced standing articulation agreement.
This variable course is designed to allow students with Tech Prep College credit for ADVR 1214 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ADVR 1214) will be delivered concurrently with ADVR 1216.
( C: 0 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ADVR 1216 - Drawing with the Computer
This course will introduce students to Adobe Illustrator, the industry-standard illustration program for creating vector-based print, multimedia and web graphics. Students will learn design theory and image creation. Students construct illustrations and prepare them for export to graphics software, to the Web, and for printing. This course will emphasize proficiency in Adobe Illustrator and understanding the role of object-oriented tools in the realm of design. Students gain the skills necessary to create vector graphics for print and web.
Prerequisite(s): ADVR1255
(4 C: 3 lect/pres, 1 lab, 0 other)

ADVR 1220 - Computer Imaging and Editing - Modified Course for Tech Prep
Using a leading image editing software application, students will learn to create color corrections and special effects using photographic and computer generated images. In addition, they will learn the functions of this application to create and process images for various outputs, including print media, multimedia and web images. The basics of scanning will be covered. Design and color theory are taught as integral parts of this class.
NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement.
This variable course is designed to allow students with Tech Prep College credit for ADVR 1220 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ADVR 1220) will be delivered concurrently with ADVR 1221.
( C: 0 lect/pres, 0 lab, 0 other)

ADVR 1221 - Computer Imaging and Editing
Students will learn the most commonly used commands and techniques for obtaining consistent, predictable, high quality images using a leading image editing software application. Using the creative tools of the software, students learn how to select pixels in images, use layers, color correct images and to apply filter styles and filters to create special effects. Students will learn how to use vector paths for a variety of purposes, including masking and clipping paths. In addition, students will learn basic scanning techniques and how to create and save images in formats for press, print and Web use.
(3 C: 1 lect/pres, 2 lab, 0 other)

ADVR 1230 - Copywriting
Students will study copywriting techniques, copy research, creative strategies and objectives. These principles are applied to a variety of media including print, direct mail, television and radio, which will then be developed into an advertising campaign. Students will learn how to discover the features and benefits of any product offering. Additional focus on methods for clearly defining the message and techniques for creating effective written pieces will be explored.
(4 C: 4 lect/pres, 0 lab, 0 other)

ADVR 1240 - Multimedia for Web Design
Students will study the process of creating and designing a multimedia web design using the Macromedia Flash MX software. Lessons will be covered using the Official Macromedia Flash MX Training Manual. Conceptualization, storyboarding and the production process will be covered through a lecture/lab format using G4 Macintosh computers. Successful completion will result in an interactive, Macromedia Flash MX web design project.
Prerequisite(s): ADVR1200, ADVR1230, ADVR2281
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1241 - Website Creation and Editing
This course is designed to instruct students in combining visual layout tools with text based HTML editing features for the creation, management, and maintenance of web sites. This course guides students toward developing necessary skills in designing and building web pages and combining them into a finished, publishable product.
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1254 - Fundamentals of Design I - Modified Tech Prep Course
This course will introduce students to a methodical approach to problems of graphic design. Students will take a step-by-step approach to learn design basics, basic drawing skills and color theory. Hands-on projects will be created using a variety of mediums.
NOTES: For details of topics covered in the high school variable course, please refer to the appropriate Tech Prep College Credit agreement.
This variable course is designed to allow students with Tech Prep College Credit for ADVR 1254 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ADVR 1254) will be delivered concurrently with ADVR 1255.
( C: 0 lect/pres, 0 lab, 0 other)

ADVR 1255 - Fundamentals of Design
This course introduces students to graphic design as a form of visual communication through the study of the elements and principles of design. Students will take a step-by-step approach to learn design basics, drawing skills, and color theory. Hands-on projects will be created using a variety of mediums. A special focus is placed on building student’s design skills and knowledge.
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1261 - Public Relations
Students will learn to identify the public relations and publicity functions often assigned to advertising personnel and apply these procedures and practices to business and community needs. Methods of crisis management and dealing with the media will be identified. Emphasis is placed on the development of persuasive, professional public relations writing skills and development of a comprehensive public relations campaign.
(2 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1265 - Visual Design
This course expands graphic design knowledge and skills, offering students the opportunity to create more advanced design in a variety of applications including print, logos, posters, billboards, brochures and websites. Research, analysis, and the design processes that lead to creative conceptualization and final design solutions are used. Emphasis is placed on visual problem solving skills and the creative and aesthetic aspects of graphic design. Students also study the history and use of typography in design throughout the semester.
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1270 - Media Research and Planning
Students will be presented with basic media research principles as they relate to today’s advertising industry and will practice advertising research methods. Students will also construct a “real life” media plan with the assistance of professional industry contacts.
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 1271 - Web Design Project
This course is designed to challenge the web designer student during their last semester with a specialized web design experience exemplarily of industry standards. Each web design project is an individualized experience with a sponsoring business, professional or agency and their instructor. All project areas will be implemented, including arranging meetings, determining deadlines, creating flowcharts, design, production and presentation. Students will integrate knowledge of copywriting, design, research, and digital photography techniques into their project. Each project will include a finished web site for a local (fictional or real) company.
(2 C: 0 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ADVR 1290 - Printing for Designers
The student will gain a general knowledge of printing areas including electronic publishing, image generation, image assembly, preflighting, multipurposing documents, and press operation. This course is designed to provide students with the skills that will allow them to understand the printing processes and effectively communicate with graphic arts professionals regarding the proper creation and production of digital files.
(2 C: 2 lect/pres, 0 lab, 0 other)

ADVR 2200 - Commercial Illustration
Students are introduced to advertising studio techniques in pencil, ink, markers and paint. Emphasis is on the development of line, volume, texture, color, light and composition.
(3 C: 1 lect/pres, 2 lab, 0 other)

ADVR 2206 - Ad-Ventures
Students will be exposed to advertising avenues critical to creating strong advertising and design. Problem solving skills will be used as students learn to trust their creative and artistic instincts and develop a visual vocabulary of their own using a variety of techniques and materials. The main focus of the course is on experimentation, exploring creativity and brainstorming. Advertising trends are also identified and discussed, and time management skills are developed.
(2 C: 2 lect/pres, 0 lab, 0 other)

ADVR 2209 - Introduction to Photography - Modified Course for Tech Prep
This course will cover the fundamentals of photography to include the use and functions of a 35mm film camera and digital camera. Students will learn light metering, exposure controls and modes, depth of field, the purpose and creative use of various lenses, filters and flash. All aspects of the course will be covered with an emphasis on creative product shots for advertising purposes.
NOTES: For details of topics covered in the high school variable course, please refer to the appropriate Tech Prep College Credit agreement.
This variable course is designed to allow students with Tech Prep College Credit for ADVR 2209 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ADVR 2209) will be delivered concurrently with ADVR 2210.
(2 C: 0 lect/pres, 0 lab, 0 other)

ADVR 2210 - Introduction to Photography
This course will cover the fundamentals of photography to include the use and functions of a 35mm film camera and digital camera. Students will learn light metering, exposure controls and modes, depth of field, the purpose and creative use of various lenses, filters and flash. Students will also learn and apply photographic design, with increased perceptual awareness to create works of film and digital imagery. Studio lighting and techniques are covered with an emphasis on creative product shots for advertising purposes.
(3 C: 1 lect/pres, 2 lab, 0 other)

ADVR 2240 - The Northway Group
This course is designed to challenge the fourth semester, second year student with a purposeful, specialized occupational experience in the advertising field. Each student project is an individualized experience with a training plan in conjunction with the sponsoring business professionals/agency and their instructor. Students will integrate knowledge of advertising writing, design, research, photography and production techniques coordinated with their industry professionals and instructor to complete a series of projects that will closely simulate actual work experience. Projects may include, but are not limited to free lance, volunteer projects, competitive events, awards and industry related seminars.
(2 C: 0 lect/pres, 2 lab, 0 other)

ADVR 2250 - Retail Advertising
Students will learn the fundamentals of national and local retail operations with emphasis on promotion and advertising. Store operations, customer service, planning, budgeting, and legal and ethical issues will be discussed. The promotional mix will be identified and illustrated using current retail materials, and trends in the future of retail advertising will be evaluated. Students will study effective media use and produce retail advertising materials for a variety of media.
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 2255 - Internship
Students gain "real-life" internship experience with an industry related company. Instructor supervision and critique is a critical element of the internship experience. The learned principles are then applied to various areas studied of the Advertising industry for future employment. This is an excellent way to "Beef Up" your resume and polish your skills! This is a variable credit course, with credits 1-6.
(0 C: 0 lect/pres, 0 lab, 0 other)

ADVR 2260 - Advertising Campaign Development
Students will study three types of advertising objectives: selling, behavioral effects and communications. Students will examine benefits and problem solutions as related to an advertising campaign. Also, there are challenges to create: art, copy, music and strategy for a complete, integrated advertising campaign.
Prerequisite(s): ADVR1200, ADVR1270, ADVR1211
(4 C: 3 lect/pres, 1 lab, 0 other)

ADVR 2270 - Advertising Campaign Management Seminar
Selected students will participate in the organization of a working team specifically for the purpose of competing in the American Federation’s National Student Advertising Campaign, (NSAC). Students will be presented with a marketing challenge developed for this effort in conjunction with a major corporation. (Examples include: Toyota USA, The New York Times, etc.) Students will research all aspects of the challenge and its relevant markets, audiences, time, etc. The team will then restructure, evaluate and develop a comprehensive marketing plan, including all tactical elements used in said plan - advertising, media, sales promotion, public relations support, etc. In addition, students will develop, write, design and produce a comprehensive campaign plans book, along with a professional multi-media campaign presentation, which will be debuted at the upper Midwest regional competition of the NSAC. This is a focused and intense learning experience that leverages all theoretical classroom learning as students become immersed in the complexities of a real-world marketing challenge.
Prerequisite(s): ADVR1200, ADVR1230, ADVR1261, ADVR1270
(3 C: 2 lect/pres, 1 lab, 0 other)

ADVR 2281 - Broadcast
Students will study commercial construction as it relates to the radio and television broadcast industry. Lessons will be covered using the Official Final Cut Pro Training Manual. They will also receive technical instruction in the Final Cut Pro multimedia software and create radio and television commercials suitable for portfolio presentation.
Prerequisite(s): ADVR1200, ADVR1221, ADVR1230
(4 C: 2 lect/pres, 2 lab, 0 other)

ADVR 2285 - Portfolio Construction and Presentation
This course is designed to challenge the fourth semester, second year student with a purposeful, specialized occupational experience in the advertising field. Each student project is an individualized experience with a training plan in conjunction with the sponsoring business professionals/agency and their instructor. Students will integrate knowledge of advertising writing, design, research, photography and production techniques coordinated with their industry professionals and instructor to complete a series of projects that will closely simulate actual work experience. Projects may include, but are not limited to free lance, volunteer projects, competitive events, awards and industry related seminars.
Prerequisite(s): ADVR1200, ADVR1211, ADVR1216, ADVR1221, ADVR2281, ADVR1230, ADVR1270, ADVR2260, ADVR2250
(2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ADVR 2295 - Multimedia/Director
Students will study the process of creating and designing professional quality multimedia presentation using the Macromedia Director Software. Lingo and Basic Lessons will be covered using the Official Macromedia Director Training Manual. Conceptualization, storyboarding and the production process will be covered through a lecture/lab format using G4 Macintosh Computers. Successful completion will result in creating a professional, interactive, Macromedia Director project exemplary of industry standards.
Prerequisite(s): ADVR1211, ADVR1221
(4 C: 2 lect/pres, 2 lab, 0 other)

ANTH 1300 - Introduction to Cultural Anthropology
Meets MN Transfer Goals 5 and 8 - History/Social, Behavioral Sciences and Global Perspective.
Students will learn and apply anthropology concepts and methods as tools for self-understanding, and for understanding others. The course will focus on ways anthropology can be applied to workplace cultures and to understanding the world we live in.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ANTH 2300 - Anthropology of Science Fiction
Meets MN Transfer Goal Areas 5 and 8 - History and the Social and Behavioral Sciences and Global Perspective.
Basic concepts of anthropology will be used to interpret the imaginary worlds of science fiction. Fictional cultures will be examined to see how features of human biology, language, social organization, technology, etc. are patterned after or different from known human cultures. Anthropology and science fiction will then provide a framework for students to deepen their understanding of themselves, our contemporary culture and current world issues.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ARCH 1502 - Introduction to Architectural Drafting
The student will learn how to use drafting tools, develop preliminary plans, design and sketch preliminary plans for a storage building, a one story home, and a two-story home.
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 1505 - Intro to Architectural CAD - Modified Course for Tech Prep
This computer-aided drafting course will include beginning graphic communication using basic computer skills/application. The student will work with AutoCAD or comparable CAD software to create drawings and learn “tools” of CAD: organizing, editing, drawing skills, printing/plotting, adding text and dimensions. This variable course is designed to allow students with Tech Prep College credit for ARCH 1505 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ARCH 1505) will be delivered concurrently with ARCH 1506.
(0 C: 0 lect/pres, 0 lab, 0 other)

ARCH 1506 - Intro to Architectural CAD
This computer aided drafting will include beginning graphic communication using basic computer skills/applications. The student will work with AutoCAD software to create drawings, learn “tools” of the cad, organizing, editing, drawing skills, printing/plotting, adding text and dimensions.
Prerequisite(s): ARCH1522
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 1510 - CAD and Design Studio
This course will give the capacity to use drafting systems to develop sales presentations, details, sections and construction plans for a two-story house.
Prerequisite(s): ARCH1502, ARCH1506, ARCH1534
(6 C: 2 lect/pres, 4 lab, 0 other)

ARCH 1513 - Estimating and Construction Fundamentals I - Modified Course for Tech Prep
This course will give the student the basics of construction practices, techniques, estimating and construction problem solving. The excavation, footings, foundations, floor framing, wall framing, and roof framing of residential building will be emphasized. The uniform building code and regulations will be the benchmark. Some writing and class participation are required.
NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement.
This variable course is designed to allow students with Tech Prep College credit for ARCH 1513 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (ARCH 1513) will be delivered concurrently with ARCH 1514.
(3 C: 0 lect/pres, 0 lab, 0 other)

ARCH 1514 - Estimating and Construction Fundamentals I
This course will give the student the basics of construction practices, techniques, estimating and construction problem solving. The excavation, footings, foundations, floor framing, wall framing, roof framing of residential building will be emphasized. The uniform code and regulations will be the benchmark. Some writing and class participation are required.
Prerequisite(s): ARCH1514
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 1515 - Introduction to Cultural Anthropology
Meets MN Transfer Goals 5 and 8 - History/Social, Behavioral Sciences and Global Perspective.
Students will learn and apply anthropology concepts and methods as tools for self-understanding, and for understanding others. The course will focus on ways anthropology can be applied to workplace cultures and to understanding the world we live in.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ARCH 1518 - Estimating and Construction Fundamentals II
This course will give the student the basics of construction practices, techniques, estimating and construction problem solving. The interior finishes, roof systems, stairways, fireplaces, thermal, moisture, and ventilation of residential building will be emphasized. The uniform building code and regulations will be the benchmark. Some writing and class participation are required.
Prerequisite(s): ARCH1514
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 1522 - Residential Design Principles
Students will learn individual room design, placement of rooms on the floor plan, architectural history of house styles and criteria to determine good exterior and interior principles of design.
(2 C: 2 lect/pres, 0 lab, 0 other)

ARCH 1526 - Residential Materials and Methods I
Students will learn the use of building materials such as, concrete, windows, doors, lumber and wood products. Also the principles of reading residential blueprints.
(2 C: 1 lect/pres, 1 lab, 0 other)

ARCH 1530 - Residential Materials and Methods II
Students will learn the use of building materials for residential construction, such as concrete blocks, bricks, stones, heating systems, solar systems, and architectural history.
Prerequisite(s): ARCH1526
(2 C: 1 lect/pres, 1 lab, 0 other)

ARCH 1534 - Residential Design and Presentation
Students will learn different architectural history of house styles, remodeling design, pencil and colored rendering and to help build on good principles of design. Student will also learn oral and written communication to help them present their projects.
Prerequisite(s): ARCH1522
(2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ARCH 2502 - Kitchen and Bath Remodeling and Design
Students will study design principles, construction methods, and products that are involved in the kitchen and bath business. Basic graphic presentation techniques will assist the student in entering careers as kitchen and bath design/sales specialists. Students will produce a remodeled plan for an actual kitchen and bath of their choice. Skills in product selection, ordering, project pricing, customer relations, and contracts will also be developed.
Prerequisite(s): ARCH5102
(2 C: 1 lect/pres, 1 lab, 0 other)

ARCH 2506 - Architectural Design Studio I
This course is an introduction to light commercial drafting procedures. Students will develop working drawings for a small commercial building utilizing pole frame, slab on grade construction. Details will also be developed for a commercial building utilizing masonry wall systems. Emphasis is placed on drawing details that meet ADA requirements. Other topics include hand sketching, shop drawings, commercial detailing, and sectioning principles.
Prerequisite(s): ARCH1502
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2510 - Architectural CAD II
This course will enable students to use their knowledge of construction materials, systems and practices by drafting the working drawings of a split-level home or twin home. Students will use AutoCAD software to produce the documents necessary for industry standard communication and construction.
Corequisite(s): ARCH2522, ARCH2530
Prerequisite(s): ARCH1506
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2514 - Architectural Design Studio II
This course will enable students to create presentation drawings that will help your customer and other concerned people understand proposed building projects. Preliminary drawings, perspectives, and enhanced elevations will be prepared.
Corequisite(s): ARCH2518
Prerequisite(s): ARCH1510, ARCH2506, ARCH2522
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2518 - Architectural CAD III
This course enables the student to draft the complete working drawings of a commercial remodeling project and a small commercial building using AutoCAD software. The student will select the appropriate building materials and systems to demonstrate their construction knowledge and understanding of project design requirements.
Corequisite(s): ARCH2514
Prerequisite(s): ARCH2510, ARCH2506
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2522 - Commercial Design Principles and Practice
This course is designed to provide students the principles of design as they apply to multi-family housing and light commercial construction. Topics of study will include aesthetics, building accessibility requirements for ADA (Americans with Disabilities Act), system selections, durability and selected fire and life-safety provisions of the Uniform Building Code. Students will study commercial design by reading and analyzing blueprints, specifications and bidding documents from actual commercial projects. Emphasis is placed on reading and understanding commercial working drawings.
Prerequisite(s): ARCH1526
(2 C: 1 lect/pres, 1 lab, 0 other)

ARCH 2526 - Construction Estimating Analysis I
This course will enable the students to estimate residential construction. Students will be required to apply piecework material takeoffs for woodframe construction. Emphasis is placed on accuracy of measurement, correct description of items, logical sequence of quantity takeoff and presentation of required building materials. Complete estimates for residential projects will be established.
Prerequisite(s): ARCH1518
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2530 - Building Systems
This course is designed to provide students with industry standards, manufacturer’s specifications, distribution methods and use of various building material systems as organized in the CSI format. Specific areas of study include thermal and moisture protection, interior finish products, commercial doors and windows, masonry and selected mechanical building systems. Emphasis is placed on selection of systems for durability, design, code compliance, and cost and life of building considerations.
(2 C: 2 lect/pres, 0 lab, 0 other)

ARCH 2534 - Construction Management and Contracting
Students will be introduced to the principles of the construction industry, and the phases of the construction process. Students will examine management systems used in construction. Areas of study will include: project manager duties, contract documents, bid process, project scheduling, as well as materials and methods used in the industry.
Prerequisite(s): ARCH2522, ARCH2526
(2 C: 2 lect/pres, 0 lab, 0 other)

ARCH 2538 - Construction Estimating Analysis II
This course will introduce the student to commercial estimating concepts. Application of linear, square, and cubic measurements and their relationships to the estimating process will be studied. Timberline estimating software will be introduced and used for residential and commercial applications. The application of the Minnesota Energy Code in residential and commercial construction will be studied.
Prerequisite(s): ARCH2526, ARCH2522
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2542 - Structural Building Systems
Statics and strengths of construction materials are presented. Structural and architectural elements in soil mechanics, structural wood, concrete, steel, prestressed and post tensioned concrete are they primary emphasis. Students will develop skills in using basic structural formulae and procedures. Students will also learn procedures for producing shop drawings for various materials.
Prerequisite(s): ARCH1530
(3 C: 1 lect/pres, 2 lab, 0 other)

ARCH 2550 - Professional Constructor Seminar
This course will enable students to prepare a resume, letters of application, and a portfolio. Students will also study and practice interviewing techniques and do oral presentations. Students will practice the behaviors, attitudes, and ethics expected of the constructor by society and the business world will also be studied. Business forms and laws pertaining to contractors and their customers will be studied.
(2 C: 2 lect/pres, 0 lab, 0 other)

ART 1320 - Beginning Drawing
Meets MN Transfer Goal Area 6 - The Humanities
This course introduces students to the basic elements of drawing. Students will experiment with a variety of techniques, styles and media, while developing perceptual awareness, eye/hand coordination, and an increased appreciation of art.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ASTR 1300 - Astronomy
Meets Mn Transfer Goal 3 - Natural Sciences.
This is an introductory astronomy course designed for non-science majors. This course presents astronomy in a cosmic context. The course starts with an overview of the evolving universe that is used during the entire course to develop an integrated understanding of astronomy and an appreciation for science. This course emphasizes key physical concepts that enable students to understand how science can explain the phenomena they see in their daily lives and how these are connected to the processes that govern the cosmos. Topics include our emerging understanding of galaxy evolution, starbursts, quasars, intergalactic clouds and dark matter. In addition, we will compare each of the planets to develop a deeper understanding of our solar system, our own world, our relationship to the cosmos and the prospects for life elsewhere in the universe.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

AUTO 1508 - Automotive Wheel Alignment
Students in this course will study and apply specific geometric angles and their terms as used in four-wheel alignment. Students will become familiar with the latest technologies and equipment used to measure and correct these angles. Steering and suspension system nomenclature and theory of operation will also be discussed, as well as the diagnosis of abnormal tire wear, undesirable handling characteristics, noises, sag and other steering and suspension problems. The focus of this course is understanding and correcting alignment angles, theory and operation of suspension and steering systems and maintenance/repair of suspension and steering systems.
Prerequisite(s): TRAN1502
(4 C: 1 lect/pres, 3 lab, 0 other)

AUTO 1509 - A6: Automotive Electrical/Electronic Systems
In this course the student will learn the basics of electricity and electronics. The student will study the sources of electricity, circuits, magnetism, resistance, voltage and amperage. Students will learn about diodes, transistors and solid-state devices. Lab work will give the students hands-on experience with digital meters, power supplies and oscilloscopes. This course also covers the operation, service techniques and diagnosis of most types of body electrical components. The student will learn about starter and alternator testing and replacement. The lab work will develop skills in repairing today's high tech accessories.
(4 C: 2 lect/pres, 2 lab, 0 other)

AUTO 1510 - Chassis Electrical
This course covers the operation, service techniques and diagnosis of most types of body electrical components. The student will learn about starter and alternator testing and replacement. The lab work will develop skills in repairing today's high tech accessories.
Prerequisite(s): TRAN1504
(4 C: 2 lect/pres, 2 lab, 0 other)

AUTO 1512 - Engine Repair Theory
This course will cover principles of operation and diagnosis of automotive engines including construction, parts identification, engine disassembly and reassembly procedures. Students will learn how to analyze the internal parts and determine the necessary repairs.
Prerequisite(s): AUTO1514
(2 C: 2 lect/pres, 0 lab, 0 other)

AUTO 1514 - Engine Repair Lab
This course will be primarily lab work and will give the student hands-on experience in engine repair and diagnose engine failures. The student will identify internal parts, perform wear measurements, rebuild cylinder heads and engine block.
Prerequisite(s): AUTO1512
(4 C: 0 lect/pres, 4 lab, 0 other)

AUTO 1516 - Brakes
The students will learn the use of brake hydraulic systems. Students will repair disc, drum brakes and power assist units. The operation and repair of antilock brake systems will also be taught.
Prerequisite(s): TRAN1502
(4 C: 1 lect/pres, 3 lab, 0 other)

AUTO 1522 - A8 Engine Performance
Students will develop skills in basic engine performance on gasoline four stroke engines. Lab work consists of typical service, repair and diagnosis procedures on ignition, fuel, emissions and related electrical systems on late model vehicles. Students should be able to describe system operation and perform engine performance and fuel system service in accordance with manufacturer's procedures.
Prerequisite(s): TRAN1504, TRAN1516
(4 C: 2 lect/pres, 2 lab, 0 other)

AUTO 1523 - Advanced Chassis Electrical
Students will develop a fundamental understanding of vehicle electronic control units controlling Anti-locking brake, supplemental restraint, and tire pressure monitoring systems. Lab work consists of using scan tools for service, repair and diagnosis on these electronic/mechanical systems on late model vehicles. Students should be able to describe system operation and perform service in accordance with manufacturer’s procedures.
Prerequisite(s): TRAN1504, TRAN1516
(2 C: 1 lect/pres, 1 lab, 0 other)

AUTO 2502 - Engine Performance I
Students will develop skills in basic engine performance on gasoline four stroke engines. Lab work consists of typical service, repair and diagnosis procedures on ignition, fuel, emissions and related electrical systems on late model vehicles. Students should be able to describe system operation and perform engine performance service in accordance with manufacturer’s procedures.
(4 C: 2 lect/pres, 2 lab, 0 other)

AUTO 2505 - Engine Performance II
Students will develop skills servicing fuel systems and computer control systems. Lab work consists of typical service, repair and diagnosis procedures on fuel and computer systems on late model vehicles. Students should be able to describe system operation and perform fuel system service in accordance with manufacturer’s procedures. Students should be able to describe computer and sensor operation and perform computer system service in accordance with manufacturer’s procedures.
Prerequisite(s): TRAN1502, TRAN1504, TRAN1516
(5 C: 3 lect/pres, 2 lab, 0 other)

AUTO 2506 - Principles of Torque Transfer
How engine torque is transferred to the wheels is the focus of this comprehensive drive train course. Students will study the theory of torque multiplication and division, applying it to all automotive and light truck applications. Operation and repair of manual transmissions and transaxles, transfer cases, differentials, propeller shafts and front driving axles will be the main topic. This course includes All Wheel Drive and Four Wheel Drive applications. All aspects of driveline repair on automotive and light truck applications will be practiced, with the exception of automatic transmission and transaxle overhaul.
Prerequisite(s): AUTO1510, TRAN1504, TRAN1502
(7 C: 2 lect/pres, 5 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
AUTO 2511 - Automatic Transmission and Transaxle Overhaul
Advancements in the electronic control of automatic transmissions and transaxles require a good understanding of the hydraulic, mechanical, and electronic functions of these units in order to accurately diagnose some driveability problems. In this course students will study and apply the operation, repair, diagnosis and overhaul of automatic transmissions and transaxles. Students will be exposed to the latest tools required to repair or overhaul them as well as the scan tools needed to diagnose them. 
Prerequisite(s): TRAN1502, AUTO2506, AUTO1510
(3 C: 1 lect/pres, 2 lab, 0 other)

AUTO 2512 - Driveline Repair
This lab course offers the opportunity for students to advance further in the techniques and procedures of diagnosing and repairing driveline failures including automatic transmission and transaxle overhaul. 
Corequisite(s): AUTO2511
Prerequisite(s): AUTO2506, AUTO1510, TRAN1502
(3 C: 0 lect/pres, 3 lab, 0 other)

AUTO 2516 - Automotive Heating and Air Conditioning
This course covers the operation, testing and repairs of manual and automatic systems. The student will learn about vacuum, electronic controls and airflow distribution. 
Corequisite(s): TRAN2514
(2 C: 0 lect/pres, 2 lab, 0 other)

AUTO 2520 - Engine Driveability
Students will learn the basic systems approach to diagnosing engine performance problems. Lab work consists of using oscilloscopes, lab scopes, DVOM meters and scan tool usage when repairing engine performance problems on today’s vehicles. Students should be able to perform engine performance service in accordance with manufacturer’s procedures. 
Prerequisite(s): AUTO2502, AUTO2505
(3 C: 1 lect/pres, 2 lab, 0 other)

AUTO 2523 - Advanced Electronic Systems
Students will develop a fundamental understanding of vehicle electronic control units controlling automatic transmissions, automatic air conditioning and Data line systems. Lab work consists of using scan tools for service, repair and diagnosis on these electronic/mechanical systems on late model vehicles. Students should be able to describe operation and perform service in accordance with manufacturer’s procedures. 
Prerequisite(s): TRAN1504, TRAN1516
(2 C: 1 lect/pres, 1 lab, 0 other)

AUTO 2538 - Supervised Internship
Students will work in a sponsoring automotive service facility. The work will be full time, approximately 40 hours per week. The tasks will be consistent with previous course work. This is a variable credit experience. Students may earn 1 to 4 credits. Course goals vary with the number of credits. 
( C: 0 lect/pres, 0 lab, 0 other)

BLGY 1305 - Environmental Science
Meets MN Transfer Goals 3 and 10 - Natural Sciences and People and the Environment
This course in environmental science studies the impact of humankind’s activities on the planet. Class discussion and interaction will be encouraged. The problems and issues which the course will be dealing with are difficult and complex. The instructor promises no easy answers to these challenges. 
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score. 
(4 C: 3 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
BUSM 1230 - Microsoft Word
This course instructs students in the theories and practical applications of Microsoft Word. Students will learn to create, edit, save and print simple business documents including letters, memos, reports, and table.  
(2 C: 1 lect/pres, 1 lab, 0 other)

BUSM 1256 - Web Site Management
Web Site Management will introduce the development, maintenance and publication of a Web site. Students will create, view, and edit Web pages insert and edit text and pictures; import and export files; and add, test, and repair hyperlinks to and within pages.  
Prerequisite(s): CPTTR1300, ADMS1203  
(2 C: 1 lect/pres, 1 lab, 0 other)

BUSM 1260 - Applied Business Mathematics/Calculators
This course covers applications of mathematics functions to the solution of business problems using a 10-key calculator. The touch method of calculator operation will be used with emphasis on speed and accuracy.  
(3 C: 2 lect/pres, 1 lab, 0 other)

BUSM 1266 - Introduction to Business - Modified Tech Prep Course
This course is designed to provide students with an overview of business functions in the United States. It will discuss the responsibilities of business to the economy, employees, environment and the government. NOTES: For details of topics covered in the high school variable course, please refer to the appropriate Tech Prep College Credit agreement. This variable course is designed to allow students with Tech Prep College Credit for BUSM 1266 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (BUSM 1266) will be delivered concurrently with BUSM 1267.  
( C: 0 lect/pres, 0 lab, 0 other)

BUSM 1267 - Introduction to Business
This course is designed to provide students with an overview of business functions in the United States. It will discuss the responsibilities of business to the economy, employees, environment and the government.  
(2 C: 2 lect/pres, 0 lab, 0 other)

BUSM 1274 - Business Law - Modified Course for Tech Prep
This course is an introduction to the principals of law as they apply to citizens and businesses. Topics include the court system, legal system, contracts, negotiable instruments, employer/employee relationships, and tenant/landlord laws. NOTES: For details of topics covered in the high school variable course please refer to appropriate advanced standing articulation agreement. This variable course is designed to allow students with Advanced Standing credit for BUSM 1274 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (BUSM 1274) will be delivered concurrently with BUSM 1275.  
( C: 0 lect/pres, 0 lab, 0 other)

BUSM 1275 - Business Law
This course is an introduction to the principals of law as they apply to citizens and businesses. Topics include the court system, legal system, contracts, negotiable instruments, agency and employer/employee relationships.  
(2 C: 2 lect/pres, 0 lab, 0 other)

BUSM 1290 - Job Seeking/Keeping Skills
This course offers an individualized approach to developing job seeking and keeping skills. Students will create resumes, write job application letters, complete a job application form, and prepare for the employment interview. Consideration will also be given to critical attitudes needed for job keeping.  
(1 C: 1 lect/pres, 0 lab, 0 other)

CACE 1400 - Professional Relations in CACE Careers
This course explores career opportunities for working with people in a variety of programs. This course also examines job requirements, duties, regulations, and issues, skills, and personal characteristics for becoming successful professionals in child and adult care and education.  
(3 C: 3 lect/pres, 0 lab, 0 other)

CACE 1401 - Professional Relations in CACE Careers - Modified course for Tech Prep
This course explores career opportunities for working with people in a variety of programs. This course also examines job requirements, duties, regulations, and issues, skills, and personal characteristics for becoming successful professionals in child and adult care and education. NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep College credit for CACE 1401 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CACE 1401) will be delivered concurrently with CACE 1400.  
( C: 0 lect/pres, 0 lab, 0 other)

CACE 1404 - Safety, Health and Nutrition
This course will guide the student in obtaining skills needed to establish and maintain a physically and psychologically safe and healthy environment for young children. Topics include preventing illness and accidents, handling emergencies, providing health, safety, and nutrition educational experiences, meeting children’s basic nutritional needs, child abuse, and current health related issues.  
T HIS COURSE DOES NOT INCLUDE CPR OR FIRST AID CERTIFICATION.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(3 C: 3 lect/pres, 0 lab, 0 other)

CACE 1419 - Foundations of Development - Modified Course for Tech Prep
This course provides an overview of typical and atypical development across cultures, from prenatal through late adult, including physical, social/emotional, and cognitive development. It integrates developmental theory with appropriate practices in a variety of caregiving and education settings. NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep College Credit for CACE 1419 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course will be delivered concurrently with CACE 1420.  
( C: 0 lect/pres, 0 lab, 0 other)

CACE 1420 - Foundations of Development
This course provides an overview of typical and atypical development across cultures, from prenatal through late adult, including physical, social/emotional, and cognitive development. It integrates developmental theory with appropriate practices in a variety of caregiving and education settings.  
T HIS COURSE DOES NOT INCLUDE CPR OR FIRST AID CERTIFICATION.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(3 C: 3 lect/pres, 0 lab, 0 other)

CACE 1422 - Profiles of the Exceptional Child
This course provides an overview of a variety of disabilities and handicapping conditions that might affect a child’s growth and development. It provides caregiving and classroom strategies to promote inclusion of all children in their communities.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(3 C: 3 lect/pres, 0 lab, 0 other)

CACE 1424 - School-Age Strategies for Learning
This course provides an overview of school-age theory and development in home or center-based settings. Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective caregiving, teaching strategies and observation methods.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(3 C: 3 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.

| CACE 1426 | Children with Difficult Behaviors                                             | This course helps students understand children’s behavior problems and identify intervention strategies to prevent and resolve problem behavior, use behavior modification techniques effectively, and design behavior plans.  
Prerequisite(s): CACE1420, CACE1440  
(3 C: 3 lect/pres, 0 lab, 0 other) |
| CACE 1428 | Family and Community Relations                                                | This course helps child care providers increase their understanding of diverse families and provides an opportunity to examine how current societal and community issues impact the development of children and the well-being of families.  
The changing role and structure of families will be explored. Other topics related to families include cultural diversity/dynamics, bias, public education, housing, employment, crime, health care, legal services, and social services.  
(3 C: 3 lect/pres, 0 lab, 0 other) |
| CACE 1440 | Guidance: Managing the Physical and Social Environment                        | This course provides an exploration of the physical and social environments that promote learning and development. It includes an introduction to basic guidance techniques for individual and group situations. Emphasis on problem-prevention and positive guidance strategies; recognition, communication, limit setting, problem-solving.  
(3 C: 3 lect/pres, 0 lab, 0 other) |
| CACE 1444 | Planning and Implementing Curriculum                                          | This course examines the role of the teacher in early childhood settings. It applies the knowledge of child development as it relates to individual children, communities, curriculum and communication activities.  
(3 C: 3 lect/pres, 0 lab, 0 other) |
| CACE 1448 | Literature and Language Development Experiences                               | This course provides an overview of language and literacy learning experiences in either home or center-based settings. Students will integrate knowledge of children’s language development, learning environments, and teaching methods to select, present, and evaluate literature experiences, and to promote literacy and conversation.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(3 C: 3 lect/pres, 0 lab, 0 other) |
| CACE 1460 | Internship I                                                                   | This course gives the students the opportunity to observe, practice, and apply skills and techniques at an introductory level. These opportunities will take place in a variety of supervised placements.  
Prerequisite(s): CACE1400, CACE1420, EMSC1404 or concurrent registration, MATH0380 or Appropriate Accuplacer Score.  
(3 C: 1 lect/pres, 0 lab, 2 other) |
| CACE 1464 | Internship II                                                                  | This course provides an opportunity to apply knowledge and skill in caregiving and/or education settings. Students will observe and assess behavior, facilitate free choice activities, implement adult-oriented learning experiences, and maintain professional relationships.  
Prerequisite(s): CACE1400, CACE1420, CACE1404, CACE1440  
(3 C: 1 lect/pres, 0 lab, 2 other) |
| CACE 1470 | Professional and Leadership Development                                        | This course focuses on the importance of professional organizations and community service. The course allows a student to develop self-confidence, practice leadership and management skills while involved in professional organizations.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(1 C: 1 lect/pres, 0 lab, 0 other) |
| CACE 1473 | Strategies in Reading for the Paraprofessional                                | This course combines an understanding of how children learn Reading and how to promote that learning by supporting the instruction of the classroom teacher.  
Prerequisite(s): READ0304 or Appropriate Accuplacer Score.  
(2 C: 2 lect/pres, 0 lab, 0 other) |
| CACE 1474 | Strategies in Math for Paraprofessionans                                      | This course combines an understanding of how children learn Math and how to promote that learning by supporting the instruction of the classroom teacher.  
Prerequisite(s): MATH0480 or Appropriate Accuplacer Score.  
(2 C: 2 lect/pres, 0 lab, 0 other) |
| CACE 1476 | Writing Strategies for Paraprofessionans                                      | This course combines an understanding of how children learn Writing and how to promote that learning by supporting the instruction of the classroom teacher.  
(1 C: 1 lect/pres, 0 lab, 0 other) |
| CACE 1478 | Technology Strategies for Paraprofessionans                                   | This course combines an understanding of how children learn to use Technology and also Assistive/Augmentative Technology; and how to promote that learning by supporting the instruction of the classroom teacher.  
(1 C: 1 lect/pres, 0 lab, 0 other) |
| CACE 1480 | Caring for Children with Special Health Needs                                 | This course introduces terminology and basic concepts of care related to children with special medical needs. The purpose of this course is to provide some basic knowledge and information on a variety of medical disabilities and how these medical issues affect a child’s care. Some of these disabilities may require short-term intervention and support, while other disabilities are a lifelong challenge. This information is designed to give a framework of information the student can build upon.  
(2 C: 2 lect/pres, 0 lab, 0 other) |
| CADD 1502 | Mechanical CADD I                                                              | Students will develop knowledge of system configuration and operation of interactive graphics software and will input drafting commands to develop drawings, store data and output drawings to the plotter for hard copy.  
(3 C: 1 lect/pres, 2 lab, 0 other) |
| CADD 1507 | Mechanical CADD II                                                             | This course is a further study of Computer Aided Drafting. Students will input drawings using absolute, relative and polar coordinates and will examine advanced CAD capabilities such as libraries, attributes, isometric drawing, and 3D drawing.  
Prerequisite(s): CADD1502  
(3 C: 1 lect/pres, 2 lab, 0 other) |
| CADD 1511 | CADD Applications - Modified Course for Tech Prep                            | This course will provide students with additional practice in the fundamentals of multi-view drawings, along with the fundamentals of dimensioning standard machine elements, dimensional notes and functional drawing dimensioning. Students will create component part drawings using 2D and solid modeling software. NOTES: For details of topics covered in Principles of Engineering PLTW 1502, please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep College credit for PLTW 1502 that was earned in high school to complete the remaining course requirements for CADD 1511 at SCTC. This SCTC course (CADD 1511) will be delivered concurrently with CADD 1512.  
(0 C: 0 lect/pres, 0 lab, 0 other) |

**PLEASE NOTE:** All program plans are preliminary and curriculum may change without notice.
CADD 1512 - CADD Applications
This course provides students with additional practice in the fundamentals of multi-view drawings, along with the fundamentals of dimensioning standard machine elements, dimensional notes and functional drawing dimensioning. Prerequisite(s): CADD1502 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 1516 - CADD Applications II
This course provides information for completing engineering drawings including design layouts, geometric construction, fasteners, tolerances and fits using 2D and solid modeling software. Prerequisite(s): CADD1507, CADD1512 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 1521 - Applied Physics - Modified Course for Tech Prep
The student will study the principles of force, motion, acceleration, deceleration, work, power, energy, thermodynamics and the properties of solids, liquids, and gases. They will apply this knowledge through experimentation and problem solving. NOTES: For details of topics covered in Principles of Engineering PLTW 1502, please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep College credit for PLTW 1502 that was earned in high school to complete the remaining course requirements for CADD 1521 at SCTC. This SCTC course (CADD 1521) will be delivered concurrently with CADD 1522. (C: 0 lect/pres, 0 lab, 0 other)

CADD 1522 - Applied Physics
The student will study the principles of force, motion, acceleration, deceleration, work, power, energy, thermodynamics and the properties of solids, liquids and gases. They will apply this knowledge through experimentation and problem solving. Prerequisite(s): TECH1522 (4 C: 1 lect/pres, 3 lab, 0 other)

CADD 2505 - Production CADD I
This course will provide students with the techniques to do sketches of objects as well as advanced drawings consisting of sections, auxiliary views, and the application of finish marks using 2D and solid modeling software. Prerequisite(s): CADD1516 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2509 - Production CADD II
This course will provide students with the knowledge and skills to create bolted and welded assembly drawings using 2D and solid modeling software. Prerequisite(s): CADD2505 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2510 - Design Concepts
Students will examine the relationships between product functions, design, quality control and manufacturing techniques. Students will discuss and apply practical geometric, dimensioning to industry drawings. Corequisite(s): CADD2514, CADD2522 Prerequisite(s): CADD2509 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2514 - Computer-Aided Design
This course deals with constructing a drawing portfolio for a completed design. Detail and design drawings are developed with emphasis on accuracy, tolerances, surface finishes, notes, system design and symbol diagrams. Corequisite(s): CADD2510, CADD2522 Prerequisite(s): CADD2509 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2517 - Statics and Strength of Materials - Modified Course for Tech Prep
Statics is an area of study concerned with determining the magnitude and direction of forces acting upon or generated by machine components. Strength of materials involves calculating stress, strain, and modulus of elasticity to determine material to be used and size of structural members. NOTES: For details of topics covered in Principles of Engineering PLTW 1502, please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep College credit for PLTW 1502 that was earned in high school to complete the remaining course requirements for CADD 2517, at SCTC. This SCTC course will be delivered concurrently with CADD 2518. (C: 0 lect/pres, 0 lab, 0 other)

CADD 2518 - Statics and Strength of Materials
Statics is an area of study concerned with determining the magnitude and direction of forces acting upon or generated by machine components. Strength of materials involves calculating stress, strain, and modulus of elasticity to determine material to be used and size of structural members. (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2522 - Machine Design
This course will examine the design and function of common machine elements, such as bearings, shafts, belts and chain drives, lubrication, fasteners and springs. Students will also consider more comprehensive design problems in the area of machine design. Upon completion of this course the student will have an understanding of the broad field of activities identified by the term "Machine Design". Corequisite(s): CADD2510, CADD2514 Prerequisite(s): CADD2518 (3 C: 1 lect/pres, 2 lab, 0 other)

CADD 2529 - Manufacturing Systems
This course will provide many opportunities to study the basic elements of manufacturing as a managed body of activities. These basic elements are arranged under two major categories: materials and processing and management. (2 C: 0 lect/pres, 1 lab, 1 other)

CADD 2531 - Geometric Dimensioning and Tolerancing
Students will examine the relationships between product functions, design, quality control and manufacturing techniques. Students will discuss and apply practical geometric dimensioning to industry drawings. Prerequisite(s): CADD1516 (1 C: 0 lect/pres, 1 lab, 0 other)

CADD 2541 - Basic CAM
This course will emphasize the function of Computer-Aided Manufacturing software (CAM), and the application of computer generated machining data. Prerequisite(s): CADD1502 (2 C: 0 lect/pres, 2 lab, 0 other)

CADD 2542 - Reverse Engineering
This course will enhance the student’s ability to use various forms of inspection devices. Students will sketch and document finished part data. Students will create assembly and detailed piece part drawing. Creation of these drawings will help build a portfolio of engineering documents for job interviews. Prerequisite(s): CADD2509 (2 C: 0 lect/pres, 2 lab, 0 other)

CADM 3502 - CMM Operations
Student will setup and perform flexible gauging operations on a stand-alone coordinate measuring machine (CMM). Inspection of piece-parts and fixtures will be done on the three axes. Students will do part-to-print inspection. Piece-parts and matching prints drawn in conventional and geometric dimensioning will be inspected to size and location tolerances, as well as other tolerancing such as runout, form and orientation where applicable. Prerequisite(s): CADD2531 (2 C: 1 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
CARP 1505 - Construction Tools - Modified Course for Tech Prep
This course will enable students to identify, properly use and maintain carpenter hand, portable tools, machines and equipment. Skills development, safety, OSHA requirements and work practices are stressed. Construction equipment is studied and utilized as lab and projects warrant. Construction equipment is studied and utilized as lab and projects warrant. Construction equipment is studied and utilized as lab and projects warrant. This variable course is designed to allow student with Advanced Standing credit for CARP 1505 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CARP 1505) will be delivered concurrently with CARP 1506.
(C: 0 lect/pres, 0 lab, 0 other)

CARP 1506 - Construction Tools, Equipment and Machines
This course will enable you to identify, properly use and maintain carpenter hand, portable tools, machines and equipment. Skill development, OSHA requirements and work practices are stressed. Construction equipment is studied and utilized as lab and projects warrant. (3 C: 0 lect/pres, 3 lab, 0 other)

CARP 1513 - Blueprint Reading and Estimating - Modified Course for Tech Prep
This course will enable students to develop skills in reading the UBC Building Codes for residential construction and applying them to blueprints. The course concentrates on the lines, symbols and abbreviations to read and understand the pages of residential blueprints. Knowledge of building codes will be stressed. NOTES: For details of topics covered in the high school variable course please refer to the appropriate advanced standing articulation agreement. This variable course is designed to allow students with Tech Prep college credit for CARP 1513 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CARP 1513) will be delivered concurrently with CARP 1514.
(C: 0 lect/pres, 0 lab, 0 other)

CARP 1514 - Blueprint Reading and Estimating
This course will enable students to develop skills in reading the UBC Building Codes for residential construction and applying them to blueprints. The course concentrates on the lines, symbols and abbreviations to read and understand the pages of residential blueprints. Materials and estimating will be part of the student’s studies.
(3 C: 1 lect/pres, 2 lab, 0 other)

CARP 1519 - Construction Principles - Modified Course for Tech Prep
This course will enable the student to learn about materials and methods for framing floors, walls, and rafters for residential and light commercial construction. The course will cover terms, techniques and layouts used. Estimating and materials used will also be emphasized. NOTES: For details of topics covered in the high school variable course please refer to the appropriate advanced standing articulation agreement. This variable course is designed to allow student with Advanced Standing credit for CARP 1519 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CARP 1519) will be delivered concurrently with CARP 1520.
(C: 0 lect/pres, 0 lab, 0 other)

CARP 1521 - Construction Principles
This course will enable the student to learn about materials and methods for framing floors, walls, and rafters for residential and light commercial construction. The course will cover terms, techniques and layouts used. Estimating and materials used will also be emphasized. Installation of doors and windows, roofing and siding will be covered.
(4 C: 1 lect/pres, 3 lab, 0 other)

CARP 1524 - Rafters and Stairs
This course will enable the student to learn about materials and methods for framing floors, walls, and rafters for residential and light commercial construction. Rafter framing of different roof systems will be emphasized. Straight stairs, hand railings, terms, techniques and layout will be emphasized. Prerequisite(s): CARP1506, CARP1514, CARP1521
(4 C: 2 lect/pres, 2 lab, 0 other)

CARP 1525 - Exterior/Interior Finish - Modified Tech Prep Course
This course will enable students to examine types, styles and applications of sidings, roofing treatments and finishes. This class will also cover insulation, paneling and wallboard applications as well as interior finishes and woodwork. NOTES: For details of topics covered in the high school variable course, please refer to the appropriate Tech Prep College Credit agreement. This variable course is designed to allow student with Tech Prep College Credit for CARP 1525 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CARP 1525) will be delivered concurrently with CARP 1527.
Prerequisite(s): CARP1506, CARP1514, CARP1521
(C: 0 lect/pres, 0 lab, 0 other)

CARP 1527 - Exterior/Interior Finish
This course will enable students to examine types, styles and applications of sidings, roofing treatments and finishes. This class will also cover insulation, paneling and wallboard applications as well as interior finishes and woodwork.
Prerequisite(s): CARP1506, CARP1514, CARP1521
(3 C: 1 lect/pres, 2 lab, 0 other)

CARP 1529 - Building Layout and Concrete
This course will enable students to cover building layout terms and techniques using builder and laser levels. Students will find property lines, building lines, and layout a basement for a house. The course will also cover types of foundations, and materials used in foundations. Concrete will also be emphasized as a building material. Students will also develop skills in forming and pouring concrete flatwork like sidewalks, driveways, steps and floor slabs. The course will concentrate on the make-up of concrete, tools used, safety and techniques used in the industry.
Prerequisite(s): CARP1506, CARP1514
(4 C: 1 lect/pres, 3 lab, 0 other)

CARP 1530 - Residential Drafting and Design
This course will enable students to study residential housing design characteristics and the factors that determine or affect them. The class will cover factors such as age, family size, lifestyles, etc. and how housing design can enhance them. Students will be able to design and analyze using Softplan.
Prerequisite(s): CARP1514
(2 C: 0 lect/pres, 2 lab, 0 other)

CARP 1535 - Cabinet Building and Estimating - Modified Tech Prep Course
This course will enable students to study design and construction fundamentals and techniques. Students also learn materials, hardware and finishing skills for custom made residential cabinetry. Estimating of materials will also be included. Basic drafting principles will apply.
NOTES: For details of topics covered in the high school variable course, please refer to the appropriate Tech Prep College Credit agreement. This variable course is designed to allow students with Tech Prep College Credit for CARP 1535 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CARP 1535) will be delivered concurrently with CARP 1536.
( C: 0 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
CARP 1536 - Cabinet Building and Estimating
This course will enable students to study design and construction fundamentals and techniques. Students also learn materials, hardware and finishing skills for custom made residential cabinetry, estimating of materials will also be included. Basic drafting principles will apply. Corequisite(s): CARP1506, CARP1514
(5 C: 2 lect/pres, 3 lab, 0 other)

CARP 2502 - Concrete II
This course will enable the student to analyze terms, materials and techniques used to form, reinforce and pour foundation, footings and walls. Prerequisite(s): CARP1529
(2 C: 1 lect/pres, 1 lab, 0 other)

CARP 2506 - Residential Framing II
This course will enable students to analyze and use their knowledge to select materials and layout methods. Advanced methods of framing floors and walls will also be emphasized. Students will also use these skills on a residential structure. Prerequisite(s): CARP1521, CARP1524, CARP1506, CARP1514
(4 C: 2 lect/pres, 2 lab, 0 other)

CARP 2510 - Stair Building
The student will study fundamental and advanced methods of stair building. This will include calculations, layout, and terminology related to stair building. This course will enable the students to study design, style, and safety of various stairs. The course will include layout and construction of several styles of stairs. Prerequisite(s): CARP1524, CARP1506, CARP1514, CARP1521
(2 C: 1 lect/pres, 1 lab, 0 other)

CARP 2518 - Exterior Finish
This course will enable the student to develop skills used to properly install windows, exterior doors, shingles, soffits and siding. Prerequisite(s): CARP1521, CARP1527, CARP1506, CARP1514
(3 C: 1 lect/pres, 2 lab, 0 other)

CARP 2522 - Interior Finish
This course will enable the student to study methods of finishing the interior of a house; from insulation and gypsum board; to hanging doors and installing trim. Finish skills will also include: wood flooring, underlayment, shelving, and cabinet installation. Prerequisite(s): CARP1527, CARP1506, CARP1514, CARP1521
(3 C: 1 lect/pres, 2 lab, 0 other)

CARP 2524 - Residential Construction Lab I
This course will enable the student to use the construction skills and techniques he/she has developed to build a residence as needed. Course will focus on framing and exterior finishes. Prerequisite(s): CARP1524, CARP1506, CARP1514, CARP1521
(5 C: 0 lect/pres, 5 lab, 0 other)

CARP 2530 - Cabinet Building II
This course will enable the student to analyze, design, layout, and construct wall and base cabinets for a house project. Consideration will be given to kitchen shape and workability along with materials, finishes, and countertops. Prerequisite(s): CARP1506, CARP1514, CARP1536
(4 C: 1 lect/pres, 3 lab, 0 other)

CARP 2534 - Construction Management
This course will enable the student to study the needs and requirements of a contractor as he/she runs the business. The course will concentrate on job site management, business management and the personal skills needed for a construction business to get started and remain profitable.
(3 C: 2 lect/pres, 1 lab, 0 other)

CARP 2546 - Residential Construction Lab II
This course will enable the student to implement and practice the knowledge and skills learned to build a residence. Course will focus on interior finish and trim techniques and materials. Prerequisite(s): CARP2506, CARP2518, CARP2522, CARP2524
(3 C: 0 lect/pres, 3 lab, 0 other)

CARP 2562 - Carpentry Internship
This course will enable students to apply the knowledge and skills learned while working for a contractor. All activities will relate to knowledge and skills previously learned. Prerequisite(s): CARP1506, CARP1514, CARP1521, CARP1524, CARP1527, CARP1536
(3 C: 0 lect/pres, 0 lab, 3 other)

CARP 2566 - Cabinetmaking Internship
This course is designed to allow students to apply the knowledge and skills learned in the classroom and lab. Student will work in a cabinet shop that does the different facets of the cabinetmaking trade. Prerequisite(s): CARP1506, CARP1536
(6 C: 0 lect/pres, 6 lab, 0 other)

CHEM 1340 - Introduction to General Chemistry
Meets MN Transfer Goal 3 - Natural Sciences
This course is intended as a broad introduction to chemistry for the non-science major as well as for the allied health science major. Topics covered include the scientific method, atomic structure, the periodic table, bonding, acids and bases, nomenclature, equations, stoichiometry, gas laws, and oxidation and reduction. This course includes two hours of required lab per week. The laboratory introduces students to safe handling of chemicals, appropriate use of lab ware, and transcription of observations and data. Attendance in the first week lab safety session is mandatory. Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(4 C: 3 lect/pres, 1 lab, 0 other)

CHEM 1341 - Introduction to Organic and Biochemistry
Meets Mn Transfer Goal 3 - Natural Sciences
This course is intended as a broad introduction to organic and biochemistry for the non-science major as well as for the allied health science major. Topics covered include nomenclature and characterization of hydrocarbons and functional groups, organic reactivity, classification and behavior of biochemicals including carbohydrates, lipids and oils, amino acids and proteins, and nucleic acids. This course includes four hours of required lab per week. The laboratory introduces students to safe handling of chemicals, appropriate use of lab ware, and transcription of observations and data. Attendance in the first week lab safety session is mandatory. Prerequisite(s): CHEM1340
(4 C: 2 lect/pres, 2 lab, 0 other)

CMSC 1203 - Structured Programming Logic
The student will study structured programming logic. This course will cover programming design tools, such as, pseudocode and flowcharting for developing algorithms to solve many programming problems.
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1206 - Basic Networking/ Security
Basic concepts and terminology used in local area networks will be covered, including the OSI and TCP/IP models of networking. Fundamental problems associated with management of local area networks will be presented and solved. The student will be able to identify the hardware and software necessary to implement a local area network. In addition, to address network security issues, this course will provide an understanding of information security management and the technical components of security. The material covers the history and terminology of security and an overview of how to manage information security issues. Topics include legal and ethical issues, risk management, security design, and maintenance.
(3 C: 2 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
CMSC 1212 - Web Markup Language
This course will teach the student how to create web pages. It will also teach them how to get those pages on the Internet and make them visible to the world. It will teach the student HTML which is the markup language used by the Internet. It will also teach the student Javascript and Cascading Style Sheets which are used to make web pages dynamic and formatted. Students will also complete exercises using links, sound, graphics, animation and forms. The programming techniques include handling conversions from both clients and servers, passing communication, distributed information handling and tags. Page loading techniques will also be taught.
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1215 - XML
XML is a language that allows information and services to be encoded with meaningful structure and semantics. It is used for information exchange over the Internet. Visual Basic, Java and many more languages use XML to process information. XML fundamentals and concepts, architecture, information modeling, XML processing, transformations and testing and tuning will be covered to prepare the student for the certification test.
Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1216 - Database Modeling I
Databases are an integral part of computer systems. This course is the first of two database modeling courses. It covers SQL server installation and configuration, configuring SQL Server instances, databases and security; configuring linked servers; database mirroring; log shipping; database snapshots as well as data customer support. Data retrieval, manipulation, management thru XML, exceptions are covered. Service Broker components are implemented as well as importing and exporting data to files. Replication management is introduced. Database maintenance, management, backup and restoration are covered.
Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1225 - Java Language I
Students will study the skills necessary for the effective and efficient creation of computer programs using Java programming. Students will complete exercises which include the creation of several Java applications and the modification of some existing Java applications. The programming techniques to be taught include object-oriented logic. Program creation, declaring and using variables, sequence, selection and loop structures, arrays, functions, inheritance, classes, polymorphism, abstract classes and interfaces are covered in this class.
Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1227 - Agile Programming Methodology
Agile programming methodology abandons the SDLC in program development. Simple design, design as you go, incremental steps, independent steps and knowing the tools that are available to use for your purpose are core rules of Agile programming. Agile programming implements the use of team programming, usually groups of 2-10. With Agile methodology, programmers can react more quickly to requirement changes and additions. Constant coding, testing and implementation are imperative in Agile programming. An expert user is also always part of the process.
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1246 - Web Programming Languages
The student will study basic web scripting concepts. This course will cover program-related problems that individuals could expect to encounter in business. Two scripting languages will be emphasized: Javascript and CGI/Perl.
Prerequisite(s): CMSC1221
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 1255 - PHP Scripting
This course is an introduction to PHP, Hypertext Preprocessor. The students will be involved in writing HTML pages that incorporate PHP into them. This will enable the students to perform database connectivity from an HTML page, utilize the GD library and create graphics on their pages as well as learning the basics of the PHP language including variables, decision and loop structures and more. This will also enable the students to stay current with market demands for programmers. Dynamic web applications will be developed using HTML and PHP.
Prerequisite(s): CMSC1203, CMSC1202, CMSC1212
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2202 - Web Scripting Language
A web scripting language enables the user to create dynamic web pages that enable database connectivity. Creating user services, creating and managing components, consuming and manipulating data, testing and debugging, deploying a web application, maintaining and supporting a web application and configuring and securing a web application are subjects covered in this course.
Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2203 - C# Programming
C# is an object-oriented language from Microsoft that is derived from C and C++. C# is programmed in the .Net environment. C# features include using variables, functions, multi-dimensional and jagged arrays, overloading, indexes, attributes and overriding and XML integration. Console applications, Windows applications and ASP.Net web services can be written in C#.
Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2204 - Mobile Device Programming/Connectivity
Mobile devices are being used more and more in the business world. Having the knowledge to program these devices will increase the programmer’s value in the workplace. Through mobile web forms and XML, this course teaches the programmer to build applications that render intelligently on different devices.
Corequisite(s): CMSC2202, Prerequisite(s): CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2205 - Internship
This will be available to students who have demonstrated readiness and willingness to work in an on-the-job situation. It usually will be a training culmination and an opportunity to apply the skills learned.
(3 C: 0 lect/pres, 0 lab, 3 other)

CMSC 2261 - Visual Basic I
Students will study the skills necessary for the effective and efficient creation of computer programs using Visual Basic.Net. Students will complete exercises that include the creation and modification of several Visual BASIC applications.
Prerequisite(s): CMSC1200, CMSC1203
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2262 - Microcomputer Database II
This is a second course allowing students to exploit the richness of Microsoft Access with the creation of applications. The course uses Visual Basic language for more sophisticated applications.
Prerequisite(s): CMSC1261
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2263 - Visual BASIC II
Students will study the skills necessary for the effective and efficient creation of computer programs using client/server programming with Visual Basic.Net. Students will complete exercises that include the creation and modification of several Visual BASIC applications.
Prerequisite(s): CMSC2261
(3 C: 2 lect/pres, 1 lab, 0 other)
CMSC 2279 - Systems Analysis and Design
This course includes an introduction to systems analysis and design, technique and tools. Students will complete several projects throughout the term.
(3 C: 2 lect/pres, 1 lab, 0 other)

CMSC 2290 - Internship
This course will be available to students who have demonstrated readiness and willingness to work in an on-the-job situation. It usually will be a training culminating and an opportunity to apply the skills learned.
(4 C: 0 lect/pres, 0 lab, 4 other)

CMST 1320 - Introduction to Communication Studies
Meets MN Transfer Goal 1 - Oral Communication. This course introduces students to a variety of communication areas, including listening, interpersonal communication, small group communication and public speaking. Students will apply concepts from these areas through writing, discussion and speaking. This course emphasizes the importance of effective communication in everyday life.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

CMST 2300 - Introduction to Public Speaking
Meets MN Transfer Goal 1 - Oral Communication. This course helps students become familiar with, and use, a variety of techniques for effective public speaking. Topics included are topic selection and development; audience analysis; message and argument construction, critical thinking and evaluation; outlining and organization; and delivery and presentation skills.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

CMST 2301 - Persuasion
Meets MN Transfer Goals 1 and 2 - Oral Communication and Critical Thinking. This course will explore the logical and psychological processes and theories of persuasion as they occur in a range of communication situations.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

CMST 2310 - Interpersonal Communication
Meets Mn Transfer Goal 1 - Oral Communication. This course covers the theory and practice of interpersonal communication. Core concepts are verbal and nonverbal communication, communication styles, perception, self-identity, active listening, and conflict resolution skills.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

COMM 1330 - Media and Social Issues
Meets MN Transfer Goals 2 and 9 - Critical Thinking and Ethical and Civic Responsibility. This course is designed to help students develop an informed and critical understanding of the nature of mass media, the techniques used by them, and the impact of these techniques on society. It is aimed to increase students’ understanding and enjoyment of how the media works, how they produce meaning, how they are organized, and how they construct reality with an emphasis on social issues.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

CPTR 1300 - Exploring Computers
Students will gain an understanding of computer hardware and software in addition to becoming familiar with terminology used in the computer world using the Microsoft Office Suite. They will gain hands-on experience with an understanding of word processing, database management, spreadsheet and presentation programs. This course teaches the appreciation of the moral and social implications of computer technology; computer applications used in today’s society; the human factors involved in the use of computers; and will review the historical development of computers.
(3 C: 2 lect/pres, 1 lab, 0 other)

CRTK 1300 - Introduction to Critical Thinking
Meets MN Transfer Goals 2 and 6 - Critical Thinking and Humanities. Intro to Critical Thinking is a practical course in critical thinking. It develops monological and multilogical and ethical reasoning skills and explores creative and logical approaches to problem solving. It examines how our thinking skills affect our personal identities, our relationships with others, and our understanding of culture. It analyzes systems of ideas, multiple perspectives on issues, and differing analytical approaches. It develops the higher order thinking skills, intellectual values, and the qualities of thought important for personal integrity, academic success, and effective citizenship.
Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

CSSC 1300 - Career Exploration
This course is designed for students who are not enrolled in a program of study and are uncertain about their career choices. The course will assist students in determining educational and career direction through an examination of values, preferences, interests, and skills. In addition, students will become familiar with sources of occupational information. Decision-making and goal setting skills are utilized in the development of an educational and career plan.
(1 C: 1 lect/pres, 0 lab, 0 other)

CSSC 1302 - Career Development/Job Search
This course is intended for students in their last two semesters before graduation. The focus of this course is to assist students with the skills needed to find and obtain career related employment, to become familiar with methods of developing career development opportunities essential for life-long learning, and to become aware of critical attitudes needed in job keeping and career advancement. Students not within 2 semesters of graduation need instructor approval.
(1 C: 1 lect/pres, 0 lab, 0 other)

CULN 1201 - Kitchen Operations
This course teaches the skills students will need to know about the food service industry. This course will cover counter service operation, kitchen math, warewashing procedures, equipment identification and equipment usage.
(3 C: 2 lect/pres, 1 lab, 0 other)

CULN 1202 - Introduction to Culinary Arts
This course includes an introduction to the Food Service Industry, culinary terms, safety, and sanitation, history, use of weights and measures. This course also covers basic cooking techniques and knife identification and use.
(3 C: 2 lect/pres, 1 lab, 0 other)

CULN 1203 - Introduction to Culinary Arts - Modified Course for Tech Prep
This course includes in introduction to the Food Service Industry, culinary terms, history, and use of weights and measures. This course also covers basic cooking techniques and knife identification and use. This variable course is designed to allow students with Tech Prep college credit for CULN 1203 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (CULN 1203) will be delivered concurrently with CULN 1202.
(0 C: 0 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
CULN 1200 - Introduction to Pantry Food Preparation
This course covers proper techniques, procedures and responsibilities for the preparation of food, such as salads, salad dressings and sandwiches. Proper care and handling of ingredients and finished products are emphasized.
Prerequisite(s): CULN1201
(2 C: 1 lect/pres, 1 lab, 0 other)

CULN 1205 - Basic Cooking Principles
This course will utilize the skills learned in the preparation of stocks, soups, and sauces. The course will also include the preparation of meat, poultry, and fish items using the various moist and dry heat methods.
Prerequisite(s): CULN1240
(4 C: 0 lect/pres, 4 lab, 0 other)

CULN 1206 - Introduction to Breakfast
This course teaches the cooking of meats, eggs, cereals and the preparation of fruits and garnishes for breakfast. This course will include production techniques used in the preparation of breakfast foods.
Prerequisite(s): CULN1201
(2 C: 1 lect/pres, 1 lab, 0 other)

CULN 1207 - Basic Food Production Principles
This course teaches the preparation of meat, fish, seafood, poultry, vegetables, fruits, pasta and other menu items using the various moist and dry heat cooking methods. This course will include production techniques used in the preparation of foods.
Prerequisite(s): CULN1220, CULN1245, CULN1230, CULN1240, CULN1250, CULN1201
(3 C: 1 lect/pres, 2 lab, 0 other)

CULN 1220 - Garde Manager
This course is designed to teach the student the fundamentals of garde manage decorating. This will include aspic sheets, chaud froid sauce, fruit carving, vegeta-oble carvings and preparing centerpiece displays.
Prerequisite(s): CULN1250
(4 C: 1 lect/pres, 3 lab, 0 other)

CULN 1225 - Servsafe Certification
This course includes an introduction to safe food handling, personal hygiene, food-borne illnesses, HACCP procedures. This course also provides the student an opportunity to pass a food management certificate through the State of MN.
(1 C: 1 lect/pres, 0 lab, 0 other)

CULN 1230 - Vegetables, Potato, Rice and Farinaceous Products
This course covers identification and preparation of vegetables, potatoes, rice and farinaceous products. - Prerequisite(s): CULN1201
(2 C: 1 lect/pres, 1 lab, 0 other)

CULN 1240 - Stocks, Soups, Sauces
This course will identify the preparation of classical and convenience stocks. From these stocks, various soups and sauces will be prepared using various tech-inedcure. Prerequisite(s): CULN1201
(3 C: 1 lect/pres, 2 lab, 0 other)

CULN 1244 - Basic Baking - Modified Course for Tech Prep
This course covers baking terminology, function of ingredients and texture of finished products such as quick breads, yeast breads, pies, cakes and cookies. NOTES: For details of topics covered in the high school variable course please refer to the appropriate advanced standing articulation agreement. This variable course is designed to allow students with Advanced Standing credit for CULN 1244 that was earned in high school to complete the remaining course require-ments at SCTC. This SCTC course (CULN 1244) will be delivered concurrently with CULN 1245.
(3 C: 1 lect/pres, 0 lab, 0 other)

CULN 1245 - Basic Baking
This course covers baking terminology, function of ingredients and texture of finished products such as quick breads, yeast breads, pies, cakes and cookies.
Prerequisite(s): CULN1201
(3 C: 2 lect/pres, 2 lab, 0 other)

CULN 1250 - Refrigeration and Freezing
This course will provide a foundation in the field of refrigeration and freezing. It will cover the principles of refrigeration, freezing, and thawing. The course will also include the preparation of various types of frozen foods. - Prerequisite(s): CULN1201
(3 C: 0 lect/pres, 4 lab, 0 other)

CULN 1260 - Basic Food Production Principles
This course teaches the preparation of meat, fish, seafood, poultry, vegetables, fruits, pasta and other menu items using the various moist and dry heat cooking methods. This course will include production techniques used in the preparation of foods.
Prerequisite(s): CULN1220, CULN1245, CULN1230, CULN1240, CULN1250, CULN1201
(3 C: 1 lect/pres, 2 lab, 0 other)

Please note: All program plans are preliminary and curriculum may change without notice.

<tbody>
<tr>
<td>DEHY 1410</td>
<td>Introduction to Dental Materials and Methods</td>
<td>This lecture/lab course is designed to provide the dental hygiene student with information required to facilitate the optimal selection, handling, placement and care of the materials used in dentistry. Topics covered include cements, varnishes, liners, esthetic anterior restorations, posterior restorations, sealants, impression materials, dental stone and plaster, polymers for prosthetics, and provisional restorations. Students will work with dental materials and typodonts in the laboratory setting.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(2 C: 1 lect/pres, 1 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1418</td>
<td>Introduction to Radiology</td>
<td>This lecture/laboratory course provides dental hygiene students with the knowledge of radiographic principles and exposure techniques. Course content includes theoretical concepts of radiation, radiation safety and monitoring, infection control, x-ray film, processing and mounting, operation of the x-ray unit, intraoral and extraoral radiographic techniques, anatomical landmarks, and exposing and processing errors. The laboratory portion of the course will prepare the student to demonstrate competence in exposing radiographs using the bisecting and paralleling techniques. Students will practice taking radiographs on phantoms, skulls and DXTTR.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(2 C: 1 lect/pres, 1 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1420</td>
<td>Dental Hygiene Materials and Methods</td>
<td>This course is designed to introduce the student to materials and techniques utilized in clinical situations. The laboratory portion covers sealants, amalgams, impressions, study models, sonics/ultrasonics, prophy jet polisher, dental records and treatment planning. All topics will be taught to lab competency. Some sections of the lab will be devoted to pain management methods in coordination with DEHY 1468.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite(s): DEHY 1484, DEHY 1402 (2 C: 0 lect/pres, 2 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1422</td>
<td>Dental Pharmacology</td>
<td>This course covers a survey of drug groups with special emphasis on the drugs used in dentistry. This course will include content in the following: physical, and chemical properties of drugs, modes of administration, therapeutic and adverse effects, and drug interactions. Identifying and managing clinical emergencies is also included.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(2 C: 2 lect/pres, 0 lab, 0 other)</td>
<td></td>

<td>DEHY 1426</td>
<td>Oral Histology/Embryology</td>
<td>This course covers concepts of the embryological development of orofacial organs and structures.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(1 C: 1 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1428</td>
<td>General and Oral Pathology</td>
<td>This course covers concepts of development and growth disturbances; diseases of microbiological origin, injury and repair; metabolic and disease disturbances; and oral manifestations of various diseases and conditions. Special emphasis is placed on clinical, and slide recognition of pathology in the oral cavity.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(3 C: 3 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1440</td>
<td>Community Dental Health I</td>
<td>This course introduces students to the disciplines and basic principles of dental public health, epidemiologic methods, and biostatistical measurements and analysis. The course will include identification of current issues in community dental health and review current community health practices. Emphasis will be placed on comparing and contrasting community health practices with those in private clinical settings. Students will be introduced to current literature in the field of community dental health through evaluation and critiquing of journal articles.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>(2 C: 2 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1444</td>
<td>Community Dental Health II</td>
<td>This lecture course is designed to provide the dental hygiene student with field experience in assessment, planning, implementation and evaluation of community dental health presentations. Practical application of dental public health methods is included.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite(s): DEHY 1440 (2 C: 2 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1448</td>
<td>Dental Hygiene Radiology II</td>
<td>This lecture/laboratory course provides the student with the knowledge of radiographic principles and exposure techniques. The course covers the characteristics of radiation, radiation production, operation of the x-ray unit, radiation safety and monitoring, x-ray film, processing and mounting, anatomical landmarks, intraoral and extraoral radiographic techniques, and exposing and processing errors. The laboratory aspect of this course prepares the student to demonstrate competence in exposing radiographs using the bisecting and paralleling techniques. Students will also process exposed radiographs utilizing automatic processing techniques and mounts films. This course also covers the interpretation of dental radiographs for the dental hygienist. The emphasis is on recognition of anatomic conditions, technique errors, caries, periodontal disease, abnormalities, dental materials, foreign objects and periapical lesions. All dental hygiene students must complete this course prior to graduation.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite(s): DEHY 1418 (2 C: 2 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1460</td>
<td>Periodontics</td>
<td>This course will focus on the pathogenesis, diagnosis, and treatment of periodontal disease. Emphasis will be on the progression of periodontal disease, diagnostic methods, treatment modalities, and the role of the dental hygienist in the prevention and treatment of periodontal disease.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite(s): DEHY 1426, DEHY 1428 (2 C: 2 lect/pres, 0 lab, 0 other)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>DEHY 1464</td>
<td>Advanced Periodontics</td>
<td>Students will study periodontal pathology, treatment planning, case studies, current literature and periodontal treatment modalities and perio surgery.</td>
<td>Prerequisite(s): DEHY 1460 (1 C: 1 lect/pres, 0 lab, 0 other)</td>
<td></td>
</tr>
<tr>
<td>DEHY 1468</td>
<td>Pain Management</td>
<td>This course covers pain management techniques used in dentistry. The course will focus on preparing the dental hygiene students for the safe, effective administration of local anesthesia and nitrous oxide/oxygen inhalation for dental hygiene practice. Included in this course are content areas in anatomy, physiology, pharmacology and emergency procedures as they relate to local anesthesia and nitrous oxide. Course information will be presented through discussion groups and lab/clinical experience. The laboratory sessions are designed to develop actual experiences in the administration of local anesthesia and nitrous oxide/oxygen inhalation. In the clinical sessions, students will be administering local anesthesia and nitrous oxide/oxygen to fellow students.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prerequisite(s): DEHY 1424, DEHY 1422 (2 C: 1 lect/pres, 1 lab, 0 other)</td>
<td></td>
<td></td>

</tbody>
</table>

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
DEHY 1400 - DH Pre-Clinical Lab I
This lab course introduces the student to dental hygiene fundamentals, with emphasis on principles of disease transmission, preventive dental aids, data gathering, patient assessment, medical emergencies, dental deposits and entry-level instrumentation techniques. (3 C: 0 lect/pres, 3 lab, 0 other)

DEHY 1402 - DH Pre Clinical/Clinical Lab II
This course is a continuation of DEHY 1400 with emphasis on principles and practice of instrumentation skills, instrument sharpening, patient safety, patient education, assessment and treatment planning. Prerequisite(s): DEHY1480 (2 C: 0 lect/pres, 2 lab, 0 other)

DEHY 1404 - Clinical Dental Hygiene II
This is a supervised clinical experience where students will provide fundamental clinical, preventive educational and therapeutic services to patients. Emphasis on treating periodontal disease, scaling, oral hygiene counseling, radiology and professionalism. Prerequisite(s): DEHY1482 (2 C: 0 lect/pres, 2 lab, 0 other)

DEHY 1408 - Dental Hygiene Integrated Board Review
This course is designed as a comprehensive review of dental hygiene in preparation for the National and Regional Board Examinations. It includes discussion and synthesis of dental hygiene theories and clinical applications. (2 C: 2 lect/pres, 0 lab, 0 other)

DEHY 1424 - Chairside Assisting I
This course is designed to continue the students' education in basic dental assisting with emphasis on instrument identification, charting, anesthesia and instrument transfer in general dentistry. Students will perform chairside techniques and follow infection control protocols in the dental clinic and utilize dental software to record clinical data. Students will also increase oral communications skills by instructing patients in oral hygiene and preventive care. Prerequisite(s): DENT1405 (2 C: 1 lect/pres, 1 lab, 0 other)

DEHY 1434 - Dental Materials I
This course is designed to introduce the student to those materials and techniques utilized for various laboratory and clinical applications. It includes both didactic information and laboratory practice with such products as gypsum, thermoplastic resins, impression materials, waxes and other dental materials. Safety is emphasized. Prerequisite(s): DENT1400, DENT1409 (2 C: 1 lect/pres, 1 lab, 0 other)

DEHY 1440 - Dental Radiology I
This course combines lecture and laboratory practice to introduce dental assisting students to the knowledge and skills needed for working with dental radiology. The course introduces students to various full mouth radiographic surveys and provides instruction on the paralleling and bisecting techniques with emphasis on paralleling. Concepts including radiographic anatomy, intraoral and extraoral films, film processing, critiquing skills, quality assurance and infection control are included. Laboratory practice on skills and teaching manikins is provided. Prerequisite(s): DENT1400 (4 C: 2 lect/pres, 2 lab, 0 other)

DEHY 1444 - Expanded Functions I
This course will prepare the student to perform the expanded functions that have been delegated to the registered dental assistant in the State of Minnesota. The course combines lecture and laboratory practice of expanded duties. The development of skills is achieved on typodonts, teaching manikins as well as working on fellow classmates. Prerequisite(s): DENT1400, DENT1409, DENT1412 (4 C: 2 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
DENT 1460 - Internship I
This course is designed to allow the first year dental assisting student to transition into the second year by spending time in various specialty and general dentistry practices for observation during the summer between years. Students would spend approximately four (4) hours in each type of specialty office, as well as in both a smaller and a larger dentistry office and a full service dental laboratory. (1 C: 0 lect/pres, 0 lab, 1 other)

DENT 2406 - Dental Health
This course will provide an overview of pathological conditions of the oral cavity. Students will recognize the appearance and maintenance of healthy oral tissue as well as anomalies of the teeth and surrounding tissues. Students will apply their knowledge while presenting oral hygiene instructions through service learning projects in addition to providing direct patient care in the community clinic. Prerequisite(s): DENT440 (4 C: 2 lect/pres, 2 lab, 0 other)

DENT 2412 - Dental Practice Management
This course will cover principles and applications related to the management of the dental business office. Topics discussed include appointment control, telephone techniques, financial records maintenance, third-party reimbursement forms, HIPAA regulations, supply inventory and business operating systems. Emphasis will be placed on job seeking skills and developing a professional portfolio. Prerequisite(s): GBEH1300 or Equivalent, DENT2424 (3 C: 3 lect/pres, 0 lab, 0 other)

DENT 2424 - Chairside Assisting II
This course the student will be introduced to the different specialties in dentistry, specifically: endodontics, oral surgery, prosthodontics, periodontics, and pediatric dentistry. Through lecture and instrument identification, the student will become familiar with the procedures and instruments used in each specialty. Current concepts of chairside assisting in general dentistry as well as dental specialties are presented with emphasis on the utilization of the dental assistant. Prerequisite(s): DENT424 (4 C: 2 lect/pres, 2 lab, 0 other)

DENT 2440 - Dental Materials II
This course is designed to introduce the student to those materials and techniques utilized for various restorative and clinical applications. It includes both didactic information and laboratory practice with such products as cements, amalgams, bonding agents, esthetic restorative materials, synthetic resins, and provisional restorations. Safety is emphasized. Prerequisite(s): DENT434 (2 C: 1 lect/pres, 1 lab, 0 other)

DENT 2446 - Dental Radiology II
This course combines lecture and laboratory practice to expand on the dental assisting student’s knowledge and skills working with dental radiology. Principles of radiation physics, production and control are discussed. Concepts including radiographic imaging, x-ray characteristics and biological effects are included. Processing skills, radiographic techniques and various darkroom exercises are enhanced. Operator and patient safety procedures are incorporated and the clinical practice is expanded to include patients. Digital radiography is introduced. Prerequisite(s): DENT440 (4 C: 2 lect/pres, 2 lab, 0 other)

DENT 2454 - Expanded Functions II
This course is a continuation of Expanded Functions I and will provide the student with the background knowledge and prepare the student to perform the expanded functions that are legally performed by a registered dental assistant (RDA) according to the Minnesota Dental Practice Act. This course combines lecture, laboratory and clinical practice which expand on the dental assisting students’ current knowledge and skills to perform the advanced functions on typodonts, manikins and patients in the dental clinic. Prerequisite(s): DENT1444 (4 C: 2 lect/pres, 2 lab, 0 other)

DENT 2460 - Internship II
This experience will consist of two rotations in different extramural assignments. The first assignment of approximately 6 weeks (160 hour MINIMUM) will be in a general practice or a specialty dental office. The second assignment of approximately 6 weeks (160 hours MINIMUM) will be in a different general practice or a specialty dental office. Students will be expected to work the same hours that the office works. The intent of each extramural assignment is to allow the student to further develop speed and accuracy of the skills learned throughout the program. Integration of knowledge and skills to a job entry level by hands-on experience and evaluation of competence is expected. The student is given the opportunity to work with one or more dentists and staff in a real-life situation for each rotation. Prerequisite(s): DENT2454, DENT2424, DENT2446, DENT2440, DENT2406 (6 C: 0 lect/pres, 0 lab, 6 other)

DMSG 1401 - Introduction to the Sonography Field
This course will introduce students to the sonography field, covering the origins and evolution of Diagnostic Medical Sonography. The student will learn the sonographer profile, sonographer safety; legal, ethical, and legislative issues; current sonographic examinations; and basic patient care skills. Prerequisite(s): MATH1300, PHYS1300, BLGY2310, BLGY2320 (1 C: 1 lect/pres, 0 lab, 0 other)

DMSG 1402 - Ultrasound Cross-Sectional Anatomy I
This course focuses on a detailed study of the normal anatomy and physiology of the abdomen, neck, musculoskeletal, neonatal brain and non-cardiac chest as it relates to the ultrasound examination. Prerequisite(s): USCV1422 (3 C: 3 lect/pres, 0 lab, 0 other)

DMSG 1404 - Diagnostic Medical Sonography I
Detailed study of the normal and pathological ultrasound images of the abdomen, thyroid and neonatal head as related to scanning techniques, patient history and laboratory data, transducer selection, and scanning protocols. Prerequisite(s): USCV1422 (3 C: 3 lect/pres, 0 lab, 0 other)

DMSG 1406 - Clinical Ultrasound Lab I
Introduction to the aspects of sonography in a hospital or simulated clinical laboratory setting. Emphasis will be placed on instrumentation, on imaging, and identification of anatomy of the abdomen and thyroid. Prerequisite(s): USCV1422, DMSG1401 (3 C: 0 lect/pres, 3 lab, 0 other)

DMSG 1408 - Clinical Ultrasound Internship I
This course is designed to provide an initial exposure to several sonography departments in hospitals and clinical settings. Students will observe the role of clinical sonographers in a clinical setting. This course will provide the opportunity to apply didactic knowledge to the clinical environment by observing normal and abnormal sonographic anatomy of the human body. Students will also be scanning in the simulated clinical lab to help them maintain their scanning skills throughout the summer. Prerequisite(s): DMSG1402, DMSG1404, DMSG1406 (2 C: 0 lect/pres, 2 lab, 2 other)
DMSG 2402 - Ultrasound Cross-Sectional Anatomy II
This course focuses on a detailed study of the normal anatomy and physiology of the male and female reproductive system, obstetrics covering all trimesters, breast sonography and vascular technology as it relates to the ultrasound field. Prerequisite(s): DMSG1402, DMSG1404, DMSG1406, DMSG1408
(3 C: 3 lect/pres, 0 lab, 0 other)

DMSG 2404 - Diagnostic Medical Sonography II
Detailed study of normal and pathological ultrasound images of the male and female reproductive systems, obstetrics covering all trimesters, breast sonography and vascular technology as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols. Prerequisite(s): DMSG1402, DMSG1406, DMSG1404, USCV1440
(3 C: 3 lect/pres, 0 lab, 0 other)

DMSG 2406 - Clinical Ultrasound Lab II
Practical training in a hospital or simulated clinical laboratory will focus on completing and becoming proficient in scanning of the human body. Emphasis will be placed on instrumentation, protocol, record findings along with associated calculations, and anatomy identification of the abdomen, thyroid, pelvis, obstetrics, breast and vascular systems. Prerequisite(s): DMSG1402, DMSG1404, DMSG1406, DMSG1408
(5 C: 0 lect/pres, 5 lab, 0 other)

DMSG 2407 - Sonography Board Reviews
This course will help the student prepare to take the American Registry for Diagnostic Medical Sonography (ARDMS) specialty examinations in Physics, Abdomen and OB/GYN in a simulated atmosphere. It is designed to be used as an edition to your regular study and as a method to determine your strengths and weaknesses so that you can study more effectively. Prerequisite(s): DMSG2402, DMSG2404, DMSG2406
(1 C: 1 lect/pres, 0 lab, 0 other)

DMSG 2409 - Clinical Ultrasound Internship II
This course is a continuation of Clinical Ultrasound Internship I. The student will focus on becoming proficient in the scanning of the human body under the guidance of registered sonographers in abdomen, superficial structures, pelvis, obstetrics, and vascular systems. Students will broaden and perfect their skills through hands-on participation and observation. Prerequisite(s): DMSG2402, DMSG2404, DMSG2406
(13 C: 0 lect/pres, 15 lab, -2 other)

DMSG 2410 - Clinical Ultrasound Internship III
This course is a continuation of skills and knowledge acquired in Clinical Ultrasound Internship II. Students will continue scanning of the human body under the guidance of registered sonographers in abdomen, superficial structures, pelvis, obstetrics, and vascular systems. Students will broaden and perfect their skills through hands-on participation. Prerequisite(s): DMSG2409
(2 C: 0 lect/pres, 2 lab, 0 other)

DMSG 2411 - Clinical Ultrasound Internship IV
This is the final course in the Sonography Program. The student will focus on becoming proficient in the scanning of the human body. Students will perform under the guidance of registered sonographers in hands-on scanning in abdominal, superficial structures, OB/GYN, and vascular systems. Upon completion of this internship the student will be able to perform routine duties and be ready for the workplace as a Diagnostic Medical Sonographer. Prerequisite(s): DMSG2410
(2 C: 0 lect/pres, 2 lab, 0 other)

DMSG 4029 - Clinical Ultrasound Lab II
Practical training in a hospital or simulated clinical laboratory will focus on completing and becoming proficient in scanning of the human body. Emphasis will be placed on instrumentation, protocol, record findings along with associated calculations, and anatomy identification of the abdomen, thyroid, pelvis, obstetrics, breast and vascular systems. Prerequisite(s): DMSG1402, DMSG1404, DMSG1406, DMSG1408
(5 C: 0 lect/pres, 5 lab, 0 other)

DMSG 4024 - Diagnostic Medical Sonography II
Detailed study of normal and pathological ultrasound images of the male and female reproductive systems, obstetrics covering all trimesters, breast sonography and vascular technology as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols. Prerequisite(s): DMSG1402, DMSG1406, DMSG1404, USCV1440
(3 C: 3 lect/pres, 0 lab, 0 other)

DVRS 1304 - Diversity and Social Justice
Meets MN Transfer Goals 5 and 7 - History/Social, Behavioral Sciences and Human Diversity. Diversity and Social Justice is a course that uses critical thinking and questioning to define, recognize and analyze individual, institutional and cultural/societal racism, sexism, classism, heterosexism and other oppressive elements from personal, professional and public lives. This course can be used in place of GBEH 1300 - Human Relations. Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

DVRS 2301 - Race and Ethnic Relations
Meets MN Transfer Goal 7 - Human Diversity. This course provides students with a framework for exploring and understanding race and ethnicity in our world today. Students will examine their own ethnic heritage and compare and contrast the history of their ethnic group with the experiences of other groups in the U.S. Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

EASC 1310 - Meteorology
Meets MN Transfer Goal 3 - Natural Sciences This is an introductory meteorology course designed for non-science majors. This course focuses on understanding the basic concepts of meteorology by emphasizing observations of the atmosphere and using those observations to explain atmospheric phenomena. This course emphasizes key atmospheric concepts that enable students to understand how science can explain the weather phenomena they see in their daily lives and how these phenomena are connected to short term events such as local weather, severe storms and atmospheric stability and long term effects such as global warming. This course includes a lab component where students will learn to use real data to analyze and predict weather patterns and atmospheric phenomena. Prerequisite(s): READ0304 and ENGL 0304 or Appropriate Accuplacer Score.
(4 C: 3 lect/pres, 1 lab, 0 other)

ECHO 1423 - Echocardiography I
This class is designed to instruct the beginning cardiac sonographer on the techniques used to perform a complete echocardiogram. It will introduce 2-Dimensional, m-mode, Color and Spectral Doppler studies as well as anatomical detail of the adult human heart. Corequisite(s): ECHO1443
Prerequisite(s): USCV1422
(2 C: 2 lect/pres, 0 lab, 0 other)

ECHO 1443 - Echocardiography Clinical I
The focus of this class is to perform a complete echocardiogram on a normal adult heart in a simulated clinical setting. The student will use all modalities discussed in Echocardiography I and apply it in a routine echo study. Prerequisite(s): USCV1422
(5 C: 0 lect/pres, 5 lab, 0 other)

ECHO 2426 - Echocardiography II
An in-depth study of the various pathology of an adult human heart. The student will be able to identify and differentiate the differences of a healthy heart versus an unhealthy heart. Advanced application techniques are also introduced for the evaluation of the various pathologies of the human heart. Prerequisite(s): USCV1422, ECHO1423, ECHO1443
(4 C: 4 lect/pres, 0 lab, 0 other)
ECHO 2448 - Echocardiography Clinic II
A continuation of Echocardiography Clinic I with emphasis on cardiac pathology recognition and quantification using advanced echocardiographic calculations. Vascular images will be acquired using pulsed wave, continuous wave, and color flow Doppler. Image acquisition techniques will be refined through continued practice of standard protocols and image manipulation in the simulated clinical setting.
Prerequisite(s): ECHO1443
(6 C: 0 lect/pres, 6 lab, 0 other)

ECHO 2450 - Applied Clinical Internship
Advanced and intense internship in a hospital or clinic setting. Specific detailed learning objectives are developed for each course by the college facility. Students will broaden and perfect their skills through hands-on participation. Students will be able to carry out everyday duties of the technologist when their clinical experience is complete.
Prerequisite(s): ECHO2426, ECHO2446
(13 C: 0 lect/pres, 13 lab, 0 other)

ECON 1310 - Personal Finance
Meets MN Transfer Goal 9 - Ethical and Civic Responsibility. The students will learn what it means to make responsible economic decisions and analyze the social and personal impact on these choices. Techniques for dealing with ethical questions and solutions based on economic consumption in a technology driven society will be identified.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ECON 1320 - Introduction to Macroeconomics
Meets MN Transfer Goal 5 - History and the Social and Behavioral Sciences This course is a study of the topics and issues related to economic growth, national income, measurement of economic performance, understanding of economic fluctuations, determination of output, price level, inflation, deficits, knowledge of monetary and fiscal policy, and unemployment in the United States.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ECON 1330 - Introduction to Microeconomics
Meets MN Transfer Goal 5 - History and the Social and Behavioral Sciences This course is a study of the economic topics concerned with individual units such as industries, firms, and households; plus determination of prices and quantities, measurement of costs and productivity, individual markets, specific goods and services, and product and resource prices.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

ELEC 1502 - Basic Wiring and Materials I
This course enables you to perform basic wiring of general lighting circuits, switching, receptacles and appliances. Identification of electrical materials and proper installation practices will be carefully evaluated. Service layout and installation calculations will be incorporated with safety habits, tools and romex wiring materials.
(5 C: 2 lect/pres, 3 lab, 0 other)

ELEC 1506 - Basic Wiring and Materials II
This course will enable students to address and install special lighting, appliances, smoke and fire, low voltage and identify installation methods for spa and pool wiring. Introduction to conduit, wire-mold, PVC and flex wiring systems for installation and safety will be emphasized.
Prerequisite(s): ELEC1502, ELEC1510, ELEC1518, ELEC1522
(5 C: 2 lect/pres, 3 lab, 0 other)

ELEC 1510 - National Electrical Code I
This course will prepare the students to apply code to the installation of basic wiring. Make aware of laws and licensing of electricians. Use and interpret code general wiring practices. Calculate circuit demands. Calculate feeder demands, service installations, overcurrent protection, and appropriate grounding practices. Utilize tables for conductor size and other purposes.
(2 C: 0 lect/pres, 2 lab, 0 other)

ELEC 1514 - National Electrical Code II
The student will identify code requirements for the installation of wire, cable, conduit and wiring systems, also boxes, switches, transformers, lighting equipment, motors, motor controls. Identify hazardous wiring locations.
Prerequisite(s): ELEC1510
(2 C: 0 lect/pres, 2 lab, 0 other)

ELEC 1518 - Applied Electrical Principles and Formulas
This course will enable the student to utilize ohms law in the application series, parallel and combination circuits. Calculate voltage current and resistance in these applications. Apply power calculations for circuits. Utilize electrical meters. Apply resistance values in the calculations used for equipment and conductors. Apply magnetic principles to operation of electrical equipment. Describe uses and application of a battery type in industry. Identify basic transformer types and operation. Apply appropriate electrical formulas in solution of electrical problems.
Prerequisite(s): MATH0380 or Appropriate Accuplacer Score.
(5 C: 2 lect/pres, 3 lab, 0 other)

ELEC 1522 - Drafting Blueprint Reading and Specification
This course teaches students to identify construction design of residential and commercial building. Application of proper symbols and layout of a workable electrical plan along with specifications will enable students to draft a complete set of electrical plans including circuit layout, heating, cooling, and other equipment as required along with the support of a specifications sheet.
(3 C: 2 lect/pres, 1 lab, 0 other)

ELEC 1526 - Applied Electrical Principles and A.C. Fund.
This course teaches students to identify differences in DC and AC current. Use trigonometric formulas to calculate voltage, current, impedance values in AC circuits. Identify resistive circuits, pure inductive circuits, resistive inductive circuits, resistive-capacitive circuits, and inductive-capacitive circuits. In-phase and out of phase conditions will be discussed. Calculate leading and lagging power factor. Calculate power factor correction of equipment and feeders.
Prerequisite(s): ELEC1518
(5 C: 2 lect/pres, 3 lab, 0 other)

ELEC 1530 - Electric Heat
This course will teach students to identify various types of electric heat systems and heat transfer methods. Critical thinking will be applied in calculating heating needs and service load. Students will be required to install and connect various heating controls and electric heat units.
Prerequisite(s): ELEC1502, ELEC1510, ELEC1522
(2 C: 0 lect/pres, 2 lab, 0 other)

ELEC 1534 - Safety, Certifications and Skills
This course is designed for Construction Electrician Students who have completed the first year of the program. They will have instruction in OSHA, various industry certifications, industrial jobsite training, advanced blueprint reading, alternative energy options, and training in basic welding and welding safety.
(3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ELEC 1538 - Industry Skills Development
This course will introduce students to total quality management, team building and networking skills. Students will explore their humanitarian responsibility, personal accountability and develop organizational and management skills. The student will be responsible for developing a working knowledge of the electrical industry, as well as a personal resume, an example of a cover letter, and interviewing skills.
Prerequisite(s): ELEC1506, ELEC1514, ELEC1526
(1 C: 0 lect/pres, 1 lab, 0 other)

ELEC 2502 - Residential Wiring I
The student will work on the installation of temporary service and installation of permanent service for a residential dwelling and enhance his wiring skills by the rough-in wiring for a residential dwelling. Job seeking skills will be developed as part of this class.
(2 C: 1 lect/pres, 1 lab, 0 other)

ELEC 2506 - Residential Wiring II
The student will install light fixtures, trim out outlets and switches, wire a furnace, water heater, range and dryer and complete the final installation of a residential dwelling for a final code inspection.
Prerequisite(s): ELEC2502
(2 C: 1 lect/pres, 1 lab, 0 other)

ELEC 2510 - National Electrical Code III
This course will develop a working knowledge of the National Electrical Code in commercial and industrial situations as they apply to chapters 1-4 in the NEC. Students will be given electrical situations and they should describe the minimum NEC standards.
Prerequisite(s): ELEC1514
(2 C: 1 lect/pres, 1 lab, 0 other)

ELEC 2514 - National Electrical Code IV
This course will develop a working knowledge of the National Electrical Code in commercial and industrial situations as they apply to chapters 5-9 in the NEC. The student will be given electrical situations and they should describe the minimum NEC standards.
Prerequisite(s): ELEC2510
(2 C: 1 lect/pres, 1 lab, 0 other)

ELEC 2518 - Commercial Wiring and Lighting
Students will read and interpret blueprints and develop procedures to follow in the installation of wiring and control systems used in commercial buildings; determine pipe fill, box fill, voltage drop, amperages and derating of conductors; develop their pipe bending skills be lab projects in EMT with 1/2 inch and 3/4 inch conduit. MN cable and AC cable lab projects will enhance the students knowledge of other wiring installations for commercial wiring; study incandescent, fluorescent, HID, and mercury vapor light fixtures, operation of troubleshooting and repair layout of systems and efficient usage.
Prerequisite(s): ELEC1506, ELEC1518
(5 C: 1 lect/pres, 4 lab, 0 other)

ELEC 2522 - AC Motor Control I
Students will study the design, construction and operation of motors. This includes lab time on single phase, squirrel cage, synchronous, repulsion and shaded pole motors. Students will examine the basic design and construction of control equipment for single phase and three phase motors.
Prerequisite(s): ELEC2538
Prerequisite(s): ELEC1526
(3 C: 1 lect/pres, 2 lab, 0 other)

ELEC 2526 - A.C. Motor Control II
This course is a continuation of ELEC 2522. Students will examine complex motor control circuits, develop motor control problem solving skills, and design working motor control diagrams.
Prerequisite(s): ELEC2522
(4 C: 1 lect/pres, 3 lab, 0 other)

ELEC 2532 - Solid State and PLC Controls
This course will enable you to analyze solid state devices and use the knowledge in a lab to assemble solid state devices such as diodes, rectifiers, filters and transistors. Then the course will develop into PLC basics and eventually complex PLC motor control situations.
Prerequisite(s): ELEC2522
(3 C: 1 lect/pres, 2 lab, 0 other)

ELEC 2534 - Industrial Systems
This course will examine wiring practices associated with industrial plants and operations. Students will assemble industrial services, bus ducts, and fire alarm systems. The students will also analyze hazardous areas as defined in the NEC, and interpret various job blueprints.
Prerequisite(s): ELEC1502
(3 C: 0 lect/pres, 3 lab, 0 other)

ELEC 2538 - Transformers, Three Phase systems, and Formulas
Students will analyze the principles and theory of single and three phase transformers and apply that knowledge in a lab situation where they will construct working models of transformers and three phase systems. Students will also use complex trigonometric formulas to describe electrical principals.
Prerequisite(s): ELEC1518, ELEC1526
(3 C: 1 lect/pres, 2 lab, 0 other)

ELEC 2540 - Low Voltage Systems
This course will introduce students to low voltage/limited energy electrical circuits, which include, but are not limited to Telecommunications, Coax cable, networking, Class 2 and 3 circuits, millivolt and fiberoptic systems, security systems, and fire alarm systems. The student will learn proper cable installation and termination skills, as well as basic problems and solutions to electromagnetic interference and other forms of electrical noise.
(1 C: 0 lect/pres, 1 lab, 0 other)

ELL 0310 - Practical Academic Skills I for ELL Students
Practical Academic Skills (PAS) I for ELL Students is designed to provide non-native speakers of English with the foundational academic skills necessary to improve performance at the college level. PAS I for ELL is intended as a complimentary course to Reading and Vocabulary and Basic Writing so students are encouraged to take all three classes during the same semester.
(3 C: 1 lect/pres, 2 lab, 0 other)

ELL 0320 - Practical Academic Skills II for ELL Students
Practical Academic Skills (PAS) II for ELL Students is designed to provide non-native speakers of English with the foundational academic skills necessary to improve performance at the college level. PAS II for ELL is intended as a complimentary course to Reading Strategies and Introduction to Analytical Writing or Introduction to Practical Writing so students will typically take all three classes.
Prerequisite(s): ELL0310 or Appropriate Accuplacer Score.
(3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
EMSC 1400 - Principles of First Aid
This is an intermediate and in-depth First Aid course. Topics covered in this course will include: how to recognize a situation needing emergency care, how and when to access the EMS system, and how to care for the victim with and without accessing further medical care. Prevention, medical emergencies and injuries will be the major focus of the course. This course will cover first aid care and treatment of adults and children including Sudden Infant Death Syndrome. This course is taught to the standards of the American Heart Association and the National Safety Council.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 1404 - First Aid and CPR for Child Care Providers
This is a general First Aid and CPR course. Topics covered in this course will include: how to recognize a situation needing emergency care, how to access the EMS system, and how to care for the victim until help arrives. Prevention, medical emergencies and injuries will be the major focus of the course. This course will cover first aid care and treatment of adults and children and will include CPR and Sudden Infant Death Syndrome. Emphasis is on pediatric first aid. This course is taught to the standards of the American Heart Association and the National Safety Council.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 1420 - Basic Emergency Care
This is a general First Aid and CPR course. Topics covered in this course will include: how to recognize a situation needing emergency care, how to access the EMS system, and how to care for the victim until help arrives. Prevention, medical emergencies and injuries will be the major focus of the course. This course will cover first aid care and treatment of adults and children and will include CPR and Sudden Infant Death Syndrome. This course is taught to the standards of the American Heart Association and the National Safety Council.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 1430 - Emergency Medical Services 1 (EMS1)
Students will be able to apply the fundamental skills and knowledge required to function as an entry level First Responder. Emphasis will be placed on skills needed for the recognition of, and emergency care of sick or injured people, utilizing basic EMS equipment and assisting Emergency Medical Technicians once they have arrived. This is a Department of Transportation designed course for non-ambulance personnel such as law enforcement, fire, rescue, DNR, industry, and private citizens who are involved in pre-hospital emergency care and are first on the scene in an emergency. This course is taught utilizing the 1995 US DOT First Responder Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB).
Upon passing this course the student will be registered with the Minnesota EMSRB as a First Responder. First Responder Certification is valid for two (2) years. This course is approved for Minnesota Peace Officers Standards and Training (POST).
(4 C: 0 lect/pres, 0 lab, 4 other)

EMSC 1432 - Emergency Medical Services 2 (EMS2)
Students will be able to apply the fundamental skills and knowledge required to function as an entry level Emergency Medical Technician Basic. Emphasis will be placed on skills needed for the recognition of, and emergency care of sick or injured people, utilizing basic and advanced EMS equipment and assisting Paramedics once they have arrived. This is a Department of Transportation designed course for ambulance personnel and is also sometimes required by law enforcement, fire, rescue, DNR, industry, and private citizens who are involved in pre-hospital emergency care and are first on the scene in an emergency. This course is taught utilizing the 1994 US DOT Emergency Medical Technician Basic Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB).
Upon passing this course the student will be eligible to take the National Registry of Emergency Medical Technicians Basic (EMT-B) exam and the Minnesota Emergency Medical Technician Basic practical exam. Successful completion of both of these exams will certify the student as both a Nationally Registered EMT-B and a Minnesota EMSRB EMT-B. Certification is valid for (2) years. This course is approved for Minnesota Peace Officers Standards and Training (POST).
(4 C: 2 lect/pres, 2 lab, 0 other)

EMSC 1440 - Emergency Medical Technician Basic (EMT-B)
Students will be able to apply the fundamental skills and knowledge required to function as an entry level Emergency Medical Technician Basic. Emphasis will be placed on skills needed for the recognition of, and emergency care of sick of injured people, utilizing basic and advanced EMS equipment and assisting Paramedics once they have arrived. This is a Department of Transportation designed course for ambulance personnel and is also sometimes required by law enforcement, fire, rescue, DNR, industry, and private citizens who are involved in pre-hospital emergency care and are first on the scene in an emergency. This course is taught utilizing the current US DOT Emergency Medical Technician Basic Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB). Interactive lecture, assigned readings, demonstrations, individual coaching and practice of aspects related to the learning outcomes of this course are based on these standards and curriculum.
Prerequisite(s): EMSC1480 currently certified in CPR at the level of Health Care provider by the American Heart Association.
(6 C: 4 lect/pres, 2 lab, 0 other)

EMSC 1444 - Emergency Medical Technician Basic Refresher (EMT-B)
This US Department of Transportation course is designed to review and enhance the knowledge and skills of certified Emergency Medical Technician Basic. This course is taught utilizing the most current US DOT Emergency Medical Technician Basic Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB). The focus is on both of these exams will certify the student as both a Nationally Registered EMT-B and a Minnesota EMSRB EMT-B. Certification is valid for (2) years. This course is approved for 28 clock hours of Minnesota Peace Officers Standards and Training (POST).
(2 C: 1 lect/pres, 1 lab, 0 other)

EMSC 1460 - First Responder
Students will be able to apply the fundamental skills and knowledge required to function as an entry level First Responder. Emphasis will be placed on skills needed for the recognition of, and emergency care of sick or injured people, utilizing basic EMS equipment and assisting Emergency Medical Technicians once they have arrived. This is a Department of Transportation designed course for non-ambulance personnel such as law enforcement, fire, rescue, DNR, industry, and private citizens who are involved in pre-hospital emergency care and are first on the scene in an emergency. This course is taught utilizing the most current US DOT First Responder Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB).
Upon passing this course the student will be re-registered with the Minnesota EMSRB as a First Responder. First Responder Certification is valid for two (2) years. This course is approved for 28 clock hours of Minnesota Peace Officers Standards and Training (POST).
(2 C: 1 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
EMSC 1464 - First Responder Refresher
This US Department of Transportation course is designed to review and enhance the knowledge and skills of certified First Responders. This course is taught utilizing the most current US DOT First Responder Curriculum and is approved by and taught to the standards of the Minnesota Emergency Medical Services Regulatory Board (EMSRB). The focus of this course is the recognition of, and emergency care of sick or injured people, utilizing basic EMS equipment and assisting Emergency Medical Technicians once they have arrived. Upon passing this course the student will be re-registered with the Minnesota EMSRB as a First Responder. First Responder Certification is valid for two (2) years. This course is approved for 16 clock hours of Minnesota Peace Officers Standards and Training (POST).
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 1480 - Emergency Cardiac Care
This course is designed for health care providers. This course will cover how to prevent heart attacks and how to perform CPR in the event that someone does go into respiratory or cardiac arrest. The course will also cover what to do when someone is choking.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 2460 - ACLS Provider
This course will result in the awarding of Advanced Cardiac Life Support Provider certification from the American Heart Association. It will cover all aspects of treating cardiac and stroke patients at the advanced level to include basic and advanced airway management, cardiac rhythm interpretation, medication administration and post resuscitation management.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 2462 - PHTLS Provider
This course will award certification as a Pre-Hospital Trauma Life Support Provider at the Advanced level. This course covers areas such as Kinematics, various injury pathologies and mechanisms and trauma patient management priorities.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 2468 - Pediatric Advanced Life Support/Neonatal Resuscitation Provider (PALS/NRP)
This course will result in the awarding of Pediatric Advanced Life Support Provider certification from the American Heart Association. It will cover all aspects of treating pediatric respiratory and cardiac patients at the advanced level to include basic and advanced airway management, cardiac rhythm interpretation, medication and fluid administration, intraosseous cannulation and post resuscitation management.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSC 2472 - PEPF Provider
Pediatric Education for Prehospital Professionals is a 13-hour two day course designed for any allied health professional who is responsible for the emergent care of children. This course has skill stations for ALS and BLS providers concurrently and emphasis is placed towards caregivers that practice in the out-of-hospital setting. Topics include Pediatric Assessment, Respiratory, Medical and Traumatic Emergencies, Children with Special Needs, Child Maltreatment, Emergency Delivery and Newborn Stabilization and others.
(1 C: 1 lect/pres, 0 lab, 0 other)

EMSP 1400 - Paramedicine I
This is an introductory course for the Paramedicine student reflective of the 1998 National Standards Curriculum. This course will enable the student to advance in knowledge from their EMT-B education to the advanced roll of the paramedic in topics such as medical-legal issues, roles and responsibilities, communication, personal wellness and the etiology of trauma. Corequisite(s): EMSP1402, EMSP1404, EMSP1406
(3 C: 3 lect/pres, 0 lab, 0 other)

EMSP 1402 - Paramedicine Skills I
This is an introductory skills course for the Paramedicine student reflective of the 1998 National Standards Curriculum. It will cover the core skills of the basic EMS provider and then expands to the advanced skills of the paramedic. Students will be enabled to apply fundamental skills in patient care to include I.V. therapy, basic and advanced airway management, advanced patient assessment/physical exam and others.
Prerequisite(s): EMSP1400
Corequisite(s): EMSP1400
(3 C: 0 lect/pres, 3 lab, 0 other)

EMSP 1404 - Emergency Pharmacology for Paramedics
This course covers the pharmacology portion of the 1998 National Standards Paramedic Curriculum. Students learn pharmacological concepts, drug legislation and drug categories. Emphasis is placed on commonly used drugs in the emergency setting and their effects on body systems. This course will also provide the student with a basic understanding of pharmacology necessary for safe drug administration.
Prerequisite(s): EMSP1400, EMSP1402, EMSP1430
(2 C: 2 lect/pres, 0 lab, 0 other)

EMSP 1406 - Paramedicine II
This course will cover the Pulmonary and Cardiology portion of module five of the 1998 National Standard Paramedic Curriculum. Emphasis is placed on pathophysiological principals and assessment findings for the student to formulate a field impression and implement a treatment plan for a patient with a respiratory or cardiovascular emergency.
Corequisite(s): EMSP1408
Prerequisite(s): EMSP1402, EMSP1430
(3 C: 3 lect/pres, 0 lab, 0 other)

EMSP 1408 - Paramedicine Skills II
This course is the skills component of EMSP 1406 and EMSP 1404, reflective of the 1998 National Standards Paramedic Curriculum. It will continue to enhance and refine the skills learned in EMSP 1402. Fundamental skills of critical cardiac and respiratory related emergencies will be enhanced. More advanced techniques and skills such as rapid sequence intubation, 12-lead application and interpretation, thoracentesis and surgical airways will be explored. Emphasis is placed on scenario-based learning.
Prerequisite(s): EMSP1400, EMSP1402, EMSP1430
(3 C: 0 lect/pres, 3 lab, 0 other)

EMSP 1430 - BLS Ambulance Clinical
This course is designed to introduce the student to the BLS and ALS ambulance operations. The student will observe the operations, procedures, and cares provided by the pre-hospital personnel along with performing BLS level skills and advanced patient assessment.
(1 C: 0 lect/pres, 1 lab, 0 other)

EMSP 1432 - Critical Care Clinical
This course is designed to allow the Paramedicine student to refine basic and advanced airway management skills and knowledge along with I.V. therapy techniques in a clinical setting. Opportunity is also afforded to allow students to develop an understanding of care given in a critical care setting. The student utilizes all of the knowledge and skills learned to this point to provide and assist in patient care in this setting under the direct supervision of an Anesthesiologist, Registered Nurse or both.
Prerequisite(s): EMSP1408, EMSP1404, EMSP1406
(2 C: 0 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
EMSP 1434 - Support Services Clinical
This course covers the various support services and ancillary areas in a clinical setting that affect what a Paramedic does in the field. The student utilizes all of the knowledge and skills learned to their written documents, and demonstrate that their choices were informed, sufficient. Students will learn how to analyze their audience, apply this knowledge effectively. Students will learn how to analyze their audience, apply this knowledge, purpose, mechanics and forms of development are addressed along with general communication issues. Students will submit a writing sample completed in class which demonstrates the principles of sentence, paragraph, research, and essay structure as they read and write narrative, descriptive, expository and persuasive pieces. Students entering this course will have scored between 51 and 77 on the ACCUPLACER reading test or have successfully completed ENGL 0300. This course is developmental and does not fulfill a general education or general studies requirement.

Prerequisite(s): ENGL0304 and ENGL0304

EMSP 1440 - ALS Ambulance Clinical
This course is designed to introduce the student to an Advanced Life Support ambulance service. The student will become familiar with the operations, procedures and care provided by the Paramedic in the field. The student will be involved with BLS and ALS patient care, treatment and transport under the direct supervision of a staff Paramedic.

Prerequisite(s): EMSP1406, EMSP1408

(3 C: 0 lect/pres, 0 lab, 3 other)

EMSP 2410 - Paramedicine III
This course covers the medical portion of the 1998 National Standard Paramedic Curriculum. Topics covered are Hematology, OB/GYN, Toxicology, Gastroenterology, Neurology, Endocrinology and others. Emphasis is placed on understanding pathology and how it relates to specific medical emergencies. Students also learn to "put it all together" and practice assessment, management and treatment of various medical and traumatic emergencies in scenario based learning.

Prerequisite(s): EMSP1432, EMSP1434, EMSP1436

(4 C: 4 lect/pres, 0 lab, 0 other)

EMSP 2412 - Paramedicine Skills III
This course is the skills component of EMSP 2410, reflective of the 1998 National Standards Paramedic Curriculum. It will continue to enhance and refine the skills learned in EMSP 1402 and EMSP 1408. Fundamental skills related to critical medical emergencies will be enhanced and applied in treatment of patients with a variety of etiologies and presentations. Emphasis is placed on team-based approach in simulation and scenario-based learning.

Corequisite(s): EMSP2410

Prerequisite(s): EMSP1432, EMSP1434, EMSP1436

(2 C: 0 lect/pres, 2 lab, 0 other)

EMSP 2438 - Emergency Department Clinical
This course covers the operations of the Emergency Department of a Level I or Level II trauma center. The student utilizes all of the knowledge and skills learned to this point to provide and assist in patient care in this setting under the direct supervision of a registered Nurse and/or Physician.

Prerequisite(s): EMSP2410

(3 C: 0 lect/pres, 3 lab, 0 other)

EMSP 2442 - Acute Care Clinical
This course includes clinical rotation through labor and delivery, pediatrics and psychiatry. The student utilizes all of the knowledge and skills learned to this point to provide and assist in patient care in this setting under the supervision of appropriate staff.

Prerequisite(s): EMSP2410

(2 C: 0 lect/pres, 0 lab, 2 other)

EMSP 2480 - Paramedicine Externship
This course covers the application of advanced level skills and knowledge in the evaluation and care of the sick and injured patient. The student will be involved in practicing the art and science of out-of-hospital medicine as a team member and a team leader under the direct supervision of a staff paramedic.

Prerequisite(s): EMSP2410

(8 C: 0 lect/pres, 0 lab, 8 other)

EMSP 2484 - Advanced Paramedicine Skills
This course is an optional technical course available for second year Paramedicine students in their last semester. The course will enhance students' level of competency in advanced life support skills and their preparedness to enter the workforce as an entry-level paramedic.

Prerequisite(s): EMSP2410, EMSP2412

(1 C: 0 lect/pres, 1 lab, 0 other)

ENGL 0300 - Foundations for College Writing I
This course is designed for students who score between 28 and 50 on the ACCUPLACER reading test. Students in this course will develop an idea using multiple paragraphs and then through basic five paragraph outlines. The course emphasizes the English usage, sentence structure, punctuation, grammar and spelling necessary for composition. This course is developmental and does not fulfill a general studies or general education requirement.

Students with serious writing difficulties can expect to complete this course multiple times. In order to receive a passing grade at the end of the course, students will submit a writing sample completed in class which demonstrates the focus, development, clarity, and coherence necessary for success in Introduction to Analytical Writing.

Prerequisite(s): ENGL0300 or Appropriate ACCUPLACER Score.

(3 C: 3 lect/pres, 0 lab, 0 other)

ENGL 0304 - Foundations for College Writing II
This is the second course in the developmental sequence for students seeking an AA or AAS degree. In this preparatory course, students will study and apply principles of sentence, paragraph, research, and essay structure as they read and write narrative, descriptive, expository and persuasive pieces. Students entering this course will have scored between 51 and 77 on the ACCUPLACER reading test or have successfully completed ENGL 0300. This course is developmental and does not fulfill a general education or general studies requirement.

Prerequisite(s): ENGL0300 or Appropriate ACCUPLACER Score.

(3 C: 3 lect/pres, 0 lab, 0 other)

ENGL 0355 - Foundations for College Success
This course provides students with preparatory skills necessary for college success including reading, writing and class presentation. In addition, students will cover personally relevant topics of learning styles, study strategies, and group dynamics. Finally students will be introduced to and use technology relevant to their general course work. This course is developmental and does not fulfill a general education requirement.

(4 C: 4 lect/pres, 0 lab, 0 other)

ENGL 1100 - Writing for the Workplace
This course emphasizes writing skills that have an impact on academic success, personal development and social/cultural involvement. Organization, tone, purpose, mechanics and forms of development are addressed along with general communication issues.

Prerequisite(s): READ0304 and ENGL0304 or Appropriate ACCUPLACER Score.

(3 C: 3 lect/pres, 0 lab, 0 other)

ENGL 1301 - Technical Writing
Meets MN Transfer Goal 1 - Written Communication. This course will teach students the established basics for effective written composition in the business world. They will learn how to write and design visually effective print and electronic documents so that people can understand them clearly and use them efficiently. Students will learn how to analyze their audience, apply this knowledge to their written documents, and demonstrate that their choices were informed, accurate, and effective.

Prerequisite(s): READ0304 and ENGL0304 or Appropriate ACCUPLACER Score.

(4 C: 4 lect/pres, 0 lab, 0 other)
ENGL 1302 - Analytical Writing
Meets MN Transfer Goal 1 - Written Communication. This course focuses on research and argument, emphasizing contemporary issues. The course develops the writing, research, analytical, and peer evaluation skills necessary to succeed academically, professionally and personally. Students will produce for grading at least 6,500 words during the semester, including an extensive research paper. This course can be used in place of ENGL 1100 - Writing for the Workplace. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 4 lect/pres, 0 lab, 0 other)

ENGL 1321 - Introduction to Modern Fiction
Meets MN Transfer Goal 6 - Humanities. This course is designed to be an interesting survey of modern literature representing the traditional to the avant garde. Students will read, interpret, discuss and write about this literature. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 1322 - Introduction to Literature
Meets MN Transfer Goal 6 - Humanities. An introduction to the study of creative literature in order to engage in critical analysis, form aesthetic judgments and develop an appreciation of literature as essential to the survival and enrichment of society. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 1330 - American Literature About War
Meets MN Transfer Goal 6 - Humanities. This course introduces students to the history, culture, and social implications of war through the experiences of soldiers and civilians of countries at war. In this class, students will gain a better understanding of the hardships that people endure during wartime and reasons that countries go to war. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 1340 - Introduction to Multicultural Literature
Meets MN Transfer Goals 6 and 7 - Humanities and Human Diversity. This course provides a broad introduction to multicultural literature. Students will read, discuss, and analyze various types of multicultural literature. Multicultural literature refers to works written by African American, Asian American, Native American, and Latino authors. It can also refer to works that deal with issues of race, gender, class, ethnicity, religion, sexuality, and nationality. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 1341 - Introduction to Women's Literature
Meets MN Transfer Goal 6 - Humanities. This course introduces students to the history, language and culture of women’s literature. In this course, students will gain an understanding of women’s lives from the past and in the present in relationship to themselves, their children and their male counterparts. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 2302 - Advanced Argument and Research Writing
Meets Mn Transfer Goal 1 - Written Communication This is a topic-based course which emphasizes research, critical thinking, organized writing, argumentation and proper documentation of sources while building on skills learned in the freshman composition course. Assignments will focus on using primary and secondary sources to develop writing and analytical skills for in-depth researched argumentative writing. Prerequisite(s): ENGL1302 Or Comp I at another college. (C: 3 lect/pres, 0 lab, 0 other)

ENGL 2310 - Introduction to Creative Writing
Meets MN Transfer Goal Area 1 - Written Communication. Students will learn the tenets and methods of basic creative writing for poetry and fiction. They will study different genres in both poetry and fiction, and learn to emulate and draw inspiration from these examples. Students should come out of the class with the ability to express themselves through poetry or fiction, and an application for works of the past and present. Prerequisite(s): ENGL1302 (C: 3 lect/pres, 0 lab, 0 other)

ETEC 1506 - Digital Electronics
This is a first course in Digital Electronics. A background in basic electronics is helpful for the understanding of some of the material presented in this course but not required. The primary goals of this course are to help individuals acquire a solid foundation in digital electronics and to apply these skills through simulation and laboratory experiments. Topics include: number systems and codes, logic gates and Boolean algebra, combinational logic circuits, flip-flops, counters and registers, integrated circuits, and interfacing with the analog world. (C: 2 lect/pres, 2 lab, 0 other)

ETEC 1509 - AC/DC Electricity - Modified Course for Tech Prep
This is an introductory course in Basic Electronics. This course is designed for students who have no previous experience in electronics and for those who need a review of basic electronic concepts. The primary goals of this course are to help individuals acquire a solid foundation in the basic electronic skills and to apply these skills through problem solving, simulation, and laboratory experiments. Topics include: conductors and insulators, resistors, capacitors, inductors, Ohm’s law, series circuits parallel circuits, series-parallel circuits, voltage and current dividers, meters, Kirchhoff’s laws, Thvenin and Norton theorems, batteries, magnetism, induction, alternating voltage and current, reactance, ac circuits, time constants, and resonance. NOTES: For details of topics covered in the high school variable course, please refer to appropriate advanced standing articulation agreement. This variable course is designed to allow students with Advanced Standing credit for ETEC 1509 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course will be delivered concurrently with ETEC 1510. (C: 0 lect/pres, 0 lab, 0 other)

ETEC 1510 - AC/DC Electricity
This is an introductory course in Basic Electronics. This course is designed for students who have no previous experience in electronics and for those who need a review of basic electronic concepts. The primary goals of this course are to help individuals acquire a solid foundation in the basic electronic skills and to apply these skills through simulation and laboratory experiments. Topics include: conductors and insulators, resistors, capacitors, inductors, Ohm’s law, series circuits, parallel circuits, series-parallel circuits, voltage and current dividers, meters, Kirchhoff’s laws, Thvenin and Norton theorems, batteries, magnetism, induction, alternating voltage and current, reactance, ac circuits, time constants, and resonance. (C: 5 lect/pres, 3 lab, 0 other)

ETEC 1520 - Semiconductor Devices
This is a first course in semiconductor devices and their utilization in modern electronic circuitry. This course is designed for students who have a working knowledge of basic electronics. The primary goals of this course are to help individuals acquire a solid foundation in using, analyzing, and troubleshooting semiconductor circuits. Individuals will apply these skills through simulation and laboratory experiments. Topics include: semiconductor theory, diodes, bipolar and fied effect transistors, transistor biasing, ac models, voltage and power amplifiers, silicon controlled rectifiers, frequency analysis, operational amplifiers, feedback, active filters, comparators, oscillators, power supplies, operation of basic test equipment, handling procedures for semiconductor devices, and experimental verification of semiconductor device characteristics. (Prerequisite: ETEC 901) Prerequisite(s): ETEC1510 (C: 4 lect/pres, 4 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
ETEC 2511 - Fluid Power
This course is an introductory course in Fluid Power. This course is designed for students who have no previous experience in fluid power or hydraulics. The primary goals of this course are to help individuals acquire a practical working knowledge of process control instruments and systems, and to acquire the necessary skills to analyze these systems through simulation and laboratory experiments. Topics include: pressure, flow, properties of fluids, fluid conductors, seals, reservoirs, contamination control, actuators, directional control valves, pressure controls, flow controls, proportional and servo valves, pumps, motors, accessories, hydraulic circuits and systems.
(2 C: 1 lect/pres, 1 lab, 0 other)

ETEC 2520 - Fundamentals of Instrumentation
This is an introductory course in instrumentation. This course is designed for students who have no previous experience in instrumentation. The primary goals of this course are to help individuals acquire a practical working knowledge of process control instruments and systems, and to acquire the necessary skills to install and maintain these systems through simulation and laboratory experiments. Topics include: level, pressure, flow and temperature sensors, electronic and pneumatic instruments, signal conditioning, control and process diagrams, calibration of instruments, control components and systems.
Prerequisite(s): ETEC1510 or concurrent registration
(4 C: 2 lect/pres, 2 lab, 0 other)

ETEC 2530 - Process Control Systems
This is an introductory course in automated control circuits, devices and systems. This course is designed for students who have successfully completed the Fundamentals of Instrumentation course. The primary goals of this course are to help individuals acquire a more in-depth knowledge of process control systems, and to acquire the necessary skills to analyze these systems through simulation and laboratory experiments. Topics include: feedback and feed-forward control loops, cascade loops, PID controllers, ratio controllers, batch control, tuning control loops, analyzing and troubleshooting control systems.
(4 C: 2 lect/pres, 2 lab, 0 other)

ETEC 2540 - Automation
This is a fundamental course in automated control circuits, devices and systems. This course is designed for students who have a good working knowledge of basic electricity. A background in semiconductor and digital devices would be helpful but not necessary to be successful in this course. Students will acquire a working knowledge of automated circuits, systems and devices by building and testing actual control circuits, and programming programmable logic controllers. Topics include: contact and non-contact sensors, solenoids, relays and relay logic, AC/DC motors, timing devices, counters, encoders, servomechanisms, programmable controllers, robotics, computer-numeric controllers, ladder logic and ladder diagrams.
(4 C: 3 lect/pres, 1 lab, 0 other)

ETEC 2550 - Automation Project Lab
This course is a hands on course in automation. Students will design, build and test basic automated control circuits, select appropriate components, interpret system specifications, write, modify and debug programs for programmable logic controllers and troubleshoot and repair automatic control circuits and systems. Projects include: machine sequencing, elevator control, bottle filling system, material handling systems, robotic systems and motor control systems.
(4 C: 0 lect/pres, 4 lab, 0 other)

ETEC 2552 - Structured Programming Logic for Control Systems
This course gives students a fundamental understanding of programming structures, procedural and object oriented programming, pseudocode and the use of flow charts. Students will use those structures to implement automated processes and control systems.
(3 C: 2 lect/pres, 1 lab, 0 other)

ETEC 2562 - Instrumentation Flex Lab
This is a capstone course that allows students to expand their knowledge and skills in a specific area of interest. Students may work as an individual or as a member of a 2 person team. Students choose their project, perform the necessary research, design, build, test, demonstrate the working project and submit a written paper about the project. This is a variable credit course, with 2-8 credits.
Prerequisite(s): ETEC2540
( C: 0 lect/pres, 0 lab, 0 other)

FBMT 1112 - Foundations for Farm Business Management
This course is an overview of the Farm Business Management Program. The student will be introduced to goal setting, self and business assessment, recordkeeping, and business projects to provide the foundation for personal and business management progress. Current issues affecting business management are an integral part of the course.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 1121 - Introduction to Farm Business Management
This course introduces basic farm business management concepts. Students will study the farm management planning cycle and develop an understanding of its relationship to: family and farm business goal setting, cash and enterprise accounting principles, and tax planning.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 1211 - Managing and Modifying Farm System Data
This course provides an opportunity for the student to view the farm business and its various components through a number of vehicles such as balance sheets, farm personal and managerial inventories, enterprise reports and historical data.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 1212 - Interpreting and Using Farm System Data
This course assists the students in achieving awareness of development in agricultural policies and practices throughout the world and assessing the impact of these policies and practices on the profitability and viability of their farm business.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 1213 - Managing a Farm System in a Global Economy
This course assists the students in achieving awareness of development in agricultural policies and practices throughout the world and assessing the impact of these policies and practices on the profitability and viability of their farm business.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 1223 - Using System Analysis in Total Farm Planning
This course enables study of concepts related to farm business analysis, and exploration of possible implications and/or solutions to these concepts. A systematic method to assess farm business strengths and weaknesses based on the analysis will be used.
(2 C: 0 lect/pres, 0 lab, 2 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
FBMT 1233 - Application of Productive Enterprise Information
This course describes procedures for applying enterprise information provided by computerized analysis of farm business accounts.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2141 - Interpreting and Evaluation of Financial Data
This course continues to expand on preparation and evaluation of the farm business analysis. This course provides continued guidance and perfection of business record close out procedures, tax implications of management decisions, and continues to monitor farm business and family goals.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2142 - Interpreting Trends in Business Planning
This course examines whole farm, enterprise, balance sheet, and inventory trends. Current analysis data is compared to historical data in making future farm business planning decisions. Financial ratios are used to indicate the farm financial structure.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2151 - Strategies in Farm System Data Management
This course will help the student focus on long term strategies necessary to maintain and enhance the farm business and personal future financial goals. The student will complete the year by developing an accurate, usable business analysis.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2152 - Integrating System Information for Financial Planning
This course uses farm system information to develop a farm financial plan. Interpretation and analysis of the farm system data will enhance the reliability of the farm plan. The comprehensive farm plan will integrate historical trends, farm and personal goals, financial and enterprise performance of the farm business.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2161 - Examination of the Context of Farm System Management
This course is designed to assist students in preparation of improved farm system management procedures. Students in this course will evaluate several years of an improved farm system analysis.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2162 - Refining Farm System Management
This course is the culmination of activities designed to enable the student to develop and implement a comprehensive farm business strategic plan. The student will use the components of the Farm Business Management Program to develop and support a farm business strategic plan.
(4 C: 0 lect/pres, 0 lab, 4 other)

FBMT 2200 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2201 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2202 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2203 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2204 - Special Topics - General Farm Management
This course is designed for farmers and/or agribusiness people with little or no Internet experience. Topics will include: accessing the Internet, use of various search engines, Internet access providers, and exploration of agriculture topics and issues.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2205 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2206 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2207 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2208 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2209 - Special Topics - General Farm Management
This course covers special topics of interest in general farm management.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 2210 - Special Topics-Marketing
This course covers special topics of interest in marketing.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2211 - Special Topics - Marketing
This course covers special topics of interest in marketing.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2212 - Special Topics - Marketing
This course covers special topics of interest in marketing.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2213 - Special Topics - Marketing
This course covers special topics of interest in marketing.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2214 - Special Topics - Marketing
This course covers special topics of interest in marketing.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2220 - Special Topics - Crops
This course covers special topics of interest in crops.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2221 - Special Topics-Crops
This course covers special topics of interest in crops.
(1 C: 0 lect/pres, 0 lab, 1 other)

FBMT 2222 - Special Topics - Crops
This course covers special topics of interest in crops.
(1 C: 0 lect/pres, 0 lab, 1 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.

<td>FBMT 3121</td>
<td>Applications of Financial Management/Business Plans</td>
<td>This course will provide the necessary instruction to put together and implement a business plan for the farm business. (3 C: 0 lect/pres, 0 lab, 3 other)</td>
</tr>
<tr>
<td>FBMT 3130</td>
<td>Directed Study - Decision Making</td>
<td>This course will examine the individual, family and farm business decision making process with emphasis on upgrading and improving decision making resources, tools and skills. Particularly, this course will lead the student to critically analyze information, applications and implications of decision making as it relates to their own situation. Students will evaluate their own decision making process. (2 C: 0 lect/pres, 0 lab, 2 other)</td>
</tr>
<tr>
<td>FBMT 3131</td>
<td>Directed Study - Communications</td>
<td>This course will assist the student in further acquiring and developing a higher level of communications skills. Students will review and evaluate various communication methods and techniques in dealing with and relating to individuals in both the public and private sectors. Students will use this information in formulating an effective communication method and style. Additional course content may include student initiated or group activities. (2 C: 0 lect/pres, 0 lab, 2 other)</td>
</tr>
<tr>
<td>FBMT 3132</td>
<td>Directed Studies in Modern Agricultural Technology</td>
<td>This course will deal with experiencing modern agricultural technological changes and determining if they fit into an individual’s farming operation. (2 C: 0 lect/pres, 0 lab, 2 other)</td>
</tr>
</tbody>
</table>

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
FBMT 3133 - Directed Studies in Farm Business and/or Family Transition
This course will focus on the many methods of farm business and/or family transition problems confronted during transition, family and/or transition needs and concerns, how to plan for farm business and/or family transition, and actually implementing a farm business and/or family transition plan.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 3134 - Directed Study - Personnel Management
This course will organize skills for effective management of farm employees and agribusiness personnel through development of: handbooks, compensation/incentive packages, individual expectations/evaluations, and team meetings.
(2 C: 0 lect/pres, 0 lab, 2 other)

FBMT 3135 - Directed Study - Enterprise Alternatives
This course will assist those students wanting to make changes in their farm business through enterprise expansion, addition or enhancement. The course will develop a set of procedures for exploring and evaluating alternative choices.
(2 C: 0 lect/pres, 0 lab, 2 other)

FFCR 1520 - Fire Fighting I
Students will be enabled to apply the fundamental skills and knowledge required to function as a Fire Fighter under direct supervision on the fire ground. Emphasis is placed on skills needed for fire suppression in a safe and effective manner in accordance with the National Fire Protection Association (NFPA) 1001 Standards.
(3 C: 1 lect/pres, 2 lab, 0 other)

FFCR 1550 - Leadership for the Chief Fire Officer
Students will be enabled to apply the fundamental leadership skills and knowledge required to function as an entry level Chief Fire Officer. Emphasis will be placed on leadership styles, techniques and the unique challenges of leadership utilizing a military structure in both volunteer and paid departments. This course will be taught utilizing the "Chief Officers Training Curriculum, Leadership," written and administered through the UNITED STATES FIRE ADMINISTRATION and the UNITED STATES NATIONAL FIRE ACADEMY.
Prerequisite(s): FFCR1520
(2 C: 2 lect/pres, 0 lab, 0 other)

FFCR 1552 - Human Resource Development
Students will be enabled to apply the fundamental skills and knowledge in the area of human resources required to function as an entry level Chief Fire Officer. Emphasis will be placed on workforce management, organizational environment, diversity and personnel support techniques within a military structure in both volunteer and paid departments.
This course will be taught utilizing the "Chief Officers Training Curriculum, Human Resource Development" written and administered through the UNITED STATES FIRE ADMINISTRATION and the UNITED STATES NATIONAL FIRE ACADEMY.
Prerequisite(s): FFCR1520
(2 C: 2 lect/pres, 0 lab, 0 other)

FFCR 1554 - Community Risk Reduction
Students will be enabled to apply the fundamental skills and knowledge in the area of Community Risk Reduction required to function as an entry level Chief Fire Officer. Emphasis will be placed on developing and managing a risk reduction plan based on response areas or neighborhood-based risk reduction programs utilizing a systematic analysis of the target audience and the profile of their communities.
This course will be taught utilizing the "Chief Officers Training Curriculum, Community Risk Reduction" written and administered through the UNITED STATES FIRE ADMINISTRATION and the UNITED STATES NATIONAL FIRE ACADEMY.
Prerequisite(s): FFCR1520
(1 C: 1 lect/pres, 0 lab, 0 other)

FFCR 1556 - Operations for the Chief Officer
Students will be enabled to apply the fundamental skills and knowledge in the area of operations required to function as an entry level Chief Fire Officer. Emphasis will be placed on developing skills and knowledge to effectively make strategic decisions when managing a complex incident.
This course will be taught utilizing the "Chief Officers Training Curriculum, Operations" written and administered through the UNITED STATES FIRE ADMINISTRATION and the UNITED STATES NATIONAL FIRE ACADEMY.
Prerequisite(s): FFCR1520
(5 C: 5 lect/pres, 0 lab, 0 other)

FNCR 1200 - Personal Money Management
This course provides skill instruction in basic money management activities involving financial decision making (balance sheet and income statement), budgeting, banking services, credit card use, major expenditure decisions, income and asset protection, and investment planning.
(3 C: 3 lect/pres, 0 lab, 0 other)

FNCR 1206 - Professional Expectations I
Finance and Credit industry expected skills, abilities, and character traits are identified and discussed. Strategies to demonstrate and document the student’s ability and willingness to meet these expectations are presented.
(1 C: 1 lect/pres, 0 lab, 0 other)

FNCR 1207 - Professional Expectations II
Students will learn from experts in the banking, finance, collections, investment, insurance, credit, and real estate industries. Industry presentations will provide students with insight into the current issues of their respective industries and discuss what students can do to be successful in those industries.
Prerequisite(s): FNCR1206
(1 C: 1 lect/pres, 0 lab, 0 other)

FNCR 1208 - Professional Expectations III
Students will prepare a portfolio demonstrating mastery of the skills, abilities, and character traits required to be successful in the finance and credit industry.
Prerequisite(s): FNCR1207
(1 C: 1 lect/pres, 0 lab, 0 other)

FNCR 1220 - Principles of Banking
A history of banking and the current banking industry is examined. The focus centers on the main functions of banking and the products and services offered by the banking industry.
(3 C: 2 lect/pres, 1 lab, 0 other)

FNCR 1240 - Supervision
This course concentrates on the managerial functions of planning, organizing, staffing, leading, and controlling, including goal setting, time management, motivation techniques, communications, problem solving, and decision making.
(3 C: 2 lect/pres, 1 lab, 0 other)

FNCR 1250 - Credit Law
This course reviews our legal system and contract law covered in BUSM 1275. Focus is then placed on laws dealing more specifically with credit, banking, real estate, employment insurance, and probate.
(3 C: 3 lect/pres, 0 lab, 0 other)

FNCR 1255 - Marketing
This course provides students with introduction to marketing essentials such as marketing concepts and processes, understanding consumers and markets, targeting markets, marketing mix concepts, marketing research and decision making processes.
(3 C: 2 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
FNCR 2215 - Commercial Lending
This course covers the basic definitions, concepts and principles of commercial lending. Areas covered include a review of the commercial lending environment, loan interviewing, credit investigation, financial statement analysis, loan structuring, loan negotiation, documentation and closing, and resolving problem loans. (3 C: 3 lect/pres, 0 lab, 0 other)

FNCR 2245 - Consumer Lending
Students will study the essential concepts needed to understand the consumer loan function, including a history of consumer credit, evaluation of credit risks, and the gathering, investigating, and analysis of credit information. Students will also study procedures involved in documenting, servicing, managing, pricing and marketing flows. (3 C: 2 lect/pres, 1 lab, 0 other)

FNCR 2270 - Collection Techniques
This course covers information regarding regulations as they pertain to collections and the tools and techniques used by credit grantors and collection agencies in skip tracing and collecting. (3 C: 2 lect/pres, 1 lab, 0 other)

FNCR 2273 - Internship
This will be available to students who have demonstrated readiness and willingness to work in an on-the-job situation. It usually will be a training culmination and an opportunity to apply the skills learned. (4 C: 0 lect/pres, 0 lab, 4 other)

GBEH 1300 - Human Relations
In this course the students and instructor will analyze human relationships in social, institutional, and cultural contexts. They will also analyze the effects of attitudes, values, and beliefs on communication and behavior. Examination of the roots of privilege, oppression, and cultural change are also included. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

GBUS 1320 - Professional Development I
This course will help students develop team building skills, leadership skills, enhance their personal and professional confidence. (1 C: 1 lect/pres, 0 lab, 0 other)

GBUS 1324 - Professional Development II
This course will introduce students to total quality management, team building and networking skills. Students will explore their humanitarian responsibility, personal accountability and develop organizational and management skills. (1 C: 1 lect/pres, 0 lab, 0 other)

GBUS 1328 - Professional Development III
This course will help the student use individual and team skills in various meetings and community activities. The Spring or Fall Home Shows, Parade of Homes, and business tours would be included. Prerequisite(s): GBUS1320, GBUS1324 (1 C: 1 lect/pres, 0 lab, 0 other)

GEOG 1300 - World Regional Geography
Meets MN Transfer Goals 5 and 8 - History/Social, Behavioral Sciences and Global Perspectives
A survey of the physical, cultural, economic and political features of the world’s geographic regions. Identification of world’s countries and major cities. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

GERO 1300 - Introduction to Gerontology
Meets MN Transfer Goal 7 - Human Diversity. This course explores the biological, social, psychological and economic changes that accompany the aging process. Students will explore societal factors affecting resources available to the elderly and possible roles they might fill as family members or professionals caring for the elderly. (3 C: 3 lect/pres, 0 lab, 0 other)

GRPH 1205 - QuarkXpress - Modified Course for Tech Prep
QuarkXpress is the dominant page layout program of the graphic arts industry. Students will learn how to use this powerful software to create pamphlets, advertisements, booklets, and just about any printed or digital document. Features include extensive text manipulation, photo and illustration control, color trapping, art and design capabilities, and preparation for output. A highly versatile program is valuable for beginners and professionals alike. NOTES: For details of topics covered in the high school variable course, please refer to appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep college credit for GRPH 1205 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (GRPH 1205) will be delivered concurrently with GRPH 1206. (C: 0 lect/pres, 0 lab, 0 other)

GRPH 1206 - QuarkXpress
QuarkXpress is the dominant page layout program for the graphic arts industry. Students will learn how to use this powerful software to create pamphlets, advertisements, booklets, and just about any printed or digital document. Features include extensive text manipulation, photo and illustration control, color trapping, art and design capabilities, and preparation for output. A highly versatile program that is valuable for beginners and professionals alike. (3 C: 1 lect/pres, 2 lab, 0 other)

GRPH 1209 - Electronic Imaging - Modified Course for Tech Prep
In today’s world of digital communication, the artboard, straight edge, and pencil have been replaced by the computer, scanner, and imagesetter. This course will give you the information you need in order to communicate with these tools. Included are topics in color theory and application, fundamentals of reproduction, flatbed scanning, output procedures, and an in-depth analysis of the several related but distinct types of electronic resolution - the building blocks of digital imaging. NOTES: For details of topics covered in the high school variable course please refer to the appropriate Tech Prep articulation agreement. This variable course is designed to allow students with Tech Prep college credit for GRPH 1209 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (GRPH 1209) will be delivered concurrently with GRPH 1210. (C: 0 lect/pres, 0 lab, 0 other)

GRPH 1210 - Electronic Imaging
In today’s world of digital communication, the artboard, straight edge, and pencil have been replaced by the computer, scanner, and imagesetter. This course will give you the information you need in order to communicate with these tools. Included are topics in color theory and application, fundamentals of reproduction, flatbed scanning, output procedures, and an in-depth analysis of the several related but distinct types of electronic resolution-the building blocks of digital imaging. (3 C: 2 lect/pres, 1 lab, 0 other)

GRPH 1215 - Adobe In-Design
Adobe In-Design is a powerful, design-oriented publishing tool that is quickly becoming a major force in the printing and publishing industries. It lets you integrate text and graphics into finished layouts, and produces files that may be printed to local or networked printers, taken to commercial service providers, or published to the World Wide Web. (3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.

152
**GRAPH 1219 - Adobe Illustrator - Modified Course for Tech Prep**
The student will perform skills in a vector based draw program. The course will cover an introduction to Adobe Illustrator as well as advanced information. Emphasis is on Macintosh equipment. Students will gain knowledge in the program through weekly assignments and lecture. 

**NOTES:** For details of topics covered in the high school variable course, please refer to the appropriate advanced standing articulation agreement. This variable course is designed to allow students with Tech Prep college credit for GRAPH 1219 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (GRAPH 1219) will be delivered concurrently with GRAPH 1220.

(3 C: 1 lect/pres, 2 lab, 0 other)

**GRAPH 1220 - Adobe Illustrator**
The student will perform skills in a vector based graphics program. The course will cover an introduction to Adobe Illustrator as well as advanced information. Emphasis is on skills acquisition in the software as well as output. Students will gain knowledge in the program through weekly assignments and lecture. (There are no prerequisites for the course, but Macintosh computer familiarity would be helpful).

(3 C: 1 lect/pres, 2 lab, 0 other)

**GRAPH 1224 - Adobe Photoshop - Modified Course for Tech Prep**
Adobe Photoshop is the leading software tool used by the design community and prepress industry to create color corrections and special effects using photographic and computer generated images. Students will learn the functions of this application to create and process images for various outputs, including print media, multimedia, and web images. The basics of scanning will be covered. Design and color theory are taught as integral parts of this class.

**NOTES:** For details of topics covered in the high school variable course, please refer to appropriate advanced standing articulation agreement.

This variable course is designed to allow students with Advanced Standing credit for GRAPH 1224 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (GRAPH 1224) will be delivered concurrently with GRAPH 1225.

(3 C: 0 lect/pres, 0 lab, 0 other)

**GRAPH 1225 - Adobe Photoshop**
Adobe Photoshop is the leading software tool used by the design community and prepress industry to create color corrections and special effects using photographic and computer generated images. Students will learn the functions of this application to create and process images for various outputs, including print media, multimedia, and web images. The basics of scanning will be covered. Design and color theory are taught as integral parts of this class.

(3 C: 1 lect/pres, 2 lab, 0 other)

**GRAPH 1230 - Web Design Fundamentals**
Web Site Fundamentals covers the creation and design of a web site. In this course students will learn basic technologies that go into the construction of web sites. This course is not intended to make the student a programmer, but to make them comfortable with a basic knowledge of HTML, web editors, and associated web design techniques.

(3 C: 2 lect/pres, 1 lab, 0 other)

**GRAPH 1249 - Offset Press Operations I - Modified Course for Tech Prep**
The student will work with several different duplicators with emphasis on set up, theory, operation, basic job planning, copy adjustment, cleanliness, care of equipment, and safety. The student also practices minor plate and press trouble shooting. 

**NOTES:** For details of topics covered in the high school variable course please refer to the appropriate Tech Prep College Credit articulation agreement.

This variable course is designed to allow students with Tech Prep College Credit for GRAPH 1249 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (GRAPH 1249) will be delivered concurrently with GRAPH 1250.

(3 C: 0 lect/pres, 0 lab, 0 other)

**GRAPH 1250 - Offset Press Operation I**
The student will work with several different duplicators with emphasis on set up, theory, operation, basic job planning, copy adjustment, cleanliness, care of equipment, and safety. The student also practices minor plate and press trouble shooting.

(3 C: 1 lect/pres, 2 lab, 0 other)

**GRAPH 1252 - Offset Press Operation II**
The student will refine basic press operation skills. This course will concentrate on close register and critical pressure adjustment, as well as maintenance. Four-color process will be produced on the latest up-to-date Heidelberg equipment.

**Prerequisite(s):** GRAPH1250

(3 C: 1 lect/pres, 2 lab, 0 other)

**GRAPH 1260 - Graphic Design for Printers**
This course will introduce students to a methodical approach to problems of graphic design. Emphasis will be placed on the elements of design and development of graphic communication projects as they relate specifically to the printing industry.

(3 C: 2 lect/pres, 1 lab, 0 other)

**GRAPH 1280 - Print Production**
This course covers the production aspect of Graphic Arts. The production class is designed for advance students. In the class the student will work in a print shop setting. The object of the course is to take in coming work and flow it through a print environment. Emphasis will be on becoming more efficient and productive.

(3 C: 2 lect/pres, 1 lab, 0 other)

**GRAPH 2212 - Advanced Production Techniques I**
This course provides those students who have shown proficiency in the previous classes an opportunity to move beyond the standard curriculum and customize a program that will give them expanded experience in the field of their choice.

Having gained an introduction to the many areas in the graphic arts industry over the preceding semesters, students can choose to advance in press operation, electronic publishing/electronic prepress, or a combination of all. Techniques and equipment used are dependent upon the individual student’s needs.

(2 C: 1 lect/pres, 1 lab, 0 other)

**GRAPH 2214 - Advanced Production Techniques II**
This course provides those students who have shown proficiency in the previous classes an opportunity to move beyond the standard curriculum and customize a program that will give them expanded experience in the field of their choice.

Having gained an introduction to the many areas in the graphic arts industry over the preceding semesters, students can choose to advance in press operation, electronic publishing/electronic prepress, or a combination of all. Techniques and equipment used are dependent upon the individual student’s needs.

(2 C: 0 lect/pres, 2 lab, 0 other)

**GRAPH 2222 - Supervised Internship I**
This course features a cooperative on-the-job education program for students interested in internships within the printing industry. Application of competencies gained from previous courses will be identified in an individual training plan to provide meaningful occupational experience in the career area of the student’s choice.

(2 C: 0 lect/pres, 0 lab, 2 other)

**GRAPH 2224 - Supervised Internship II**
This course features a cooperative on-the-job education program for students interested in internships within the printing industry. Application of competencies gained from previous courses will be identified in an individual training plan to provide meaningful occupational experience in the career area of the student’s choice.

A continuation of Supervised Internship I.

(2 C: 0 lect/pres, 0 lab, 2 other)

---

**PLEASE NOTE:** All program plans are preliminary and curriculum may change without notice.
GTEC 1304 - The Automobile in America
Explore the history and future of the automobile and its impact on labor, culture, society, the environment, and the economy of the United States. Analyze the effect of the automobile on your present and future lifestyles.
(3 C: 3 lect/pres, 0 lab, 0 other)

HART 1502 - Copper and Gas Piping
In this course students will learn to solder, braze, swage and flare copper tubing as used in the HART field. Students will also learn how to cut, deburr, and thread gas piping for the HART field. (1 C: 0 lect/pres, 1 lab, 0 other)

HART 1506 - Schematics and Blue Print Reading
In this course students will study, draw and read wiring schematics so they can properly analyze electrical problems in furnaces and air conditioners. Students will also learn to read blueprints to properly size furnace and air conditioners for residential homes.
Prerequisite(s): HART1514, HART1518
(3 C: 2 lect/pres, 1 lab, 0 other)

HART 1510 - Sheetmetal
This course will enable you to use sheet metal hand tools, squaring shear and brake to make simple sheetmetal fittings. Students will lay out and make many different sheetmetal projects in residential heating and air conditioning.
(1 C: 0 lect/pres, 1 lab, 0 other)

HART 1514 - Forced Air Heating
In this course you will study different types of residential furnaces, gas and fuel oil. The function of each component and how they operate together to make the furnace safe and function properly to heat your home.
(5 C: 3 lect/pres, 2 lab, 0 other)

HART 1518 - Electrical Controls for Heating and A/C
This course will start out with the fundamentals of electricity and take you through the safety and operative controls in residential heating and a/c. You will learn how they operate, what they control, and what the controls are protecting and how they are protecting the unit, device or structure.
(4 C: 2 lect/pres, 2 lab, 0 other)

HART 1522 - Installation of Heating and A/C
This course will enable you to install furnaces and A/C in residential houses. It also includes gas piping standard and two pound systems. Also the proper venting of standard and high efficiency furnaces. You will be able to correctly install evaporators and condensing units for central A/C.
Prerequisite(s): HART1502, HART1510, HART1514, HART1518
(3 C: 2 lect/pres, 1 lab, 0 other)

HART 1526 - Principles of Air Conditioning
In this course you will be introduced to refrigeration systems used in air conditioning. You will also learn the function of the four basic components of the a/c, evaporator, condenser, compressor and metering devices. Also charging, evacuating and reclaiming residential a/c systems.
Prerequisite(s): HART1514, HART1518
(4 C: 2 lect/pres, 2 lab, 0 other)

HART 1530 - Heat Pumps
In this course you will study fundamentals of heat pump as applied to both heating and a/c. Both air-to-air heat pump and ground source heat pumps and how each work.
Prerequisite(s): HART1514, HART1518
(2 C: 1 lect/pres, 1 lab, 0 other)

HART 1534 - Troubleshooting Heating and A/C
This course will enable you to diagnose malfunctions in residential heating and A/C systems by learning the proper troubleshooting techniques, repairing or replacing defective components.
Prerequisite(s): HART1514, HART1518
(3 C: 1 lect/pres, 2 lab, 0 other)

HART 1538 - HART Job Preparation
This course is designed to prepare students for job seeking skills necessary to complete a resume and job interviews. This course will also cover customer relation and service order documentation skills as it relates to the HVAC industry.
(1 C: 1 lect/pres, 0 lab, 0 other)

HART 1540 - Internship - Residential
This course is designed to allow students to apply the knowledge and skills learned in the classroom and lab. Students will work for a residential heating and air conditioning company.
Prerequisite(s): HART1502, HART1510, HART1514, HART1518
(2 C: 0 lect/pres, 0 lab, 2 other)

HART 2502 - Commercial Refrigeration II
Students will do an in depth study of commercial refrigeration systems and refrigeration controls. Students will perform control adjustments and installation.
(4 C: 2 lect/pres, 2 lab, 0 other)

HART 2506 - Commercial Refrigeration I
Students will study fundamental principles of commercial refrigeration. Students will study accessories and perform troubleshooting on commercial applications.
Prerequisite(s): HART1502, HART1540
(4 C: 2 lect/pres, 2 lab, 0 other)

HART 2510 - Commercial Electrical and Controls
Students will study the operation and troubleshooting of commercial electrical controls as they relate to commercial refrigeration, heating and air conditioning systems. Students will perform troubleshooting and installation of controls.
Prerequisite(s): HART1502, HART1540
(3 C: 2 lect/pres, 1 lab, 0 other)

HART 2514 - Compressor Operation and Troubleshooting
Students will study in-depth the operation and the troubleshooting skills for refrigeration and air conditioning compressors. Students will perform operational checks and teardown of compressors.
Prerequisite(s): HART2506, HART2510
(3 C: 1 lect/pres, 2 lab, 0 other)

HART 2518 - Commercial Troubleshooting
Students will use knowledge and tools to troubleshoot commercial refrigeration, air conditioning and heating equipment. Students will use refrigeration theory and electrical diagrams to troubleshoot equipment.
Prerequisite(s): HART2506, HART2510
(2 C: 1 lect/pres, 1 lab, 0 other)

HART 2522 - Commercial Air Conditioning
Students will service and install commercial air conditioning systems. Students will do an in-depth study of controls and types of air conditioning systems as they relate to the commercial field.
Prerequisite(s): HART1502, HART1540
(3 C: 2 lect/pres, 1 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
HART 2526 - Commercial Heating and HVAC Systems
Students will use their skills and knowledge to troubleshoot, perform maintenance and install commercial heating and HVAC systems. Students will do an in-depth study of controls and design of commercial heating and HVAC systems. Prerequisite(s): HART2506, HART2510, HART2522, HART2530, HART2540
(3 C: 2 lect/pres, 1 lab, 0 other)

HART 2530 - Commercial Load Calculating
Students will properly select the correct refrigeration equipment to load demands. Students will also determine the proper piping size and accessories for the equipment selected. Prerequisite(s): HART1502, HART1540
(2 C: 1 lect/pres, 1 lab, 0 other)

HART 2534 - Commercial HVAC Controls
Students will use their knowledge of commercial heating, air conditioning systems and ventilation to perform service, installation and maintenance on equipment. Students will study the design and controls of commercial HVAC equipment. Prerequisite(s): HART2506, HART2510, HART2522, HART2530
(2 C: 1 lect/pres, 1 lab, 0 other)

HART 2540 - Internship - Commercial
The student must have internship approved by instructor and have a completed internship agreement form signed by supervisor of internship and by instructor. Prerequisite(s): HART1502, HART1540
(2 C: 0 lect/pres, 0 lab, 2 other)

HASL 1400 - American Sign Language I
An introduction to beginning ASL sign vocabulary. The student will learn more grammatical features and more-depth classifiers with emphasis on visual American Sign Language. This course promotes an increased understanding and appreciation of Deaf culture. (3 C: 3 lect/pres, 0 lab, 0 other)

HASL 1404 - American Sign Language II
Review and expansion of basic vocabulary and grammatical structure, conversational practice. Must be taken in sequence. Prerequisite(s): HASL1400. (3 C: 3 lect/pres, 0 lab, 0 other)

HASL 1408 - American Sign Language III
Meets Mn Transfer Goal 8 - Global Perspective. Continuation of American Sign Language expansion of intermediate vocabulary, grammar and visual language with increased speed and clarity of fingerspelling and signing. Prerequisite(s): HASL1404. (3 C: 3 lect/pres, 0 lab, 0 other)

HASL 1412 - American Sign Language IV
Meets Mn Transfer Goal 8 - Global Perspective. Intense study of intermediate + (or intermediate plus) vocabulary and ASL grammatical structures, in-depth descriptive classifiers, with few repetitions and students’ self critique. Knowledge of political corrections signs. Primarily for intermediate sign language students. Prerequisite(s): HASL1408
(3 C: 3 lect/pres, 0 lab, 0 other)

HLTH 1400 - Nursing Assistant/Home Health Aide
The students will be introduced to concepts of basic human needs for a variety of populations, safe environment, emergency measures and basic nursing skills. Skills are performed in a supervised laboratory and clinical setting. This course is intended to prepare students for employment as Nursing Assistants, Home Health Aides/or Homemakers. The Federal and State OBRA Laws and MN Department of Health requirements are met in this course. (4 C: 2 lect/pres, 2 lab, 0 other)

HLTH 1404 - Home Health Aide/Homemaker
This course is intended to prepare Nursing Assistants as Home Health Aides and/or Homemakers. The Federal and State OBRA Laws and MN Department of Health requirements are met in this course. (1 C: 1 lect/pres, 0 lab, 0 other)

HLTH 1430 - Introduction to Health Careers
This course will provide an introduction and review of a variety of health care careers and their respective work settings to the beginning health care student. An overview of diversified health occupations will provide a foundation of which the student will be able to decide upon furthering their health care career plans and goals. This course will focus on information essential to the success of today’s health care worker. Discussion of professional standards of practice, working with others, communication skills, legal and ethical responsibilities, infection control, safety promotion, cultural diversity, problem solving, decision making, basic college skills, resume writing, and role play interviewing will be provided. (2 C: 2 lect/pres, 0 lab, 0 other)

HLTH 1440 - Medical Terminology
This course will enable students to interpret basic medical terminology. Prefixes, suffixes, word roots, combining forms, plural forms, abbreviations and drugs and their classifications will be covered. Emphasis is placed on definition, usage, and pronunciation. Students will learn the rules for separating medical terms into their word parts which will enhance the ability to spell medical terms correctly. (1 C: 1 lect/pres, 0 lab, 0 other)

HLTH 1444 - Introductory Anatomy and Physiology
This course will enable students to develop a basic understanding of the normal structure and functioning of the human body. Students will start by studying cells, tissues and membranes, then study the structure and functions of each of the organ systems, which include the integumentary, skeletal, muscular, nervous, urinary, circulatory, lymphatic, respiratory, reproductive, sensory, digestive, and endocrine systems. Students will also require team building, problem solving, communication and critical thinking skills through the group work and the assignments given. (4 C: 4 lect/pres, 0 lab, 0 other)

HLTH 1448 - Infection Control
The student will study scientific concepts related to the causes of disease, how disease is spread and methods for controlling its spread as well as how the body responds and protects itself from disease. (1 C: 1 lect/pres, 0 lab, 0 other)

HLTH 1460 - Nutrition
This course is an introduction to basic nutrition and its relationship to health. Prerequisite(s): READ0304 or Appropriate Accuplacer Score. (1 C: 1 lect/pres, 0 lab, 0 other)

HLTH 1468 - Essentials of Nutrition
This course is an introduction to the basic principles of nutrition. This course provides instruction on the principles of assessing, diagnosing, planning, implementing and evaluating total care of clients and helps the student contribute to the nutritional well-being of clients. Prerequisite(s): READ0304 or Appropriate Accuplacer Score. (2 C: 2 lect/pres, 0 lab, 0 other)

HLTH 1484 - Ethics for Health Careers
This course prepares health and human service students and graduates for situations they will face in their professional lives that have an ethical component. The students will learn basic ethical theory and concepts. This theory will be used as they apply practical approaches to identify and deal with common problems in their chosen fields. Prerequisite(s): READ0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
HPWT 2502 - Reverse Osmosis Chemistry
Reverse Osmosis (OR) Chemistry applies chemical concepts to water and membrane technologies. It relates atomic theory to water contaminants so as to develop a thorough understanding as to why particular contaminants behave the way they do. It includes the means by which those contaminants are measured or characterized. It then applies these principles to reverse osmosis membrane technology in order to recognize how the water characteristics affect the performance of the membrane. (2 C: 0 lect/pres, 0 lab, 2 other)

HPWT 2504 - Reverse Osmosis Principles
Reverse Osmosis (RO) principles develops an understanding of the components and issues involved in an operational RO system. It covers the issues involved in the mechanical configuration of an RO membrane system. It applies design variables, discusses monitoring variables, and demonstrates how to adjust variables in a working RO system. It also illustrates some of the important RO maintenance functions, as well as some critical RO performance concerns. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2506 - Reverse Osmosis (RO) Monitoring
Reverse Osmosis (RO) Monitoring provides the tools necessary for the detailed tracking of the performance of a reverse osmosis (RO) system. It includes common methods of analysis for key water contaminants. It develops an understanding of the RO operating and performance variables, including how they are calculated and applied. It completes with methods that can be used to break down and characterize RO system performance as a means of monitoring or analyzing system problems. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2508 - Reverse Osmosis (RO) Cleaning
Reverse Osmosis (RO) Cleaning develops an understanding of the chemical nature of cleaning solutions so as to correctly apply them in maximizing RO membrane cleaning effectiveness. It explains how the different cleaning agents work in the removal of common membrane foulants and scale. It then offers methods for correctly cleaning an RO membrane system and evaluating the effectiveness of a cleaning. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2510 - Reverse Osmosis (RO) Pretreatment
Reverse Osmosis (RO) Pretreatment details the equipment requirements upstream of a reverse osmosis (RO) system so as to minimize the RO maintenance requirements and increase the longevity of the membrane elements. It begins with the treatment provided by many municipal water treatment facilities and expands this into the requirements more specific for RO systems. This covers media filtration for removal of suspended solids, acid and scale inhibitor injection, or softening, for control of scale formation, and the removal of biocides that might be incompatible with the RO membrane. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2512 - Reverse Osmosis (RO) Biological Control
Reverse Osmosis (RO) Biological Control investigates the nature of biological activity so as to better understand how it can be effectively controlled in a reverse osmosis (RO) system. It discusses the needs that bacteria have for their survival and how their reproduction can foul an RO system. It covers the different methods available for killing and controlling bacteria and how these methods can be applied to an RO system. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2514 - Reverse Osmosis (RO) System Design
Reverse Osmosis (RO) System Design applies water quality information to the design of a reverse osmosis (RO) system that is based on meeting the requirements of the membrane element manufacturers. It covers the options available when designing a new system, including design methods for reducing the fouling or scale formation potential of the system. It also includes methods for designing a two-pass RO system, for projecting RO permeate quality, and for estimating the RO system operating and capital equipment costs. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2516 - Reverse Osmosis (RO) System Analysis
Reverse Osmosis (RO) System Analysis provides methods for logically determining the likely cause of a problem in reverse osmosis (RO) performance. It includes methods for isolating the location of the problem within the RO system as a means of gaining insight into the problem. It includes common system performance problems as they relate to the location of the problem. It also covers methods for verifying the suspected problem. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2518 - Ion Exchange (IX) Principles
Ion Exchange (IX) Principles applies concepts of water chemistry and chemical equilibrium to the development of a detailed understanding of the ion exchange process. It covers the nature of ion exchange resins, and how they are used in single-bed, two-bed, and mixed-bed systems in the creation of high purity water. It includes information on how to monitor and optimize the performance of ion exchange systems. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2520 - Electrodialysis Reversal (EDR) and Electrodeionization (EDI)
Electrodialysis Reversal (EDR) and Electrodeionization (EDI) Principles relates concepts of ionic conductivity and electricity to electrochemistry, as it applies to electrodialysis reversal (EDR), and then builds on this knowledge to explain electrodeionization (EDI). It discusses how ion exchange membrane sheets and electricity can be used to move ions out of a feed water stream into a concentrate stream in the EDR process. Scale control is performed by switching electrode polarity and reversing the movement of ions. Ion exchange resin beads can be added within certain chambers of the device as a means of continuously achieving even higher purity effluent water in the EDI process. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2522 - Ion Exchange (IX) System Design
Ion Exchange (IX) System Design provides methods for designing ion exchange systems and predicting their performance. It covers how to relate incoming water quality to design variables, how to choose resin types, and size tanks. It also covers regeneration system design and flow rate calculations. It finishes with topics related to the application of ion exchange units to high purity water systems. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2524 - Ion Exchange (IX) System Analysis
Ion Exchange (IX) System Analysis provides methods for determining if there is a problem with the performance of an ion exchange bed and for finding out what the problem is. It discusses the symptoms of common ion exchange problems. It details how water and resin analyses can be used to monitor and identify problems. Finally, it discusses how to fix common problems and avoid their occurrence. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2526 - Deionized (DI) Water Principles
Deionized (DI) Water Principles develops an understanding of the nature of deionized (DI) water as a process chemical, how it is created, and how it is used. It includes a discussion of the various DI water requirements from different industries, and the methods used to achieve those qualities. It covers many of the challenges of DI water systems and the methods used to deal with those challenges. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2528 - Deionized (DI) Water System Design
Deionized (DI) Water System Design explains the options available when designing a water treatment system as they are affected by the feed water quality and the desired deionized (DI) water quality. It details with the roles played by different types of water treatment equipment in their contribution to the production of a high purity water. It covers the sizing of flow rates and equipment. It also discusses the design of reclaim DI water systems and distribution piping systems. (2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
HPWT 2530 - Deionized (DI) Water System Analysis
Deionized (DI) Water System Analysis stresses the use of scheduled and documented instrument calibration in combination with the establishment of a contaminant history throughout a deionized (DI) water system, which can later be used to isolate DI water-related problems. It relates analytical techniques to common DI water equipment problems, and explains how specialized techniques can be used to identify a contaminant. It includes a method of correlating water quality trends with other process changes and isolating the problem with its DI system origin. (2 C: 2 lect/pres, 0 lab, 0 other)

HPWT 2532 - Deionized (DI) Water Maintenance
Deionized (DI) Water Maintenance describes how the various on-line, on-site and off-site analysis can be used to monitor the performance of a DI water system as a basis for determining its maintenance requirements. It explains the purpose and limitations of some common analytical techniques, and special concerns related to analyzing DI water. It covers the proper methods for changing our cartridge filters and verifying their integrity. It also covers methods for sanitizing piping systems. (2 C: 2 lect/pres, 0 lab, 0 other)

HUMN 1300 - Introduction to the Humanities
Meets Mn Transfer Goal Area 6 - Humanities. Introduction to Humanities allows students to explore, celebrate, and experience the human need to create thought, visual and performing art, literature, and architecture. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

HUMN 1320 - Holocaust and Genocide Studies
Meets Mn Transfer Goals 6 and 9 - Humanities and Ethical and Civic Responsibility. This course provides a broad introduction to Holocaust and contemporary genocide studies. Students will read, discuss, and analyze various types of Holocaust and other contemporary genocide literature, as well as the relevant historical events and perspectives, which surround the Holocaust and other contemporary genocides. The contemporary genocides studied will vary. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

HUMN 1340 - Middle Eastern Cultures
Meets Mn Transfer Goal Areas 6 and 8 - Humanities and Global Perspectives This course will explore and examine a number of Middle Eastern cultures. It focuses on central characteristics, beliefs, and insights, which have shaped their values, practices, and aspirations over the centuries. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

HUMN 2350 - Film and American Culture
Meets Mn Transfer Goal Area 6 - Humanities. This course examines contemporary American culture and society through film. We will investigate the culture in which we live and the movies our culture produces. By watching, discussing, and writing about these films, we will examine how motion pictures create a window into modern American society. Successful completion of 20 credits of General Education courses by the start of the course. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

HUMN 2352 - Holocaust Field Studies
Meets Mn Transfer Goal Area 6 - Humanities. This course will introduce students to the United States Holocaust Memorial Museum and give them an opportunity to tour the museum. The tour will give the students a chance to view primary documentation and actual Holocaust artifacts. Students will also have the privilege to meet and interact with a Holocaust survivor and hear his/her experience first hand. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (1 C: 1 lect/pres, 0 lab, 0 other)

ICVT 1422 - Cardiovascular Instrumentation
A study of concepts that serve as the foundation for the cardiovascular technology field. Topics include basic electricity and electrical safety, physiological monitoring instrumentation, x-ray tubes and bio-effects of radiation. (5 C: 0 lect/pres, 0 lab, 0 other)

ICVT 1423 - Catheterization Lab Fundamentals I
This course focuses on the cath lab procedures, scrub and circulate, equipment set-up, hemodynamic monitoring, and the coronary angiography procedure itself. Corequisite(s): ICVT1443. Prerequisite(s): ICVT1422 (2 C: 2 lect/pres, 0 lab, 0 other)

ICVT 1443 - Cardiovascular Clinic I
Introduction to the aspects of cardiac cath lab in a hospital or simulated clinical laboratory setting. Emphasis placed on instrumentation, entry-level scrub/circulate, and lab set-up. Prerequisite(s): ICVT1422 (5 C: 0 lect/pres, 5 lab, 0 other)

ICVT 2426 - Catheterization Lab Fundamentals II
A continuation of Catheterization Lab Fundamentals I with emphasis on pharmacology, advanced cardiovascular diagnostic and therapeutic procedures, percutaneous coronary intervention procedures, and cardiac surgical procedures. Corequisite(s): ICVT2446 Prerequisite(s): ICVT1423, USCV1400 (4 C: 4 lect/pres, 0 lab, 0 other)

ICVT 2446 - Cardiovascular Clinical II
Practical training with focus on completing and becoming proficient in all duties of the cardiovascular technologist in the cath lab, to include diagnostic and interventional procedures, in both scrub/circulate and hemodynamic monitoring capacities. Prerequisite(s): ICVT1443, USCV1400 (5 C: 0 lect/pres, 5 lab, 0 other)

ICVT 2450 - Applied Clinical Internship
Advanced and intense internship in a hospital or clinic setting. Specific detailed learning objectives are developed for each course by the college facility. Students will broaden and perfect their skills through hands-on participation. Students will be able to carry out everyday duties of the technologist when their clinical experience is complete. Prerequisite(s): ICVT2426, ICVT2446 (13 C: 0 lect/pres, 0 lab, 13 other)

LSCS 1502 - Surveying Principles I
The student will study error analysis and measurements, random errors, survey standards and specifications. Focus will also be on state plane coordinate calculations, development of coordinate geometry, trigonometric solutions, geodetic surveying problems, positioning of corners in Public Land Survey System. Students will study historical development, description and land boundary elements related to platting, which includes, deed interpretation and boundary systems. Corequisite(s): LSCS1526 (3 C: 1 lect/pres, 2 lab, 0 other)

LSCS 1506 - Advanced Survey
Students will study advanced distance, angle and elevation work, including traverse layout, topographic data collection, x-sections and profiles, horizontal and vertical curves and property line surveying and precise leveling. This course includes practical field applications including total station and data collector and data transfer. Prerequisite(s): LSCS1530, LSCS1502 or concurrent registration (5 C: 1 lect/pres, 4 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
LSCE 1510 - Civil Drafting Methods
This course is designed to develop the student’s technical skills in map making and construction document drafting. Also to give an introduction to interpreting legal descriptions and exposure to the coordinate system, and basic concepts of the public land surveying system. Students will study and practice survey and civil engineering drafting techniques. Drafting work includes horizontal and vertical alignments with horizontal and vertical curves. Course will focus on hand drafting methods.
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 1514 - Civil CADD I
Students will develop a knowledge of system configuration, hardware operations and interactive graphics software (“AutoCAD” and “Softdesk”). The student will input drafting commands to develop civil/survey drawings, store data and produce digital drawings.
Prerequisite(s): LSCE1510
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 1518 - Materials, Estimating, and Specifications
Students will study and practice procedures for estimating quantities and costs as they relate to public works projects. Topics include concrete and asphalt estimating in the preliminary, final and as-built phases of construction. The student will be introduced to materials testing. Students will study construction materials, construction methods, inspection and quality control. The students will study standard contracts and specification documents.
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 1522 - Technical Computations I
Students will study percents, signed numbers, algebraic operation, equation manipulation, ratios, geometric principles, trigonometric functions, area and volume calculations and physics concepts.
Prerequisite(s): MATH0380 or Appropriate Accuplacer Score.
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 1526 - Technical Computations II
Students will study the natural laws that govern the relationship between work, force, motion, energy and power. Students will apply this knowledge through practical lab experiments and problem solving. Students will perform the basic computations in the civil engineering/land surveying field. These include: volumes, bearings/azimuths, latitudes/departures, area traverse and various curve calculations. The student will also study elementary concepts involving coordinate geometry and route-survey methods.
Prerequisite(s): MATH1300, LSCE1510 or LSCE1510, TECH1500 or LSCE1510, LSCE1522
(4 C: 3 lect/pres, 1 lab, 0 other)

LSCE 1530 - Survey Fundamentals
Students will study basic surveying with practical applications in horizontal distance, angle and vertical measurement, introduction to total station/data collection, traverse angle and distance measurement methods. The student will begin using coordinate geometry. This course includes extensive fieldwork.
(5 C: 1 lect/pres, 4 lab, 0 other)

LSCE 2502 - Control and Digital Surveys
Students will focus on preliminary and final survey procedures in gathering information through total station and automated data collection procedures. Subjects include centerline profiles, cross sections, radio topography, advanced traversing, triangulation, resection, star shots, areas, volumes, section breakdown and subdivision surveys. Field projects will use total station and data collections procedures.
Prerequisite(s): LSCE1506, LSCE2514
(5 C: 1 lect/pres, 4 lab, 0 other)

LSCE 2506 - Construction Design and Surveying Principles
Students will focus on construction survey techniques and systems used in construction projects. The student will use practical field techniques for staking profile, blue tops, slope and grade staking, sanitary and storm, curb and gutter, water mains, buildings and some aspects of platting. Emphasis will be on both Total Station with data collection and traditional methods.
Prerequisite(s): LSCE2502, LSCE2522 or Concurrent Registration
(5 C: 1 lect/pres, 4 lab, 0 other)

LSCE 2510 - Surveying Principles II
Students will study Minnesota State Statutes, county and city ordinances relating to platting and surveying methods, along with techniques for record research. Emphasis will also be on writing of land descriptions and easements. Students will study professional duties of surveyor and civil engineer responsibilities and liabilities, tracing land boundaries, boundary establishment through riparian rights, deed descriptions, plats, survey evidence, metes and bounds and Public Land Survey System.
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 2514 - Civil CADD II
Students will focus on interactive Computer Aided Drafting and Design software applications as they relate to basic principles of drawing and design of civil/survey projects. Students will focus on coordinate geometry, mapping, digital terrain modeling, plating, detail drafting and design using CADD methods.
Prerequisite(s): LSCE1502, LSCE1514, LSCE1526
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 2518 - Utility Design I
Students will study basic fluid mechanics. Focus will be on fluid flow characteristics of gravity sanitary sewer and storm sewer systems. Students will be introduced to storm water hydrology, storm water management, and various wetland issues. Students will design storm sewer systems including piping, inlet structures, storm water facilities and site grading and will prepare plan and profile drawings.
Prerequisite(s): LSCE1526
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 2522 - Civil CADD III
Students will perform civil engineering and land surveying design tasks using advanced Autodesk engineering and surveying software. Topics include advanced principles of coordinate geometry, digital terrain modeling, roadway plan and profile, cross sections and earthwork design.
Prerequisite(s): LSCE2514
(3 C: 1 lect/pres, 2 lab, 0 other)

LSCE 2526 - Subdivision Design
Students will focus on subdivision design. Topics include plat layout, grading and earthwork, hydrology, and storm water management. The student will also study wetland issues, existing land use factors, and zoning considerations. Minnesota State Statutes, county and city ordinances relating to platting, along with techniques for record research will also be discussed.
Corequisite(s): LSCE2514, Prerequisite(s): LSCE1502
(4 C: 3 lect/pres, 1 lab, 0 other)

LSCE 2530 - Utility Design II
Students will study basic fluid mechanics and flows in both gravity and pressure systems. Focus will be on flow characteristics in sanitary sewer systems and water supply systems. Students will design a water distribution system and become familiar with materials, valves, flow control devices, appurtenances and construction.
Corequisite(s): LSCE2522
Prerequisite(s): LSCE2518
(3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
MACH 1501 - Machine Tool I - Modified Course for Tech Prep
This course will cover first level instruction in the setup and operation of common machine tools as well as the use of hand and precision tools. Machining of projects will begin with basic cutoff saw, lathe, milling machine and drill press setup and operation. Complimentary skills will be demonstrated in off-hand grinding and bench work operations. NOTES: For details of topics covered in the high school variable course please refer to appropriate advanced standing articulation agreement. This variable course is designed to allow students with Advanced Standing credit for MACH 1501 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (MACH 1501) will be delivered concurrently with MACH 1502. (C: 0 lect/pres, 0 lab, 0 other)

MACH 1503 - Machine Technology I
This course will address the operations of a drill press, pedestal grinder, vertical mill, lathe, and band saws. Machine safety, machine component identification, as well as turning, milling, sawing, bench, drilling and off-hand grinding projects are also included in the components listed above. The student will also learn the care and use of inspection and layout tools. (4 C: 0 lect/pres, 4 lab, 0 other)

MACH 1505 - Machine Tool Technology II - Modified Course for Tech Prep
This course is part of a Tech Prep articulation agreement. The students participating will be required to attend this class the full semester. This course will cover the operations of a drill press, pedestal grinder, milling machines, lathe, vertical, horizontal band saws and bench tools. Machine safety and machine component identification are also a part of the components listed above. The student will perform part layout, as well as milling, taper turning, boring, threading, drilling and proper hand tool use. The student will also learn the care and use of inspection and layout tools. NOTES: For details of topics covered in the high school variable course please refer to the appropriate advanced standing articulation agreement. This variable course is designed to allow students with Advanced Standing credit for MACH 1505 that was earned in high school to complete the remaining course requirements at SCTC. This SCTC course (MACH 1505) will be delivered concurrently with MACH 1504. (C: 0 lect/pres, 0 lab, 0 other)

MACH 1510 - Machine Technology II
This course will cover additional skill development in the setup and operation of saws, milling machines, lathes and drill presses. More complex machining tasks will be included in mill, drill machining and lathe machining projects. Introductory open setup inspection and layout exercises will be performed in the inspection area. Additional inspection tools and equipment will be used as they relate to checking project dimensions. Prerequisite(s): MACH1503 (4 C: 0 lect/pres, 4 lab, 0 other)

MACH 1512 - Machine Technology III
This course will address the operations of horizontal and vertical milling machines, lathes and surface and cylindrical grinders. Machine safety and machine component identification are also a part of the components listed above. The student will perform part layout, as well as slot and pocket milling, taper turning, boring, drilling and grinding projects. The students will also learn the care and use of different tooling used in the lathe, milling machines, surface grinders and cylindrical grinder. Prerequisite(s): MACH1510, MACH1517 (6 C: 0 lect/pres, 6 lab, 0 other)

MACH 1514 - Introduction to Swiss Machining
This course is an introductory course to Swiss machining and programming. Upon completion of this course the student will become familiar with Swiss turning machine equipment, components, features, tooling, setup and programming. Students will also work on advanced projects on manual equipment when assigned. Several units of advanced inspection procedures and equipment will be part of this course. Prerequisite(s): MACH1512, MACH1517 (2 C: 0 lect/pres, 2 lab, 0 other)

MACH 1515 - Blueprint Reading I
This course will cover the basic principles of blueprint reading that will include three view drawings, the types of lines and view arrangements, dimensioning, types of tolerancing, surface textures, and classification of fits. Corequisite(s): MACH1503, MACH1510 (1 C: 0 lect/pres, 1 lab, 0 other)

MACH 1519 - Blueprint Reading II
The student will interpret intermediate level blueprints involving orthographic views, section views and cutting planes. Special views, datums, welding symbols and sketching are also emphasized. Prerequisite(s): MACH1517, MACH1503 (1 C: 0 lect/pres, 1 lab, 0 other)

MACH 1525 - Geometric Dimensioning and Tolerancing
This course is designed to allow students to interpret the latest ANSI Y 14.5 drawing standard that applies to blueprint standards. Students will learn the symbols, rules and geometric controls shown on today’s blueprints. Students will be given prints and exercises to enhance their skills in print reading. Job seeking and keeping information will also be provided for students. (1 C: 0 lect/pres, 1 lab, 0 other)

MACH 1528 - Jigs and Fixtures
This course is designed to familiarize the student with basic types and functions of jigs and fixtures used in metalworking industries. Various workholding types from simple soft jaws to modular workholding systems will be examined. Design principles, which explore simplicity and economy, are considerations, which are discussed in the course. (1 C: 1 lect/pres, 0 lab, 0 other)

MACH 1530 - CNC Fundamentals
This course is intended to give the student an introduction into the computer numerical control segment of machine tool technology. The student’s time will be spent learning the fundamentals of CNC machines, programming aspects, coordinate systems, word address system, computer download routines and basic setups. (2 C: 1 lect/pres, 1 lab, 0 other)

MACH 2502 - Introduction to CNC Turning
This is a basic programming and CNC lathe operation course. The student will learn the basics of the word address system as applied to CNC turning centers. Programs will be written manually and with computer-assist (CAM) and proved out using simulation software prior to running on the CNC turning center. Students will machine their own parts and inspect for dimensional accuracy using appropriate precision tools. (3 C: 1 lect/pres, 2 lab, 0 other)

MACH 2506 - Introduction to CNC Milling
Basic programming and milling course. Students will learn the CNC word address programming language. The primary activities of this course are to program, setup and operate a CNC milling machine. Programming will involve drilling and milling operations, using manual and computer-assist (CAM) methods. Students will input programs using manual data input or download through a personal computer. Programs will be input, saved and simulated on a personal computer prior to downloading into the CNC mill. (3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
MACH 2510 - Cutting Tool Technology
This course will emphasize the identification and use of standard and special cutting tools. Conventional cutting tools will be examined as to their application in machining. Carbides, cermet, diamond and cubic boron carbide type cutting inserts will be examined as to their use in machining and manufacturing.
(1 C: 1 lect/pres, 0 lab, 0 other)

MACH 2514 - Metallurgy
This course will examine various steels and non-steel metals and their mechanical properties. Other types of materials such as castings, forgings and powder metal (PM) materials will also be analyzed. Lab work will consist of performing a tensile test on a metal, hardness testing, and the heat-treat of a steel workpiece. Heat treat applications will also be an important segment of the course.
(1 C: 0 lect/pres, 1 lab, 0 other)

MACH 2518 - Advanced CNC Milling
This course will emphasize the setup and operation of (CNC) machining centers to produce multiple and/or complex machined piece-parts. The programs will be written both manually and computer-assist and simulated on the computer prior to running on the machine. Program entry will be performed through downloading from the computer. Prerequisite(s): MACH2506
(3 C: 1 lect/pres, 2 lab, 0 other)

MACH 2523 - High Performance Manufacturing
This course is designed to help students understand the practical use of basic quality management as well as production tools and procedures. Students will be engaged in the use of various statistical process control charting and exercises which stress quality in the workplace. Corrective and preventive action techniques will be used in assessing non-conforming product. Information on the control and documentation of production will be stressed.
(1 C: 0 lect/pres, 1 lab, 0 other)

MACH 2526 - Advanced CNC Turning
This course will emphasize the setup and operation of a (CNC) slant bed turning center with a Fanuc control. Students will be required to perform setups and program complex shaped piece-parts using internal and external tools. The programs will be written both manually and computer-assist (CAM) and simulated on the computer prior to running on the machine. Program entry will be performed through downloading from the computer. Prerequisite(s): MACH2502
(3 C: 1 lect/pres, 2 lab, 0 other)

MACH 2528 - Electrical Discharge Machining
This course is intended to give the student an opportunity to learn the area of electrical discharge machining. Students will setup, operate and program these machines to produce parts to blueprint requirements.
(2 C: 0 lect/pres, 2 lab, 0 other)

MACH 2530 - 3D Milling
This course will emphasize the setup and operation of computerized (CNC) machining centers to produce three-dimensional shaped piece-parts. The projects will be programmed using manual and computer-assist techniques. Three-dimensional programs using sub-programming will also be addressed. The machining in three axes will be performed on metal parts and mold shapes. Prerequisite(s): MACH2506, MACH2518 or may be taken in conjunction with this course. (2 C: 0 lect/pres, 2 lab, 0 other)

MACH 2532 - Swiss Turning Intermediate
This course is intended to give the student an opportunity to advance in learning Swiss turning practices and programming of these automated machines. Programming of these machines will be an integral part of this course. Prerequisite(s): MACH1514
(2 C: 0 lect/pres, 2 lab, 0 other)

MACH 2536 - Swiss CNC Turning Advanced
This course is intended to give the student an in-depth experience in Swiss CNC turning. The student’s time will be spent learning the programming software and advanced programming language necessary to complete multi-axis and multi-operations on the machine. The use of special Swiss CNC cutting tools will be emphasized. The use of high precision inspection tools such as optical comparators and high precision measuring tools will be an integral part of the course. Prerequisite(s): MACH1514
(2 C: 0 lect/pres, 2 lab, 0 other)

MACH 2544 - CNC/CAM Capstone
Students will engage in advanced machining activities encompassing all areas of CNC and CAM. Course focus will include: 4th axis programming and part development on machining centers; drawing solid models using CAM systems; utilizing the drawings to develop .stl files, and building the shape using a 3D printer.
(1 C: 0 lect/pres, 1 lab, 0 other)

MATH 0380 - Basic Math Skills
This course is designed to help students upgrade their skills in addition, subtraction, multiplication and division of whole numbers, decimal numbers and fractions as well as ratios and proportions, percents, basic geometric formulas and the metric system. Students will also acquire skills in pre-algebra; signed numbers, powers, and solving simple equations. This course will emphasize solving and applications of these skills.
(3 C: 3 lect/pres, 0 lab, 0 other)

MATH 0470 - Elementary Algebra
This course is an introductory course in the principles and applications of algebra. Topics covered include solving equations and inequalities, application of percents, graphs of equations, data analysis, graphing linear equations, exponents and scientific notations, operations on polynomials, factoring polynomials, solving quadratic equations be factoring, and rational expressions. A wide variety of examples and exercises are used to help the student connect the mathematical content with the real world. Prerequisite(s): MATH0380 or Appropriate Accuplacer Score.
(3 C: 2 lect/pres, 1 lab, 0 other)

MATH 0480 - Intermediate Algebra
This course is an intermediate course in the principles and applications of algebra. Topics covered include division and factoring polynomials, rational equations, functions, systems of equations, radical expressions and equations, quadratic equations, and exponential and logarithmic functions. A wide variety of examples and exercises are used to help the student connect the mathematical content with the real world. Prerequisite(s): MATH0470 or Appropriate Accuplacer Score.
(3 C: 2 lect/pres, 1 lab, 0 other)

MATH 0490 - College Algebra Prep
This course is designed for students who would like to independently review select topics in Intermediate Algebra. The student must start and finish the course within one semester or summer equivalent. This is a self-paced independent course with access to the instructor through e-mail, online office hours, and through face-to-face office hours. The course is delivered online, but the student will have to take the final exam in person on campus. The primary goal of this course is to provide a refresher to students who are on the borderline between College Algebra and Intermediate Algebra. The course topics are: Fractions, Linear Equations, Graphing, Exponents, Polynomials, Factoring, Rational Expressions, Radicals, Quadratic Equations, Functions, and Conic Sections. Prerequisite(s): MATH0470 or Appropriate Accuplacer Score.
(2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
MATH 1300 - College Algebra
Meets MN Transfer Goal 4 - Mathematical/Logical Reasoning
This course covers topics typically addressed in a college algebra course. The course is designed for students who have good elementary and applied algebra skills. The primary goals of this course are to help individuals acquire a solid foundation in the basic skills of college algebra and to show how college algebra can be used to model and solve authentic real-world problems. Prerequisite(s): MATH0480 or LSCE1522 or TECH 1500 or Appropriate Accuplacer Score. (3 C: 2 lect/pres, 1 lab, 0 other)

MATH 1320 - College Trigonometry
Meets MN Transfer Goal 4 - Mathematical/Logical Reasoning
This course covers topics typically addressed in a college trigonometry course. The course is designed for students who have good algebra skills and need to understand trigonometric functions and their applications. The primary goals of this course are to help individuals acquire a solid foundation in the basic skills of college trigonometry and to show how college trigonometry can be used to model and solve authentic real-world problems. Prerequisite(s): TECH 1500 or MATH 1300 or LSCE 1522 (2 C: 1 lect/pres, 1 lab, 0 other)

MATH 1330 - Cultural Mathematics
Meets MN Transfer Goal 4 - Mathematical/Logical Reasoning
This course is an investigation into the nature of mathematics and the application of mathematics to varied disciplines including the arts and sciences across cultures. Students will experience mathematics as a creative and evolving discipline. Topics include critical thinking, sets, logic, number systems, algebra, graphs, functions, linear equations, inequalities, metric system, geometry, probability, and statistics. Emphasis will be placed on applications in these topic areas. Prerequisite(s): MATH 0480 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

MATH 1350 - Introduction to Statistics
Meets MN Transfer Goal 4 - Mathematical/Logical Reasoning
This course is an introduction to the principles and applications of statistics that emphasizes working with data and statistical ideas. The primary goals of this course are to help individuals acquire a solid foundation in the basic principles of statistics and to show how statistics can be used to analyze and solve authentic real-world problems. This course uses data and examples from many disciplines and is applicable to any major. Topics include descriptive measures of empirical data, graphs and distributions, sampling and experiment design, probability and probability distributions, estimation, hypothesis testing, inference, correlation, and regression. Prerequisite(s): MATH 1300 (3 C: 3 lect/pres, 0 lab, 0 other)

MHTT 1502 - Diesel Engine I
In this introductory course, students learn theory design to operation of a diesel engine and fuel system. Working in the lab in groups of two, students will disassemble, inspect and reassemble a running light duty diesel engine. After completion of this course students will be prepared to advance to Diesel II. (4 C: 2 lect/pres, 2 lab, 0 other)

MHTT 1506 - Mobile Hydraulics
In addition to power steering, the application of hydraulics on trucks is widespread, such as on sanitation, snowplows, agriculture, and construction trucks. In this course students study the design and operation of pumps, valves, cylinders, motors, and other hydraulic components on these trucks. The student will service, test, and repair hydraulic systems used on trucks. (2 C: 1 lect/pres, 1 lab, 0 other)

MHTT 1508 - Truck Computer Systems
Students will study an overview of the computer systems used on trucks. The emphasis will be on the study of input devices, ECM operation, and output devices. Students will identify components, test their operation, retrieve and program data, in accordance with manufacturer's procedures. Prerequisite(s): TRAN 1504 (2 C: 1 lect/pres, 1 lab, 0 other)

MHTT 1510 - Truck Power Train
The truck power train makes it possible to deliver engine power to the vehicle wheels. This course covers theory and operation of all drive system components including manual transmissions, clutches, drive lines and differentials. Other studies include component troubleshooting, repair operations, and preventive maintenance practices. (4 C: 1 lect/pres, 3 lab, 0 other)

MHTT 1514 - Truck Brake Systems
Proper brake system operation is vital to safe utilization of any vehicle used on public roadways. This course covers air and hydraulic brake system theory and operation including actuation and foundation system assemblies. Other studies include component troubleshooting, repair operations, and preventive maintenance practices. (4 C: 1 lect/pres, 3 lab, 0 other)

MHTT 1518 - Truck Steering/Suspension
Understanding and maintaining truck steering and suspension systems is necessary to achieve peak tire life, fuel economy, and safe vehicle operation. Studies include steering and suspension system theory of operation, repair procedures, and preventive maintenance operation. (3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 1522 - Electrical II
Through this course the electrical theory learned in Electrical I is applied to the vehicle by the study of the starting and charging systems. Upon the completion of this course students will be able to troubleshoot and repair starting and charging systems on light, medium, and heavy trucks. (2 C: 1 lect/pres, 1 lab, 0 other)

MHTT 1526 - Truck Maintenance
The goal of low cost efficient truck operation is to maintain the trucks in a manner that minimized repair and downtime and ensures safe vehicle operations for the driver. This goal is the emphasis for this course. Following the recommendations of the OEM maintenance manuals, the student will perform truck maintenance in the lab. (3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 1530 - Welding
In the trucking industry there is often a need for technicians to have basic welding knowledge and skills. Students are introduced to Shield Metal Arc Welding (SMAW), gas metal arc welding (GMAW), plasma cutting, and oxygen acetylene cutting, heating, welding (OAW). Working in the lab on exercises and projects, students will practice these welding processes safely. (3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 1534 - Body Repair
In the trucking industry, it is sometimes important for technicians to perform basic truck repair. In this elective course students will have the opportunity to study and practice safety, body hardware, glass replacement, fiberglassing, and painting. (3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
MHTT 2502 - Diesel II
With the knowledge and experience gained in Diesel I, students practice engine rebuilding skills on medium to heavy duty diesel engines in the lab. Emphasis is placed on understanding the theory and operation of different fuel systems and tune up procedures.
Prerequisite(s): MHTT1502
(4 C: 1 lect/pres, 3 lab, 0 other)

MHTT 2506 - Diesel III
In this final course of the Diesel Engines/Fuel Systems series, students study and work on electronic computer driven engines. Through the knowledge and skills gained in this and previous diesel engine courses, students will be able to program engine computers, diagnose engine failures, and repair engines.
Prerequisite(s): MHTT2502
(4 C: 2 lect/pres, 2 lab, 0 other)

MHTT 2514 - Gasoline Engines
In this elective course students have an opportunity to study gasoline engine systems while rebuilding their own gasoline engine in the lab. Emphasis is placed on different fuel and ignition systems.
Prerequisite(s): MHTT1502
(3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 2518 - Automatic Transmissions
The popularity of the transmission in the trucking industry continues to grow. This elective course gives students the opportunity to study the theory and operation in the classroom. Then, experience hands on skills in the lab by practicing the rebuilding of an operational Allison automatic transmission.
Prerequisite(s): MHTT1502, (3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 2522 - Electrical III
This advanced course involves lighting, instrumentation, accessories, and ABS electrical systems on medium and heavy trucks and trailers. Emphasis is placed on using wiring diagrams and digital multimeters to troubleshoot electrical failures and performing industry approved electrical repair procedures.
Prerequisite(s): MHTT1522, (3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 2526 - Truck Maintenance II
Proper vehicle maintenance is critical for economic security and competitiveness in any vehicle maintenance operation. This course covers preventive maintenance program design and implementation. Other studies include D.O.T. (Department of Transportation) vehicle inspection procedures, extending vehicle service file, failure analysis, troubleshooting, and repair techniques.
Prerequisite(s): MHTT1526, (4 C: 1 lect/pres, 3 lab, 0 other)

MHTT 2530 - Truck Heating and AC Systems
Proper operation of Heating and AC ventilation systems is important for driver comfort and safe vehicle operation. This course covers theory and heater AC and ventilation systems. Other studies include system troubleshooting, repair operations, and preventive maintenance practices.
Prerequisite(s): TRAN2514
(2 C: 1 lect/pres, 1 lab, 0 other)

MHTT 2534 - Transport Refrigeration
Many truck technicians choose careers in which knowledge and skills in transport refrigeration system are needed. The theory and skills are achieved in lecture and through working in the lab on truck and trailer refrigeration units. Emphasis is on maintenance and troubleshooting of electrical and refrigeration systems.
(3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 2536 - Truck Systems Troubleshooting
Basic skills acquired by the student in previous courses shall be used and developed into advanced troubleshooting skills needed in various aspects of the transportation industry. Studies include, electrical system diagnosis and troubleshooting, mechanical system diagnosis and troubleshooting, and proper manufacturer service manual and information utilization.
Prerequisite(s): MHTT1502, MHTT1522, MHTT2502
(3 C: 1 lect/pres, 2 lab, 0 other)

MHTT 2538 - Supervised Internship
Students will work in a sponsoring Medium/Heavy truck service facility. The work will be full time, approximately 40 hours per week. The tasks will be consistent with previous course work. This is a variable credit course, with credits 1-7.
Prerequisite(s): MHTT1526
( 0 C: 0 lect/pres, 0 lab, 0 other)

MHTT 2546 - Truck Preventive Maintenance and Troubleshooting
Basic skills acquired by the student in previous courses shall be used and developed into advanced troubleshooting and preventive maintenance skills necessary to operate a truck fleet or perform shop operations in the transportation industry. Studies shall include mechanical and electrical system diagnosis and troubleshooting procedures. Identifying and practicing mechanical and electrical system preventive maintenance operations. Customer/shop communication processes shall also be studied.
(4 C: 1 lect/pres, 3 lab, 0 other)

MSNA 1200 - IT Essentials
Students will the functionality of hardware and software components as well as suggested best practices in maintenance and safety issues. The students, through hands-on activities and labs, learn to assemble and configure a computer, install operating systems and software, and troubleshoot hardware and software problems. In addition, this course includes an introduction to networking. This course helps students prepare for the CompTIA A+ certification.
(3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 1202 - MS XP Professional 70-270
Students will study the skills needed to effectively manage the Windows operating environment. Topics include how to use functions and utilities, manage program properties, manage hardware devices, install operating system and applications and describe importance of DOS environment. This course will also prepare the student for the 70-270 exam.
(3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 1204 - Cisco (Exploration) Fundamentals
This course provides students with the fundamental skills needed to be successful in any network-related degree program by introducing architecture, functions, components and models of networks and using OSI and TCP/IP layered models. It uses the OSI and TCP layered models to examine the nature and roles of protocols and services at the application, network, data link, and physical layers. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced, to provide a foundation for the curriculum.
(3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
MSNA 1206 - Cisco (Exploration) Switching and Wireless
This course provides a comprehensive theoretical and practical approach to learning the technologies and protocols needed to design and implement a converged switched network. Students learn about the hierarchical network design model and how to select devices for each layer. The course explains how to configure a switch for basic functionality and how to implement Virtual LANs, VTP, and Inter-VLAN routing in a converged network. The different implementations of Spanning Tree Protocol in a converged network are presented. Students will develop the knowledge and skills necessary to implement a WLAN in a small to medium network. This course is part of the four-part Cisco curriculum that prepares for the CCNA certification exam. Prerequisite(s): MSNA204 (3 C: 1 lect/pres, 2 lab, 0 other)

MSNA 1208 - IT Essentials II
This course is an intensive introduction to networking fundamentals and multiuser/multitasking network operating systems. Students will learn characteristics of the Linux and MS Windows network operating systems. They will explore a variety of topics including installation and configuration procedures. Students will also learn more advanced administrative tasks such as troubleshooting issues, security issues, and remote access. The curriculum is a basic introduction to the CompTIA Server+ certification topics. (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 1210 - Panduit Network Installation Essentials
The PNIE course is designed for students interested in the physical aspects of voice and data network cabling and installation. The course focuses on cabling issues related to data and voice connections. It provides an understanding of the industry and its worldwide standards, types of media and cabling, physical and logical networks, as well as signal transmission. This course stresses documentation, design, and installation issues, as well as laboratory safety, on-the-job safety, and working effectively with others. Students successfully completing this course are eligible to earn Panduit Authorized Installer (PAI) global certification. (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 1212 - MS Server 2003 70-290
This Microsoft Official Academic Course provides everything students need to build the knowledge and skills necessary to install, configure, administer, and support the primary services in the Microsoft Windows Server 2003 operating system and to prepare for the Microsoft Certified Professional Examination 70-290: Managing and Maintaining a Microsoft Windows Server 2003 Environment. Prerequisite(s): MSNA1202, (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 2202 - MS Small Business Server 2003
Microsoft Small Business Server 2003 is the combination of Microsoft Server 2003 and Network Operating System (NOS) applications, including Exchange e-mail, SharePoint portal and document management, SQL database server and ISA Internet Server. Coursework includes installation, configuration of the server, as well as the NOS applications. This course will prepare students to maintain a Small Business Server to meet small and medium business information technology requirements. Prerequisite(s): MSNA2200 (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 2204 - Wireless CWNA
This lecture and lab course is designed to expose wireless concepts to the student. The student will understand how to install, configure, and troubleshoot wireless networks. Through current and book examples, the course will present real-world examples of the issues facing network administrators. Students will explore the basics of wireless networks, wireless security, network architecture, network models, risk management, network security policy, and configuration training. Prerequisite(s): MSNA1206 (2 C: 1 lect/pres, 1 lab, 0 other)

MSNA 2206 - Network Security
This course is designed to expose security concepts to students. The student will recognize how to prevent hackers from entering their network, and if breached, detect the intrusion. Using current events and examples, the students will work through real-world issues facing network administrators. Students will explore the basics of network security, security objectives, security architecture, security models, risk management, network security policy, and security training. The course will help prepare the student for the Security+ certification. Prerequisite(s): MSNA1204 and MSNA1212 (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 2208 - MSNA Practicum
Students will be assigned to an internal SCTC department, to practice previously learned knowledge and skills. They will maintain a log of their tasks and activities, which will be verified by their supervisors. Supervisors will, in coordination with the instructor, assess student performance. (1 C: 0 lect/pres, 0 lab, 1 other)

MSNA 2210 - Linux Workstation
Linux Workstation introduces students to the knowledge and skills needed to manage major Linux distributions, including installing the operating system (OS), navigating the file system and configuring OS security. Students will also learn to configure the X-Windows desktop, as well as to modify graphical user interface (GUI) settings to meet user needs and personal preferences. Course outcomes cover the objectives outlined by CompTIA, to prepare for its Linux+ exam and certification, an international industry credential that offers proof of knowledge. Prerequisite(s): MSNA1208 (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 2212 - Help Desk
This course provides students with the fundamentals to provide basic help desk services. Students, through case studies and hands-on projects, will learn to perform activities associated with real-world customer support operations. Focus will be on the development of interpersonal skills and communication with end-users, to troubleshoot and resolve real-world issues, and to identify user hardware and software requirements, based on present and future functional needs. Students will learn to determine user training requirements, and to develop training plans and written documentation for clients. Corequisite(s): MSNA2208 (3 C: 2 lect/pres, 1 lab, 0 other)

MSNA 2214 - MSNA Internship
The MSNA Internship is the capstone course for students enrolled in the MSNA major. Students entering the internship have already demonstrated their knowledge and abilities to perform entry level computer and network installation, configuration, maintenance, administration and repair. The internship is to be viewed as a first job in the Information Technology (IT) workplace, and be performed in an organization outside of the college. The internship may be either paid or unpaid. (4 C: 0 lect/pres, 0 lab, 4 other)

MSNA 2220 - A+ Certification Prep- Essentials and 220-602
A two-day seminar is to prepare students for taking the CompTIA A+ Certification Tests Essentials and 220-602, demonstrating their knowledge of microcomputer hardware, operating systems and software. (1 C: 1 lect/pres, 0 lab, 0 other)

MSNA 2222 - MS XP Pro 70-270 Cert Test Prep
A two-day seminar is to prepare students for taking the Microsoft Certification Test 70-270, demonstrating their knowledge of MS Windows XP Professional. Prerequisite(s): MSNA1202 (1 C: 1 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
PHIL 1320 - Ethics
Meets Transfer Goal Areas 6 and 9 - Humanities and Ethical and Civic Responsibility. This course explores the philosophical conceptions of morality and value. It addresses questions such as: how do we make ethical decisions? Where does our sense of right and wrong come from? Do the values we hold apply only to us as individuals, to us as part of a culture, or do they apply to all humans in all places and at all times? Through an examination of major ethical theories, both contemporary and classical, this course reveals the relationship between ethical theory and ethical practice, particularly as it relates to contemporary issues such as the death penalty, poverty, gay marriage, and war.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

PHIL 1340 - Introduction to Logic
Meets MN Transfer Goal Areas 2 and 4 - Critical Thinking and Mathematics. This course begins by exploring the principles of inductive and deductive reasoning. The course includes traditional Aristotelian logic and modern symbolic logic, validity, invalidity, and proofs. Students will study various methods for proving validity in deductive arguments as well as for recognizing informal fallacies in logical reasoning. Topics include the method of counter-example, symbolic translation, Venn diagrams, truth table, deductive fallacies and categorical syllogisms. Since this course can be taken to fulfill the Mathematical-Logical Reasoning general education requirement, students should expect a Math-like course, with exercises and exams.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

PHIL 1360 - Comparative World Religions
Meets Mn Transfer Goal Areas 6 and 8 - The Humanities and Global Perspective. Using a comparative framework, this course attempts to understand the nature of religion by looking at the historical and ideological formation of some of the world’s most influential religious traditions. It explores ideas of ultimate meaning in different cultures and different times, and follows the development of these ideas in the long search for purpose in human existence. The primary goal is to comprehend better the varieties of religious experience in the world, with a particular emphasis on understanding the unfamiliar empathetically and the familiar objectively.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

PHYS 1300 - General Physics
Meets MN Transfer Goal 3 - Natural Sciences. This is an introductory course in Physics and its applications. This course is designed for students who have no previous experience in physics. However, a good working knowledge of algebra is assumed. The primary goals of this course are to help individuals acquire a solid foundation in the basic theory and application of classical physics and to apply these skills through problem solving, simulation, and laboratory experiments. Topics include: linear and rotational motion, vectors, forces and equilibrium, work and energy, momentum, properties of solids, liquids and gases, heat and thermodynamics, waves and sound.
Prerequisite(s): MATH1300
(4 C: 3 lect/pres, 1 lab, 0 other)

PLBG 1504 - Piping Procedures I
Students will study plastic piping, which involves the joining of drainage, waste and vent, water supply and distribution lines. Students will become familiar with the different types of copper pipe, fittings and tubing. PEX water and heating distribution piping will be discussed and utilized. Students will also utilize and study water pumps. Safe methods of handling and installing piping in accordance with Minnesota State Plumbing Code and general industry accepted standards will be emphasized.
(5 C: 2 lect/pres, 3 lab, 0 other)

PLBG 1508 - Plumbing Calculations I
This course will apply mathematics to plumbing calculations in developed lengths of pipe, fitting allowances, offsets, areas, volumes, diameters, weights and pressures. Students will also use formulas common to the industry.
(4 C: 2 lect/pres, 2 lab, 0 other)

PLBG 1510 - Minnesota State Plumbing Code I
Students will study the Minnesota Plumbing Code, which covers the laws, rules, and regulations of plumbing installed in Minnesota.
(3 C: 3 lect/pres, 0 lab, 0 other)

PLBG 1514 - Minnesota State Plumbing Code II
Students will study the Minnesota State Plumbing Code which covers the laws, rules and regulations of plumbing installed in Minnesota including plumbing principles, materials, traps and fixtures, water supply and drainage, waste and vent systems used in construction, repair and remodeling of buildings.
Prerequisite(s): PLBG1510
(3 C: 3 lect/pres, 0 lab, 0 other)

PLBG 1518 - Blueprint Reading and Estimating I
The student will learn to read building plans and pipe diagrams, interpret floor plans, elevation views, draw isometrics and sketch detailed work drawings. Student will develop skills in estimating plumbing cost for new installations and remodels and prepare projects using industry developed estimating procedures. Estimates include material, fixtures and labor costs with profit and overhead calculations.
(4 C: 1 lect/pres, 3 lab, 0 other)

PLBG 1520 - Blueprint Reading and Estimating II
The student will learn to read building plans and pipe diagrams. Interpret floor plans, elevation views, draw isometrics and sketch detailed work drawings. Student will develop skills in estimating plumbing cost for basic residential installations and remodels. Building on these skills, the student will gain knowledge of complex residential and commercial blueprint reading, pipe diagrams, isometric drawing and job cost estimating. Student will learn to interpret commercial building roof drain systems including how to size, draw and estimate the cost of a storm water disposal system.
Prerequisite(s): PLBG1518
(3 C: 1 lect/pres, 2 lab, 0 other)

PLBG 1524 - Plumbing Calculations II
The application of mathematics to plumbing calculations in developed lengths of pipe, fitting allowances, offsets, areas, volumes, diameters, weights and pressures. Students will also use formulas common to the industry. Emphasis will be put on estimating plumbing jobs. Calculation of profit margin percentages as it relates to the plumbing industry.
Prerequisite(s): PLBG1508
(3 C: 1 lect/pres, 2 lab, 0 other)

PLBG 1530 - Piping Procedures II
Students will study the assembly of Cast Iron hub and no-hub soil and waste pipe and fittings. Students will join Cast Iron hub type neoprene and fabricate projects in no hub pipe. Special waste piping including enfield, enfusion, glass, bituminized fiber and welded pipe will be discussed. Students will fabricate steel piping projects using the fundamentals of cutting, threading, grooving of piping, identify fittings and apply sealants to piping.
Prerequisite(s): PLBG1504
(3 C: 1 lect/pres, 2 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
PLBG 1538 - Plumbing Internship
Students will work in a sponsoring plumbing-related business applying knowledge, concepts and skills learned in the classroom.
(2 C: 0 lect/pres, 0 lab, 2 other)

PLBG 1544 - Career Planning/Customer Relations
The student will write a telephone script, fill out a job application, complete an employer ready cover letter and resume. Students will write short, intermediate and long term personal and professional goals. Students will study the fundamentals of good customer relations and apply them in their daily working lives. Student will participate in discussions with guest prospective employers.
(1 C: 0 lect/pres, 1 lab, 0 other)

PLTW 1500 - Introduction to Engineering Design
This course covers fundamental principles of the engineering design and development process. Topics include planning and developing, recording, modeling, product analysis and marketing. The student will learn procedures in these areas, developing their own ideas in a lab environment, and presenting their ideas. Specific emphasis is given in drawing and developing through the use of pencil sketching and computer software.
(3 C: 1 lect/pres, 2 lab, 0 other)

PLTW 1502 - Principle of Engineering
This course covers fundamental principles and processes of engineering. Topics include definition and types of engineering, the design process, engineering systems, engineering for reliability, and the documentation process used in engineering fields. The student will learn procedures in these areas, developing their own ideas in a lab environment, and presenting their ideas. Specific labs in material testing, statics, and statistics will be utilized. The student will acquire a fundamental approach in the design, development and engineering process. Individuals will apply these skills through problem solving and laboratory experiments.
(3 C: 1 lect/pres, 2 lab, 0 other)

PLTW 1504 - Digital Electronics Engineering
This course covers fundamental principles of digital electronics, number systems and Boolean Algebra. Topics include number conversion, logic simplification, logic gates and their applications, sequential logic, logic families, microprocessors and interfacing. A background in basic electronics is given to aid in the understanding of some of the material presented in this course. The student will learn how to connect logic gates to form functional devices using simulation and breadboards with integrated circuits. Finally, a capstone project of their own design will be simulated, built on a breadboard and presented.
(3 C: 1 lect/pres, 2 lab, 0 other)

POLS 1304 - Introduction to American Politics
Meets MN Transfer Goals 5 and 9 - History/Social, Behavioral Sciences and Ethical/Civic Responsibility. Introduction to American Politics is an introductory course on political ideologies, (democracy, capitalism, etc.), political institutions, (federal, state, and local governmental systems), and processes, (how a bill becomes a law, etc.). Team learning, community involvement and off-campus activities such as city council meetings are used as teaching tools.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

PRSG 2401 - Medical Surgical Nursing I
This course will enable you to analyze conditions that affect surgery, the digestive, reproductive, urinary, neurosensory, hematopoietic/lymph, and musculoskeletal systems. This course includes medical terminology, pathology, signs and symptoms, treatment and nursing interventions of acute and chronic disorders. The nursing process will be utilized. Theory and practice from previous course work will be incorporated into classes and evaluations.
(3 C: 3 lect/pres, 0 lab, 0 other)

PRSG 2402 - Medical Surgical Nursing II
This course will enable you to analyze conditions that affect surgery, the digestive, reproductive, urinary, neurosensory, hematopoietic/lymph, and musculoskeletal systems. This course includes medical terminology, pathology, signs and symptoms, treatment and nursing interventions of acute and chronic disorders. The nursing process will be utilized. Theory and practice from previous course work will be incorporated into classes and evaluations.
(3 C: 3 lect/pres, 0 lab, 0 other)

PRSG 2409 - Basic Nursing Concepts
In this course the student will acquire the theory base essential to building a foundation for the practice of Nursing. This course is developed in units and assists the students to move from knowledge to application.
(3 C: 3 lect/pres, 0 lab, 0 other)

PRSG 2410 - Advanced Nursing Role Concepts
In this course the student will synthesize learning that has occurred in prior Practical Nursing theory and lab classes. The student will focus on integrating topics and skills that relate to the graduate role. The student will acquire needed knowledge and will develop autonomy to assure success in the transitional process from student to beginning practitioner. The student will review test taking techniques and the format for a systematic review for the State Board Examination. Additionally, this course illustrates employer-employee and consumer relations along with successful completion of a service-learning project.
(3 C: 3 lect/pres, 0 lab, 0 other)

PRSG 2419 - Nursing Skills
In this course the student will develop psychomotor skills, which are applied to a diverse range of patient problems in a variety of health care settings. Skills include medication administration, data collection, reporting, recording and documentation, medical and surgical asepsis and nurse patient interactions. The student will also acquire skills specific to various body systems necessary to complete patient care.
(3 C: 0 lect/pres, 3 lab, 0 other)

PRSG 2420 - Essentials of Clinical Pharmacology
In this course students will acquire introductory pharmacology information. Students will acquire the knowledge related to medications referencing and medication classifications including dose, expected action, side effects, and untoward effects and nursing implications. Students will study conversions and drug calculations and IV fluid rate calculations.
(2 C: 2 lect/pres, 0 lab, 0 other)

PRSG 2439 - Clinical Application I
In this course the student will implement the nursing process and nursing skills in simulation, sub acute and long term nursing care settings.
(3 C: 0 lect/pres, 3 lab, 0 other)

PRSG 2440 - Clinical Application II
In this course the student will have the opportunity to implement the nursing process and nursing skills in a variety of settings that may include: simulation, acute, sub acute and long term nursing care settings. The student will integrate the theory and skills from previous theory and clinical course in increasing complex nursing situations.
(5 C: 0 lect/pres, 5 lab, 0 other)

PRSG 2450 - Family Health Nursing
This course uses a family centered approach to introduce the student to the concepts of ante partum nursing, principles of labor, delivery, postpartum and newborn nursing care. In addition, this course provides the student with an opportunity to identify the physiological and psychological responses of children and families to illness. Nursing care concepts and the application of the nursing process are reflected in home, hospital and community settings.
(3 C: 3 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
PRSG 2460 - Mental Health Nursing
In this course the student will have the opportunity to build on their understanding of human behavior and therapeutic communication skills. The student will discover how key nurses have influenced mental health nursing of today. The student will also be introduced to basic information and nursing interventions that enables monitoring the cognitive affect and behavioral functioning of clients. (2 C: 2 lect/pres, 0 lab, 0 other)

PSYC 1300 - Introduction to Psychology
Meets MN Transfer Goal 5 - History/Social, Behavioral Sciences. Survey of contemporary scientific psychology. Includes: research methods, biological bases of behavior, cognitive mechanisms, sensation and perception, learning and behavioral adaptation, development, social influences, personality, and disorders. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

PSYC 1304 - Life Span Developmental Psychology
Meets MN Transfer Goal 5 - History/Social, Behavioral Sciences. Life Span Psychology is both intriguing and biographic because each of us is constantly developing. The course examines human biosocial, cognitive, and psychosocial development in diverse contacts from ‘Womb to Tomb’. It includes coverage of scientific discoveries and theories; critical analysis of evidence supporting or contradicting those theories; basic concepts and terminology; integration of personal experience and developmental theory and research; and related current public policy and diversity issues. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

PSYC 1310 - Psychology of Women
Meets MN Transfer Goal 5 & 9 - History/Social, Behavioral Sciences and Ethical and Civic Responsibility. Psychology of Women will critically explore the topic of women’s psychology in a Sociocultural, historical, global and multi-cultural context. It will focus on many facets of women’s lives and the sociocultural impact. The class will compare feminist theories and research with other theories that are sex biased. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

PSYC 2310 - Abnormal Psychology
Meets MN Transfer Goal Area 5 - History, Social and Behavioral Sciences. This course explores the nature and causes of abnormal behavior and the terminology used in describing and discussing abnormal behavior. Students will examine current trends and research in the fields of mental health and psychopathology. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

READ 0300 - Reading and Vocabulary
This course will focus on basic reading comprehension and vocabulary development. Students will explore reading and vocabulary through a variety of materials, including novels, magazines, newspapers, Internet, and technical resources. Students will increase their general vocabulary, and will explore technical terminology unique to their interests. This course is developmental and does not fulfill a general studies requirement. (3 C: 2 lect/pres, 1 lab, 0 other)

READ 0304 - Reading Strategies
Expands students’ ability to successfully use reading strategies for achievement in college courses. Course material will focus on textbooks and other types of reading materials prevalent in technical courses. This course is developmental and does not fulfill a general studies requirement. Prerequisite(s): READ0300 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

READ 1110 - Study Strategies
Students develop study skills necessary for academic success in college. Students focus on developing personal study habits that aid the student in reaching a desired level of academic accomplishment. Topics include time management, stress management, learning styles, note taking, listening skills, memory, reading techniques, test-taking strategies and critical thinking. Prerequisite(s): READ0304 or Appropriate Accuplacer Score. (2 C: 2 lect/pres, 0 lab, 0 other)

SAMG 1199 - Principles of Marketing - Modified Course for Tech Prep
This course is an introduction to the marketing process. Discussion includes selecting target markets, creating short and long-term goals, identifying customer wants and needs, providing customer satisfaction, and developing the marketing mix to appeal to targets. Students will apply topics covered to create marketing plan presentations for designated products. NOTES: for details of topics covered in the high school variable course please refer to the appropriate Tech Prep College Credit agreement. This variable course is designed to allow students with Tech Prep College Credit for SAMG 1199 that was earned in high school to complete the remaining course requirements at SCTC. This course will be delivered concurrently with SAMG 1200. (C: 0 lect/pres, 0 lab, 0 other)

SAMG 1200 - Principles of Marketing
This is an overview of basic marketing principles and practices. This course includes discussion on the marketing mix, identifying customer needs and wants, determining target markets, and creating appropriate products, services and programs to serve these markets. (3 C: 3 lect/pres, 0 lab, 0 other)

SAMG 1210 - Customer Service/Sales Techniques
This course covers a fundamental customer service and sales approach that can be used as a foundation for a future in customer service and sales. The content covers the importance of a positive attitude, listening, communication styles and skills, the basics steps of quality service and the basics steps of the sale. (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 1215 - Principles of Management
This introductory course gives students an overview of the management process, tracking the historical aspects through to current management principles and practices. The course explores the management functions of planning, organizing, leading, and controlling, and focuses on trends in quality improvement, team building and leadership skills. (3 C: 3 lect/pres, 0 lab, 0 other)

SAMG 1220 - Sales Promotion/Advertising
This course covers the fundamentals of sales promotion, the types of promotional tools available, and effective use of those tools. The course also focuses on advertising including: the various types of retail advertising options, the parts of the advertisement, and the creation of a promotion plan as a part of class work. (3 C: 3 lect/pres, 0 lab, 0 other)

SAMG 1224 - Business Ethics and Law - Modified Course for Tech Prep
This course involves an explanation of ethical issues as they relate to business and general law. Topics include the legal system in the United States, the function, organization, and work of the federal and state court systems, and criminal and civil law. Important areas of business law are covered including contracts, sales, and consumer protection. This variable course is designed to allow students with Tech Prep College Credit for SAMG 1224 earned in high school, to complete the remaining course requirements at SCTC. This course will be delivered concurrently with BUSM 1225. (C: 3 lect/pres, 0 lab, -3 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
SAMG 1225 - Business Ethics and Law
This course involves an explanation of ethical issues as they relate to business and general law. Topics include the legal system in the United States, the function, organization, and work of the federal and state court systems, and criminal and civil law. Important areas of business law are covered including contracts, sales, and consumer protection. (3 C: 3 lect/pres, 0 lab, 0 other)

SAMG 1235 - Supervised Occupational Experience
This course is designed to provide the student with a purposeful occupational experience in the sales and marketing industry. Since each Supervised Occupational Experience is an individualized experience, a training plan is specifically created for each student in conjunction with the training station the student is assigned to. This can be offered as a cooperative arrangement, an internship arrangement or other appropriate work experience arrangement. (2 C: 0 lect/pres, 0 lab, 2 other)

SAMG 1240 - Professional Self Development
This course focuses on the importance of the professional organization and community service as a part of the career picture. The course allows students to develop self-confidence, practice leadership and management skills while involved in a professional organization. (1 C: 1 lect/pres, 0 lab, 0 other)

SAMG 1245 - Sales and Marketing Math
This course covers the application of mathematics functions to the solution of business marketing and management problems and how they relate to the effective methods of improving the profitability of the business. Explanation of business procedures, terminology and documents within the mathematical environment are provided to aid in student understanding and application. Prerequisite(s): MATH0380 or Appropriate Accuplacer Score. (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 1250 - Fundamentals of Sales Accounting
The course includes basic accounting fundamentals, along with the examination of profit and loss statements, calculations, and formulas and how they relate to the effective operations of a business in relationship to a sales organization. Analysis of the importance and relatedness of decisions within the sales process will be tied to management decision making, along with interpreting financial operating statements and methods to improve the profitability of the business within case analysis. (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2245 - Marketing Management
This course is designed to provide the student with marketing management concepts. Students examine how companies design and implement competitive strategies using the marketing mix tools. Prerequisite(s): SAMG1200 (3 C: 3 lect/pres, 0 lab, 0 other)

SAMG 2255 - Applied Sales Strategies/Telemarketing
This course takes the fundamentals of sales and builds upon them. The course focuses on sales language, verbal visualization, mental visualization, listening skills, customer follow up and service, prospecting, and using telephone skills to enhance sales success. Prerequisite(s): SAMG1210 (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2260 - Management Computer Applications
The focus on this course is the interpretation of accounting and financial records using the computer. Reports, projections and systems will also be studied along with Power Point, and Excel. Prerequisite(s): BUSM1200 (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2270 - Human Resource Management
This course focuses on Human Resource Management Issues. The course covers the techniques and legal aspects of recruiting, hiring, firing, promotion, documentation, evaluation, and other areas essential to the personnel function. The course also provides training in job seeking. (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2276 - Marketing Research
This course will focus on the fundamentals of marketing research, research methods, market surveys, analyzing data, and reporting. Prerequisite(s): SAMG1200 (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2280 - Sales Management
This course is designed to present basic principles of sales management. This course will help the student to understand the organization and functions of managing a selling force. Coverage includes information on budgeting, setting sales goals, leading a sales force, team building, team conflict, and measuring sales force performance in the field. (3 C: 2 lect/pres, 1 lab, 0 other)

SAMG 2285 - Entrepreneurship/Small Business Management
This course is designed for prospective small business owners or operators. It is designed to increase their knowledge of the economic and business principles upon which sound small business management is based. Curriculum is built around the basic areas of entrepreneurship/small business management: management, planning, marketing, promotion, financial management, and human resource management. Prerequisite(s): SAMG1200, SAMG1210, BUSM1200 (3 C: 2 lect/pres, 1 lab, 0 other)

SOCI 1310 - Introduction to Sociology
Meets MN Transfer Goal Area 5 - History and the Social and Behavioral Sciences. This course introduces students to the basic concepts, theories, and perspectives of sociology. Social interaction, social structure, social relationships, and stratification are analyzed to develop an understanding of how individuals function within larger social contexts. Students will use sociological data, concepts and theories to think critically about social institutions. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

SOCI 1320 - Social Problems
Meets MN Transfer Goal Area 5 - History and the Social and Behavioral Sciences. This course introduces students to a sociological analysis of social problems. A variety of social issues are analyzed, including race, poverty, population, and inequality. Causes and consequences of social problems are explored to deepen an understanding of the impact of social problems on quality of life. Expect an emphasis on critical thinking as potential solutions are developed through the analysis of data and the application of sociological processes. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

SOCI 1350 - Sociology of Marriage and Family
Meets MN Transfer Goal Area 5 - History and the Social and Behavioral Sciences. This course analyzes Marriage and Family from a sociological perspective. The course examines how historical changes, social contexts, economics, gender roles, and social policies affect how we form and maintain families. Marriage and family are looked at from both theoretical and practical perspectives. Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score. (3 C: 3 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
SOCL 2305 - Environmental Sociology
Meets MN Transfer Goals 5 and 10 - History/Social, Behavioral Sciences and People and the Environment. Students will examine environmental issues from a sociological perspective. The focus will be on social, political, and economic factors which encourage or discourage protection of the natural life support systems of earth. What steps are going to be required to restore our damaged resources and create a sustainable society for future generations? Considering the implications of what we have studied, students will be encouraged to develop a personal philosophy.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

SPEC 2850 - Special Topics This is a variable credit course, with 1-6 credits.
TECH 1530 - Computer Applications
This is an introductory course in computer applications. This course is designed for students who have no previous computer experience or for those who need a review of basic computer applications. The primary goals of this course are to help individuals acquire a hands-on working knowledge of current personal computer applications including, word-processing, spreadsheet, database, presentation, and internet browser software.
(2 C: 0 lect/pres, 2 lab, 0 other)

TECH 1540 - Technical Communications
Students are introduced to the correct procedures for verbal and written communication in the technical field including and presenting technical data and working in a team environment.
Prerequisite(s): TECH1530
(1 C: 0 lect/pres, 1 lab, 0 other)

TECH 1550 - Basic CADD
This is a fundamental course in using computer aided drafting software to create basic drawings. This course is designed for students who have no previous experience in drafting or using computers. Topics include: file management, two-dimensional drawings, symbols, libraries, electrical and schematic drawings.
(2 C: 0 lect/pres, 2 lab, 0 other)

TECH 1552 - Basic Metal Joining and Fabrication
Time will be spent in the lab developing skills using the Oxy-Fuel cutting processes, Plasma cutting, basic oxy-acetylene torch use, SMAW and GMAW and the GTAW processes. Welds will be made in various positions. An important part of this class will be the safety concerns of each of the processes listed. For the Machine Tool students it will be expected they complete the required welds and demonstrate a level of proficiency with each process as required by the Machine Tool industry. CADD students enrolled in this same course will be held to a different standard. They will not be required to meet a high level of proficiency, but will be required to complete the required number of welds to gain an understanding of the process and how it may be applied.
(2 C: 0 lect/pres, 2 lab, 0 other)

TECH 1554 - Basic Electric Circuits
This course gives students a fundamental understanding of electrical circuits, components, test equipment, and troubleshooting techniques. Students will develop skills in reading electrical prints, using a volt-ohm meter, ammeter, connecting and testing common electrical components: such as switches, relays, solenoids, and motors.
(2 C: 0 lect/pres, 2 lab, 0 other)

TECH 1556 - Basic Manual - Automated Machining
This course is intended to give the student an introduction into the machining-metalmaking world. The student's time will be spent in the lab developing skills in manual machining techniques, using various metals and materials, inspection and measurement of machined features as well as an overview of Computer Numerical Control (CNC) machining and programming. An important part of this class will be the safety concerns of each of the areas being taught. The content of the course will vary somewhat for welding, CADD and electronic students. The electronics students will be given a higher level of automated machining experiences that the welding and CADD students.
(2 C: 0 lect/pres, 2 lab, 0 other)

TECH 1565 - Basic Manual - Manual Machining
The course will be held at a lower level of proficiency than the automated course.
(2 C: 0 lect/pres, 2 lab, 0 other)

THTR 1310 - Theatre Appreciation
Meets Mn Transfer Goal Area 6 - Humanities and Fine Arts. This course is designed through a broad survey of dramatic text/performance, to improve students' understanding and appreciation of Theatre and Humanity. Through explorations in dramatic literature, as well as recorded and live performance, students will gain insight into Theatre-past and present. We will survey the history of Theatre and the theatre of history, gaining a deeper appreciation of our individual roles in these entwined processes.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

THTR 1360 - Acting for Everyone/Beginning Acting/Acting I
Meets MN Transfer Goal 6 - The Humanities and Fine Arts. This course is designed, through explorations in the art and craft of acting, to heighten the student's self-awareness and to improve presentational skills, both individually and in collaboration. Through a series of exploratory exercises, written assignments, and performed presentations, students will engage with and create texts, sharpening analytical skills, and improving understanding of both self and humanity.
Prerequisite(s): READ0304 and ENGL0304 or Appropriate Accuplacer Score.
(3 C: 3 lect/pres, 0 lab, 0 other)

TRAN 1502 - General Service
This course covers the correct procedures for servicing vehicles, shop safety and use of service manuals and bulletins. Automotive tools, equipment and minor service and repairs will be emphasized.
(2 C: 1 lect/pres, 1 lab, 0 other)

TRAN 1504 - Electricity and Electronic Principles
In this course the student will learn the basics of electricity and electronics. The student will study the sources of electricity, circuits, magnetism, resistance, voltage and amperage. Students will learn about diodes, transistors and solid state devices. Lab work will give the students hands on experience with digital meters, power supplies and oscilloscopes.
(3 C: 1 lect/pres, 2 lab, 0 other)

TRAN 1516 - Scan Tool Data Acquisition
Students will study how to acquire and store data from various automotive computer systems using factory and aftermarket scan tools. Students should be able to describe automotive computer operation and perform service in accordance with manufacturer’s procedures.
(1 C: 1 lect/pres, 0 lab, 0 other)

TRAN 1518 - Transportation Hazardous Materials
Students enrolled in this class will learn how to identify and to handle hazardous materials found in the transportation industry. Studies include shop safety, hazmat identification, haz-mat source identification, storage and handling of haz-mat, personal and environmental effects of haz-mat, emergency procedures involving haz-mat, and pollution prevention techniques.
(1 C: 1 lect/pres, 0 lab, 0 other)

TRAN 1520 - Workplace Perceptions and Expectations
The workplace is filled with expectations of the employee, employer, and customers. This course will explore issues concerning safety, performance, and workplace ethics. Students completing this course will develop skills to perform successfully in the transportation industry.
(2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
TRAN 2514 - Basic Air Conditioning
This course covers the principles of air conditioning systems, the various types of systems, diagnosis of malfunctions and proper legal procedures for handling refrigerants. Students will learn to test and repair automotive or truck systems. Hands on experience will include evacuating, replacing of defective components, charging and performance testing air conditioning systems.
(2 C: 1 lect/pres, 1 lab, 0 other)

USCV 1402 - Cardiovascular Anatomy and Physiology
A study of the anatomy, physiology, and structural relationships of the human heart and vascular system. Focus on hemodynamics and electrocardiography.
Prerequisite(s): BLGY2310
(4 C: 3 lect/pres, 1 lab, 0 other)

USCV 1422 - Ultrasound Physics
A study of the physical principles and mathematical equations required to understand diagnostic ultrasound. Course includes parameters of sound waves, pulsed and continuous wave principles, laws of reflection and refraction and the role of piezoelectricity in the production and processing of ultrasound.
(3 C: 3 lect/pres, 0 lab, 0 other)

USCV 1440 - Introduction to Clinics
Topics address patient scheduling, patient preparation, patient histories, and physical signs. Lecture and simulated laboratory experience prepares the student to perform patient care utilizing critical thinking and clinical skills.
Prerequisite(s): USCV1422 or ICVT1422
(1 C: 1 lect/pres, 0 lab, 0 other)

USCV 2405 - Cardiovascular Pathology
An in-depth study of the pathologies of the cardiac and vascular systems, their physiologic symptoms and outcomes. This course includes discussion of acquired diseases, embryological development of the heart, fetal circulation, and congenital heart defects.
Prerequisite(s): USCV1400, USCV1402
(3 C: 3 lect/pres, 0 lab, 0 other)

WELD 1502 - Welding for Work and Leisure
This course covers basic welding procedures using arc welding and oxy-fuel equipment. One of the major topics of discussion will be safety in the use of this equipment. Time will be spent in the shop completing welds in various positions with different processes and electrodes. The processes to be covered in this class will be stick electrode (SMAW) Oxy-Acetylene welding, cutting and brazing along with a short introduction into wirefeed welding. Students in this course will be from other programs where welding may be a useful tool. However it will be stressed that in many situations it is most advisable to have a skilled welder do jobs that will involve personal safety. Knowing your limitations is of the utmost importance.
(2 C: 1 lect/pres, 1 lab, 0 other)

WELD 1507 - Arc Welding Processes I - Lee
In the Arc Welding Processes I (lecture) course, we will cover the safety issues connected with the arc welding process and the types of power sources used in arc welding. Current selection and the applications will also be covered. Electrodes and the AWS electrode code will be defined. Electrode selection and application will be covered. The use of welding codes and how they apply will also be covered along with welding certification guidelines. An introduction into Gas Metal Arc Welding will be incorporated into this class covering the safety aspects of the process.
Corequisite(s): WELD1511
(1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1509 - Shielded Metal Arc Welding - Modified Course for Tech Prep
This course covers the SMAW welding process, formerly known as the stick-welding process. Using this process, high quality welds can be made rapidly with excellent uniformity. A minimum amount of equipment is required and the process can be very portable often using engine driven power supplies. The course covers the knowledge, skills, and safety principles for the SMAW process. Welding will be performed on plain carbon steel products in the flat, horizontal, and vertical positions. A special emphasis will be placed on the E-6010 and E-7018 electrodes.
( C: 0 lect/pres, 0 lab, 0 other)

WELD 1511 - AWP I (lab)
In Arc Welding Processes I (lab), time will be spent in the lab developing skills using the SMAW and GMAW processes. Welds will be made in the flat, horizontal and vertical positions using the SMAW process. The GMAW process will use the flat and vertical down positions. With the SMAW process various types of electrodes will be used. The short arc method of transfer will be used with the GMAW process. Welding tests will be done in accordance with the AWS welding code. Welds will be completed on plate and an introduction to pipe welding will also be included.
(4 C: 0 lect/pres, 4 lab, 0 other)

WELD 1512 - Arc Welding Processes I
This course covers the SMAW welding process, formerly known as the stick-welding process. Using this process, high quality welds can be made rapidly with excellent uniformity. A minimum amount of equipment is required and the process can be very portable-often using engine driven power supplies. The courses cover the knowledge, skills, and safety principles for the SMAW process. Welding will be performed on plain carbon steel products in the flat, horizontal, and vertical positions. A special emphasis will be placed on the E-6010 and E-7018 electrodes.
Prerequisite(s): WELD1509
(2 C: 0 lect/pres, 2 lab, 0 other)

WELD 1514 - Oxy-Fuel Welding and Brazing -Lee
This course covers the use of oxy-fuel welding, brazing and equipment. A very important part of this course will be discussing safety as related to oxy-fuel equipment. Also covered will be set-up and other flame applications.
Corequisite(s): WELD1518
(1 C: 1 lect/pres, 0 lab, 0 other)

WELD 1518 - Oxy-Fuel Welding and Brazing Lab
This course covers oxy-fuel welding and brazing operations and equipment. The student will be working with the equipment required to gas weld and braze in all positions. Other equipment used will be spray powder torches and heating tips. The student will be required to demonstrate the safe use of the equipment.
(1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1523 - Metallurgy
This course covers the study of metals and how to weld them. Physical and mechanical properties of carbon steels as they apply to welding will be covered. The numerical code for the classification of steel and aluminum will be discussed. Terms dealing with metallurgy will be an important part of the course. Some time will be spent doing hardness testing and identifying metals.
(1 C: 0 lect/pres, 1 lab, 0 other)
WELD 1524 - Related Math for the Welding Profession
The welding profession requires a good working knowledge of math concepts using whole numbers, fractions, decimals and the metric system. In many situations the welder will be required to convert from one method of measure to another. Knowing how to make these conversions can make the job easier. In other instances the welder will be required to calculate the weight and cost of material to fabricate a tank then calculate the capacity, which may be needed in cubic feet, gallons or liters. To accurately layout and fabricate parts the welder will need some knowledge of geometric construction. One of the tools used in this math class will be a calculator. How to use the functions of the calculator will be covered. (1 C: 1 lect/pres, 0 lab, 0 other)

WELD 1528 - Blueprint Reading I
This course covers why blueprints are such an important part of the welding and fabrication industry. As an introduction to blueprints the types of lines, drawings and views will be discussed. How views are arranged and the importance of developing an understanding of the relationship of one view to another. If one does not have a good understanding of lines and views it becomes more increasingly difficult to deal with more complex blueprints. (1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1532 - Blueprint Reading II
This course covers the use of blueprints in industry dealing with applications in structural steel, and sheet metal fabrication. In this course the use of metric measure will be discussed. The American Welding Society weld symbols and their use and applications will be covered. The various components of the symbols and types of weld joints will be discussed. Prerequisite(s): WELD1528 (1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1534 - Cutting Processes
This course covers the use of cutting equipment used in the metal fabrication industry. Equipment included will be machine flame cutting equipment, plasma cutting and mechanical cutting processes which will include sawing and shearing. (2 C: 1 lect/pres, 1 lab, 0 other)

WELD 1539 - AWP II (lecture)
The Arc Welding Processes II (lecture) will cover the Gas Metal Arc Welding (GMAW) process in depth. The course will be covered in five major groups: Power Sources, Shielding Gases, Methods of Transfer, Electrodes, Wirefeeders and Torches. Each one of these topics will be covered in detail. The course will also deal with various wire types, flux core, metal core, aluminum and stainless steel. The applications for these various wires will be discussed. The completion of Shielded Metal Arc Welding will also be a part of this course. This will include the overhead position and the completion of the guided bend test. Students may elect to take a certification test. Course must be taken in conjunction with WELD 1543 or Instructor’s approval will be required. (1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1543 - AWP II (lab)
In the Arc Welding Processes II (lab) course, time will be spent in the lab developing skills using the GMAW process. In the beginning solid wire will be used with the short arc method of transfer. The use of solid wire with spray arc and pulse spray will also be covered. Welding will be done in all positions. Students will also set up equipment for various applications. Upon completion of the required projects with solid wire, the students will then begin using flux core wire. Both gas shielded and gasless will be used in all positions. The students will also be given the opportunity to use various shielding gases. The welding of aluminum and stainless steel will be covered. The students will also complete welds in the overhead position using the SMAW process with various electrodes. Upon completion of the required welds the students may choose to take the AWS Structural certification test, using the processes covered in this course. Prerequisite(s): WELD1539 (5 C: 0 lect/pres, 5 lab, 0 other)

WELD 1546 - Gas Tungsten Arc Welding - Lecture
This course covers the safety hazards and applications for Gas Tungsten Arc Welding (Heli-Arc) in the welding industry. Material covered in the classroom will be power source setup, current types, current selection, shielding gases and torch types. Various procedures will be discussed for welding different metals and problems that may be encountered. Applications for the process in the piping industry. The use of back purging will be discussed and its applications. Safety when using the process and the handling of high pressure cylinders will also be covered. (2 C: 2 lect/pres, 0 lab, 0 other)

WELD 1550 - Gas Tungsten Arc Welding - Lab
Safety when using the GTAW process and the handling of high pressure cylinders will be covered. The setup and operation of the equipment will be covered in the lab. Welding of mild steel, stainless steel and aluminum will be covered in the lab along with the proper preparation and correct selection of electrodes. This welding process is one of the more demanding and requires good hand and eye coordination. Prerequisite(s): WELD1546 (3 C: 0 lect/pres, 3 lab, 0 other)

WELD 1554 - Fabrication Equipment I
This course covers equipment used in the metal fabrication industry, for the forming and shaping of metals. A wide variety of equipment will be used during this course and several projects will be fabricated. Types of equipment will include shear, ironworker, hydraulic brake, pan and finger brake, track torches, electronic tracer and plasma cutting equipment. Also included in this course will be layout procedures for various applications. (1 C: 0 lect/pres, 1 lab, 0 other)

WELD 1558 - Fabrication/Layout II
This course covers the use of forming equipment used in the metal working industry along with the safety aspects of using this equipment. Several different types of layouts will be done, along with the actual forming of parts. Also covered in this course will be the process of searching out the various types of shops when seeking employment. Students will also develop a resume and letter of application. Prerequisite(s): WELD1554 (2 C: 0 lect/pres, 2 lab, 0 other)

WETT 1502 - Basic Laboratory Skills
Students will learn basic testing skills, weighing and sampling techniques in order to evaluate the effectiveness and efficiency of water and wastewater treatment processing. Course also includes: laboratory safety, the identification, care, and use of laboratory equipment. (1 C: 0 lect/pres, 1 lab, 0 other)

WETT 1506 - Introduction to Water/Wastewater Technology
Students will gain an understanding and develop skills, knowledge, and attitude necessary to be successful in the water and wastewater treatment program. Student will study water and wastewater terminology, identify operator duties, identify different treatment processes, identify sources of water and define water characteristics. Students will also learn the effect of people on public waterways and what treatment processes have been designed to limit these effects. This course will distinctly define the differences between water and wastewater treatment facilities. (3 C: 3 lect/pres, 0 lab, 0 other)

WETT 1510 - Water/Wastewater Treatment Calibrations
Students will review basic arithmetic and metric conversions. Calculations will relate to water and wastewater treatment using word problems to solve for: volumes, areas, flows and weights. (2 C: 2 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
WETT 1514 - Source Water Treatment and Development
Students will study the treatment of development of both ground and surface water sources. Areas studied will include: well construction and development, pump types and applications, ground and surface water protection, pretreatment of surface water, and water filtration.
Prerequisite(s): WETT1506, WETT1510, WETT1502
(4 C: 2 lect/pres, 2 lab, 0 other)

WETT 1518 - Water Plant Operation I
This course assists students to identify and gain knowledge and demonstrate the skills and tasks used in the treatment of raw water and drinking water. The tasks and skills reflect tests and operations that are practices in water treatment plants and are based on biological and chemical concepts. The tests are in correlation with Public Health and environmental Protection Agency Standards. Prerequisite(s): WETT1506, WETT1510, WETT1502
(3 C: 2 lect/pres, 1 lab, 0 other)

WETT 1522 - Water Plant Operation II
This course correlates and uses synthesis to assist the student to gain knowledge and experience in advanced raw water and drinking water testing. The tests presented are based on knowledge obtained in previous courses. All sampling and testing are evaluated using Public Health and Environmental Protection Agency Standards. Prerequisite(s): WETT1518
(3 C: 2 lect/pres, 1 lab, 0 other)

WETT 1526 - Water Distribution Systems
Students will be exposed to all operational design and maintenance characteristics of water distribution systems. This will include storage facilities, pump stations, distribution piping, valves, and fittings and associated hydraulics. The course will include a 40-hour internship at a water treatment facility. Prerequisite(s): WETT1506, WETT1510, WETT1502
(3 C: 1 lect/pres, 2 lab, 0 other)

WETT 1530 - Understanding OSHA Safety Regulations in the Water Industry
Students will study the intent of the OSHA regulations as they pertain to the safety of the individual in the water industry. Students will obtain an understanding of the development of OSHA. Students will also construct a facility safety and health manual based on the knowledge obtained in the classroom and information gathered through research and observation at a local utility. (3 C: 3 lect/pres, 0 lab, 0 other)

WETT 1534 - Wastewater Plant Operation I
This course will assist students in understanding preliminary, primary and secondary operation and process control at a wastewater treatment facility. The concept of rotating biological contractors and trickling filter operations and maintenance will be presented as the secondary processes. Students will be presented with the opportunity to demonstrate control strategies, safety practices, ability to solve mechanical, flow and pollution problems. The lab component in this class will address specific analytical methods directly associated with the treatment processes involved. Prerequisite(s): WETT1502, WETT1506, WETT1510
(3 C: 2 lect/pres, 1 lab, 0 other)

WETT 1538 - Wastewater Plant Operations II
Students will gain an understanding and develop skills, knowledge, and attitude necessary to be successful with controlling processes that occur in Activated Sludge, Stabilization Pond and Septic systems. The student will identify problems that occur in each of these processes and develop skills necessary to troubleshoot and solve the problems. The laboratory component presented in this course will require a synthesis of prior theory and practice. Prerequisite(s): WETT1534
(4 C: 2 lect/pres, 2 lab, 0 other)

WETT 1542 - Wastewater Laboratory Procedures
Students will receive the opportunity to observe, perform and demonstrate their abilities with a wide variety of water and wastewater tests commonly performed at a water and/or wastewater treatment facility. Students will interact with other students while performing sampling, preservation and handling of samples as well as when running on analysis. Students will be working in a variety of groups and sharing ideas and skills necessary and expected throughout the industry in performing standardized tests. Students will be required to generate lab reports and complete standard regulatory forms with their data generated from their lab results. (3 C: 1 lect/pres, 2 lab, 0 other)

WETT 1546 - Collection and Disinfection Systems Operation
This course will prepare students for the operation and maintenance of wastewater collections systems and disinfection methods employed in water and wastewater treatment systems. The installation and maintenance of the equipment required by these systems will be explored. Disinfection by chlorination will be the main focus of the disinfection methods discussed. Calculations of chemical dosages and the safety practices involved with handling chemicals will also be included in the study of collection and disinfection systems. Lab analysis and interpretation of lab data will be demonstrated and practiced to ensure comprehension and understanding of these systems. Prerequisite(s): WETT1502, WETT1506, WETT1510
(3 C: 2 lect/pres, 1 lab, 0 other)

WETT 1550 - Strategic Enhancement for Success
This course is designed to synthesize all courses in the Water Environment Technologies program. The process of synthesis will assist students in passing their state “class D” certification examination and to complete an internship in cooperating water and wastewater treatment facilities. Students will also complete the process of researching and applying for employment, using a variety of methods learned in the water and wastewater industry. Use of the D2L online learning environment will be utilized in this class. Corequisite(s): WETT1546 Prerequisite(s): WETT1554, WETT1502, WETT1506, WETT1510, WETT1514, WETT1522, WETT1526, WETT1538, WETT1542
(3 C: 3 lect/pres, 0 lab, 0 other)

WETT 1554 - Automated Control Systems
Students will comprehend basic electrical concepts used to analyze electrical consumption and assist in environmental protection through consumption reduction. Students will also develop an understanding of the motors and control panels used in the operation of water and wastewater treatment processes. The operation of various types of instrumentation, monitoring equipment and other control devices will be understood and utilized by the students. Prerequisite(s): WETT1502, WETT1506, WETT1510
(3 C: 1 lect/pres, 2 lab, 0 other)

WETT 1558 - Understanding the EPA Part 503 Biosolids Rule
This course is designed to assist students with the interpretation and understanding of the rules and regulations set forth by the federal and state agencies relating to biosolids. Students will study the comprehensive requirements for the management and disposal of biosolids generated during the process of treating municipal wastewater. This course will also help prepare students in obtaining a type IV biosolids operator’s license upon meeting the state and federal requirements for biosolids application. Prerequisite(s): WETT1502, WETT1506, WETT1510
(3 C: 3 lect/pres, 0 lab, 0 other)
WETT 1562 - Backflow Prevention and Control
This course will train the small water system operator to identify areas where backflow prevention is required. The course will also include what the different types of backflow devices are available and the proper application of such devices. Operators will also learn about the potential health concerns related to cross connections and understand the terminology of this subject.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1564 - Applying Water Operator Math Skills
This course is designed to train the small water system operator the basic math skills in order to properly operate and maintain a public water system. Procedures that will be covered will include area volume, quantity and velocity calculations, chemical additions and dosage calculations. Formula selection and calculator usage will also be included.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1566 - Disinfection II, Gas Chlorinators
In this course small system operators will learn the purpose of disinfection processes. Topics that will be covered in this class will include: chemistry of chlorination, chlorine safety requirements, and calculations of dosage. The focus of this course will be on gas chlorination and chlorinators. Students will be required to identify, repair and maintain all components in a gas chlorination system and to recognize associated problems with a failed or failing system. Also, students are expected to learn the standards set forth by the AWWA for materials, installation and application of chlorine facilities.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1569 - Fire Hydrants and Water Meters
In this course small water system operators will learn to effectively operate and maintain fire hydrants and water meters. Areas to be included in this course will include, proper hydrant flushing techniques, hydrant maintenance, code requirements, differentiating between hydrant types and evaluation of hydrant conditions. Other subject areas will include planning and inspection of construction projects, winter operation and readiness, and pumping of wet barrel hydrants. Water meter component will include disassembly and reassembly of residential and compound water meters, identification of meter parts and common failures of water meters. Students are expected to distinguish between several types and models of water meters and associated components. Students will study how a meter register works and explain the concept behind magnetic metering. Remote meter reading applications will be explored.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1570 - Fluoridation
This course is designed for small system operators enabling them to understand the purpose, the methods, the maintenance, and the monitoring required to operate a fluoride feed system. The course covers a brief history of fluoridation. Techniques that can be used for system setup and calibration. Calculations required to dilute liquid fluoride. MDH reporting requirements to include process and frequency of reports. Operation and maintenance of chemical feed pumps will be included. Module will also include methods available to analyze fluoride concentrations in public water supplies.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1573 - Water Testing for Small Systems
This course will train the small water system operator on how to use laboratory analysis to assist in the operation of a water utility. Operators will learn the proper techniques required to perform water analysis and to apply the results to day-to-day operations. The course is designed to provide the operators with adequate time to develop and perfect the skills to obtain useful data. Procedures that will be covered will include but are not limited to total and fecal coliform analysis, pH, iron and manganese, water hardness, and fluoride concentrations.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1574 - Ion Exchange/Reverse Osmosis
In this course the operator will gain knowledge and understanding in the operation of ion exchange and reverse osmosis water treatment systems. Operators will practice operating and maintaining treatment units in order to provide both safe and aesthetically desirable drinking water supplies.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1577 - Disinfection I, Hypochlorinators
This course is designed to provide small water system operators with the knowledge and skills required to operate water facilities chlorination systems using liquid solutions as hypochlorite. The content will include preparation of various strength chlorine solutions, feed equipment and processes used in the hypochlorite feed system, application and monitoring points and proper installation of such facilities. Safe handling and personal protection equipment when dealing with hypochlorite solutions will be emphasized. Disinfection analysis and calculations of dosages are also likely. Other small systems disinfection methodologies may be incorporated into this course to meet the needs of communities in rural areas.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1580 - Water Communications Network
The purpose of this course is to provide small water system operators with the knowledge and skills required to develop and maintain a functional record keeping and reporting system. Primary areas of coverage will include records and reports that are required by the MN Department of Health. Information will also be provided on documentation requirements of EPA and the Safe Drinking Water Act regulations. The course will assist the operators in developing a method to develop records in order to effectively operate and maintain the public water system in their charge to include items such as routine and preventative maintenance. This course will provide assistance with report writing to enhance the communications process.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1582 - Water System Corrosion Control
This course is designed to train the small water system operator on the importance of corrosion control in water treatment facilities and distribution systems. Key topics that will be covered and discussed are, use of chemicals, chemical application points, and chemical feed systems. One of the objectives is to be able to identify and recognize a systems need to manage corrosion of the system and recognize the steps to prevent excessive corrosion form occurring.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1584 - Water Hydraulics
This course is designed to assist operators in applying theories to operations of water a system in relation to the physical effects water has on/in a water system. The affects of head, pressure and force will be explored in both dynamic and static water systems. Head losses, including friction, velocity and total dynamic head will be evaluated. The importance of pressures and pressure losses will be emphasized throughout the course. The concept and effects of water hammer in a water adversely affect a water systems operation and the use of pressure gauges and booster pumps will be demonstrated to replicate what occurs on a daily basis in water systems. Calculations relating to elevation differences and friction losses will be emphasized.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1586 - Distribution System Operation and Maintenance
This course is designed to train operators/students to effectively operate and maintain water distribution systems in a safe and effective manner. The course will provide information on system installation, excavation safety, locating and marking of utilities, proper operation of storage facilities, methods of mapping and record keeping and public relations.
(1 C: 1 lect/pres, 0 lab, 0 other)

PLEASE NOTE: All program plans are preliminary and curriculum may change without notice.
WETT 1588 - Source Water (wells)
This course is designed for small system operators beginning a career as a water operator and for current operators to upgrade their skills and abilities relating to water treatment operator duties. The course covers basic knowledge and understanding of source waters and wells, how they are constructed, protected, monitored and maintained to provide for a constant, safe supply of water for consumers. Students are required to participate in discussions involving the course topics and hands-on exercises developed specifically to enhance the skills and understanding of water system operators. Students will also be able to identify the components of a well system and calculate the production of the well based on actual measurements taken in the field. Students will begin to develop the necessary attitude and values as have become expected by professionals and peers in this industry.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1591 - Pump Operation and Maintenance II (Centrifugal)
This course is designed to enable small water system operators to understand the theory and operation of water pumps. The course will include the operation and maintenance requirements for centrifugal and other chemical and water pumps used in utilities today. Topics will include repair and maintenance, parts identification, total head calculations, adjustment and controls, applications and calibration procedures. Class will include hands-on maintenance activities of pumps in laboratory setting using system simulations.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1592 - Water Filtration
This course is designed to train small water system operators to understand the theory and design of water filtration. Information will be presented on both gravity and pressure filtration systems. Topics will include determining when and how to backwash, what parameters to monitor and how they can be implemented into filter operation. The course will also include information on aeration and chemical additions used with filtration systems.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1594 - Water Exam Preparation
This course is designed to assist operators in preparing for State of Minnesota licensure (upper level). Students will be supplied with materials necessary to study and practice for their exams. Content for each licensure level will be provided. This course will provide training with math skills, Regulations, maintenance, process control and operation knowledge as well as distribution system components and other pertinent components in water treatment systems. Students will be required to complete a variety of tests addressing content covered in the course and reference materials. Materials and tests will be provided in electronic and manual/paper formats.
(1 C: 1 lect/pres, 0 lab, 0 other)

WETT 1596 - Iron and Manganese Treatment Techniques
This course is designed to train small water system operators to understand the sources of iron and manganese in drinking water supplies. Information will be presented on treatment techniques, test methods, impacts on and with-in treatment systems as well as chemical and physical processes utilized for removal. Students will review and discuss the effects of iron and manganese on the customers and heating systems throughout their service area. Critical evaluation of the secondary maximum contaminant levels will be explored. The course will also include exploration of aeration systems and chemical addition used in conjunction with filtration systems for the removal of iron and manganese.
(1 C: 1 lect/pres, 0 lab, 0 other)

Academic Advisor
An academic advisor is a faculty member assigned to advise a student and act as a resource.

Academic Forgiveness
Some colleges or universities offer students an opportunity to disregard grades that they obtained in the past according to specific guidelines. The policy only applies to the institution where it is granted and does not apply to financial aid eligibility. Previous credits and grades that a student has earned are ignored in the calculation. The courses, however, remain on the transcript.

Admissions and Counseling
The Office of Admissions provides assistance in the enrollment process. Counseling is provided by trained professionals that adhere to the “Ethical Standards for School Counselors.” Counselors facilitate academic, career, and personal student success.

Advanced Placement (AP)
Courses offered in high school and exams that cover the material taught in AP courses. Students who pass the AP exam with a minimum score can have credit awarded at colleges and universities according to institutional policies.

Alumnus/Alumni
A person or persons who attended or graduated from a particular school.

Assessment
Assessment is a way of evaluating students’ present skills, such as in English, reading and math so students are placed into appropriate level courses. Assessment is based on placement scores that are used as a guide for proper course placement to maximize student success.

Associate of Arts (AA)
An Associate of Arts degree may be awarded after the successful completion of a liberal arts and sciences curriculum designed to constitute the first two years of a baccalaureate degree. An Associate in Arts degree shall include the entire Minnesota Transfer Curriculum.

Associate of Applied Science (AAS)
An Associate of Applied Science degree may be awarded for successful completion of a program of 60 to 72 semester credits. An AAS degree may be designed to transfer to a related baccalaureate major. The degree shall include a minimum of 25 percent of the total credits in general education, from at least 3 goal areas.

Associate of Science (AS)
An Associate of Science degree may be awarded after the successful completion of a program in a designated field or area which transfers to a baccalaureate major in a related scientific, technical, or non-liberal arts professional field. The degree shall include a minimum of 30 semester credits in general education credits, from at least 6 goal areas.

Audit
Students participate in a course but are not required to take exams or quizzes, or complete assignments. Students do not receive grades or credit for audited courses. Students pay to attend the class and registration for audit requires the permission of the instructor.

Bachelor’s Degree
A degree awarded by a state college or university after the successful completion of a program of 120 to 128 semester credits.

Catalog
A book containing course descriptions, program and general education requirements, college policies, procedures and standards, and student rights and responsibilities. Catalogs may be available online.

Certificate
A certificate may be awarded after the successful completion of a specialized program of study. A certificate shall include 9 to 30 semester credits.

Class Schedule
A listing of all classes that will be offered during a semester, including days and times of class meetings, names of instructors or to be announced (TBA), rooms, registration information, academic policies, support services, etc. Not all courses are taught each term. Class schedules may be available online.

CLEP
The College-Level Examination Program or CLEP provides students of any age with the opportunity to demonstrate college-level achievement through a program of exams in undergraduate college courses.

College Readiness Courses
Courses that prepare students to succeed at the college level. These credits do not count toward graduation.

Concurrent Registration
Registration in two classes at the same time.

Core Studies
Courses that count toward graduation in more than one related program and contain content common to two or more majors.

Counselor
A professionally trained staff member who helps students with education, career, and/or personal concerns. Counselors may also teach career or personal enrichment classes.
Credit
The value assigned to a course. Usually one credit equals one 50-minute class period per week. A course that is assigned 3 credits would meet for three 50-minute periods per week.

Credit by Exam
An examination designed to demonstrate knowledge in a subject where the learning was acquired outside the classroom.

Credit for Prior Learning
Credit awarded to a student who demonstrates knowledge and/or proficiency in a subject through an exam or evaluation of a portfolio.

Curriculum
The content and competency level of each credit course as approved by the Academic Affairs and Standards Council led by faculty members.

Dean
The highest officer of an academic division of study. In addition to the academic deans, there is a Dean of Students who heads the Student Affairs department.

Degree
An award given to students that have successfully completed a specified number of collegiate level credit courses and experiences.

Degree Audit Reporting System (DARS)
Allows electronic evaluation of a student’s academic record toward their academic goal. A student or advisor can use a DARS report to know what requirements remain to be completed.

Department
The organizational unit established by the College. For example, Transportation Technology.

Diploma
A diploma may be awarded after the successful completion of a program intended to provide students with employment skills. A diploma shall include 30 to 72 semester credits. At least one-third of the credits shall be taught by the faculty recommending the awarding of the diploma.

Drop
Students are allowed to drop (cancel) courses without penalty during the first five days of the semester. Financial aid benefits may also be curtailed because a course is dropped. A drop is not recorded on the student’s transcript and there is a refund for the course.

Electives
Courses students select from an academic area. The number of electives varies according to programs. Electives may be suggested by program advisors.

Extracurricular
Activities, clubs, or organizations students join and participate in above and beyond academic courses.

Faculty
Instructors employed by the College who meet the standards and requirements for employment.

Fees
Money charged by a college (in addition to tuition) for services or equipment provided to a student. Fees may be charged for health services, athletic centers, registration, parking, lab equipment, computers, etc.

Final Exams
Exams held during examination week at the end of each semester. Instructors may also schedule periodic exams or mid-term exams throughout the semester.

Financial Aid
Federal, state, college, and private programs help students pay for college costs. Financial aid can be in the form of grants, loans, or college work-study programs. Grants are often described as “free money” and are awarded to students by the state and federal governments based on criteria that must be met.

Full-time Student
Students are considered full-time if enrolled for a minimum of 12 credits per semester.

General Education
Courses that are outside a field of study that may be part of the Minnesota Transfer Curriculum. Students must complete 25% of semester credits in general education to satisfy the requirements for the Associate of Applied Science Degree.

General Studies
Semester credits (6-9) outside a field of study offered at a technical college to meet the requirements for the Diploma of Occupational Proficiency. General Studies courses do not fulfill the Minnesota Transfer Curriculum.

GPA Values
Values given to letter grades so that grade point averages may be computed. The following values are used at St. Cloud Technical College: “A”, 4.0; “B”, 3.0; “C”, 2.0; “D”, 1.0; and “F”, 0.0.

Grade Point Average (GPA)
An arithmetic mean of grade points earned ranging from 0.0 to 4.0.
**Hour**
A unit of time measurement defined as 50 minutes that designates the time spent in classroom or laboratory for a course.

**Incomplete Grade**
A grade given when student performance dictates success in the course, but all course requirements are not completed. Needs faculty approval. An incomplete grade is changed to “F” when the assignments are not completed within the specified time.

**Internship**
Class credit given to students who work at jobs on or off campus. The jobs give them practical experience in their major. Internships may or may not be paid.

**Lecture**
A common method of instruction in college courses, when a faculty member conveys information by speaking to a class.

**Letter Grades**
A grade such as “A”, “B”, “C” that designates the quality of work. Letter grades have the following meanings: “A”, superior; “B” very good; “C”, average; “D”, passing; “F”, failing; “P”, pass, but no grade points; “AU”, audit for no credit (NC) or grade.

**MnSCU**
The Minnesota State Colleges and Universities system comprises 32 colleges and universities, including 25 two-year colleges and seven state universities. The system is separate from the University of Minnesota.

**Matriculate**
To apply for a degree program, to be accepted in that program, and to enroll in classes.

**Official Transcript**
An official transcript is the only document receiving institutions will accept to determine transfer of courses. The transcript must be sent directly from one institution to another or may be in a sealed envelope. If the envelope is opened, the transcript becomes unofficial.

**Orientation**
A period of time or a series of events planned to help new students adjust satisfactorily to college life.

**Part-time Student**
A student enrolled for fewer than 12 credits per semester.

**Prerequisite**
A requirement of a specific course that must be completed before the course can be taken. Minimum requirements for enrolling in a course.

**President**
The chief administrative officer appointed by the Chancellor of the Minnesota State Colleges and Universities system to be responsible for the management and day-to-day operations of the college in accordance with policies set forth by the Board of Trustees and in compliance with Minnesota state law governing higher education.

**Probation**
Notice that a student is not making satisfactory academic progress. Without improvement probation is followed by suspension.

**Progress Report**
A report issued to students mid-semester to inform them of their academic standing and need for improvement.

**Registrar**
The registrar manages course schedules and is responsible for maintaining course registration software, the student database and academic records and transcripts.

**Registration**
Actual enrollment of a student into specific courses after student has been admitted to the college.

**Section**
A number given to each class offered in a single subject matter.

**Semester**
A system dividing the academic year into two parts of approximately 16 week segments.

**Student ID**
Card issued to identify a student. The student ID number is typically used for access to registration and student records.

**Supervised Occupational Experience (SOE)**
Work experience that students may or may not be paid for to perform work for an employer that is related to their field of study. Faculty supervise these experiences.

**Syllabus**
A course syllabus is a document that contains the elements of the corresponding course outline and standards for evaluation of student learning and will contain additional information which reflects the creative work of the faculty member. Each student enrolled in a course shall receive a course syllabus.

**Tech Prep**
A program designed to provide the competencies high school students need to move into technical programs that transfer to the technical college for advanced placement. Classes in
which material is learned in an active or applied manner, usually in high school.

**Technical Studies**
Technical courses that contain specialized program content necessary to become competent in a technical field.

**Term**
A period of study in a college that usually ends with the administration of final examinations. A term may be a semester or summer session.

**Textbook**
A book that summarizes information about the subject matter of a college course.

**Transcript**
A list of all the courses/credits a student has taken with the grades that the student earned in each course. A college or university will often require a high school transcript when a student applies for admission.

**Transfer Credit**
Course credit that is accepted from or by another college or university to meet program requirements.

**Tuition**
The amount charged per credit for college courses.

**Tutor**
A person who gives individual instruction to students, either in or outside the classroom.

**Withdrawal**
The procedure in which a student officially removes himself/herself from taking a class, or from an institution. Tuition may or may not be refunded, depending on the date of withdrawal or other extenuating factors. Students withdrawing from one or more courses must notify the college or university in writing and request that they be officially withdrawn. Refunds, if any, are based on the refund schedule set forth in the catalog.

**Withdrawal Grade (W)**
A grade given so that students may drop courses when they have good reasons for doing so. “W” grades do not lower grade point averages.
