St. Cloud Technical & Community College thrives in the heart of central Minnesota. As a comprehensive community and technical college we seek to prepare students for their career or advanced degrees, but when a student decides that they want to compete in athletics and become one of the Cyclones, we know that they’ve chosen something that will prepare them for life! As an NJCAA Division III institution, we cannot offer our students athletic scholarships, but what we do offer them is a truly unique experience that creates memories to last a lifetime.
ABOUT THIS GUIDE

We’re Cyclones, but we don’t change direction without good reason. The Cyclones Athletics Brand Guidelines are provided to ensure that St. Cloud Technical & Community College (SCTCC), as well as the vendors assisting the college in creating and preparing communications that bear the Cyclones brand, will consistently and appropriately use the iconography of our athletics teams.

Primary Logo

The primary logo was developed to boldly and uniquely personify the strength, energy and character of Cyclones Athletics. These examples represent acceptable uses of the primary logo. Use them well, and our opponents will know a storm is on the way.
Wordmark

Sometimes you can’t fit the full strength of Cyclones Athletics in one small area. The customized Cyclones wordmark can be used alone in situations where the primary logo will not work.

These examples represent acceptable uses of the mascot wordmark.
Primary Logo & Wordmark

Below are acceptable uses of our primary logo and wordmark combination.
Full Title & Wordmark

The following examples illustrate acceptable applications of the SCTCC wordmark when paired with a secondary, clarifying title that identifies the college.
Primary Logo, Full Title & Wordmark

When the forecast is for full-on Cyclones Athletics branding, look to these examples of primary logo, wordmark and a full title that identifies the college.
Primary Logo, Monogram & Wordmark

These executions illustrate situations when SCTCC is an acceptable substitute for St. Cloud Technical & Community College.
Sports Specific Signatures

When promoting or identifying programs in the Cyclones Athletics family, use the approved executions shown here.
Sports Specific Signatures / Cont’d

- SCTCC Cyclones Volleyball
- SCTCC Cyclones Basketball
- SCTCC Cyclones Baseball
- SCTCC Cyclones Softball
Other Signatures

The examples shown here represent unique, yet acceptable, signatures for special applications. The C, for example, is approved for use on the Cyclones baseball caps. The mascot wordmark with border is approved for embroidered items.

If your head is spinning over a special Cyclones Athletics signature application, contact the experts at marketing@sctcc.edu.
Clear Space

If you get too close to a cyclone, it can do some damage. Same thing goes for our brand. Make sure it has enough room to stand out from text, photos and other icons. Our clear space minimum is approximately the height of the O in CYCLONES. At least this amount of space must surround Cyclones marks in all applications.

(In the example shown below, this is about .375")
Primary Logo / 1-Color

For single-color executions of the primary logo, limit applications to the examples shown here.
Primary Logo / 2-Color

Refer to these examples for acceptable two-color applications of the primary logo.

NOTE
In instances where black is used in two-color, it is our preference that black is not used in the logo, and instead, the one-color version of the logo is used.
Primary Logo, Full Title & Wordmark / 1-Color

Limit single-color applications of the primary logo, full title and wordmark to examples shown here.
Primary Logo, Full Title & Wordmark / 1-Color Reverse

Refer to these examples for acceptable applications of the primary logo with full title and wordmark in a single-color reverse.
Colors

To build awareness of and enthusiasm for the Cyclones Athletics identity, colors must be used consistently.

The colors of Cyclones Athletics are Pantone 3305 C, Pantone Green and Pantone Cool Gray 3. These elements are critical for materials or communications that are produced in color.
