

Predictive, Preventive Maintenance

Train-the-Trainer

6 Hours of On-Site Training with Your Maintenance Team

Hands-on practices that save time and money:

- Are you replacing parts that could be repaired?
- Are parts wearing out due to unnecessary machine vibration or improper lubrication?
- Are proper planning and scheduling tools in place to avoid down-time?

Our instructor will work directly with your Maintenance staff by reviewing your current maintenance practices to identify opportunities to predict and prevent unnecessary maintenance expense. Optional tools such as **Thermal Imaging, IR Temperature Guns, and Vibration Analysis** may also be presented.

Customized 6-Hour Maintenance On-Site Review

**Choose the Maintenance topics/areas
for review with your Maintenance Team.**

On-site visit scheduled by request.
